Welcome to text-based instructions from Bricks for the Blind. Before you start building,

here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/PPP: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/21256>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3 and put them in one container.

This LEGO set comes with 6 bags labeled 1, 2, 3, 4, 5, and 6, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

60. Now you should have 2 of these parts! Vertically place them in front of the 2 leftmost and 2 rightmost columns of the 1x16 bricks so they overhang 4 rows to the front. Make sure the 2x2 tiles with a stud are in the front!

61. Locate 2 dark orange 2x4 tiles. Vertically place them on top of the 1x16 bricks and previously placed parts in the back left and back right corners. Make sure to press down on the overhang 2x4 and 2x2 bricks so they click into place.

There should be 3 anti studs in every direction of these bricks. Then flip your build over again so it is upright and facing the same way.

Place 1 to the left so it sits on the front row of the plate.

80. Locate 1 blue 1x1 plate and 2 green 1x1 round flower plates. Place the 2 flower plates on the 2x2 plate in front of the 2x8 plate so they are diagonal to the previously placed flower plates. Now place the 1x1 plate on the 4th row from the front and the 3rd column from the right.

81. Locate 1 brown 2x2 container and 1 light green 2x4 tile with 2 studs. Place the container to the left of the 2x2 plate. Then place the 2x4 plate on the front 2 rows so it is centered left and right.
