

60386 Recycling Truck

Adapted by John Le and tested by Natalie Charbonneau

Kids grow up surrounded by amazing vehicles and machines, and with LEGO® City Great Vehicles building sets they get to explore them up close, with realistic models and fun characters that inspire open-ended imaginative play.

Toy Recycling Truck – Caring for the environment is fun with this LEGO City Recycling Truck (60386) playset, complete with a recycling center setting.

What's in the box? – Everything kids need to build the LEGO City Recycling Truck, plus a toy recycling center with 3 containers, 3 minifigures, and a cat figure.

Fun functions for children who love realistic role play – Kids can activate the tipping platform to empty the recycling containers into the truck and raise the truck's flatbed for offloading.

Dimensions – When built, the Recycling Truck measures over 3 in. (8 cm) high, 8 in. (21 cm) long and 2 in. (6 cm) wide.

The front of the box shows the white and teal recycling truck parked in a parking lot! Behind it are the recycling bins where a person is throwing a stick in. On top of the recycling bins is a cute white cat! In front of the truck, there are 2 workers, dressed up in bright yellow jackets, who are picking up debris and bringing it to the truck!

The back of the box shows the back of the truck's mechanism. It allows you to place a trash can on it and flip it upside down to dump the trash! There are 2 more pictures. 1 shows how the truck can lift up the dumpster and dump everything out! And the other picture shows how you can throw away your recyclables through the tops of the recycling bins and they are collected in the trash cans.

The top of the box shows the 3 minifigures together. 1 worker is sweeping the litter on the floor while another worker scoops it up with his shovel. And there is a civilian in the back waving at them for doing a good job!

The build is 261 pieces in total, 138 steps long, and is for ages 5+.

Bag 1 includes the pieces to make the minifigures and recycling bins, bag 2 includes the pieces to make the truck, and bag 3 includes the pieces to make the dumpster.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we may be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.

- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/PPP: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/60386>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, and 3, 3 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Minifigures and Recycling Bins.

Group 1 - Left minifigure on page 5.

Group 2 - Middle minifigure on page 5.

Group 3 - Right minifigure on page 5.

Group 4 - Steps 1 - 11.

Group 5 - Steps 12 - 24 and 1 bright green trash can from Step 25.

Group 6 - 1 blue trash can from Step 25.

Group 7 - 1 dark grey trash can from Step 25 and Step 26.

Bag 2 - Truck.

Group 8 - Steps 1 - 11.

Group 9 - Steps 12 - 23.

Group 10 - Steps 24 - 30.

Group 11 - Steps 31 - 32 and 2 dark grey 1x1 slope tiles from step 33.

Group 12 - 2 transparent 1x1 slope tiles from step 33 and steps 34 - 45.

Group 13 - Steps 46 - 57.

Bag 3 - Dumpster

Group 14 - Steps 1 - 9 and 3 red 1x6 tiles for steps 10 - 11.

Group 15 - 3 white 1x6 tiles for steps 10 - 11 and steps 12 - 22.

Group 16 - Steps 23 - 32.

Group 17 - Steps 33 - 37.

Group 18 - Steps 38 - 50.

Group 19 - Steps 51 - 55.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Minifigure 1

Locate 1 torso with a bright yellow construction vest, 1 brown pants, 1 man's yellow head, 1 blue cap, and 1 light grey shovel. Assemble your minifigure and put the shovel in his hand!

Group 2 - Minifigure 2

Locate 1 torso with a bright yellow construction vest, 1 brown pants, 1 woman's yellow head, 1 black hair, and 1 brown broom. Assemble your minifigure and put the broom in her hand!

Group 3 - Minifigure 3

Locate 1 dark blue torso, olive green pants, 1 yellow head, 1 brown hair, 1 white 1x2 tile that says ticket, and 1 white cat. Assemble your minifigure and put the ticket in her hand and the cat by her side!

Group 4 - Recycling Bins

1. Locate 1 light green 8x16 plate with 6 1x4 gaps on the sides and place it horizontally in front of you.

2. Locate 6 light green 1x4 tiles and fill all the gaps of the 8x16 plate.

3. Locate 1 light grey 2x2 tile and place it in the center of the 8x16 plate so there are 6 studs to the left of it and 3 studs in front of it.

