

60425 Jungle Explorer Water Plane

Adapted by John Le and tested by Jolene Nemeth

Surprise your little adventurer with this LEGO® City Jungle Explorer Water Plane (60425) playset for ages 6 and up, featuring a toy seaplane and a jungle cave setting. There are also 2 explorer minifigures, a frog figure, and 3 crocodile action figures, including a baby croc, for imaginative play and storytelling.

What's in the box? – This creative building toy includes a LEGO® seaplane, jungle cave setting, photographer and LEGO pilot minifigures, a frog figure, and 3 crocodile action figures.

A building toy for kids who love imaginative play – Kids enjoy a fun build before joining the photographer and pilot aboard the toy plane for exciting crocodile safari adventures.

Explorer toy with fun accessories – This kids 'playset comes with LEGO® minifigure accessories for pretend play, including a camera and a printed map element.

Dimensions – The airplane in this 177-piece LEGO® City set measures over 3 in. (8 cm) high, 7 in. (18 cm) long and 6 in. (16 cm) wide.

The front of the box shows the jungle water explorer plane flying over a huge lake. The pilot just dropped off a photographer and is now waving bye to her! The photographer is down below taking pictures of 2 huge crocodiles and 1 small baby crocodile in their jungle habitat!

The back of the box shows the water plane parked on the water. The pilot has a wrench to fix his plane! The photographer is on top of the wings of the plane and is taking pictures of the crocodiles. The baby crocodile is swimming in the water. One huge crocodile is right behind the baby with their mouth wide open and a frog on their back! And one is hiding under a rocky area covered by plants.

The top of the box shows 2 crocodiles with their baby. And it shows the pilot and photographer taking a picture of a cute little frog!

The build is 177 pieces in total and is for ages 6+.

Bag 1 includes the pieces for the explorer minifigure, the jungle habitat, and the 3 crocodiles.

Bag 2 includes the pieces for the pilot minifigure and part of the sea plane.

Bag 3 includes the pieces for the rest of the sea plane.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.

- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/60425>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1,2 and 3, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Explorer, Crocodiles, and Jungle Habitat
 Group 1 - Pages 5-7.
 Group 2 - Steps 1-10.
 Group 3 - Steps 11-18.

Bag 2 - Pilot and Sea Plane

Group 4 - Page 3.

Group 5 - Steps 1-9.

Group 6 - Steps 10-19 and 2 dark blue 2x2 triangle tiles from Steps 20-21.

Group 7 - 1 orange 2x2 triangle tile and 1 orange 2x4 sloped curved tile from Steps 20-22.

Group 8 - 1 white 2x2 triangle tile and 1 white 2x4 sloped curved tile from Steps 20-22 and Steps 23-25.

Group 9 - 2 dark blue 2x2 triangle tiles from Step 26.

Group 10 - 1 orange 2x2 triangle tile and 1 orange 2x4 sloped curved tile from Steps 26-27.

Group 11 - 1 white 2x2 triangle tile and 1 white 2x4 sloped curved tile from Steps 26-27.

Group 12 - Steps 28-29 and 1 transparent red 1x1 round tile from Step 30.

Group 13 - Rest of Step 30 and Steps 31-33.

Bag 3 - Sea Plane

Group 14 - Steps 34-43.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Explorer Minifigure and Crocodiles

Sub-build 1. Locate 1 dark blue pair of legs, 1 torso printed with a tan vest over an orange shirt, 1 yellow head printed with freckles, lipstick, and a smirk, and 1 light brown hair. Assemble your minifigure and put her in front of you.

Sub-build 2. Locate 1 black camera, 1 black 1x1 round tile with a small bar facing up, and 1 black 1x1 cone brick. Place the 1x1 round tile on top of the stud of the camera so the bar faces the front. Then insert the stud side of the cone brick into the bar to make the camera! Now put it in her hand!

Sub-build 3. Put a gold and dark blue 1x1 round tile printed with a compass in her other hand! Also, put a small crocodile next to her!

