

76272 The Batcave with Batman, Batgirl and The Joker

Adapted by John Le and tested by Jolene Nemeth

More than just a Batcave playset, this awesome toy also includes 3 minifigures – Batman, Batgirl, and The Joker – a Batwing™ aircraft with folding wings, a push-along car, disc launcher, jail room, and fun accessories including a glow-in-the-dark spider. Hands-on features include a flip-switch catapult and 'exploding' jail doors. The set comes with a chassis Starter Brick to help kids get building underway. Intuitive instructions are provided in the form of a colorful picture-story guide. For added digital fun, builders can zoom in, rotate models in 3D, and track their progress using the fun, intuitive LEGO Builder app. This creative toy is a great LEGO Batman gift for kids and budding superheroes.

Batcave™ adventure toy for kids – The Batcave with Batman™, Batgirl™ & The Joker™ is packed with play scenarios to engage and entertain boys and girls aged 4 and up.

Super-hero toys and figures – Includes a buildable car, Batwing™ aircraft, and LEGO® Batman™, Batgirl™ and The Joker™ minifigures, plus a large chassis Starter Brick to make building quick and fun.

Batman™ themed creative toy – The Batcave™ toy's flip-switch catapult, 'exploding' jail doors, disc launcher, and authentic accessories make this an endlessly inspiring gift for kids.

Fun Batman™ collectables – Accessories include a Batarang™, hot dog, and a glow-in-the-dark spider that glimmers in the dark prison cell.

Big LEGO® Batman™ set for ages 4+ – This toy has 184 pieces and the Batcave™ measures over 4 in. (11 cm) high, 5 in. (13 cm) wide and 2.5 in. (6 cm) deep.

The front of the box shows the Batcave in the back equipped with a screen with an alert of Joker, and a prison to the right for when they catch Joker! To the right, Batgirl is in her aircraft chasing after Joker in his car! A bunch of gems and money is falling out of his car as he goes! To the left, Batman is hiding behind some cover shooting disks at Joker and getting ready to grapple him!

The back of the box shows all the things that the set comes with. It comes with 3 minifigures, money, bat boomerangs, a grapple gun, a mug, a crystal, Joker's weapon, bat disks, Batman's cover, Joker's Car, and Batgirl's Aircraft, as well as the Batcave and Prison.

The top of the box shows a full-size image of Batman.

The build is 184 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Batman and the Batcave.

Bag 2 includes the pieces for Joker and his car.

Bag 3 includes the pieces for Batgirl and her aircraft.

Bag 4 includes the pieces for the jail cell.

Welcome to text-based instructions from Bricks for the Blind. Before you start building,

here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/76272>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 through 4, 4 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the

builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Batcave

Group 1 - Pages 6-7.

Group 2 - Pages 8-27.

Group 3 - Pages 28-29.

Group 4 - Pages 30-37.

Group 5 - Pages 38-43

Group 6 - Pages 44-53.

Group 7 - Pages 54-66.

Bag 2 - Joker and his Car

Group 8 - Pages 4-7.

Group 9 - Pages 8-35.

Bag 3 - Batgirl and Aircraft

Group 10 - Pages 4-7.

Group 11 - Pages 8-15.

Group 12 - Pages 16-43.

Group 13 - Pages 44-57.

Bag 4 - Jail Cell

Group 14 - Pages 4-29.

Group 15 - Pages 30-45.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Batman

6-7. Locate 1 black pair of legs, 1 black torso printed with a yellow oval and a black bat symbol over it, 1 black cape, 1 light tan head printed with a smirk, 1 black Batman mask, and 1 black Batarang. Assemble your minifigure making sure the cape is on his back, then put the Batarang in his hand! Also, make sure the mouth and eye holes of the mask face the front!

Group 2 - Batcave

8-9. Horizontally place a light grey 8x16 plate with 1x4 gaps in front of you.

