

## **43243 Simba the Lion King Cub**

Set adapted by Alex Charbonneau and tested by Natalie Charbonneau.

Appeal to kids and The Lion King fans aged 6+ with this fun gift of a LEGO® | Disney Simba the Lion King Cub (43243) play-and-display building toy, featuring a buildable character model that celebrates The Lion King's 30th anniversary. The precocious baby Simba LEGO | Disney animal figure from the hit movie has a rotating head and movable legs and tail, and it comes with a leaf and 4 'bugs' for 'food'.

This kids' buildable playset makes a fun Disney gift idea for children and movie-lovers, looks great on display in any room and is packed with features and functions to inspire the best imaginative play. It works well with other LEGO | Disney building sets for kids in the series (sold separately) and is also a great size for pick-up-and-play portability.

To add to the fun, kids can enjoy an easy and intuitive building adventure with the LEGO Builder app, where they can zoom in and rotate models in 3D, save sets and track their progress.

Buildable toy for kids:

- Treat girls and boys aged 6+ to this Simba the Lion King Cub buildable figure playset that's ready for imaginative role play and makes a fun display afterwards.

Celebrate a milestone:

- This kids' building toy features a Simba LEGO® | Disney animal figure from The Lion King, plus a small leaf build with 4 'bugs', to celebrate The Lion King's 30th anniversary.

Moving parts:

- The buildable toy Simba LEGO® | Disney animal figure has a rotating head and movable legs and tail, and it can be posed either standing up or sitting down.

Building set for kids:

- Create Simba and his 'food', play out fun stories and then set the model on display in a variety of poses, standing, sitting or lying down, once bedtime is over.

Disney gift for kids aged 6+:

- A building toy set featuring a Disney character with functions and accessories that makes a fun gift for movie fans, girls and boys who deserve an everyday treat.

LEGO® | Disney play:

- Add this building toy to the extensive range of compatible LEGO building toys and LEGO | Disney buildable sets (sold separately) in the series.

Expand life skills:

- With a LEGO® | Disney buildable character and a small side build and functions to enhance display, this kids' construction toy helps foster life skills through fun.

Measurements:

- This 222-piece play-and-display building set features a buildable Simba figure standing over 4 in. (11 cm) tall.

The box is blue and red. The bottom right corner is red, with a picture of Simba as a cub from The Lion King. The top left corner is blue, with a LEGO logo and a Disney logo. The front of the box has a picture of Simba as a cub running over a flat, dry piece of ground. Pride Rock is in the background. Simba is pouncing on a collection of colorful bugs and grubs which are on a leaf.

The top of the box shows a life sized image of one of Simba's eyes, which is printed on a 2x2 tile.

The back of the box has one main image and two small images. These images highlight the fact that the model can be posed in a variety of ways. The main image shows Simba in a seating position, with his front paw on one of the bugs. The top right inset shows Simba from the front as he looks at the leaf with bugs on it. The final inset shows Simba stretched out and laying down.

The build is 222 pieces, and 98 building steps.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of the piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each kit, PDF versions are always online at LEGO.com: (<https://www.lego.com/en-us/service/buildinginstructions/43243>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

This LEGO set comes with four bags labeled 1-4, and an instruction booklet. Sort the pieces into groups as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split across two groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 (7 groups of bricks)

Group 1 contains the pieces for steps 1-10.

Group 2 contains the pieces for steps 11-16.

Group 3 contains the pieces for steps 17-18.

Bag 2 (8 groups of bricks)

Group 4 contains the pieces for steps 19-28.

Group 5 contains the pieces for steps 29-36

Group 6 contains the pieces for steps 37-40, and the 2x2 curved slope tile with the right eye pattern from step 41.

Group 7 contains the pieces for steps 41-49.

Bag 3 (9 groups of bricks)

Group 8 contains the pieces for steps 50-62

Group 9 contains the pieces for steps 63-74

Group 10 contains the pieces for step 75.

Bag 4 (10 groups of bricks)

Group 11 contains the pieces for steps 76-83.

