

76287 Iron Man with Bike and The Hulk

Adapted by John Le and tested by Jolene Nemeth

The LEGO Marvel playset includes Iron Man and Incredible Hulk minifigures, plus Iron Man's buildable, push-along toy motorcycle and a buildable house. Kids activate a function to collapse the building (which happens a lot when Hulk is around!) and then rebuild it in time for Hulk's next outburst. The set comes with a vehicle-frame Starter Brick to help kids get building. Intuitive instructions are provided in the colorful picture-story guide. For added digital fun, builders can zoom in and rotate models using the intuitive LEGO Builder app.

Iron Man and Incredible Hulk buildable toy – This build-and-play LEGO® Marvel Iron Man with Bike and The Hulk playset for kids is especially designed for boys and girls aged 4 and up.

Super Hero set with minifigures – Includes Iron Man and Incredible Hulk minifigures, Iron Man's buildable, push-along toy motorcycle, a buildable house and fun accessories.

Hands-on adventure playset – Kids can activate a function to collapse the building (which happens a lot when Hulk is around!) and then rebuild it in time for Hulk's next outburst.

68-piece set for ages 4+ – The motorcycle measures over 1 in. (4 cm) high, 3 in. (9 cm) long and 1 in. (3 cm) wide; the house measures over 2 in. (6 cm) high, 2 in. (6 cm) wide and 1 in. (3 cm) deep.

The front of the box shows Hulk smashing down the wall. Iron Man is in the back of his bike trying to get him to stop destroying things!

The back of the box shows all the accessories that the set comes with. It comes with Hulk, Iron Man and his helmet, 2 bars, a trash can, motorcycle, wall, sausage, a donut, and a bottle!

The top of the box shows an actual-sized image of Iron Man.

The build is 68 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Iron Man and his bike.

Bag 2 includes the pieces for Hulk and the wall.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the

table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/76287>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bag labeled 1 and 2, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Iron Man and Bike

Group 1 - Pages 6-9.

Group 2 - Pages 10-43.

Bag 2 - Hulk and Wall

Group 3 - Pages 4-7.

Group 4 - Pages 8-25.

Group 5 - Pages 26-35.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Iron Man

6-9. Locate 1 dark red pair of legs printed with red and gold armor, 1 dark red torso printed with red and gold armor, and a light blue core, 1 tan head printed with a mustache and goatee, 1 black hair, and 1 dark red helmet printed with a gold faceshield. Assemble your minifigure and put him aside. Make sure the lower lip of the helmet faces the front! You can change his helmet for his hair if you like!

Group 2 - Motorcycle

10-11. Horizontally place a red 2x10 angled motorcycle base in front of you so the 4 side studs face the front.

12-13. Horizontally place a dark red 2x4 angled plate upright on the front-facing side studs so it is centered and the long side is on top and attaches to the side studs.

14-15. Let's make a part! Insert 2 gold wheels into 2 black tires.

16-17. Insert a yellow 2L pin into each side of the wheels. There should be 4 pins inserted in total!

18-19. Rotate your red 2x10 angled motorcycle base 180 degrees so the angled side faces the back. Now attach the 2 wheels underneath the left side and right side so the pins connect to the pin holes.

20-21. Horizontally attach a red 2x10 angled motorcycle base to the front-facing pins so the 4 side studs face the front.

22-23. Horizontally place a dark red 2x4 angled plate upright on the front-facing side studs so it is centered and the long side is on top and attaches to the side studs.

24-25. Vertically place a black 1x2 tile with an overhead bar on the 4th column from the right so it is centered vertically and the bar faces the right. Then place a black 2x2 tile with 2 studs to the left so the studs face the right. Then vertically place a gold 1x2 grill tile to the left.

26-27. Horizontally place a dark red 1x4 slope brick on the front row so it is centered horizontally and slopes to the right. Then repeat symmetrically to the back.

28-29. Vertically place a transparent red 1x2 plate on the rightmost column there is no overhang. Then place a gold 2x2 round tile to the left.

