

## **10793 Spidey vs. Green Goblin**

Adapted by John Le and tested by Natalie Charbonneau

This Disney+ Spidey and His Amazing Friends toy vehicle set includes: a Spidey minifigure and his hover spinner with rotating propeller and lift-up cockpit; a Green Goblin minifigure and his glider with pumpkin projectiles; and a Ghost-Spider minifigure with her large, golden web element. There's also Spidey's robot friend Trace-E, sea accessories, and a cute crab. The set comes with a cockpit Starter Brick to help get building underway and intuitive instructions in the form of a colorful picture-story guide.

Marvel heroes and vehicle toy set – Includes Spidey, Green Goblin, and Ghost-Spider minifigures for action play, plus a large Starter Brick to make building quick and fun.

Movable toys for kids – The playset features Spidey's hover spinner with a rotating propeller and lift-up cockpit and Green Goblin's glider toy.

Spider-Man toys — Authentic elements from the TV show include Spidey's robot friend Trace-E, pumpkin projectiles, a golden web element, sea accessories, and a crab.

4+ vehicle set – This portable playset has 84 pieces and Green Goblin's glider measures over 1 in. (3 cm) high, 3 in. (8 cm) long and 5.5 in. (14 cm) wide.

The front of the box shows Spider-Man in his vehicle hovering over the water. He has to watch out though because Green Goblin is flying in hot shooting pumpkins at him! But Spider-Man has a friend to help him! Ghost Spider is behind Green Goblin trying to capture him with a net!

The back of the box shows all the accessories the set comes with. It comes with Spider-Man and his vehicle, Green Goblin and his vehicle, Ghost Spider and the dock, a crab, a fish, and a web.

The top of the box shows a full-size image of Spider-Man.

The build is 84 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Spider-Man and his vehicle.

Bag 2 includes the pieces for Green Goblin and his vehicle.

Bag 3 includes the pieces for Ghost-Spider and his dock.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast that fell off the

table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/10793>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, and 3, 3 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Spider-Man and Hovercraft

Group 1 - Pages 6-7.

Group 2 - Pages 8-9 and 1 light grey 1x2 tile printed with 2 speedometers, buttons, and a radio from Pages 10-11.

Group 3 - Rest of Pages 10-11.

Group 4 - Pages 12-25.

Group 5 - Pages 26-43.

Bag 2 - Green Goblin and Aircraft  
Group 6 - Pages 4-5.  
Group 7 - Pages 6-43.

Bag 3 - Ghost Spider and Dock  
Group 8 - Pages 4-7.  
Group 9 - Pages 8-27.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Spider-Man

6-7. Locate 1 short blue pair of legs, 1 red and blue torso printed with a gold spider on the chest, and 1 red head printed with a web and yellow eyes. Assemble your minifigure then put him away!

Group 2 - Spider-Man's Hovercraft

8-9. Locate 1 tall red 4x6 vehicle base. Vertically place it in front of you so the tall side is in the back.

You will have 1 extra light grey 1x2 tile printed with 2 speedometers, buttons, and a radio. Save these for later.

Group 3 - Spider-Man's Hovercraft

10-11. Locate 1 blue 1x2 brick with 2 side studs and 1 light grey 1x2 tile printed with a yellow joystick and buttons. Horizontally place the 1x2 brick in the center of the front row so the side studs face the front. Then horizontally place the 1x2 tile in the front right corner so the joystick is on the left and does not overhang. Now locate 1 light grey 1x2 tile printed with 2 speedometers, buttons, and a radio from group 1. Horizontally place it to the left so the speedometers are in the front left corner. Ask a sighted person to make sure it is oriented correctly!

Group 4 - Spider-Man's Hovercraft

12-13. Let's make a part! Locate 1 blue 1x4 plate, 1 blue 2x2 sloped curved tile, and 2 transparent 1x1 round tiles. Place the plate horizontally in front of you. Then place the 2x2 tile in the center so it slopes and overhangs to the front. Then place the 1x1 tiles to the left and right.