Group 12 contains the pieces for steps 84-91.

Group 13 contains the pieces for step 92.

Group 14 contains the pieces for steps 93-98.

Building Instructions:

Open bag 1.

Main Build: Simba the Lion King Cub

Open group 1.

1. We'll start by building Simba's body! Place a tan 2x12 plate horizontally in front of you.
2. Place a tan 1x2 inverted slope brick, with the slope at the front, on the front right corner of the previous piece. Repeat symmetrically on the back side.
3. Place a tan 2x2 ribbed short brick to the left of the two previous pieces.
- 4.1. Place a brown 2x6 brick, horizontally, to the left of the previous piece.
- 4.2. Place a tan 2x2 ribbed short brick to the left of the previous piece.
5. Place a tan 1x2 inverted slope brick, with the slope at the front, to the left of the front row of the previous piece. Repeat symmetrically on the back side.
6. Place a light gray 1x2 plate with a tow ball socket, with the tow ball socket at the front, on the front row of each of the two 2x2 ribbed bricks. Repeat symmetrically on the back side.
7. Place a bright orange 1x4 tile with two studs, vertically, on the leftmost column. Repeat symmetrically on the right side.
8. Place a bright orange 2x4 plate, horizontally and centered vertically, to the right of the left piece from the previous step. Repeat symmetrically on the right side.

9.1. Place a yellow 1x2 plate with two rows of four studs hanging down from one side, with the side studs at the front, on the front row between the previous two pieces. Repeat symmetrically on the back side.

10. Place a bright orange 4x4 plate, centered vertically, on the left four columns. Place two more to the right of the first.

Open group 2.

11. Place a tan 1x2 brick with a hole, vertically and centered vertically, on the rightmost column.

12.1. Place a brown 2x3 brick, horizontally, to the left of the previous piece.

12.2. Place a brown 2x6 brick, horizontally, to the left of the previous piece.

13. Place a dark brown 2x2 brick with a tow ball on one side, with the tow ball on the left, to the left of the previous piece.

14. Place the left two columns of a bright orange 2x4 plate, horizontally, on the previous piece. Place two more to the right of the first.

15. Place three bright orange 1x4 curved slopes, horizontally with the thick sides at the back, on the front row of the body. This should cover all of the studs on the front row. Repeat symmetrically on the back side.

16.1. Now we'll build Simba's side between the front and back legs. Place a tan 2x6 plate horizontally in front of you.

16.2. Place a bright orange 1x2 tile, vertically, on the leftmost and rightmost columns of the previous piece.

16.3. Place a bright orange 2x2 angled corner tile, with the tile at the back left, to the right of the left piece from the previous step. Repeat symmetrically on the right side.

16.4. Repeat steps 16.1-16.3.

16.5. Find the two rows of side studs on the front side of Simba's body. Rotate one side panel towards you so the tiles are at the front. Place this, centered horizontally, on the side studs. The widest row of free studs on the panel should be at the bottom. Repeat symmetrically on the back side.

Open group 3.

17.1. Now we'll build the bottom of Simba's chest. Set the rest of the body aside for now. Place a tan 2x2 inverted tile in front of you.

17.2. Place the rightmost anti-stud of a tan 1x4 inverted curved slope, horizontally with the slope on the left, on the front left stud of the previous piece. Place another behind the first.

17.3. Repeat the previous step symmetrically on the right side.

17.4. Place a tan 2x4 tile with two studs, horizontally and centered horizontally on the previous four pieces..

17.5. Place the body upside down in front of you with the tow ball at the left. Keeping it horizontal, flip the bottom of the chest over so it's upside down. Place it on the left eight anti-stud columns on the body.

18.1. Next we'll make the back of Simba's body. Set the rest of the body aside for now. Place a bright orange 2x2 plate in front of you.

18.2. Place the rightmost anti-stud of a bright orange 1x3 curved slope tile, horizontally with the slope on the left, on the front left stud of the previous piece. Place another behind the first.