10-11. Horizontally place 2 yellow 1x4 plates in the gaps on the back row. Then vertically place another 1 in the gap on the leftmost column. Then repeat symmetrically to the right.

12-13. Horizontally place a dark grey 1x4x6 door frame on the back left corner so there is no overhang. Then repeat symmetrically to the right.

14-15. Horizontally place 2 yellow 2x4 bricks, 1 to the left of the other, on the back 2 rows in between the 2 door frames.

16-17. Horizontally place a brown 1x2 jumper plate in front of the left door frame so it is centered horizontally to it. Then repeat symmetrically to the right.

18-19. Horizontally place a dark grey 2x4x6 rock formation in front of the left door frame so the rock side faces the front. Then repeat symmetrically to the right.

20-21. Place a light grey 1x1 brick on the leftmost and rightmost columns of each of the previous rock formations.

22-23. Horizontally place a yellow 2x8x6 window frame on top of the 2 2x4 bricks on the back row so the window frame side faces the back.

24-25. Horizontally place a dark blue 1x6 brick on the front row of the 2x4 bricks so it is centered between the window frame.

26-27. Horizontally place a transparent light blue 1x6x5 panel printed with an alert about Joker, his whereabouts, and a picture of his car on top of the previous 1x6 brick so the wall side faces the front.

Group 3 - Batcave

28-29. Horizontally place a dark blue 2x4 brick on the back left corner of the build. Then repeat symmetrically to the right.

Group 4 - Batcave

30-31. Place a dark grey 2x2 slope brick on the back left corner of the build so it slopes to the left. Then horizontally place a dark grey 2x4 brick to the right. Now repeat symmetrically to the right.

32-33. Horizontally place a dark grey 1x4 brick with side studs on the back row so it is centered between the 2 2x4 bricks and the side studs face the back. Then horizontally place another 1 in front so the side studs face the front.

34-35. Horizontally place a dark grey 2x4 brick on the back 2 rows so it is centered horizontally. Then place a dark grey 2x2 slope brick to the left and right so they slope outwards.

36-37. Horizontally place a light grey 2x2 tile with a stud on top of the previous 2x4 brick so it is centered horizontally. Then horizontally place a black 2x4 rounded tile printed with a yellow oval and bat symbol over it on the front-facing side studs below the previous 2x2 tile you placed so it is centered horizontally.

Group 5 - Batcave

38-39. Horizontally place a black bat statue on top of the 2x2 tile with a stud so it faces the front.

40-41. Vertically place a green 1x2 brick on the leftmost column in front of the rock formation. Then place a yellow 2x2 brick with a pin to the right so the pin faces the front. Then vertically place another green 1x2 brick to the right.

42-43. Place 2 green 2x2 tiles with a stud on top of the previous 3 bricks so there is no overhang.

Group 6 - Batcave

44-45. Horizontally place a green 1x2 tile printed with money on the left 2x2 tile with a stud. Then place a transparent light green crystal on the right 2x2 tile with a stud.

46-47. Let's make a part! Horizontally place a black 2x4 plate with a hole underneath in front of you. Place a light grey 2x2 tile with a stud on the left 2 columns of the plate. Then horizontally place a black 1x2 panel with 3 walls on the back right corner so the long wall faces the back. Then repeat symmetrically to the front.

48-49. Horizontally attach the back hole of your part to the front-facing pin that is on the left side of the build.

50-51. Insert a green 1x2 tile printed with money in the center of the 2 previous panels. It should not attach to any studs.

52-53. Horizontally place a dark blue 2x4 brick in front of the 1x6x5 panel with the Joker's information so it is centered horizontally between the front rows of the rock formations.

Group 6 - Batcave

54-55. Horizontally place a dark grey 1x2 slope tile printed with buttons on the back row of the previous 2x4 brick so it slopes to the front and is centered horizontally. Then horizontally place a black 1x2 tile printed with a keyboard in front of the previous slope tile.