14-15. Now horizontally place your part upright on the front-facing side studs so it slopes down.

16-17. Let's make 2 parts! Locate 2 light grey 2x2 plates with 2 side studs and 2 red 4x4 angled sloped curved tiles. Place the plates in front of you so the side studs face the front. Then place the tiles on top of them so they slope back.

18-19. Now place your parts upright on the left and right-facing side studs of the build so the side studs of the parts face the front. They should align at the front and back.

20-21. Locate 2 blue 1x2 rounded plates and 2 white crowns with a bar. These aren't crowns but actually spider webs! Vertically place the rounded plates upright on the front-facing side studs. Then insert the bars of the spiderwebs upright into the top stud of the rounded plates.

22-23. Locate 1 light blue 2x4 plate and 1 black 1x2 plate with 2 clips. Horizontally place the 2x4 plate on the back 2 rows. Then horizontally place the 1x2 plate in the center of the front row of the 2x4 plate so it clips to the front.

24-25. Locate 1 red 1x2 plate with 2x4 side studs. Horizontally place it behind the 1x2 plate with clips so the side studs face the back.

#### Group 5 - Spider-Man's Hovercraft

26-27. Locate 2 blue 1x2 slope tiles and 1 blue 2x2 tile with a stud. Place the 2x2 tile on top of the 1x2 plate with clips and plate with side studs. Then vertically place the 1x2 tiles to the left and right so they slope outwards.

28-29. Locate 2 light blue 2x2 slope bricks and 1 black 2x2 tile with a pin. Rotate your build 180 degrees so the back is now facing the front. Place the bricks upright on the front-facing side studs so they slope outwards to the left and right. Then place the 2x2 tile with a pin upright on the front-facing side studs.

30-31. Locate 1 large gold wheel with 4 holes. Insert the middle hole of the wheel into the front-facing pin.

32-33. Locate 1 transparent light blue 2x5 windshield with a bar. Rotate your build 180 degrees so the wheel is in the back. Vertically attach the bar to 2 clips of the 1x2 plate and push the windshield all the way down.

34-35. Let's make a part! Locate 1 large light blue wheel with a lot of holes in the middle. Place it in front of you.

36-37. Locate 1 red 1x2 pin-1x1 axle. Insert the axle into the middle axle hole.

38-39. Locate 1 light blue dish with a hole in the middle. Place it into the 1x2 pin you previously placed so it curves down!

40-43. Now place your build on top of the pin using the back hole so it clicks in to complete the build!

#### Building Instructions (Bag 2, Book 2):

#### Group 6 - Green Goblin

4-5. Locate 1 short purple pair of legs, 1 purple and light green torso printed with a defined chest and abs, and a belt, 1 light green head printed with a mean-looking smile, 1 purple and light green hat, and 1 red spider. Assemble your minifigure then put the spider in his hand!

#### Group 7 - Green Goblin's Aircraft

6-7. Locate 1 dark grey 4x10 vehicle base with angled sides. Place it horizontally in front of you.

8-9. Locate 1 purple 2x2 plate. Place it on the 2x2 stud area that is on the right.

10-11. Locate 1 green 1x2 plate with a bar. Vertically place it to the right of the plate so the bar overhangs to the right.

12-13. Locate 1 purple 2x2 sloped curved tile. Place it on top of the 1x2 plate with a bar and 2x2 plate so it slopes to the right.

14-15. Locate 1 orange 1x2 grill tile. Vertically place it to the left of the 2x2 sloped curved tile.

16-17. Locate 2 black 1x2 plates with hinge connectors. Horizontally place them in the center of the front and back rows so the connectors face outwards.

18-19. Locate 2 light green 1x2 sloped curved tiles. Horizontally place them on top of the right studs of the previously placed 1x2 plates so they slope to the right.

20-21. Locate 2 light green 1x2 sloped curved tiles. Horizontally place them on top of the left studs of the previously placed 1x2 plates so they slope to the left.

22-23. Locate 1 light green 1x2 plate. Vertically place it on the leftmost column.