30-31. Horizontally place a red 1x2 plate with 2 clips in front of the previous 2x2 round tile so the clips face the front. It should only attach to 1 stud. Then repeat symmetrically to the back.

32-33. Vertically place a red 1x2 plate with 2 1x3 angled sloped curved sides on the rightmost column so it slopes to the left and is centered vertically.

34-35. Vertically place a gold 1x2 grill tile on the rightmost column so it sits on the previous plate. Then attach the right side of a transparent light blue bar to the front-facing 2 clips so it faces the left. Then repeat symmetrically to the back.

36-37. Vertically place a black 1x2 plate with a clip on the long side on the 3rd column from the left so it is centered vertically and the clip faces the right.

38-39. Horizontally place a dark red 2x3 sloped curved brick printed with a gold center and a light blue core with a triangle on it on the left 3 columns so it slopes to the left and is centered vertically.

40-41. Attach the bottom bar of the dark grey handlebars to the right-facing clip of your previous 1x2 plate so the handlebars face the right.

42-43. Now put Iron Man on the bike and attach his hands to the handlebars!

Building Instructions (Bag 2, Book 2):

Group 3 - Hulk and Trash

4-5. Locate 1 green pair of legs printed with purple shorts, 1 green torso printed with muscles, 1 green head printed with eyes, mouth, and eyebrows, and 1 black hair. Assemble your minifigure and put him in front of you.

6-7. Place a light green trash can in front of you. Then place a red hotdog, a transparent green bottle, and 1 light brown 1x1 round tile printed with a donut inside the trash can. Then attach it to Hulk's hand! Now put everything away while we build the wall!

Group 4 - Wall

8-9. Horizontally place a light grey 4x6 plate in front of you. Then horizontally place a dark grey 1x6 brick on the back row.

10-11. Horizontally place a light grey 1x4 brick in the back left corner on top of the previous brick so there is no overhang. Then horizontally place a light grey 1x2 brick with a pin to the right so the pin faces the front.

12-13. Let's make a part! Horizontally place a red hole with 2 pins in front of you so the hole faces front and back. Then attach 1 yellow 2L pin connector to the left-facing and right-facing pins.

14-15. Horizontally attach the middle hole of your part to the front-facing pin on your main build.

16-17. Horizontally place a dark grey 1x6 brick on the 2nd row from the front so there is no overhang. Then horizontally place a silver 1x2 grill tile in the front right corner of the build so there is no overhang.

18-19. Horizontally place a light brown 1x4 masonry brick on the left 4 studs of your previous 1x6 brick so the brick print faces the front. Then horizontally place a light brown 1x2 masonry brick to the right so the brick print faces the front.

20-21. Horizontally place a tan 1x6 tile on top of your previous 2 bricks so there is no overhang. Horizontally place a tan 1x2 panel in the back left corner so the wall faces the back. Then horizontally place a tan 1x4 panel to the right so the wall faces the back.

22-23. Let's make a part! Stack 3 dark green 2x2 bricks on top of each other so there is no overhang, then place it in front of you. Now place a tan 2x2 tile on top so there is no overhang.

24-25. Take your part and place it in the back right corner on top of the 1x4 panel. It should not connect to any studs.

Group 5 - Wall

26-27. Let's make a part! Horizontally place a dark green 2x4 brick in front of you. Then vertically place a dark green 1x2 brick on the leftmost and rightmost columns so there is no overhang.

28-29. Horizontally place a brown 1x2x2 window on the front row so it is centered horizontally. Then vertically place a dark green 1x2 brick to the left and right.

30-31. Horizontally place a tan 2x4 tile on top so the only overhang is in the back middle.

32-33. Horizontally place your part to the left of your previous part. It should not connect to any studs!

34-35. Horizontally place a dark red 2x4 slope brick on top of your previous part so it sits on the 2x4 tile and slopes to the front. It should not connect to any studs. Then place a dark red 2x2 slope brick to the right so it slopes to the front. It should not connect to any studs either! Now you can push down on the right-facing pin connector to destroy the wall!

Thank you so much for building this set!