4. Locate 2 more light grey 2x2 tiles and 2 dark grey 1x2 plates. Vertically place each of the plates to the left and right of the tile in the center. Then to the left and right of these plates, place each of the 2x2 tiles.

5. Locate 2 more dark grey 1x2 plates and vertically place them to the left and right of the previously placed 2x2 tiles.
6. Locate 1 light grey 1x10 plate. Horizontally place it in front of the previously placed tiles and plates so the left and right sides line up.
7. Locate 1 light green tree and place it in the back right corner.
8. Locate 1 dark tan 1x2 brick with grooves and 1 dark tan 1x1 brick. Place the 1x1 brick on the back stud of the 1x2 plate that is farthest to the right. Then in front of this, vertically place your 1x2 brick so the side with 1 groove faces left.
9. Locate 1 dark tan 1x2 brick with grooves and 1 dark tan 1x1 brick. Vertically place the 1x2 brick on top of the 1x1 brick and 1x2 brick so the side with 1 groove faces left. Then in front of this, place your 1x1 brick.
10. Locate 2 dark grey tall 1x2 bricks. Rotate your build 180 degrees so the tree is now in the front left. To the right of the bricks you just placed vertically place each of your tall 1x2 bricks on the 1x2 plates. There should be 1 more 1x2 plate to the right of the tall bricks you just placed.
11. Locate 1 light grey 1x10 plate. Horizontally place it in front of the bricks you just placed so the left side lines up with the bricks and the right-side lines up with the 1x2 plate.

Group 5 - Recycling Bins

12. Locate 1 bright green door that has a single stud and door handle. Horizontally place it on the leftmost side of the 1x10 plate you just placed so it is upright and the door opens towards you.
13. Locate 1 dark tan 1x4 plate. Vertically place it on top of the door and bricks so there is no overhang.
14. Locate 1 dark tan 1x2 brick with grooves and 1 dark tan 1x1 brick. To the right of the tall 1x2 bricks, there is a vertical set of 1x4 studs. Vertically place your 1x2 brick on the front two studs, so that the side with 1 groove faces left. Then behind this brick, place your 1x1 brick.
15. Locate 1 dark tan 1x2 brick with grooves and 1 dark tan 1x1 brick. place a 1x1 brick on top of the 1x2 brick you just placed, so it sits in the front. Then vertically place your 1x2 brick behind this brick so the side with 1 groove faces left.
16. Locate 2 bright green doors with a single stud and door handle. In front of each of the tall 1x2 bricks, horizontally place your doors so the part with the stud sits in front of the tall bricks and so the doors open towards you.
- 17.1. Rotate your build 180 degrees so the tree is now in the back right corner. Locate 1 bright green door with a single stud, door handle, and a sticker.
- 17.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 7 on the bright green door. This sticker has a light green background with a picture of a recycling sign. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

17.3. Horizontally place the door so the stud part sits in front of the tall 1x2 brick that is on the right. Make sure the door opens towards you.

18. Locate 1 dark tan 1x4 plate. Vertically place it above the tall 1x2 brick and doors that you just placed so there is no overhang.

19.1. Locate 1 bright green door with a single stud, door handle, and a sticker.

19.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 6 on the bright green door. This sticker has a light green background with a picture of a recycling sign. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

19.3. Horizontally place the door so it sits to the left of the previous door you just placed.

20.1. Locate 1 bright green door with a single stud, door handle, and a sticker.

20.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 5 on the bright green door. This sticker has a light green background with a picture of a recycling sign. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

20.3. Horizontally place the door so it sits to the left of the previous door you just placed.

21. Locate 2 dark tan 1x4 plates. Vertically place them so they sit above the bricks and doors you just previously placed.

22. Locate 2 light grey 1x10 plates. Horizontally place them on top of the 1x4 plates in the front and back so they sit above the doors.

23. Locate 4 light grey 1x2 slope tiles. In between the 1x10 plates you just placed there are 4 sets of 1x2 studs. Vertically place 2 on the left 2 sets of studs so they face up towards the left. Then vertically place the other 2 to the right so they face up towards the right.