56-57. Place a red mug to the right of the previous keyboard tile so the handle faces the front. Horizontally place a dark blue 2x2 chair in front of the keyboard tile so there is a free row in between them and the back of the chair faces the front.

58-59. Horizontally place a black 1x2 plate with a clip on the short side on the 2 rightmost columns in front of the rock formation so the clip faces the right.

60-61. Place a dark blue 2x2 container to the left of the previous plate so it sits in front of the rock formation. Then vertically place a light grey 2x3 sloped curved tile on top of the 1x2 plate with a clip so it slopes to the front.

62-63. Place a black Batarang inside the container.

64-66. Now put Batman in your Batcave so he can track down Joker!

Building Instructions (Bag 2, Book 2):

Group 8 - The Joker

4-5. Locate a purple pair of legs, 1 torso printed with a purple suit with an orange flower over a green top, 1 white head printed with a scary smile with red lipstick and green eyebrows, and 1 green hair. Assemble your minifigure and put him in front of you.

6-7. Place a white gun in front of you so the handle faces the left. Then attach a light green 1x1 bubbles to the right-facing side stud of the gun. Now attach the gun to your minifigure's hand!

Group 9 - Joker's Car

8-9. Horizontally place a purple 4x10 car base with arches and pins in front of you.

10-11. Insert 4 gold wheels into 4 black tires.

12-13. Insert the wheels into the front-facing and back-facing pins that are underneath the arches of the car base so the concave side of the wheel faces inward.

14-15. Horizontally place a white 2x4 tile printed with a smile with red lipstick on the left-facing side studs of the car-base so there is no overhang.

16-17. Vertically place a white 1x2 tile with an overhead bar on the rightmost column of the 2x6 gap in the car so the bar faces the right. Then place a white 2x2 tile with 2 studs to the left so the studs are on the left.

18-19. Vertically place a white 1x2 steering wheel to the left of the previous tile so the wheel faces the right. Then place a white 2x2 brick to the left.

20-21. Place a green 4x4 car hood with 2 studs on the 4 leftmost columns so the studs are on the right.

22-23. Horizontally place a green 1x4 plate on the front row to the right of the previous car hood. Then repeat symmetrically to the back. Then vertically place a transparent red 1x2 plate to the right of the previous plates so it is centered vertically on the build.

24-25. Horizontally place a green 1x3 sloped curved brick on the back right corner of the build so it slopes to the right and does not overhang. Then repeat symmetrically to the front.

26-27. Place a white 2x2 sloped curved tile on top of the previous transparent red 1x2 plate so it slopes to the right. It should not overhang.

28-29. Rotate your build 90 degrees clockwise so the backend of the car faces the front. Now vertically place a transparent red 1x2 plate upright on the leftmost and rightmost columns of the front-facing side studs. Then place a white 2x2 tile with 2 studs upright in between so the 2 studs are at the bottom.

30-31. Rotate your build 90 degrees counterclockwise so the backend of the car faces the right. Now vertically place a white 1x1 plate with a 1x1 double-sided stud on the front row to the right of the car hood so the double-sided stud faces the front. Then repeat symmetrically to the back.

32-33. Vertically place a transparent 2x4 curved windshield on top of the car hood and previous 1x1 plates with doubled-sided studs so it slopes to the left.

34. Now put Joker inside the car so he can ride it!

Building Instructions (Bag 3, Book 3):

Group 10 - Batgirl

4-5. Locate 1 light grey pair of legs, 1 light grey torso printed with a yellow belt, a yellow oval on her chest with a bat over it, 1 black and blue cape, 1 light tan head printed with a light blue eye mask, and 1 light brown hair. Assemble your minifigure, making sure the blue side of the cape faces toward the minifigure.

6-7. Insert the bar of a dark grey grapple hook into the inverted cone side of a black megaphone. This is a grapple gun! Now attach the gun to the minifigure's hand! Now put her aside while we build her aircraft!

Group 11 - Batman's Disk-shooter

8-9. Horizontally place a light grey 4x6 plate in front of you. Then horizontally place 2 yellow 1x2 tiles with an overhead bar on the back row so together they are centered horizontally and the bars face the front.