18.3. Repeat the previous step symmetrically on the right side.

18.4. Place the body rightside up in front of you with the tow ball at the left. Place the back assembly on the right six columns on the body.

Open bag 2.

Open group 4.

19. Now we'll start building Simba's head! Set the body aside for now. Place an orange 2x3 plate horizontally in front of you.

20.1. Place a dark brown 2x2 brick with a tow ball socket on one side, with the tow ball socket on the right, on the right two columns of the previous piece.

20.2. Place a tan 1x2 plate with rounded ends, vertically, to the left of the previous piece.

21. Place an orange 1x2 brick with two studs on one side, vertically with the side studs on the left, on the previous piece.

22. Place a yellow 1x2 plate with two rows of four studs hanging down from one side, with the side studs at the front, to the right of the front stud of the previous piece. Repeat symmetrically on the back side.

23. Place a bright orange 2x4 plate, horizontally, on the head. The left side of this piece should be even with the left side of the head.

24.1. Next, we'll build Simba's cheeks. Place a bright orange 2x4 plate horizontally in front of you.

24.2. Place a bright orange 2x2 double slope brick, with the stud at the back right, on the left two columns of the previous piece. Repeat symmetrically on the right side.

24.3. Repeat steps 24.1 and 24.2.

24.4. Rotate one cheek so it is horizontal and sideways, with the two studs on the top row facing you. Place this on the front set of side studs on the head. Repeat symmetrically on the back side.

25.1. Place an orange 1x4 plate vertically in front of you.

25.2. Place a dark brown 1x2 plate with a horizontal clip on one side, vertically with the clip at the front, on the front two studs of the previous piece. Repeat symmetrically on the back side.

25.3. Place a dark brown 1x1 round plate on the front and back anti-stud of the 1x4 plate.

25.4. Place an orange 1x4 plate, vertically, on the two 1x2 plates with clips.

25.5. Place a bright orange 1x1 plate with a 1x1 slope tile on one side, horizontally with the slope on the front, on the front two studs of the previous piece.

25.6. Place this assembly, vertically and centered vertically, on the rightmost column on the head.

26. Now we'll give Simba his brain! Place a pink 2x2 brick to the left of the previous assembly.

27. Place a dark gray 1x2 plate with two rows of four studs hanging down from one side, with the side studs at the front, on the front row of the previous piece. Repeat symmetrically on the back side.

28.1. Place a tan 1x2 plate with rounded ends, vertically, on the leftmost column of the head.

28.2. Place an orange 1x2 brick with two studs on one side, vertically with the side studs on the left, on the previous piece.

Open group 5.

29. Now we'll build the front of Simba's face. Set the rest of the head aside for now. Place a tan 2x3 plate horizontally in front of you.

30.1. Place the left column of a bright orange 2x2 slope tile, with the slope at the right, on the right column of the previous piece.

30.2. Place a tan 2x2 plate to the left of the previous piece.

31.1. Place a tan 1x2 plate with rounded ends, vertically, on the left column of the previous piece.

31.2. Place a dark tan 1x2 plate with a row of two studs sticking up from one side, vertically with the side studs at the right, to the right of the previous piece.

32. Place a tan 1x1 plate with a triangle hanging down from one side, with the triangle at the front, on the front stud of the previous piece. Repeat symmetrically on the back side.

33. Place a tan 1x2 half circle tile, vertically with the flat side at the right, to the left of the pieces from the previous step. This is Simba's chin.

34. Place a tan 1x1 quarter circle tile, with the corner at the front right, on the front row to the right of the previous piece. Repeat symmetrically on the back side. These are the sides of Simba's mouth!

35. Now we'll make Simba's pink nose! Place a pink 1x1 tile with one rounded end, sideways with the rounded end at the front, on the front side stud which is to the right of the pieces from the previous step. Repeat symmetrically on the back side.

36. Place the rest of Simba's head in front of you, with the tow-ball socket at the right. Find the two rows of side studs on the left side of the head. Rotate the front of the face so the chin is at the bottom and place the face on the two rows of side studs on the left side of the head.

