

42632 Farm Animal Vet Clinic

Adapted by John Le and tested by Jolene Nemeth

Inspire kids aged 4 years old and up to care for animals with this LEGO® Friends Farm Animal Vet Clinic (42632) toy set. This kit helps kids learn to build and comes with a buildable vet clinic, 2 mini-dolls, 3 animal figures, and vet accessories to inspire imaginative play.

LEGO® Friends Farm Animal Vet Clinic toy – Set includes 2 mini-dolls, 3 animal figures, and lots of pretend-play accessories for girls, boys, and kids aged 4 plus who love to care for animals.

Made for young builders – Children who are learning to build can get off to a great start with this kids' building kit as they help Autumn and Gabriela care for the goat, who has just given birth.

Transport the goats on the trailer – The set comes with a buildable trailer so kids can act out the story as they give the new mom and her baby a ride through the entrance archway to the vet clinic.

2 mini-dolls and 3 animal figures – Set includes LEGO® Friends characters Autumn and Gabriela, plus a goat with her baby and a rabbit, so the creative play starts right away.

Lots of accessories – The set comes with toy accessories, including vet medical accessories, cherries, a strawberry, a bee, cookies, a carrot, a mug, and a shampoo bottle.

Measurements – 161-piece set with vet clinic measuring over 4 in. (10 cm) high, 12 in. (30 cm) wide and 2.5 in. (7 cm) deep.

The front of the box shows the clinic attached to the dog examination area and computer area in the back! Gabriela has a stethoscope around her neck and a hand-held X-ray in her hand! She is currently examining what is wrong with a dog that is on her table! In the front Autumn is driving a vehicle with a trailer that has a little pup in it! She is bringing it to the clinic to get examined!

The back of the box shows all the parts that the clinic comes with! It comes with 2 minifigures, the clinic with the dog table, 3 animals, an entire set of tools, a rabbit house, a vehicle, some snacks and food for the animals, a box, bricks, and a cup!

The top of the box shows a full-sized image of Autumn!

The build is 161 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Gabriela and the clinic.

Bag 2 includes the pieces for the dog examining area and computer area.

Bag 3 includes the pieces for Autumn, a vehicle, and a rabbit house.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.

- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/42632>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, and 3, 3 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Gabriela and the Clinic

Group 1 - Pages 6-9.
Group 2 - Pages 10-41.
Group 3 - Pages 42-74.

Bag 2 - Pet Examination Area and Bathing Area

Group 4 - Pages 4-5.
Group 5 - Pages 6-29.
Group 6 - Pages 30-61.

Bag 3 - Autumn, Vehicle, and Rabbit House

Group 7 - Pages 4-7.
Group 8 - Pages 8-19.
Group 9 - Pages 20-31.
Group 10 - Pages 32-41.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Gabriela

6-7. Locate 1 blue pair of legs with white shoes, 1 teal torso printed with a short sleeve t-shirt and blue gloves, 1 light brown head printed with light green eyes, nose, and a smile, and 1 dark red hair with a light aqua headband. Assemble your minifigure then put her in front of you.

8-9. Place a light aqua stethoscope around her neck and a baby formula bottle in her hand. Now place a white dog by her side! Now put everything aside while we build the clinic.

Group 2 - Clinic

10-13. Place a lime green 8x8 plate with 3 gaps and a 1x4 overhang in front of you so the overhang faces the left. Then place another one underneath the left overhang of the previous plate so the overhang faces the left.

14-15. Vertically place a tan 2x4 plate on the rightmost 1x4 gap so it overhangs 1 column to the right. Then horizontally place a white 1x4 plate on the back row in the left 1x4 gap.

16-17. Horizontally place 2 tan 2x4 bricks, 1 to the right of the other, on the back left corner so they sit on the back 2 rows.

18-19. Vertically place a lime green 1x4 tile on the front right corner. Then vertically place a white 1x4 plate behind the previous 1x4 tile. Then vertically place another 1 to the left so the back 2 studs of the plate sit to the right of the 2x4 brick.

20-21. Horizontally place a light aqua 2x8x6 window frame on the 2 tan 2x4 bricks so the frame faces the back.

22-23. Horizontally place a white 1x6 brick in between the 2x8x6 window frame on the front row of the 2x4 bricks.

24-25. Horizontally place a purple 1x6x5 panel with a print on top of the white 1x6 brick so the wall faces the front. The print shows a chart of a dog with a baby dog inside, a picture of dog kibble, and 2 shelves with medicine on it

26-27. Horizontally place a white 1x2 plate with a bar on the long side on top of the previous 1x6x5 panel in the center so the bar faces the front. Then place a teal 2x2 tile with a stud to the left and right so there is no overhang.

