

76963 Baby Dinosaur Rescue Center

Adapted by John Le and tested by Natalie Charbonneau

Young fans aged 4+ can care for and play with dinosaur babies while learning to build with this LEGO® Jurassic World Baby Dinosaur Rescue Center (76963) set. It includes an off-road vehicle and research area with a cave wall, both with Starter Brick elements, plus a feeding station. 2 minifigures, baby Ankylosaurus, Triceratops, and Velociraptor figures, and small Velociraptor and adult Pteranodon kids' dinosaur toy figures get play started fast.

Dinosaur research center – The 5 dinosaur toy figures include a baby Ankylosaurus, Triceratops and Velociraptor, a small Velociraptor and an adult Pteranodon, plus Darius and Sammy minifigures.

Packed with features – Includes a brick-built, 4-wheel-drive off-road vehicle, a feeding area with a shed wall, a research area with solar panels, a cave wall, and a computer workstation.

Build and play – This 139-piece set includes a research area that measures over 4.5 in. (12 cm) high, 4 in. (10 cm) wide and 4.5 in. (12 cm) deep.

The front of the box shows a feeding area and a dinosaur rescue centre in the back equipped with a solar panel, computer, magnifying glass, and egg incubation! In the front, Darius and Sammy are feeding carrots, bananas, milk, and apples from their truck to the dinosaurs! There are so many! There are baby triceratops, an ankylosaurus, 2 velociraptors, and a pteranodon flying overhead!

The back of the box shows all the accessories the set comes with. This set comes with a truck, feeding area, dinosaur rescue centre, 2 minifigures, 5 dinosaurs, a baby bottle, an egg, a magnifying glass, 1 fossil, 4 carrots, 1 fish, 1 apple, and 2 bananas!

The top of the box shows a 1 to 1 scale of a minifigure!

The build is 139 pieces in total and is for ages 4+.

Bag 1 includes the pieces for the dinosaurs and the feeding area.

Bag 2 includes the pieces for the rescue center.

Bag 3 includes the pieces for the truck and a minifigure.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.

- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/PPP: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/76963>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bags labeled 1 and 2, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Pteranodon, Triceratops, Ankylosaurus, and Feeding Area

Group 1 - Pages 6-9.

Group 2 - Pages 10-15.

Group 3 - Pages 16-46.

Bag 2 - Derkus, Velociraptor, and Dinosaur Rescue Centre

Group 4 - Pages 4-5.

Group 5 - Pages 6-19.

Group 6 - Pages 20-41.

Bag 3 - Sammy, velociraptor and Truck

Group 7 - Pages 4-7.

Group 8 - Pages 8-37.

Group 9 - Pages 38-57.

Group 10 - Pages 58-63.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Ankylosaurus and Triceratops

6-7. Locate 1 light brown and tan Ankylosaurus, 1 light green stem, and 1 orange carrot. Insert the stem into the top of the carrot. Put the carrot beside the ankylosaurus so it can eat it! Now put these away while we build a triceratops!

8-9. Locate 1 tan and dark grey triceratops, 1 dark grey 1x2 brick, and 1 dark grey 1x2 tile with a stud. Place the 1x2 tile on top of the brick. Then place them on top of the triceratops in the gap so there is no overhang. Put this away so we can build a pteranodon!

Group 2 - Pteranodon

10-11. Locate 1 dark blue and light blue body with clips on the sides and back, 1 dark blue lower lip, and 1 dark blue and light blue face with yellow eyes. Horizontally place the body in front of you so the clips on the back end face the left. Then horizontally insert the bar part of the lower lip into the hole underneath the right side of the body. Then horizontally attach the face on top of the body above the lower lip.

12-13. Locate 2 light blue and dark blue wings. Vertically place them on the front and back clips so the side of the wings with fingers faces the right.

14-15. Locate 1 yellowish-green fish. Vertically place the fish on the front clip that is on the left side so the face of the fish faces you.

Group 3 - Feeding Area

16-17. Locate 1 green 8x8 plate with a rounded side. Place it in front of you so the rounded side faces the front.

18-19. Locate 1 light grey 2x2 tile with a pin facing up and 1 brown 1x2 round pin connector. Place the tile in the back left corner. Then place the pin connector onto the pin.