Open group 6.

37. There should now be six side studs on the front and back sides of the head, including the studs on the two double slope bricks. Place a dark brown 1x2 tile, standing upright, on the top two studs on the right column on both the front and back sides of the head.

38. Now we'll attach Simba's ears! Find the two clips on the right column of the head, one on each side. Find a bright orange 2x2 plate with a bar on the bottom. Rotate this piece so the studs point to the front, and so the bar is pointing up and down on the left half of the piece. Clip the bottom part of the bar to the clip on the front side of the head. Repeat symmetrically on the back side.

39. Now we'll put on Simba's ears! Find two 3x3 round tiles with ear prints. The print on these pieces does have a correct orientation, so you might want a sighted helper to get these right! There are four anti-stud circles on the back of these tiles. Place the anti-stud tiles of each ear onto the pieces from the previous step. Now, rotate the ears to the left.

40.1. Assemble two 1x2 hinge bricks by clipping a light gray 1x2 hinge plate into a dark tan 1x2 hinge base.

40.2. Place one 1x2 hinge brick, on the top two side studs on the front side of the face, with the flat side at the right. The hinge plate should be free to rotate to the left. Rotate the hinge so the studs are at the front. Repeat symmetrically on the back side.

41.1. Place the right column of a bright orange 2x2 curved slope tile with the right eye print, with the slope at the right, on the front piece from the previous step.

Open group 7.

41.2. Place the right row of a bright orange 2x2 curved slope tile with the left eye print symmetrically on the back side.

42. Rotate both pieces with the eye prints in as far as they will go towards Simba's nose.

43. Place an orange 2x3 plate, horizontally, on the right three rows on the head.

44. Place the front stud of a bright orange 2x2 curved corner piece, with the corner at the front left so it's oriented like a braille letter E, in front of the left column of the previous piece. Repeat symmetrically on the back side.

45. Place a bright orange 3x4 tripled curved slope tile, with the studs at the right, on the left three columns of the head.

46. Now we'll build the spiky hair on the back of Simba's head. Rotate the head 90 degrees clockwise so Simba's face is at the back. Place a bright orange 1x1 plate with a 1x1 slope tile on one side, horizontally with the slope tile at the left, on the front row. Place another behind the first.

47.1. Place a bright orange 1x1 slope tile, with the thick side at the back, on the front piece from the previous step.

47.2. Place a bright orange 1x1 slope tile, with the thick side at the right, behind the previous piece.

48. Place the body in front of you, with the tow ball on the left. Rotate Simba's head so tow ball socket is on the right and the hair is on top. Attach the head to the body using the tow ball and socket.

49.1. Now we'll build Simba's tail! Set the body aside for now. Find a long bright orange bent cylinder. This piece has a pin hole on one end and a bar hole on the other end. It looks kind of like a long macaroni noodle. Place this horizontally in front of you with the pin hole at the left. It doesn't matter which way it curves.

49.2. Push a black 2L pin into the left side of the previous piece.

49.3. Find a bright orange horn. This is another long cylinder which comes to a rounded point and has a short bar on one side. With the bar on the left, push this piece into the right side of the bent cylinder. It doesn't matter which way it curves.

49.4. Now we'll give the tail a tuft at the end. Push the hollow stud of a dark brown 1x1 cone, from the right, onto the right side of the previous piece.

49.5. Place a dark brown 1x1 round plate with a hollow stud into the anti-stud of the previous piece,

49.6. Push the short bar of a dark brown feather, from the right into the hollow anti-stud of the previous piece.

49.7. Set the body in front of you, with the head at the left. Keeping the tuft at the right, push the tail into the pin hole on the right side of the body.

Open bag 3.

Open group 8.

50. Now we'll start building Simba's legs! Set the body aside for now. We'll build a front leg first. Place a bright orange 2x2 inverted tile in front of you.

51. Place an orange 1x2 plate with a bar on one side, vertically with the bar on the right, on the right column of the previous piece.