24. Locate 4 light grey 1x4 curved tiles. Vertically place them above each of the slope tiles you just placed.

25.1. Locate 1 bright green trash can with 2 handles. Open the door on the left and insert your trash can.

Group 6 - Recycling Bins

25.2. Locate 1 blue trash can with 2 handles. Open the door in the middle and insert your trash can.

Group 7 - Recycling Bins

25.3. Locate 1 dark grey trash can with 2 handles. Open the door on the right and insert your trash can.

26. Locate 1 brown branch, 1 light green plant stem, 2 transparent 1x1 slope tiles, and 1 white 1x2 tile that looks like mail. Put the branch and plant stem inside the left trash can. Put the 1x2 tile in the middle trash can and the 2 transparent slope tiles that are glass into the right trash can.

Building Instructions (Bag 2, Book 2):

Group 8 - Truck

1. Locate 1 dark grey 2x4 brick with a gap in the middle and axle holes on both ends. Vertically set this down in front of you.
2. Locate 2 black 1x16 bricks. Horizontally place 1 in front of the other in the gap so the left side of the bricks line up with the 2x4 brick.
3. Locate 1 blue 2x5 plate that has a 2x2 low side and a 2x3 raised side. Horizontally place it to the left of the previously placed bricks so the raised side sits on top of the 1x16 bricks.
4. Locate 2 light grey round 2x2 plates with a smooth bottom. Flip your build over keeping the same orientation. Place 1 of the 2x2 plates on the rightmost column of the 1x16 bricks so there is no overhang. Then place the other 1 on the left side leaving the leftmost column open.
5. Locate 1 dark grey 2x4 brick with a gap in the middle and axle holes on both ends. Turn it upside down and vertically insert the gap to the left of the round 2x2 plate that is on the right.
6. Flip your build over again so that it's oriented the same way. Locate 2 dark grey 1x8 tiles and 1 dark tan 2x4 plate. Horizontally place 1 tile in front of the other to the right of the blue 2x5 plate that has a lower side and a raised side. Then to the right of these tiles, horizontally place your 2x4 plate.
7. Locate 4 tan 1x2 pins with an axle. Insert the axle part into the axle holes located in the front left and front right. Then repeat for the backside.
8. Locate 1 black 3x4 tile with a 1x4 stud area. Vertically place this to the right of the dark tan 2x4 plate you placed in step 6 so it is centered and overhangs in the front, back, and right.
9. Locate 2 white 2x4 bricks with arches. Horizontally place 1 on the 2 studs that are above the front left axle pin so it is centered and the arch is facing you. Repeat for the back left but make sure the arch is facing the back now.
10. Locate 1 blue 1x4 plate. Vertically place it in between the arch bricks on the left side so it sits in the middle of the blue 2x5 plate that has a raised and lower side.
11. Locate 1 light grey 2x14 plate. Horizontally place it to the right of the blue 1x4 plate you just placed.

Group 9 - Truck

12. Put your build aside for now. Locate 2 light grey 2x4 plates with a 2x2 stud area and a top hole, 2 black 1x2 pins, and 2 black 2x4 plates with a 2x2 stud area and a bottom hole. Horizontally place 1 light grey 2x4 plate with the top hole in front of you so the hole is in the back right corner. Then take 1 pin and insert it through the hole from the front. Then insert the hole of the black 2x4 plate into the pin so it sits directly above the light grey one when flat. Repeat to make another identical build. Now bring back your main build oriented the same way. Horizontally place these builds one in front of the other so they sit to the right of the 2x14 plate and above the 3x4 plate. Make sure to connect the grey plates and not the black plates.

13. Locate 2 black 1x2 grill tiles. Horizontally place them on top of the 2x4 grey plates with a hole you just placed so they sit on the front and back studs.

14. Locate 1 dark grey 2x6 tile. Horizontally place this in between the grill tiles you just placed so the right side lines up with the right side of the grill tiles.

15. Locate 2 dark grey 2x2 bricks with arches. Horizontally place them above the pins located in the front right and back right. Make sure the arches are facing outwards. Now turn the 2 black 2x4 plates with holes to the left so they are touching the tiles.

16. Locate 1 dark grey 2x6 tile. Vertically place it on top of the 2x2 bricks with the arches you previously placed.

17. Locate 4 yellow 1x2 plates with a 2x4 side stud area. Horizontally place 1 in the front to the left of the 2x6 tile you previously placed so that it sits next to a 2x2 tile. Then to the left of this yellow plate, horizontally place another one so there is a 1x2 gap between the 2 plates. The side studs should make a 2x8 stud area now. Repeat for the backside.