20-21. Locate 1 tall red 1x6 panel with grooves. Horizontally place it on the back row to the right of the tile so the wall faces the back.

22-23. Locate 2 tall red 1x1 bricks. Place them in front of the leftmost and rightmost studs of the panel.

24-25. Locate 1 red 2x6 plate. Horizontally place it on top of the previously placed bricks and panel.

26-27. Locate 1 nougat 2x2 round barrel and 1 brown 2x2 square container. Place the square container in between the 2 tall bricks on the left. Then place the round barrel to the right.

28-29. Locate 1 light green 1x1 round brick with 3 leaves. Place it on the 2nd column from the left in front of the 2x2 tile with a pin so the middle leaf faces the front left corner.

30-31. Locate 1 short yellow 2x2 square box. Place it in front of the barrel and container so it sits in the middle.

32-35. Locate 2 orange carrots and 2 light green stems. Insert the stems into the carrots! Now place the carrots in the brown 2x2 square container.

36-37. Locate 1 red apple and 2 yellow bananas. Place the bananas into the round barrel and the apple into the short yellow box!

38-39. Locate 3 dark grey 1x2 tiles with a bar. Horizontally place them on the front row of the 2x6 plate so the bars are to the front.

40-41. Locate 1 long brown thick curved bar with a pin and 1 long brown thick curved bar with a bar. Insert the bar with a pin into the back left corner hole so it curves to the front. Now insert the bar part of the thick curved bar into the hole of the previously placed piece so it curves to the front.

42-43. Locate 3 dark grey 2x3 tiles with 2 clips. Vertically attach the clip parts to the bars of the previously placed tiles so the tile side is facing up. Now bend them to the front so they are at a 45-degree angle.

44-45. Locate 1 green 1x2 plate with a clip connected to 7 long leaves. Clip it onto the top of the long brown thick curved bar so the leaves are facing up and the studs are facing you. You finished the feeding area! Put this away while we build the rest!

Building Instructions (Bag 2, Book 2):

Group 4 - Derkus and Velociraptor

4-5. Locate 1 light blue teal pair of legs, 1 light grey torso printed with a ripped-up T-shirt and shark necklace, 1 brown head with a mean-looking smile on his face, and 1 black hair. Also locate 1 mint, light blue, and purple velociraptor and 1 whitish-blue baby bottle. Assemble your minifigure then put the baby bottle in his hand and the raptor by his side! Feed the milk to the raptor so it can grow big and strong! Put this away so we can build the Rescue Centre now!

Group 5 - Rescue Centre

6-7. Locate 1 green 8x8 plate with a gap on each side and 2 light grey 1x4 plates. Place the 8x8 plate on the table then place the 1x4 plates horizontally on the back gap and vertically on the right gap.

8-9. Locate 1 light grey 2x2 tile with a pin and 1 brown 1x2 round pin connector. Place the tile in the back right corner. Then place the pin connector on top of the pin.

10-11. Locate 2 light green 2x4 plates and 1 long brown thick curved bar with a pin. Insert the pin into the hole of the pin connector so it curves to the front. Now horizontally place one 2x4 plate in the front gap so it overhangs and the other 2x4 plate vertically in the left gap so it overhangs.

12-13. Locate 1 light green 2x6 plate with a rounded side and 1 light green 4x8 half-circle plate. Horizontally place the 4x8 plate underneath the front overhang so it is centered and curves to the front. Then vertically place the 2x6 plate on the left overhang so it is centered and curves to the left.

14-15. Locate 1 tall light grey 2x4 sloped rock wall. Vertically place it in front of the 2x2 tile in the back right corner so the wall faces the right.

16-17. Locate 1 tall light grey 2x4 sloped rock wall and 1 dark grey 1x2 tile with a bar. Horizontally place the 2x4 rock wall to the left of the 2x2 tile in the back right corner so the wall faces the back. Then horizontally place the tile on the back left corner so the bar is to the front.

18-19. Locate 1 tall light grey 1x2 brick. Horizontally place it in front of the previously placed tile.