52.1. Place a bright orange 1x6 plate, horizontally to the left of the back stud of the previous piece.

52.2. Place a brown 1x1 round plate in front of the rightmost stud of the previous piece.

53. Place a bright orange 2x4 plate, horizontally, on the right four columns.

54. Place a brown 1x3 plate, horizontally, to the left of the back row of the previous piece.

55.1. Place a bright orange 1x1 brick on the leftmost stud of the previous piece.

55.2. Place a dark gray 1x2 plate with a tow ball on one long side, horizontally with the tow ball at the front, to the right of the previous piece.

55.3. Place a bright orange 1x3 slope brick, horizontally with the slope at the right, to the right of the previous piece.

56.1. Place a bright orange 1x1 slope tile, with the thick side at the back, in front of the left stud of the previous piece.

56.2. Place a bright orange 1x2 slope tile, horizontally with the thick side at the back, to the right of the previous piece.

57. Place a bright orange 2x2 double slope tile with one pointed end, with the pointed end at the right, to the right of the previous piece.

58. Keeping the studs pointing up, rotate the leg 180 degrees so the previous piece is on the left side. Place an orange 1x2 brick with two studs on one side, with the side studs at the front, on the second and third studs from the right. It should be to the left of a 1x1 brick, and there should only be four free studs on top of the leg.

59. Place a bright orange 1x4 double curved slope tile, horizontally, on the four studs on the leg.

60. Place the top row of a bright orange 2x4 tile with rounded ends, horizontally, on the two side studs on the front of the leg. The right side of this piece should be even with the right side of the leg.

61. Place a bright orange 1x3 double inverted slope, horizontally, on the bottom of the leg to the right of the 2x2 inverted tile. There should be two free anti-stud to the right of this piece.

62. Place the body in front of you with the head at the left. Find the left tow ball socket on the front side of Simba. Find the tow ball on the back side of the leg and push it into this tow ball socket. Rotate the leg so it points down. The anti-stud on the leg should be on the right.

Open group 9.

63. Next we'll build the other front leg. Set the body aside for now. Place a bright orange 2x2 inverted tile in front of you.

63.1. Place an orange 1x2 plate with a bar on one side, vertically with the bar on the left, on the left column of the previous piece.

64.1. Place a bright orange 1x6 plate, horizontally to the right of the back stud of the previous piece.

64.2. Place a brown 1x1 round plate in front of the leftmost stud of the previous piece.

65. Place a bright orange 2x4 plate, horizontally, on the left four columns.

66. Place a brown 1x3 plate, horizontally, to the right of the back row of the previous piece.

67.1. Place a bright orange 1x1 brick on the rightmost stud of the previous piece.

67.2. Place a dark gray 1x2 plate with a tow ball on one long side, horizontally with the tow ball at the front, to the left of the previous piece.

67.3. Place a bright orange 1x3 slope brick, horizontally with the slope at the left, to the left of the previous piece.

68.1. Place a bright orange 1x1 slope tile, with the thick side at the back, in front of the right stud of the previous piece.

68.2. Place a bright orange 1x2 slope tile, horizontally with the thick side at the back, to the left of the previous piece.

69. Place a bright orange 2x2 double slope tile with one pointed end, with the pointed end at the left, to the left of the previous piece.

70. Keeping the studs pointing up, rotate the leg 180 degrees so the previous piece is on the right side. Place an orange 1x2 brick with two studs on one side, with the side studs at the front, on the second and third studs from the left. It should be to the right of a 1x1 brick, and there should only be four free studs on top of the leg.

71. Place a bright orange 1x4 double curved slope tile, horizontally, on the four studs on the leg.

72. Place the top row of a bright orange 2x4 tile with rounded ends, horizontally, on the two side studs on the front of the leg. The left side of this piece should be even with the left side of the leg.

73. Place a bright orange 1x3 double inverted slope, horizontally, on the bottom of the leg to the left of the 2x2 inverted tile. There should be two free anti-stud to the left of this piece.