10-11. Horizontally place a black 2x6 brick in front of the previous tiles with a bar so there is no overhang. Then vertically place a yellow 1x2 slope brick on the leftmost and rightmost columns of the previous brick so they slope to the front. Then horizontally place a black 1x4 brick with a rectangular slot on the back row of the 2x6 brick so it is centered horizontally.

12-13. Horizontally place a yellow 1x6 tile on top of the previous slope bricks and brick with a slot so there is no overhang. Now locate 2 black 2x2 round tiles printed with a yellow oval and bat over it. Place them in front of your build!

14-15. You can insert these round tiles into the slot and shoot them out of the other side!

Group 12 - Batgirl's Aircraft

16-17. Horizontally place a dark grey 4x10 aircraft base with angled sides in front of you. Then vertically place a yellow 1x2 steering wheel on the leftmost column of the 2x4 gap so the wheel faces the right.

18-19. Place a yellow 2x2 tile with 2 studs to the right of the steering wheel so the studs are on the left. Then vertically place a yellow 1x2 tile with an overhead bar to the right so the bar faces the right.

20-21. Vertically place 2 dark blue 1x1 plates with a 1x1 double-sided stud on the leftmost column of the build so the double-sided studs face the front and back. Then repeat symmetrically to the right.

22-23. Vertically place a yellow 1x2 plate on top of the previous plates on the leftmost column. Then repeat symmetrically to the right.

24-25. Vertically place a yellow 2x2 plate with angled sides to the right of the leftmost 1x2 plate so the long side faces the right. There should not be any overhang. Then repeat symmetrically to the right.

26-27. Horizontally place a light grey 1x2 plate with a bar on the front row in between the 2 previous 2x2 plates with angled sides so it is centered horizontally and the bar faces the front. Then repeat symmetrically to the back.

28-29. Horizontally place a black 1x4 sloped curved tile on top of each of the previous 1x2 plates with a bar so they are centered horizontally.

30-31. Insert 2 transparent light orange fires upright to the right-facing side of the rightmost doubled-sided studs. Make sure they are flat.

32-33. Horizontally place a black 1x2 brick with a bar on the front row of the 2 rightmost columns so the bar faces the front. Then repeat symmetrically to the back.

34-35. Vertically place a black 1x2 slope brick on the front row to the left of the previous 1x2 brick with a bar so it slopes and overhangs to the front. Then repeat symmetrically to the back.

36-37. Horizontally place a dark blue 2x3 tile with an angled side on top of the bricks on the 3 rightmost columns so the angled side faces the right.

38-39. Vertically attach the clips of a black angled flag to the front-facing bar on the rightmost column so it is flat and the angled side faces the left. Then repeat symmetrically to the back.

40-41. Vertically place a black 3x4 sloped curved brick on the 3 leftmost columns of the build so the short end faces the left. There should not be any overhang.

42-43. Insert 2 black blades upright to the left-facing studs of the leftmost double-sided studs so they are flat.

Group 13 - Batgirl's Aircraft

44-45. Let's make a part! Horizontally place a black 4x8 plate with a rounded side in front of you so the rounded side faces the back. Then horizontally place a yellow 1x2 plate with 2 clips on the front row so it is centered horizontally and the clips face the front. Then place a black 2x2 round tile printed with a yellow oval and a bat over it on the back row so it is centered horizontally. Make sure the bat is vertical. Ask a sighted person to help!

46-47. Horizontally place a yellow 1x4 sloped curved tile on top of the 1x2 plate with clips so it is centered horizontally.

48-49. Attach the clips of your part to the back-facing bar located in the middle of the back row of the build!

50-51. Let's make another part! Horizontally place a black 4x8 plate with a rounded side in front of you so the rounded side faces the front. Then horizontally place a yellow 1x2 plate with 2 clips on the back row so it is centered horizontally and the clips face the back. Then place a black 2x2 round tile printed with a yellow oval and a bat over it on the front row so it is centered horizontally. Make sure the bat is vertical. Ask a sighted person to help!