Group 6 - Accessories

20-21. Let's make a computer! Locate 1 white 2x2 brick, 1 white 1x2 tile printed with a keyboard, 1 black 2x2 tile with a clip on the back printed with a light blue screen with 2 tabs opened, and 1 dark grey 1x2 tile with a bar. Place the brick on the table. Then horizontally place the tile on the front row so the keyboard is oriented correctly. Ask a sighted person to check. Then horizontally place the tile with a bar on the back row so the bar is to the back. Now attach the clip of the tile to the bar so the screen faces the front.

22-23. Now place your computer build in the gap of the 2x4 sloped rock wall that is on the right so the screen faces the left.

24-25. Locate 1 red chair. Place it to the left of the keyboard tile so the back of the chair is to the left.

26. Let's build an egg incubator now! Locate 1 white 2x2 brick, 1 white 1x2 tile with a stud, and 1 transparent light blue 1x2 panel. Place the brick on the table. Horizontally place the 1x2 tile on the front row. Then horizontally place the panel behind it so it faces the back.

27. Locate 1 light blue 1x2 plate, 1 light blue 2x2 tile with a stud, and 1 white egg printed with a hole and an eye poking out. Place the egg on top of the stud of the 1x2 tile so the eye faces the front. Ask a sighted person to make sure it is correct! Then horizontally place the 1x2 plate on top of the panel. Then place the 2x2 tile on top so it overhangs to the front.

28-29. Now place your egg incubator in front of the tall 1x2 brick.

30-31. Locate 1 green 1x1 round brick with 3 leaves. Place it to the left of the front row of the egg incubator you previously placed. Make sure that the right leaf is vertical and facing the front.

32. Let's build a fossil examination station now! Locate 1 white 2x2 brick, 1 light blue 1x2 plate, and 1 white 1x2 plate with a clip. Place the brick on the table. Then horizontally place the 1x2 plate on the back row. Then horizontally place the plate with a clip in front so the clip faces the left.

33. Locate 1 light blue 2x2 tile with a stud, 1 magnifying glass, and 1 transparent orange 1x1 brick with a fossil inside. place the tile on top of the previously placed plates. Then place the fossil brick on top of the stud. Then attach the magnifying glass to the left clip.

34-35. Take your build and place it in front of the right 2x4 sloped rock wall so the magnifying glass is to the left.

36-37. Locate 1 dark grey 1x2 tile with a bar and 1 green 1x1 round brick with 3 leaves. Horizontally place the tile on top of the tall 1x2 brick and 2x4 2x4 sloped rock wall on the back rows so the bar is to the back. Then place the brick on top of the front stud of the right 2x4 sloped rock wall so the left leaf is vertical and facing you.

38-39. Locate 1 dark blue 2x4 tile with 2 clips printed with a solar panel. Vertically attach the clips to the previously placed tile with a bar so the tile side is upright and faces the front.

40-41. Locate 1 long brown thick curved bar with a bar and 1 light green 1x2 plate with a clip connected to 7 leaves. Connect the bar to the previously placed long brown thick curved bar so it curves to the front. Then attach the clip of the leaves to the top of the previously placed thick bar so the leaves face up.

Building Instructions (Bag 3, Book 3):

Group 7 - Sammy and Velociraptor

4-5. Locate 1 light blue pair of legs, 1 white torso printed with a white dress covered in pink flowers, 1 light nougat head with a female faceprint with lipstick on, and 1 black hair. Assemble your minifigure and put her aside.

6-7. Locate 1 light grey velociraptor, 1 green stem, and 1 orange carrot. Insert the stem into the top of the carrot. Then put the carrot in Sammy's hand and the raptor by her side!

Group 8 - Car

8-9. Locate 1 black 2x10 car base with curved sides and 2 yellow 1x2 pins. Horizontally place the car base in front of you so the side with side studs is facing back. Now insert the 2 pins into the middle front 2 holes of the car base.

10-11. Locate 1 black 2x10 car base. Insert the holes of this base into the pins so it is aligned with the other car base.

12-13. Locate 1 tan 1x2 brick and 2 red 1x4 plates. Vertically place the 1x2 brick on the center of the rightmost column of the car base's 4x4 gap. Then horizontally place the 1x4 plates on the front row and back row of the gap.