74. Place the body in front of you with the head at the right. Find the right tow ball socket on the front side of Simba. Find the tow ball on the back side of the leg and push it into this tow ball socket. Rotate the leg so it points down. The anti-stud on the leg should be on the left.

Open group 10

75.1. Now we'll build Simba's front paws. Set the rest of Simba aside. Place an orange 1x3 double inverted slope brick horizontally in front of you.

75.2. Place a tan 1x1 plate with a vertical clip on one side, centered horizontally with the clip at the front, on the previous piece.

75.3. Place a bright orange 1x1 plate to the left and right of the previous piece.

75.4. Place a bright orange 1x3 plate, horizontally, on top of the paw.

75.5. Place a bright orange 1x1 plate, centered horizontally, on the previous piece.

75.6. Place three tan 1x1 double curved slope tiles, with the flat sides at the front and back, on the three studs on the paw. These are Simba's toes!

75.7. Repeat steps 75.1-75.6 to make Simba's other front paw.

75.8. Place Simba in front of you, with his head at the left. Find the bars on the bottoms of the legs. Rotate one paw so the toes are on the left and the clip is on top. Attach the clip to the bar on the bottom of the leg. Repeat with the other paw.

Open bag 4.

Open group 11.

76. Now we'll make Simba's back legs! Set the rest of Simba aside for now. Place a bright orange 1x6 plate horizontally in front of you.

77.1. Place a bright orange 1x2 plate with a bar on one short side, horizontally with the bar on the left, on the left two studs on the previous piece.

77.2. Place an orange 1x4 plate, horizontally, to the right of the previous piece.

78.1. Place a bright orange 1x1 brick on the rightmost stud of the previous piece.

78.2. Place a light gray 1x2 plate with a tow ball on one long side, horizontally with the tow ball at the back, to the left of the previous piece.

78.3. Place a bright orange 1x3 slope brick, horizontally with the slope on the left, to the left of the previous piece.

79. Place an orange 1x2 brick with two studs on one side, horizontally with the side studs at the front, to the right of the previous piece. There should only be four free studs on top of the leg.

80. Place a bright orange 1x4 double curved slope tile, horizontally, on the four studs on the leg.

81. Place the top row of a bright orange 2x4 tile with rounded ends, horizontally, on the two side studs on the front of the leg. The right side of this piece should be even with the right side of the leg.

82. Place a bright orange 1x3 double inverted slope, horizontally, on the left three anti-stud on the bottom of the leg.

83. Place Simba in front of you with the head at the left. Find the right tow ball socket on the front side. Find the tow ball on the back side of the leg and push it into this tow ball socket. Rotate the leg so it points down. The anti-stud on the leg should be on the right.

Open group 12.

84. Only one more leg to go! Set the rest of Simba aside for now. Place a bright orange 1x6 plate horizontally in front of you.

85.1. Place a bright orange 1x2 plate with a bar on one short side, horizontally with the bar on the right, on the right two studs on the previous piece.

85.2. Place an orange 1x4 plate, horizontally, to the left of the previous piece.

86.1. Place a bright orange 1x1 brick on the leftmost stud of the previous piece.

86.2. Place a light gray 1x2 plate with a tow ball on one long side, horizontally with the tow ball at the back, to the right of the previous piece.

86.3. Place a bright orange 1x3 slope brick, horizontally with the slope on the right, to the right of the previous piece.

87. Place an orange 1x2 brick with two studs on one side, horizontally with the side studs at the front, to the left of the previous piece. There should only be four free studs on top of the leg.

88. Place a bright orange 1x4 double curved slope tile, horizontally, on the four studs on the leg.

89. Place the top row of a bright orange 2x4 tile with rounded ends, horizontally, on the two side studs on the front of the leg. The left side of this piece should be even with the left side of the leg.

90. Place a bright orange 1x3 double inverted slope, horizontally, on the right three anti-stud on the bottom of the leg.

