

21261 The Wolf Stronghold

Adapted by John Le and tested by Jolene Nemeth

Kids build the Wolf Tamer a base featuring a big wolf's head above the entrance, then have fun switching the wolf's face from friendly to angry. Inside is a crafting table, blast furnace, anvil, and, for the first time in a LEGO Minecraft set, a smithing table. A chest of supplies contains a Netherite ingot, which kids can craft into a sword, sweet berries, and bones that are used to tame the wild wolf. Outside is a forest section with a tree, boulder, mushroom, and sweet berry bush. 2 Minecraft skeleton toys wander the forest: one has an enchanted bow, and the other has a bow and arrow and diamond helmet.

Creative castle playset – The toy includes a crafting table, blast furnace, anvil, and a smithing table, plus a LEGO® Minecraft® Wolf Tamer figure, 2 skeletons, and 2 wolves.

Building toy and action playset – Kids tame a wild wolf, battle skeletons, and make use of a variety of crafting equipment in this forest explorer-hero toy.

Minecraft® wolf toy – The entrance to the Wolf Tamer's base features a large, buildable wolf's head with a face that kids can quickly switch from friendly to angry.

312-piece forest fortress – The Wolf Stronghold part of the assembled building toy measures over 4.5 in. (11 cm) high, 6 in. (16 cm) wide and 5 in. (12 cm) deep.

The front of the box shows the wolf stronghold in the background. It is a stone building with a huge face of a wolf. In the front, the wolf tamer is fighting off two skeletons that have bows and arrows! Luckily, he has his two wolves to help fight them off!

The back of the box shows the wolf tamer building new gear with ingots on the roof. Below the roof, the two wolves are enjoying their bones. But they got to be careful because 1 skeleton has their bow drawn and is about to shoot them through the window! Another skeleton is hiding behind a tree waiting for them to come out!

The top of the box shows all the characters this set comes with. It comes with the wolf tamer, 2 skeletons, and 2 wolves!

The build is 312 pieces in total and is for ages 8+.

Bag 1 includes the pieces for the minifigure, wolves, utilities, and a tree.

Bag 2 includes the pieces for the wolf stronghold.

Bag 3 includes the pieces for the skeletons and the wolf stronghold.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we may be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: going from front to behind.

- Horizontally: going from left to right.
- Upright: pointing up towards the ceiling.
- That one/PPP: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up from left to right.
- Column: studs lined up from top to bottom or front to back

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/21261>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, and 3, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.