52-53. Horizontally place a yellow 1x4 sloped curved tile on top of the 1x2 plate with clips so it is centered horizontally.

54-55. Attach the clips of your part to the front-facing bar located in the middle of the front row of the build!

56-57. Now put Batgirl into her aircraft so she can fly it!

Building Instructions (Bag 4, Book 4):

Group 14 - Jail Cell

4-5. Place a light grey 8x8 plate with a rounded side in front of you so the rounded side faces the front.

6-7. Horizontally place a dark grey 1x2 masonry brick with grooves on the back left corner so the horizontal groove faces the front. Then repeat symmetrically to the right.

8-9. Vertically place a dark grey 1x2 masonry brick on the leftmost column in front of the previous 1x2 brick so the horizontal groove faces the right. Then repeat symmetrically to the right.

10-11. Vertically place a dark tan 1x2 log brick to the right of the left vertical 1x2 brick. Then place a light grey 2x2 tile with a stud to the left of the right vertical 1x2 brick.

12-13. Vertically place a brown 1x2 jumper plate on top of the previous 1x2 log brick. Then place a white bowl on top of the 2x2 tile with a stud.

14-15. Place a transparent yellow 1x1 round plate on top of another 1. Then place them inside the previous white bowl.

16-17. Horizontally place a light grey 1x2 brick with a bar on the 2 leftmost columns in front of the previous pieces so the bar faces the left. Then repeat symmetrically to the right.

18-19. Horizontally place a dark grey 1x2 slope tile in front of the previous 1x2 bricks with a bar. Then horizontally place a dark blue 1x4 tile with 2 studs in between the previous slope tiles.

20-21. Horizontally place a yellow 1x2 grill tile in front of the 1x4 tile with 2 studs so it is centered horizontally. Then horizontally place another 1 on the front row so it is centered horizontally.

22-23. Vertically place a dark grey 2x4 rock formation in the back left corner of the build so the rock formation faces the left.

24-25. Place a red hotdog inside of a tan hotdog bread. Now vertically place this hotdog on the 1x2 jumper plate that is in the gap of the previous rock formation.

26-27. Vertically place another 2x4 rock formation in the back right corner of the build so the formation faces the right.

28-29. Horizontally place a dark grey 1x6 brick with holes on the back row of the build on top of the rock formations. Then horizontally place another 1 on the front row of the 2 previous 2x4 rock formations.

Group 15 - Jail Cell

30-31. Vertically place 1 dark blue 1x4 tile with 2 studs on the back left corner on top of the previous bricks and rock formation. Then repeat symmetrically to the right. Now place a dark blue 4x4 plate in between the previous 1x4 tiles with 2 studs.

32-33. Vertically place a yellow 2x4 tile with 2 studs on top of the previous pieces in the back left corner. Then repeat symmetrically to the right.

34-35. Insert a dark grey 8L axle with a stop into the front-facing middle hole of the front 1x6 brick with holes. Then push it all the way in so it overhangs to the back.

36-37. Now insert a 3L red axle connector to the back-facing overhang of the 8L axle.

38-39. Let's make a part! Horizontally place a yellow 1x4x6 door frame in front of you so the thicker inner sides face the back. Now insert a dark grey 1x4x6 prison bar door to the left side of the door so it opens to the left. Now horizontally place 2 dark grey 1x2 slope tiles on top so they slope to the front. Now place a yellow 1x1 round tile upright on the front-facing side stud of the door.

40-41. Horizontally place your part on top of the 1x4 tile with 2 studs that is in between 2 1x2 slope tiles.

42-43. Place a white spider on the rightmost stud on the 2nd row from the front of the build.

44-45. You can push on the back 3L axle connector to push the door out so the Joker can break out if he gets caught!

Thank you so much for building this set!