28-29. Place a teal 2x2 sloped curved tile on top of the 1x2 plate with a bar so it slopes to the back.

30-31. Horizontally place 2 teal 1x1 tiles with 1x1 slope to the left of the left 2x2 tile with a stud so the slope overhangs and slopes to the left.

32-33. Vertically place a teal 1x2 plate to the right of the right 2x2 tile with a stud so there is no overhang. Then place a yellow 1x1 round plate with 3 leaves on the left 2x2 tile with a stud so the leaves face the left.

34-35. Vertically place 4 light aqua 1x2x5 bricks on top of the 2 white 1x4 plates that are to the right so there are no exposed studs of the plates.

36-37. Horizontally place a light aqua 1x8 arch brick on top of the previous 1x2x5 bricks so it sits on the back row of the build.

38-39. Vertically place a white 1x2x2 brick in front of the leftmost and rightmost studs of the 1x8 arch bricks.

40-41. Horizontally place a light aqua 1x8 arch brick on top of the 1x2x5 bricks in front of the 2 previous bricks.

Group 3 - Clinic

42-43. Horizontally place a teal 1x4 brick on top of each of the arch bricks so they are centered horizontally.

44-45. Vertically place a teal 3x4 slope brick to the left and right of the previous 1x4 bricks so they slope and overhang to the left and right.

46-47. Vertically place 2 teal 3x4 slope bricks on top of the previous 3x4 slope bricks and 1x4 bricks so they slope to the left and right. Together they should make a 2x4 stud area.

48-49. Horizontally place a white 1x2 plate with 2x2 studs on the front row of the 2x4 area of the 3x4 slope bricks so the side studs face the front.

50-51. Place a white 3x3 round tile printed with a blue dog snuggling against a purple dog upright on the front-facing 2x2 side studs. Then place a 1x1 round plate of a leaf plate on the back left stud of the 2x4 area of the 3x4 slope bricks so the extended 1x1 round plate faces the front right corner.

52. Let's make a part! Horizontally place a white 2x3 cabinet in front of you so the opening faces the front. Then horizontally place a transparent 2x3 cabinet door to the front right side so it opens to the right. The handle of the door should be on the left.

53. Place 1 light aqua pencil, bandage, neck collar, and otoscope inside the cabinet, then close it!

54-55. Horizontally place your part in front of the purple 1x6x5 panel so it sits against the 1x2x5 brick that is to the right.

56. Let's make another part! Horizontally place a white 2x3 cabinet in front of you so the opening faces the front. Then horizontally place a transparent 2x3 cabinet door to the front left side so it opens to the left. The handle of the door should be on the right.

57. Place 1 light aqua needle, thermometer, and spoon inside the cabinet, then close it!

58-59. Now horizontally place the part to the left of the previous cabinet.

60-61. Place a white 2x2 brick to the left of the previous part you placed.

62-63. Horizontally place a tan 1x2 brick on the back row of the previous 2x2 brick.

64-65. Horizontally place a white 1x2 brick with a clip on the long side in front of the 1x2 brick so the clip faces the front.

66-67. Horizontally place 2 yellow 2x4 tiles with 2 studs, 1 to the right of the other, on top of the previous bricks and 2 cabinets so there is no overhang.

68-69. Horizontally attach the bar of a light aqua clipboard to the front-facing clip of the 1x2 brick so the clipboard part is on the right.

70-71. Let's make a part! Place a transparent light blue 3x3 dish in front of you. Place a white 1x1 plate with a clip on top so the clip faces the back.

72-73. Then attach the clip to the front-facing bar that is above the 1x6x5 panel so it is horizontal. This is the light for the examination table!

74. Now place your dog on top of the yellow 2x4 tiles with 2 studs, then place your minifigure in front of the table!

Building Instructions (Bag 2, Book 2):

Group 4 - Goat and Bubbles

4-5. Locate 1 dark tan goat with horns and place it in front of you. Then place 1 white 1x1 bunch of bubbles on top of an orange 1x1 round brick. The bubbles feel like a pyramid of balls. Then place it next to your goat! Now put everything aside while we build the examination area!

Group 5 - Pet Examination Area

6-7. Place a light green 8x8 plate with a rounded side in front of you so the rounded side faces the left. Then horizontally place a white 1x2 brick with a clip on the long side in the back right corner of the 8x8 plate so the clip faces the back.

8-9. Horizontally place a tan 1x2 brick to the left of the previous brick. Then horizontally place a tan 1x4 brick in front of the 2 bricks so the left and right sides are aligned with the previous bricks.

10-11. Horizontally place a tan 2x4 plate on top of the 3 previous bricks so there is no overhang. Then vertically place a tan 1x2 jumper plate in the center of the leftmost column of the 8x8 plate so there is no overhang.