Sub-build 4. Let's make a crocodile! Horizontally place a dark green crocodile base in front of you so the teeth of the jaw face the left. Now attach the dark green upper jaw to the leftmost side so the teeth align with the teeth of the lower jaw. Make sure they click into place! Then flip your crocodile over so the jaw faces the left. Now attach a dark green tail to the rightmost side by pushing it into place.

Sub-build 5. Now insert the pin side of a red 1L pin with a stud into the hole that connects the tail! Now repeat the steps to make a crocodile so you have 2 in total! Put them away after so we can build the habitat!

Group 2 - Jungle Habitat

1. Horizontally place a dark tan 2x8 plate in front of you. Then horizontally place a light grey 1x2 brick with a bar on the back right corner so the bar faces the right.

2. Then horizontally place a transparent light blue 1x4 tile to the left of the previous brick. Then place a transparent light blue 2x2 tile with a stud in front of the left 2 columns of the 1x4 tile so it overhangs to the front.

3. Place a light grey 1x1 brick with a clip on the back left corner of the build so the clip faces the left. Then place a mint green 1x1 brick to the right.
4. Horizontally place a dark tan 4x8 plate with a round side in the front underneath the overhang so it is centered horizontally, and the round side faces the front.
5. Place a transparent light blue 2x2 tile with a stud to the right of the previous 2x2 tile with a stud. Then place a light grey 1x1 round tile to the right of the back row of this tile. Then repeat symmetrically to the left.
6. Place a light grey 2x2 corner tile with a cutoff corner on the 2 leftmost and 2 rightmost columns next to the previous 1x1 round tile so they surround it. The left one should look like the braille letter h and the right one should look like the braille letter j.
7. Place a dark grey 2x2 round tile with a stud in front of the left corner tile and a 2x2 tile with a stud. There should not be any overhang. Place a light grey 1x1 round tile to the right of the front row of the previous tile. Then place another 1 on the front row on the right stud. Then place another 1 to the right so it sits in front of the right column of the 2x2 tile with a stud.
8. Horizontally place a dark tan 1x2 brick with 2 side studs on the back left and back right corners of the build so the side studs face the front.
9. Horizontally place a dark grey 1x6 arch brick on the back row so it is centered horizontally. Then place a dark green 1x1 slope tile to the left and right so the left one slopes to the left and the right one slopes to the front.
10. Horizontally place a light grey 1x6 plate on the back row so it is centered on top of the arch brick.

Group 3 - Jungle Habitat

11. Horizontally place a brown 1x2 plate with a clip on the long side on top of the previous plate so it is centered horizontally and the clip faces the front. Then horizontally place a mint green 1x2 rounded plate to the left and right.
12. Locate 1 dark grey 2x4 sloped angled brick. Make sure when it is vertically upright, the angled part is on the left. Now vertically place it upright on the left 2 front-facing side studs so it slopes up to the back. Then repeat symmetrically to the right.
13. Place a dark green 1x1 slope tile upright on the front-facing stud of the previous left brick so it slopes up to the back. Then repeat symmetrically to the right but now make it slope back to the right.
14. Place a lime green frog on the 2x2 round tile with a stud that is in the front left so it faces the front.
15. Horizontally place a light grey 1x4 slope brick on the back row so it is centered and slopes to the right.
16. Let's make a part! Horizontally place a dark tan 1x2 plate with a bar in front of you so the bar faces the left. Then horizontally place a large green leaf with 2 studs and a clip on top of the plate so the clip

sits on top of the bar of the 1x2 plate. Now vertically attach the bar to the front-facing clip that is underneath the slope brick you placed so the leaves face the front. Push down on it sits diagonally.

17.1. Let's make a part! Horizontally place a brown curved thick bar in front of you so the stud is on the left. Place the middle stud of a large dark green leaf on top of the stud of the curved bar. This piece has a branch with 5 studs, 2 branches with 1 stud, and 2 more branches with 3 studs. Orient the leaf so the branch with 5 studs faces the left.