18. Locate 1 white 2x2 plate. To the left of the 2 yellow 1x2 plates with a 2x4 side stud area located on the left side, place your 2x2 plate.

19. Locate 1 light grey 2x2 tile with 2 studs and 1 teal 2x2 tile with 1 stud. Place the tile with 2 studs directly on top of the 2x2 plate you previously placed so the 2 studs are on the left. Then to the right of this plate, place your teal 2x2 tile.

20. Put your build aside for now. Locate 2 dark grey 2x8 bricks and place them horizontally in front of you.

21. Locate 2 dark grey 2x6 tiles. Horizontally place 1 on each of the bricks so the bricks' leftmost two columns of studs are free.

22. Locate 4 black 1x2 grill tiles. Horizontally place 1 behind the other to fill that 2x2 stud area. Repeat to get 2 identical builds.

23. Bring back your build so that it is oriented the same way. Ensure that there is a 2x2 stud area on the left side that is lower than the rest of the build. Now horizontally attach 1 of your sub-builds to the front-facing 2x8 studs. Then repeat for the back-facing 2x8 studs with the other sub-build.

Group 10 - Truck

24. Locate 1 white 2x6 plate with a raised 1x4 area and 4 side studs. Centered vertically, place this on the 2x2 stud area on the left side of the build so the side studs are facing left.

25. Locate 1 transparent 1x2 brick. Vertically place it to the right of the raised 1x4 area of the plate you just placed so it is centered.

26. Locate 2 yellow 1x4 tiles with a stud on each end. Horizontally place these 1 behind the other, above your transparent 1x2 plate so the left side of the tiles line up with the left side of the brick.

27. Locate 1 dark tan 2x4 plate. Vertically place it on top of the 2 yellow 1x4 tiles you just placed so that the plate sits on the right half of the tiles. This plate should line up with the 1x2 stud area of the arches in the front and back.

28. Locate 2 light grey 1x2 plates with grooves. Horizontally place 1 in the front left and back left of the build. Make sure the groove part is facing outwards.

29. Locate 1 tan 1x4 brick with side studs. Centered vertically, place this on the left end of the build so it sits in between the plates with grooves and the side studs face left.

30. Locate 2 transparent 1x2 bricks. Horizontally place 1 in the front left and back left of the build so they sit on top of the 1x2 plates with grooves.

Group 11 - Truck

31. Put your build aside for now while we make the front of the truck! Locate 1 white 2x6 plate with a raised 1x4 stud area and 4 side studs. Place it horizontally in front of you so the side studs are facing back.

32. Locate 1 blue 1x4 plate. Horizontally place it in the front on top of the 2x6 plate so it is centered.

33.1. Locate 2 dark grey 1x1 slope tiles. Place them in the front left and front right so the slopes go down outwards.

Group 12 - Truck

33.2. Locate 2 transparent 1x1 slope tiles. Place them in the back left and back right so the slopes go down outwards.

34.1. Locate 1 dark grey 1x4 tile with a sticker and 2 black 1x2 grill tiles.

34.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 4 in the middle of the dark grey 1x4 tile. This sticker shows a white license plate surrounded by a black outline. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

34.3. Horizontally place the 1x4 tile in the front. Then horizontally place both grill tiles right behind this tile.

35. Bring back your main build. Orient your main build so that there is a 2x4 side stud area facing the front. Now centered horizontally, attach your sub-build onto this 2x4 stud area making sure the left and right side lines up and there is no overhang. Make sure the grill tiles are above the license plate. Now rotate your build 90 degrees clockwise so that this license plate is facing left.

36. Locate 2 white 2x4 plates. Horizontally place them on the front left and back left of the build. There should only be a little overhang over the slope tiles.

37. Locate 1 white 2x2 plate. Place this on the left 2 columns in between the 2 white 2x4 plates you previously placed.

38. Locate 1 yellow 1x2 tile with a bar. Centered vertically with the bar on the right side, place this in the 5th column. To the right of this piece, there should only be a 2x2 stud area.

39. Locate 1 black steering wheel. Centered vertically with the steering wheel facing the right, place this in the 2nd column.

40. Locate 1 light grey 2x2 engine exhaust. There is a large side and a short side to this piece. Place this to the right of the yellow bar you placed in step 38 so that the short side is facing right.

41. Locate 2 light grey bricks with 2 holes. Horizontally place 1 in front of the yellow bar and exhaust and 1 behind them.