12-13. Vertically place a tan 2x4 plate to the right of the 1x2 jumper plate so the front is aligned with the front of the jumper plate. Vertically place a yellow 2x4 tile with 2 studs on top of the previous 2x4 plate so there is no overhang. Then horizontally place a white 1x2 slope tile printed with a light blue scale meter in front of the previous 2x4 tile with 2 studs so it slopes to the front. Now horizontally place a tan 2x4 plate to the right of the 2x4 tile so it sits in front of the 2x4 plate that is on top of the bricks. There should be 1 free column of the 8x8 plate to the right of this plate.

14-15. Place a pink 1x1 round flower plate on top of an orange 1x1 leaf plate with 3 leaves. Now place your part on top of the 1x2 jumper tile so the leaves face the front left corner.

16-17. Let's make a part! Horizontally place 1 teal 2x3x2 cabinet in front of you so the opening faces the front. Then horizontally insert 1 pink shelf on the bottom row of the cabinet. Now place 2 tan 1x1 round tiles printed with sprinkles on top into another pink shelf. Then horizontally insert it into the top row of the cabinet.

18-19. Now horizontally place your cabinet on the right of the 2x4 plate that is in front of the 2x4 plate that is in the back right corner so the opening faces the front and there is no overhang.

20-21. Horizontally place a white 1x2 tile with an overhead bar on the back right corner of the cabinet so there is no overhang. Then horizontally place a white 1x2 tile printed with a keyboard in front of the previous tile. Then place a yellow mug to the left of the keyboard tile so the handle faces the left.

22-23. Attach the clip of a black 2x2 tile with a computer screen with tabs open on the overhead bar of the 1x2 tile.

24-25. Horizontally place a light purple ladder with 4 rungs in front of you. Then horizontally attach 2 clips of a light purple ladder with 7 rungs to the rightmost rung of the previous ladder.

26-27. Now rotate your main build so the rounded side of the 8x8 plate faces the front. Now horizontally attach the rightmost rung of the ladder with 7 rungs to the left-facing clip so the clip sits at the bottom of the rung.

28-29. Now turn the ladders to the right so the ladders surround the 8x8 plate with a rounded side. Now put this build aside while we build the pet bathing area!

Group 6 - Pet Bathing Area

30-31. Place a light green 8x8 plate with a rounded side in front of you so the rounded side faces the right. Then horizontally place a white 1x2 plate with a clip on the long side on the back left corner of the 8x8 plate so the clip faces the back.

32-33. Horizontally place a tan 1x2 brick to the right of the previous brick. Then horizontally place a tan 1x4 brick in front of the previous bricks so the left and right sides align with the bricks.

34-35. Horizontally place a tan 2x4 plate on top of the previous bricks so there is no overhang. Then horizontally place a tan 1x2 brick to the right of the front row of the 2x4 plate. Now vertically place a tan 1x2 jumper tile on the center of the rightmost column of the 8x8 plate so there is no overhang.

36-37. Place a white 2x2 corner panel to the left of the jumper tile and in front of the 1x2 brick so it looks like the braille letter d. Then place another 1 to the left so it looks like the braille letter f.

38-39. Horizontally place a transparent light blue 1x2 tile in the 1x2 gap made by the previous 2 corner panels. Then horizontally place another 1 in front of it. Now place 2 white 2x2 corner panels in front so they surround the 1x2 tile. The left one should look like the braille letter h and the right one should look like the braille letter j.

40-41. Horizontally place a gold 1x2 tile with a faucet on top of the 1x2 brick that is behind the back 2 corner panels so the nozzle faces the front. Then place a yellow 2x2 box in the front left corner of the build.

42-43. Let's make a part! Place an orange 1x1 round plate with 3 leaves in front of you. Then place a light purple 1x1 round flower plate on top of it. Then place a transparent 1x1 round tile printed with a bumblebee on top of the flower plate.

44-45. Now place your part on the rightmost column so it sits on the jumper tile and the leaves face the front right corner.

46-47. Place a brown 1x1x6 pillar brick that has a round portion to the right of the 1x2 faucet tile.

48-49. Place the back stud of a green 1x2 rounded plate connected to a bunch of leaves on top of the previous brick so the leaves face the front left corner. Now place a light purple 1x1 round flower plate on the left stud of the previous piece. Make sure this piece is not directly above the 1x1x6 brick!

50-51. Now place a green stem inside the right stud of the leave plate. Make sure to push it all the way in so it connects to the 1x1x6 brick!

52-53. Horizontally place a light purple ladder with 4 rungs in front of you. Then horizontally attach 2 clips of a light purple ladder with 7 rungs to the rightmost rung of the previous ladder.