17.2. Insert a brown bar with 3 small tips into the middle stud of the dark green leaf. This is a little branch!

17.3. Insert the bar of the brown curved thick bar into the stud of the rounded plate that is on the back row to the left of the 1x4 slope brick so the large dark green leaf is horizontal. Now place a green 1x1 round plate with 3 leaves on the back right stud of the large dark green leaf so the leaves face the back right. This is the middle stud of the branch with 3 studs. Then place 1 in the front middle stud of the large dark green leaf so the leaves face the front. This is the branch with 1 stud. Then place 1 on the back left corner so the leaves face the back left. This is the branch that is in the back and to the right of the leftmost stud.

18. Place a light orange 1x1 flower plate on top of a green 1x1 round plate with 3 leaves. Repeat this again so you have 2 parts in total. Now place 1 part on top of the 1x4 slope brick so the leaves face the front. Then place 1 to the right so the leaves face the back right corner.

Building Instructions (Bag 2, Book 2):

Group 4 - Pilot Minifigure

Sub-build 6. Locate 1 dark tan pair of legs printed with pockets, 1 torso printed with a dark brown jacket over a red and white shirt, 1 yellow head with an orange beard and mustache, 1 brown helmet, 1 dark grey pair of goggles, 1 black wrench, and 1 white 2x2 tile printed with a map of a river and grassland. Assemble your minifigure, attach the goggles to the sides of the helmet, then put it on him, then put the map and wrench in his hands!

Group 5 - Sea Plane

1. Horizontally place a black 4x6 inverted angled sloped curved plate in front of you so the short side faces the right.

2. Vertically place a red 1x2 brick with an axle hole on the rightmost column of the 2x4 lower stud area. Then horizontally place a light grey 2x2 plate with angled sides to the right so the sides align with the previous plate.

3. Place a black 2x2 slope brick to the left of the 1x2 brick so it slopes to the left. Then place a light brown 2x2 tile with 2 studs to the left so the studs are on the right and it overhangs to the left.

4. Vertically place a black 1x4 plate with inverted slope sides underneath the overhang so it is centered vertically.

5. Horizontally place a dark grey 2x8 plate underneath the left side of the build so it is centered vertically and there are 5 columns of stud exposed. Then place an orange 2x2 plate on the 2 rightmost column of the 2x8 plate's exposed 5 columns.

6. Vertically place a black 1x4 plate with inverted slope sides to the left of the previous plate so it is centered vertically.

7. Vertically place a dark grey 1x2 tile with a bar overhead to the left of the 2x2 tile with 2 studs so the bar is on the left. Then place a light brown 2x2 tile with 2 studs to the left so the studs are on the right.

8.1. Let's make a part! Horizontally place a black 4x6 inverted angled sloped curved plate in front of you so the short side faces the left.

8.2. Horizontally place a nougat 2x4 brick in the 2x4 lower stud area of the plate. Then horizontally place a light grey 2x2 plate with angled sides to the left so the sides align with the previous plate.

8.3. Now place your part horizontally on the 2 leftmost columns of the main build so the short side faces the left. Make sure it is centered vertically!

9. Horizontally place a light grey 1x8 tile on the front and back rows so they are centered horizontally.

Group 6 - Sea Plane

10.1. Let's make a part! Horizontally place an orange 2x4 plate in front of you. Vertically place a red 1x2 brick with an axle hole on the rightmost column of the plate.

10.2. Vertically place 2 lime green 1x2 bricks with holes next to each other to the left of the previous brick.

10.3. Then vertically place a nougat 1x2 brick with a side stud to the left so the side stud faces the left. Then vertically attach a 1x1 round plate with a bar to the left-facing side stud so the bar faces up.

10.4. Horizontally place your part on the rightmost 4 columns of the build so it is centered vertically and the upright bar is on the left.

11. Horizontally place 2 black 1x2 plates with 2x2 side studs below the plate next to each other on the front row of the part you previously placed so the side studs face the front. Then repeat symmetrically to the back.

12. Horizontally place 1 dark tan 1x2 plate with 2x2 side studs above the plate on the front stud row on the 5th and 6th columns from the left so the side studs face the front. Then repeat symmetrically to the back. Now vertically place a black 1x2 slope tile on the right column in between the 2 sets of side studs so it slopes to the right.

