Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (https://www.lego.com/en-us/service/buildinginstructions/42614) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder!

LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Building Instructions (Bag 1, Book 1):

Group 1 - Liann

Sub-build 1. Locate 1 pair of legs printed with light blue shorts and green shoes, 1 torso printed with a white and green shirt with a pink sweater over it, 1 tan head printed with dark red eyes, 1 black hair, 1 lime green round brick, and 1 white 1x1 faucet. Assemble your minifigure then place the faucet on top of the 1x1 round brick. Now attach the faucet to her hand!

Group 2 - Store

Step 1

Horizontally place a light blue 4x8 plate in front of you.

Step 2

Vertically place a yellow 1x8 brick with holes on the rightmost column so it overhangs 4 studs to the front.

Step 3

Place 2 magenta 2x2 tiles with a stud, 1 in front of the other, on top of the plate, to the left of the previous 1x8 brick. Then vertically place a lime green 2x4 plate to the left.

Step 4

Horizontally place the back right corner of a light blue 8x16 plate underneath the overhang.

Step 5

Vertically place a yellow 1x8 brick with holes in the back left corner of the 8x16 plate so it overhangs 4 studs to the back. Then horizontally place the leftmost column of a light blue 4x8 plate underneath it.

Step 6

Horizontally place a lime green 1x3 tile in the back left corner to the right of the 1x8 brick. Vertically place a lime green 1x3 tile on the back 3 rows to the right of the previous 1x3 tile so there is no overhang. Then horizontally place another 1 on the 2nd column from the left of the build in front of the 1x3 tile. Then horizontally place another 1 to the right of the front row of the previous 1x3 tile. They should form a square! Now place a white 2x2 tile with a circle in the middle of the tiles.

Step 7.1

Place a yellow 2x2 tile with 2 studs on the back 2 rows so it is centered horizontally and the studs face the back. There should be 2 free columns to the left in between this and the tiles. Now horizontally place a black 2x4 tile with a sticker in front so there is a 1 row gap in between and it is centered horizontally.

Step 7.2

Skip this step if you have already placed your sticker! Ask a helper to place sticker 10 on the black 2x4 tile. This sticker is a bunch of purple, light blue, orange, yellow, pink triangles that fill the entire tile! Make

sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Step 8

Place a lime green 1x1 round brick on the 2nd column from the left so it sits to the right of the front stud of the 1x8 brick with holes. Then repeat symmetrically to the right.

Step 9

Horizontally place a yellow 1x2 brick on the 2 leftmost columns in front of the previous 1x1 round brick and 1x8 brick with holes. Then repeat symmetrically to the right. Now horizontally place a yellow 2x6 brick to the left of the previous 1x1 round brick and 1x2 brick that are on the right.

Step 15

Place a light pink 1x1 round plate to the right of the rightmost 1x2 rounded plate from the previous step. Then place another 1 on the 2nd column from the right in front of the 2x2 tile with 2 studs. Now place a light pink 1x1 brick on top of each of them.

Step 16

Stack 3 pink 2x2 bricks together so there is no overhang, then place them on the 2 rightmost columns so the front left corner sits on the previous 1x1 brick.