42. Locate 2 tall black 1x2 slope bricks. Place 1 on each of the bricks with the 2 holes you previously placed so that the slope goes down towards the right.

43. Locate 1 transparent 1x6 windshield. Vertically place it in the leftmost column so that the window side is facing left.

44. Locate 2 tall transparent 1x2 panels. Horizontally place them in the front and back to the right of the windshield. Make sure the wall side is facing out.

45.1. Locate 2 tall white 1x2 bricks with a sticker.

45.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 1 on the side of the tall 1x2 bricks. These stickers show a green and blue recycling sign. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

45.3. Place them in the front and back to the right of the panels you previously placed. Make sure the sticker side is facing outwards.

Group 13 - Truck

46. Locate 1 white 1x6 tile and 2 white 1x4 tiles with 2 studs. Horizontally place 1 white 1x4 tile in the front left corner on top of the transparent pieces and white brick. Then repeat for the back left corner. To the right of these tiles, vertically place your 1x6 tile so that it is centered.

47. Locate 1 long light grey bar with a larger part in the middle and a pin. This is the truck's exhaust! To the right of the brick with a sticker, there is a hole. Insert the pin in the hole and rotate the bar so it is parallel to the surface.

48. Put your build aside for now. Locate 1 dark tan 2x4 plate and place it in front of you horizontally.

49. Locate 2 black 1x2 plates with clips. Horizontally place them in the back row so that the clips face left and right.

50. Locate 1 white 4x6 curved tile with 4 studs. Horizontally place this in the front row so that the 4 studs sit on top of the 4 studs of the 2x4 plate.

51. Locate 1 white 2x2 tile. Place it in the center of the 2x4 stud area so there is no overhang.
52. Locate 2 transparent orange bulbs with a bar. Attach the bars to each of the clips and make sure the bulb is on top.
53. Locate 1 black 1x1 sphere tile with a stick coming out of it. Place this to the right of the bulb that is on the left. Make sure the stick is pointed up.
54. Locate 1 white 1x4 tile with 2 studs. Centered horizontally, place this underneath the white 4x6 curved tile in the front row.
55. Bring back your build so it is vertical and the windshield is facing you. Take your sub-build and place it in the front on top of the windshield. The white 1x4 tile you just placed on the underside of the curved tile should sit on top of the front row of the windshield.
56. Locate 4 black tires and 4 black wheels. Insert the wheels into each of the tires. Now rotate your build so the windshield is facing left. Insert your wheels into the pins that are in the front left and front right of the build. Make sure the side of the wheel that has a deep groove is facing you. Repeat at the back.

Building Instructions (Bag 3, Book 3):

Group 14 - Dumpster

1. Locate 1 light grey 6x14 plate. Place it horizontally in front of you.
2. Locate 1 dark grey 1x4 tile. Centered vertically, place it in the rightmost column.
3. Locate 2 tall teal 1x2 bricks. Horizontally place them in the front right corner and back right corner.
4. Locate 2 teal 1x8 plates. Horizontally place 1 to the left of each of the teal bricks you previously placed.
5. Locate 2 transparent 1x1 tiles. Place 1 to the left of each of the teal 1x2 bricks you placed.
6. Locate 2 tall light grey 2x2 bricks. Place 1 in front of the other in between the 2 teal bricks and 2 transparent tiles.
7. Locate 2 tall teal 1x2 bricks. Horizontally place them in the front right corner and back right corner on top of the tall teal bricks.
8. Locate 2 black 1x2 bricks with ridges. Vertically place them 1 behind the other on top of the tall 2x2 bricks so they sit in between the tall teal 1x2 bricks. Make sure that the side with ridges going across is facing left.
9. Locate 1 red 1x2 tile with a wall. Centered vertically, place it to the left of the bricks with the ridges you previously placed. Make sure the side with the wall is facing the left.
- 10-11.1. Locate 3 red 1x6 tiles. To the left of the red 1x2 tile with a wall you just placed, vertically place 1 red 1x6 tile so that it is centered. Then to the left, skip a column and place another. Repeat this once more.