13. Vertically place a light grey 1x2 panel to the left of the previous slope tile so the wall faces the right.

14. Horizontally place an orange 2x4 plate on the 4 leftmost columns so it is centered vertically. Then horizontally place a light grey 2x3 brick on the right 3 columns of the previous plate so it is also centered vertically.

15.1. Let's make a part! Horizontally place an orange 1x4 inverted sloped curved plate in front of you so the curve faces the left. Then place an orange 2x2 plate on the 2 rightmost columns so it overhangs to the front.

15.2. Horizontally place an orange 1x4 inverted sloped curved plate underneath the overhang so the curve aligns with the previous curve.

15.3. Horizontally place an orange 2x4 plate on top so it is centered. Now horizontally place your part on the leftmost column so it sits to the left of the 2x3 brick.

16. Horizontally place a black 1x2 plate with 2x2 side studs below the plate on the front row of the right 2 columns of the 2x3 brick. Then horizontally place another 1 to the left. Then repeat symmetrically to the back. Now there should be 2x6 side studs in the front and back!

17. Horizontally place an orange 2x4 plate upright on the front-facing 2x6 side studs on the 4 right columns. Then repeat symmetrically to the back. Now vertically place a white 1x2 plate upright on the leftmost column of the rightmost front-facing 2x4 set of side studs. Then repeat symmetrically to the back.

18. Let's make a part! Horizontally place a light grey 2x10 plate in front of you. Then place a black 1x2 hinge with 1x2 plate in the center of the plate so the hinge faces the front.

19. Horizontally place a black 1x2 slope tile on the back row of the previous 1x2 plate with a hinge so it slopes to the front. Then vertically place a dark grey 1x2 tile to the left and right.

20.1. Place a dark blue 2x2 triangle tile to the right of the right 1x2 tile so the right angle is in the front left. Then place another 1 to the left of the left 1x2 tile so the right angle is in the back right corner.

Group 7 - Sea Plane

20.2. Place an orange 2x2 triangle tile in front of the left triangle tile so the right angle is in the front left.

You will have an extra orange 2x4 sloped curved tile. Save it for later.

Group 8 - Sea Plane

20.3. Place a white 2x2 triangle tile behind the rightmost triangle tile so the right angle is in the front right. The leftmost and rightmost column of the 2x10 plate should be free!

21. Now horizontally place your part upright on the front-facing side studs of the right 3 columns of the 2x4 plate and 1x2 plate. It should not overhang to the right of the 1x2 plate.

22. Horizontally place a white 2x4 sloped curved tile upright on the rightmost column of your previous part so it slopes back and to the right. Then repeat symmetrically to the left but using an orange 2x4 sloped curved tile from group 7.

23. Insert a black bar into a black axle connector with a hinge connector. Now vertically attach the hinge connector to the front-facing pin that is centered on your previous part.

24. Let's make another part! Horizontally place a light grey 2x10 plate in front of you. Then place a black 1x2 hinge with 1x2 plate in the center of the plate so the hinge faces the front.

25. Horizontally place a black 1x2 slope tile on the back row of the previous 1x2 plate with a hinge so it slopes to the front. Then vertically place a dark grey 1x2 tile to the left and right.

Group 9 - Sea Plane

26.1. Place a dark blue 2x2 triangle tile to the right of the right 1x2 tile so the right angle is in the back left. Then place another 1 to the left of the left 1x2 tile so the right angle is in the front right.

Group 10 - Sea Plane

26.2. Place an orange 2x2 triangle tile in front of the rightmost triangle tile so the right angle is in the front right.

You will have an extra orange 2x4 sloped curved tile. Save it for later.

Group 11 - Sea Plane

26.3. Place a white 2x2 triangle tile behind the left triangle tile so the right angle is in the front left. The leftmost and rightmost columns of the 2x10 plate should be free.

26.4. Rotate your build 180 degrees. Now horizontally place your part upright on the front-facing side studs so it sits on the left 3 columns of the 2x4 plate and 1x2 plate.

27. Horizontally place a white 2x4 sloped curved tile upright on the leftmost column of your previous part so it slopes back and to the left. Then repeat symmetrically to the right but using an orange 2x4 sloped curved tile from group 10.