14-15. Locate 1 red 1x4 plate and 1 transparent red 1x2 plate. Vertically place the 1x2 plate on top of the 1x2 brick. Then vertically place the 1x4 plate to the right so it is centered.

16-17. Locate 2 red 2x2 plates with an arch. Horizontally place them to the right of the previously placed 1x4 plate so the arches are outwards to the front and back.

18-19. Locate 1 red 1x2 steering wheel. Vertically place it to the left of the 1x2 brick so it faces the left.

20-21. Locate 1 light brown 2x2 tile with 2 studs. Place it to the left of the steering wheel so the studs are on the left.

22-23. Locate 2 tan 1x4 bricks. Horizontally place them on top of the 1x4 plates on the front and back rows of the 4x4 gap.

24-25. Locate 1 red 1x4 plate. Vertically place it to the left of the 2 previously placed bricks so it is centered.

26-27. Locate 2 red 2x2 plates with an arch. Horizontally place them to the left of the previously placed plate so the arches are outwards of the build.

28-29. Locate 1 tan 2x4 plate. Vertically place it on top of the previously placed plates with an arch and 1x4 plate so it is centered in the front and back.

30-31. Locate 2 tan 1x2 plates with 2x2 side studs. Vertically place them on the leftmost column to the left of the 2x4 plate so the side studs face the left.

32-33. Locate 1 tan 2x4 tile with 2 studs. Vertically place it on top of the previously placed plates and 2x4 plate so it is centered in the front and back.

34-35. Locate 2 transparent red 1x2 plates. Rotate your build so the backend of the car faces the front. This is the side with the 2x4 side studs! Now horizontally place the plates upright on the bottom row of side studs.

36-37. Locate 2 tan 1x2 tiles. Horizontally place them upright on the row above the previously placed plates.

Group 9 - Car

38-39. Rotate the build so the right side of the car is facing you. Locate 1 tan 2x4 trapezoid plate and 1 tan 2x2 round tile with a red background and black T-Rex on it. Place the tile on the studs of the plate. Now horizontally place the plate upright on the 4 side studs so the short side is on the bottom. Make sure the T-Rex tile is oriented correctly! Ask a sighted person to check!

40-43. Locate 1 tan 2x4 trapezoid plate and 1 tan 2x2 round tile with a red background and black T-Rex on it. Repeat steps 38-39 symmetrically for the left side of the car now!

44-45. Locate 1 red 1x2 plate with 2x4 side studs. Vertically place it on the leftmost column of the car so the side studs face the left.

46-47. Locate 1 red 3x4 plate with angled sides. Vertically place it on top of the left side of the build so the 1x2 gap of this plate surrounds the previously placed 1x2 plate with 2x4 side studs.

48-49. Locate 1 tan 2x4 plate. Horizontally place it upright on the left-facing side studs.

50-51. Locate 1 tan 2x4 tile printed with headlights and the grill of a car. Horizontally place it upright on the left-facing side studs. Make sure the lights are at the top! Ask a sighted person to check!

52-53. Locate 1 tan 2x4 tile with 2 studs. Horizontally place it on top of the 3x4 plate with angled sides and 1x2 plate with 2x4 side studs so it overhangs slightly to the left.

54-55. Locate 1 transparent light blue windshield and 1 black 1x4 bar fence. Vertically place the windshield to the right of the previously placed tile so it slopes to the left. Then vertically place the 1x4 bar fence to the left of the 2x4 tile with 2 studs that is on the right side.

56-57. Locate 1 nougat 3x4 crate. Vertically place it to the right of the previously placed bar fence so it is centered.

Group 10 - Car

58-59. Locate 4 tires and 4 red wheels. Insert the wheels into the tires.

60-63. Locate 4 yellow 1x2 pins. Insert the pins into the side of the wheels with grooves. Now attach the pins to the front and back sides of the build underneath the arches.

64. Now you can place the velociraptor in the crate on the truck and feed it the carrot so it doesn't bite you!

Congratulations you finished the Baby Dinosaur Rescue Centre!

Thank you so much for building this set!

Visit bricksfortheblind.org for more accessible instructions and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 3 LEGO Jurassic Park Theme kits:

76944 T. rex Dinosaur Breakout

76958 Dilophosaurus Ambush

76957 Velociraptor Escape