Group 15 - Dumpster

- 10-11.2. Locate 3 white 1x6 tiles. Fill in the gaps you made in the previous steps using these tiles.
12. Locate 2 red 1x1 tiles. To the left of the white 1x6 tile that is on the left, place 1 in the front and 1 in the back so they sit on top of the 1x8 plates.
13. Locate 2 yellow 1x2 bricks with 2 sets of 2 side studs. Horizontally place them in front of and behind the red 1x2 tile with a wall you placed in step 9. Make sure they are overhanging to the left.
14. Locate 1 black 1x4 window frame. Vertically place it in between the 2 red 1x1 tiles.
15. Locate 1 yellow 1x4 tile. Vertically place it directly to the left of the 1x4 window you just placed.
16. Locate 1 black 4x4 tile with a 1x4 stud area. Place this to the left of the tile you just placed making sure the 1x4 stud area is facing the left and is also overhang.
17. Locate 2 tall teal 1x2 bricks. To the left of each of the 1x1 red tiles that are in front of and behind the window frame, horizontally place your tall 1x2 bricks.
18. Locate 2 tall teal 1x2 slope bricks. Place these to the left of each of the tall 1x2 bricks you just previously placed. Make sure the slopes are going down towards the left.
19. Locate 2 dark grey 1x1 bricks with clips. On top of each of the tall teal 1x2 bricks you placed in step 17, place these in the right stud spot. The clip in the front should be facing you, and the one in the back should be facing back.
20. Locate 1 teal 1x6 arch brick. Vertically place this so it sits on top of both dark grey 1x1 bricks with clips you just placed.
21. Locate 2 tall teal 1x2 slope bricks. Horizontally place these to the left of the arch you just placed in the front and back row so the slope goes down towards the left. The slope should line up with the slope below.
22. Locate 1 teal 6x12 plate. Horizontally place this above your slope bricks you just placed so the left column of the plate lines up with the slope bricks you placed in the last step. Make sure to click in the right side and make the connection secure!

Group 16 - Dumpster

23. Put your build aside for now. Locate 1 black 4x8 plate and 1 teal 2x4 curve tile. Put the plate horizontally in front of you. Then in the back right corner, horizontally place your 2x4 curve tile so the curve goes down towards the back.
24. Locate 3 more teal 2x4 curve tiles. Horizontally place 1 to the left of the curve tile so the curve goes down towards the back. Now horizontally place the rest in front of the curve tiles so the curves go down towards you.

25. Bring back your build oriented the same way. Make sure the slope side is facing the left. Horizontally insert your 4x8 plate with curved tiles into the front-facing 4x8 gap so it clicks on to the 2 studs in the top right.

26-27. Put your build aside for now while we make another 4x8 plate with curved tiles. Repeat steps 23-24 to make this sub-build again.

28. Bring back your build and orient it so the slope side is facing the right. Then horizontally insert your 4x8 plate with curved tiles into the front-facing 4x8 gap so it clicks on to the 2 studs in the top left.

29. Locate 1 dark grey 4x4 plate with 2 clips. Centered horizontally, place this on top of the 6x12 plate on the right side so the clips overhang to the right.

30. Locate 2 dark grey 1x2 curve tiles. Horizontally place these on the front left and back left stud of the 4x4 plate you just placed so the bottom of the curve overhangs to the left and clips onto the 6x12 plate.

31. Locate 2 dark grey 1x2 tiles and 2 black 1x1 plates with clips. To the right of each of the curve tiles you just placed, horizontally place your 1x2 tiles. Then to the right of these 1x2 tiles, place your 1x1 plate so that the clip in the front is facing you and the clip in the back is facing back.

32. Locate 2 transparent orange bulbs with a bar. Insert the bar part of this piece into the clips of the 1x1 plates you just placed. Make sure the bulb part is facing up.

Group 17 - Dumpster

33. Put your build aside for now while we build the door for the garbage. Locate 1 light grey 6x8 plate with a 4x6 gap in the middle. This plate also has 2 clips in the center gap. Place it horizontally in front of you so the side with clips is on the right.

34. Locate 3 dark grey 1x2 plates with bars. Vertically place them 1 in front of the other in the rightmost column so the bars are facing right.

35. Locate 2 white 1x4 tiles with 2 studs. Horizontally place them to the left of the 1x2 plate with bars in the front row and back row.

36. Locate 1 dark grey 1x2 plate with 2 side studs. Horizontally place it to the left of the back white tile with 2 studs so that the side studs are facing back.