Group 12 - Sea Plane

28. Insert a black bar into a black axle connector with a hinge connector. Now vertically attach the hinge connector to the front-facing pin that is centered on your previous part.

29. Place a black 1x1 round plate with a bar on the front row on the 3rd column from the right so the bar faces the front right. Then repeat symmetrically to the back.

You will have an extra transparent red 1x1 round tile. Save it for later.

Group 13 - Sea Plane

30. Vertically place a black 2x4 angled plate on the back row of the 2 rightmost columns so it overhangs 3 rows to the back, the angled side faces the left, and the short end faces the back. There are 2 different versions of this plate, (a left one, and a right one) so make sure it is the right one! Now repeat symmetrically to the front. Then place a transparent green 1x1 round tile on the back stud of the back 2x4 angled plate. Then repeat symmetrically to the front using a transparent red 1x1 round tile from group 12.

31. Horizontally place an orange 2x3 plane tail end printed with a dark blue and blue globe on the center of the 3 rightmost columns of the build so the tail faces the right. Then horizontally place an orange 2x3 tile to the left.

32. Let's make a part! Place an orange 2x2 plate in front of you. Then horizontally place a white 1x4 sloped curved tile on the back row. Then place 2 white 2x2 angled sloped curved tiles on the front row so they curve to the front middle. There are 2 different versions of this tile so make sure they are in the right place! Now vertically place your part on the 2 leftmost columns of the build so the curved parts face the left and it is centered vertically.

33.1. Let's make a part! Place a light grey 2x2 plate surrounded by 8 bars in front of you. Then place a dark grey 2x2 round tile with a hole on top of the previous plate.

33.2. Insert the axle side of a white 2L axle with 1L pin into the top of the hole.

33.3. Attach the hole of a black propeller with 3 blades to the top 1L pin.

33.4. Now attach the axle underneath the part upright to the left-facing axle hole.

Building Instructions (Bag 3, Book 2):

Group 14 - Sea Plane

34. Horizontally place a transparent 4x5 windshield to the right of the white 1x4 sloped curved tile so it slopes to the left. Then horizontally place another 1 to the right so it slopes to the right.

35. Now we'll attach the wings to the plane. Vertically place a dark blue 4x10 angled plate on the front row in between the 2 previous windshields so the angled part faces the front, the plate should overhang to the front. Then repeat symmetrically to the back. There should be a 2x4 gap in between them.

36. Horizontally place a white 4x6 sloped curved roof tile with 4 studs on top of the 2 previous plates and windshields so it is centered.

37. Let's make a part! Horizontally place a black 4x10 plate upside down in front of you. Then vertically place an orange 2x6 inverted sloped angled curved brick upside down on the back left 2x2 corner so it slopes to the back. There are 2 different versions of this brick. Make sure the angled part is on the left and slopes to the back, if it is not, try a different brick.

38. Repeat the previous step symmetrically to the front so the angled part is on the left and it slopes to the front. Now horizontally place a dark grey 2x3 inverted slope brick upside down to the right so it slopes to the right and is centered vertically.

39. Now repeat steps 37-38 symmetrically to the right.

40. Flip your build over so the 4x10 plate is vertical. Now horizontally place a black 2x4 angled plate on top of each of the corners so they sit on the 2x6 bricks. Make sure the angled plates align with the angled sloped curved bricks and do not overhang.

41. Horizontally place 2 dark green 1x6 tiles, 1 to the right of the other, on the 2nd row from the front so there is no overhang. Then repeat symmetrically to the back.

42. Place a dark grey 2x2 plate behind the front 2 tiles so it is centered horizontally. Then repeat symmetrically to the back.

43. Place a black 2x2 slope brick on top of each of the 2x2 plates so they slope outwards.

44. Now place your plane on top of your part. Make sure it goes in between the 2 slope bricks and is centered. Also, make sure the 2x2 slope bricks sit underneath the hinge connectors with a long bar in them. Then, push up on the long bars so they hold up the wings!

Now you can remove the windshield and wings and put in your pilot!

Thank you so much for building this set!

Visit bricksfortheblind.org for more accessible instructions, sign up for our newsletter, and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.