54-55. Rotate your main build so the rounded side of the 8x8 plate faces the back. Now horizontally attach the rightmost rung of the ladder with 7 rungs to the left-facing clip so the clip sits at the bottom of the rung. Make sure to turn the ladders to the right so they surround the 8x8 plate with a rounded side.

56-57. Place red cherries, green cherries, and a pink 1x1 round tile printed with a strawberry inside the box that is in the front right corner of the build.

58-59. Locate 1 white bubbles that is on top of an orange 1x1 round brick. You made this in group 4 along with the goat! Rotate your main build so the rounded side of the 8x8 plate faces the right. Now place your bubbles on the front row on the 2nd column from the left on top of the 2x4 plate that is to the left of the faucet and tree.

Building Instructions (Bag 3, Book 3):

Group 7 - Autumn and Rabbit

4-5. Locate 1 pair of legs printed with teal shorts and brown boots, 1 torso missing an arm and printed with a pink shirt and sunflowers, 1 light tan head printed with light green eyes and freckles, and 1 light brown hair. Assemble your minifigure and place her in front of you!

6-7. Insert 1 light green stem into an orange carrot then put it in her hand. Then place a brown rabbit by her side! Now put everything away while we build a car!

Group 8 - Car

8-9. Horizontally place a white 2x6 plate in front of you. Then vertically place a black 2x2 plate with 2 pins underneath the 2 leftmost columns of the 2x6 plate so the pins face the front and back. Repeat symmetrically to the right.

10-11. Place a light grey 2x2 plate with a ball on the rightmost column so the ball overhangs to the right. Then vertically place a teal 1x2 plate on the rightmost column of the build. Then place a purple 2x2 sloped curved tile to the left so it slopes to the left.

12-13. Vertically place a purple 1x2 panel with a middle wall to the left of the previous slope so the long wall faces the left. Then place a yellow 2x2 plate to the left. Now vertically place a teal 2x2 plate with angled slopes sides on top of the 2x2 plate so it slopes to the left.

14-15. Vertically place a yellow 1x2 slope tile on the leftmost column of the build so it slopes to the left. Then vertically place a yellow steering wheel to the right so the wheel faces the right.

16-19. Insert 4 white wheels into 4 black tires. Now place 4 wheels to the pins in front and back of the build so the side of the wheel that goes in faces outwards. Now put your car away while we build the trailer.

Group 9 - Trailer

20-21. Horizontally place a purple 2x4 plate in front of you. Then place a yellow 2x2 plate on the 2 right columns so there is no overhang. Then place a light grey 2x2 plate with a socket to the left so the socket overhangs to the left.

22-23. Vertically place 1 yellow 1x2 panel on the leftmost column so the wall faces the left. Repeat symmetrically to the right. Now horizontally place a yellow 1x2 panel on the front row so the wall faces the front. Then repeat symmetrically to the back.

24-25. Flip your build upside down so the socket faces the left. Now vertically place a red 1x2 plate upside down on the rightmost column. Then place a black 2x2 plate with 2 pins upside down to the left so the pins face the front and back.

26-29. Insert 2 white wheels into 2 black tires. Now place 2 wheels to the pins in front and back of the build so the side of the wheel that goes in faces outwards.

30-31. Bring back your car and orient it so the ball faces the right. Now connect the socket of the trailer to the ball! Now put it away while we build a dog house!

Group 10 - Dog House

32-33. Place a light green 4x4 plate in front of you. Now vertically place a teal 1x2 plate in the back left and back right corner of the plate. Then vertically place a tan 1x2 jumper plate in the front right corner so there is no overhang.

34-35. Horizontally place 2 tan 1x4 arches, 1 in front of the other, on the back row so they sit on the 1x2 plates. Then place 2 teal 2x2 slope bricks, 1 to the right of the other, on the back 2 rows on top of the arches so they slope to the front.

36-37. Horizontally place the 1x1 round plate part of pink leaves on the leftmost stud of the slope bricks so the leaves go to the right. The 1x1 round plate with a long part should sit on the rightmost stud of the slopes. Now place a yellow 1x1 leaf plate with 3 leaves on the leftmost stud of the leaves so the leaves face the right.

38-39. Let's make a part! Horizontally place a yellow 1x2 ridged brick in front of you so the vertical ridges face the front. Then horizontally place another 1 on top so there is no overhang and the horizontal ridges face the front. Now repeat so you have 2 parts in total! This is hay!

40-41. Now put them beside the dog house and put another yellow 1x2 ridged brick next to the dog house! You can use the trailer of the car to transport the hay!

Thank you so much for building this set!

Visit bricksfortheblind.org for more accessible instructions, sign up for our newsletter, and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!