37. Locate 1 white 1x6 tile and 1 white 1x2 plate. Vertically place your 1x6 tile in the leftmost column so that there is no overhang. Then to the right of this, in the front row, horizontally place your 1x2 plate.

Group 18 - Dumpster

38. Locate 1 white 6x8 plate with a 4x6 gap in the middle. This plate also has 2 clips in the center gap. Horizontally set it on top of your build so that the side with clips sits on top of the clips of the plate below. Make sure there is no overhang with this plate.

39. Locate 1 white 1x4 tile with 2 studs. Horizontally place it in the back left corner.

40. Locate 1 white 1x2 slope brick and 1 white 1x6 slope brick with 3 holes. Horizontally place your 1x2 slope brick in the back left corner so the slope goes down towards the left. Then to the right of this, horizontally place your 1x6 slope brick so the slope goes down towards the right.

41.1. Locate 1 white 1x3 tile with a sticker.

41.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 2 on the white 1x3 tile. This sticker has white and red stripes. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

41.3. Horizontally place this in the back row on top of the exposed 1x3 studs.

42. Locate 2 black 1x2 slope tiles and 1 white 1x4 tile with 2 studs. Vertically place the slope tiles 1 in front of the other in the left column so that the slopes go down towards the right. Then vertically place your 1x4 tile with 2 studs in the right column. This tile should be centered and the first row should be open.

43. Locate 2 transparent red 1x1 slope tiles. Place them on the 1x4 tile with 2 studs you previously placed so that the slopes go down towards the right.

44. Put your sub-build aside for now. Locate 1 dark grey 2x4 brick with a gap in the middle and axle holes on both ends. Set it down vertically in front of you.

45. Locate 1 tan 1x2 axle with a pin. Insert the axle end into the axle hole in the back of the 2x4 brick so that the pin faces back.

46. Locate 1 black 2x5 plate that has a short 2x2 side and a raised 2x3 side. Attach the 2x2 gap of the 2x4 dark grey brick to the bottom of the 2x3 raised side so that the short side faces the left.

47. Locate 1 light grey 2x2 tile with 1 stud. Place this on the short side of the 2x5 plate you previously placed in the last step.

48. Bring back your sub-build and orient it so the 3 holes are in the back. Now flip over your current build so the bottom of the black 2x5 plate with a short side and a tall side is now facing up. Also make sure the pin in your current build is facing the back. Now insert that pin into the front of the left hole. Now turn the black 2x5 plate with a short side and a tall side to the left so it sits on the black 1x2 slope tiles on the left side.

49. Locate 1 white 1x4 tile with 2 studs. Horizontally place it in the front left corner of the build so there is no overhang.

50. Locate 1 white 1x2 slope brick and 1 white 1x6 slope brick with 3 holes. Horizontally place the 1x2 slope brick in the front left corner so the slope goes down towards the left. Then to the right of this, horizontally place your 1x6 slope brick so the slope goes down towards the right.

Group 19 - Dumpster

51.1. Locate 1 white 1x3 tile with a sticker.

51.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 3 on the white 1x3 tile. This sticker has white and red stripes. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a helper to check!

51.3. Horizontally place your tile on top of the slope bricks you previously placed so it covers all 3 studs.

52. Locate 1 tan axle with a circular side. Push the axle side into the front left pinhole so it goes in all the way.

53. Locate 1 black steering wheel. Attach the bottom of this onto that circular side of the axle you placed in the previous step.

54. Locate 2 black 1x1 half-spheres with a stick sticking out. Rotate your build 180 degrees so the back is now facing you. In the front right, there are 2 front-facing studs. Attach these 2 half-spheres to it and turn them so the sticks are facing straight up.

55. Now bring back your main build and orient it so the slope side is facing right. On the left-facing side of your sub-build, there are 3 handlebars. Attach these to the clips that are above the slopes on the right side of the main build. Make sure nothing is sticking out in the front or back and you completed the dumpster!

56. Now bring back your truck and orient it so the front of the truck is facing left. Now attach the dumpster to the right of the truck so the front and back sides line up with the truck.

Congratulations you finished the recycling truck!

At the end of the instruction booklets are advertisements for the following 5 LEGO CITY Theme kits:

60382 - Vet Van Rescue

60371 - Emergency Vehicles

60388 - Gaming Tournament Truck

60386 - Recycling Truck

60390 - Park Tractor

Thank you so much for building this set!