24-25. Locate 1 purple 3x4 sloped curved brick with angled sides and green eyes on each side. Place it on the leftmost side so the angled sides align with the vehicle base and slope to the left.

26-27. Let's make a part! Locate 1 black 3x6 angled plate and 1 dark grey 1x1 plate-1x1 hole. Horizontally place the plate in front of you so the angled side faces the back and the short end faces the right. Make sure you have the correct 3x6 plate! Then horizontally place the plate with a hole on the 2 rightmost columns so the hole is on the right and does not overhang.

28-29. Locate 1 light grey 1x2 plate with a hinge, 1 purple 2x2 sloped curved tile, and 1 light green 1x2 sloped curved tile. Horizontally place the 1x2 tile on the stud of the plate with a hole so it slopes to the left. Then vertically place the hinge plate on the back 2 studs of the leftmost column so the hinge faces the left. Then place the 2x2 tile on top so it slopes to the right and does not overhang.

30-31. Now take your part and vertically attach the hinge to the front-facing hinge connector.

32-33. Let's make another part! Locate 1 black 3x6 angled plate and 1 dark grey 1x1 plate-1x1 hole. Horizontally place the plate in front of you so the angled side faces the back and the short end faces the left. Then horizontally place the plate with a hole on the 2 leftmost columns so the hole is on the left and does not overhang.

34-35. Locate 1 light grey 1x2 plate with a hinge, 1 purple 2x2 sloped curved tile, and 1 light green 1x2 sloped curved tile. Horizontally place the 1x2 tile on the stud of the plate with a hole so it slopes to the right. Then vertically place the hinge plate on the back 2 studs of the rightmost column so the hinge faces the right. Then place the 2x2 tile on top so it slopes to the left and does not overhang.

36-37. Rotate your main build 180 degrees so the hinge connector is facing the front. Then vertically attach the hinge to the hinge connector.

38-43. Let's make a part! Locate 2 light grey bars with a stud at the end and 2 orange pumpkins. Place the pumpkins on the studs of the bars. Now rotate your build 90 degrees clockwise so the 3x4 angled sloped curved brick is facing the front. Now vertically insert the bars into the front holes that are at the ends of the wings. Make sure the pumpkins face the front! These are pumpkin shooters!

Building Instructions (Bag 3, Book 3):

#### Group 8 - Ghost Spider

4-5. Locate 1 purple pair of legs, 1 white and purple torso printed with wings and a gold spider on the chest, 1 white head printed with gold eyes, and 1 white hood. Assemble your minifigure.

6-7. Locate 1 large gold web with a bar and clips. Place the bar of the web into your minifigure's hand.

#### Group 9 - Dock

8-9. Locate 1 light blue 6x8 plate and 2 brown 1x4 log bricks. Place the plate horizontally in front of you. Then vertically place the bricks in the back left and back right corners so they don't overhang.

10-11. Locate 1 brown 4x8 plate. Horizontally place it on top of the log bricks.

12-13. Let's make a part! Locate 1 tall light grey 1x1 brick with 2 side studs and 1 white tube with a stud. This is a rescue float for when someone falls into the water! Attach the float to the lower stud so it rounded part is on top.

14-15. Locate 1 black bar with an anti-stud and 1 red flag. Place the bar on top of the tall brick. Then vertically place the flag on top so it faces the front.

16-17. Now place your part on the back right stud so the flag faces the right.

18-19. Locate 1 nougat 2x2 barrel and 1 yellow 2x2 box. Place the box on the back right corner of the build. Then place the barrel on the back 2 rows to the left of the tall 1x1 brick.

20-21. Locate 1 black 1x2 plate. Horizontally place it on the front left corner of the 4x8 plate so there is no overhang.

22-23. Locate 1 dark tan 1x2 plate with grooves hanging down. This is a ladder so you can get out of the water! Horizontally place it on top of the 1x2 plate so the grooves face the front.

24-26. Locate 1 red crab and 1 light blue fish. Place the fish inside of the barrel. Then place the crab on the 2nd row from the front and the 3rd column from the right so the claws face the front.

Thank you so much for building this set!