91. Place Simba in front of you with the head at the right. Find the left tow ball socket on the front side. Find the tow ball on the back side of the leg and push it into this tow ball socket. Rotate the leg so it points down. The anti-stud on the leg should be on the left.

Open group 13

92.1. Now we'll build Simba's back paws. Set the rest of Simba aside. Place an orange 1x3 double inverted slope brick horizontally in front of you.

92.2. Place a tan 1x1 plate with a vertical clip on one side, centered horizontally with the clip at the front, on the previous piece.

92.3. Place a bright orange 1x1 plate to the left and right of the previous piece.

92.4. Place a bright orange 1x3 plate, horizontally, on top of the paw.

92.5. Place a bright orange 1x1 plate, centered horizontally, on the previous piece.

92.6. Place three tan 1x1 double curved slope tiles, with the flat sides at the front and back, on the three studs on the paw. These are Simba's toes!

92.7. Repeat steps 92.1-92.6 to make Simba's other front paw.

92.8. Place Simba in front of you, with his head at the left. Find the bars on the bottoms of the back legs. Rotate one paw so the toes are on the left and the clip is on top. Attach the clip to the bar on the bottom of the leg. Repeat with the other paw. Now Simba is complete! Set him aside for now.

Sub-build: Leaf with bugs

Open group 14.

93. Place a green 4x4 round plate in front of you.

94. Place a dark green 1x2 jumper plate, vertically and centered vertically, on the second column from the left on the previous piece. Place another to the right of the first.

95.1. Find a dark green 1x2 left wedge curved slope tile. This looks like a regular 1x2 curved slope tile, except the sloped end comes to a point. There are left and right versions of this piece, to determine which one you have, place it in front of you with the smooth side on top and the long side at the back. If the point is on the left, it is a left wedge slope tile. Place this piece, horizontally with the point at the left, to the left of the front row of the two pieces from the previous step.

95.2. Place a dark green 1x2 right wedge curved slope tile symmetrically behind the previous piece.

95.3. Repeat 95.1-95.2 symmetrically on the right side.

96.1. Place two red 1x1 round tiles with a ladybug pattern on the studs on the front row.

96.2. Place a dark green 1x1 tile with a clip, oriented so the clip looks like a letter U when viewed from the side, on the right stud on the back row.

97.1. Now we'll add a couple of grubs! Place a light brown hotdog into the clip of the previous piece. This looks like a big worm! Yummy!

97.2. Place a pink croissant on the left 1x2 jumper plate. This is another grub.

98.1. Now we'll build a tiny snail. Place a lime green 1x1 plate with a stud sticking up from one side, with the side stud at the front, in front of you.

98.2. Make the snail's antenna by pushing the short bar on a lime green pair of cherries, with the cherries on top, into the hollow side stud of the previous piece.

98.3. Make the snail's shell by placing a purple double curved slope tile, with the flat sides at the left and right, on the upright stud on the 1x1 plate with a stud sticking up.

98.4. Place the completed snail on the 1x2 jumper plate to the right of the croissant.

Congratulations! Now Simba the Lion King Cub is complete!

Thank you so much for building this set!

Visit [bricksfortheblind.org](http://bricksfortheblind.org) for more accessible instructions, sign up for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

There are two pages of ads after the instructions end.

The first page has two sets on it. The first set is set number 43240, Maleficent's Dragon Form. This includes a large purple and black dragon, a pink and blue castle, Aurora and Prince Philip. The second set is 43244, Elsa's Ice Palace. This includes a giant ice castle, Elsa, Anna, Kristoff, and Olaf, as well a sled and a baby reindeer!

The second page has three sets on it. The first is set number 43245, The Magical Madrigal House from the movie Encanto. This includes the colorful Madrigal house, as well as a bunch of members of the Madrigal family! The second set is this set, set number 43245, Simba the Lion King Cub. The third set is set number 43276, Snow White's Jewelry Box. This set looks like a red jewelry box, which is held closed by a golden dagger. It can open to display scenes from the story! Also included are Snow White, the Evil Queen, as well as a bracelet which can be decorated however you like!
