

30671 Aurora's Forest Playground

Adapted by Chris Harper and tested by Matthew Shifrin.

This LEGO® Aurora's Forest Playground (30671) toy playset for ages 6 and up is a treat for young Disney fans. Aurora, also known as Sleeping Beauty, is accompanied by two animal friends living in a forest tree.

The set features Aurora wearing a beautiful pink princess gown. Her arms are outstretched above her head and long flowing blond hair. Aurora is facing a tall and solid tree adorned with pink flowers, two hanging baskets, a mushroom and multiple cute animals. There is one reddish brown squirrel with a cheeky winking expression and another grayish blue bunny. The canopy is lush with leaves and rises above Aurora's head.

There are 60 pieces in this set and 14 steps in the fun building process.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each set, PDF versions are always online at:

[\[https://www.lego.com/service/buildinginstructions/30671\]](https://www.lego.com/service/buildinginstructions/30671) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the Pieces

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a sighted friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted into groups according to the building steps in the set. Doing this in advance makes locating the pieces easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be collected into a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

Bag 1

Group 1: Minifigure Parts: Head, Hair, Legs, Chest

Group 2: First Section: Steps 1-8

Group 3: First Sub Assembly: 1-4

Group 4: Second Sub Assembly (2x): 1-4

Group 5: Second Section 11-14

Let's get to building!

Building instructions (Bag 1)

Group 1 - Aurora

Locate Aurora's pink legs. They have a pyramid shape with oval connector on top.

Place Aurora's torso on top of the legs.

Place Aurora's head on the torso.

Place Aurora's blonde hair on her head.

Group 2:

1. Locate 1 green 2x6 plate and place it horizontally in front of you. Locate two 3x1 brown inverted arches and place them horizontally on the back row of the 2x6 plate so that they don't overhang, the left one's slope will be to the left, and the right one goes symmetrically to the right. The two studs on top of these pieces form a horizontal 2x1 space.

2. Locate two 2x2 light green jumper plates and place them on the left and right ends of the 2x6 plate's front row, so they overhang one row to the front.

3. Locate two 3x3 curved plates and place the plates next to each other with the right plate's curved side at the front right and the left plate's curved side at the front left. Place the 2x2 jumper plates onto the back rows of the 3x3 curved plates, one will be on the two leftmost studs of the left plate's back row, and the other will be symmetrically on the right plate. The curved plates should be right next to each other.

4. Locate two brown 3x1 inverted arches. Place them vertically, next to each other, with their studs to the back, in front of the horizontal 3x1 inverted arches, so their studs align with the previous inverted arches, creating a 2x2 surface of studs on top. This forms the roots and the base of the tree. Place the 1x1 pink flower plate onto the right light green jumper plate.

5. Locate a reddish brown 2x2 plate and place it on top of the four 3x1 inverted arches. Locate the 1x1 purple dome and place it on the pink flower plate. This completes the mushroom.

6. Locate two round 2x2 bricks. Place them on top of the reddish brown 2x2 plate. This forms the tree trunk.

7. Locate two 1x2 brown bricks with pinhole and place them horizontally one in front of the other on top of the previous round bricks the pinholes are to the front and to the back

8. Put a reddish brown 2x2 plate on top of the previous pieces. Place a round 2x2 brick on the plate.

Group 3: First Sub Assembly: 1-4

In this group, we'll build the holder for the baskets that the animals can sit in.

8.1. Locate a 1x5 rounded plate with an axle-hole in the middle.

8.2. Locate two 1x1 round tiles. Place these on the inside studs of the 1x5 plate. Place two 1x1 leaf plates on the outside studs.

8.3. Locate two 2-stud-long bars. Orient them so they're upright and insert them into the holes on the leaf plates.

Group 4: Second Sub Assembly (2x): 1-4

8.3.1. Locate a 3L axle with end stop. Place a blue 1x1 round plate on the axle's end stop.

8.3.2. Locate a brown 2x2 round tile with a log print. Place the tile on the blue stud.

8.4. Insert the 3L axle into the center of the 1x5 rounded brown plate.

9. Hold the axle parallel to the ground and perpendicular to the trunk of the tree. With the leaves facing towards you insert the 3L axle through the hole in the trunk. Locate a blue 3x3 disk with axlehole. On the rear side of the tree, insert the axle through the blue disk. The axle should now spin freely but be attached to the tree by the disc.

Now we'll build the baskets for the animals to sit in. 9.1. Locate two 2x2 plates with a rounded edge and hole, one lighter green and one darker green. Place a light green plate on top of a darker green plate. Orient with the rounded edge towards you.

9.2. Place a pink 1x2 plate on the two studs furthest away from the rounded edge. Place an orange 1x2 plate with top handle on top of the pink 1x2 plate. The orange piece should "lean" away from the rounded edge.

9.3. Locate a beige arched window frame. Place it horizontally on the remaining 2 exposed studs. Locate a 1x1 leaf plate and place it on top of the window frame with the 1x1 leaf plate facing away from the rounded edge. Locate a 1x1 pink flower with bar underneath and place it on top of the leaf.

9.4. Turn the build so the rounded edge is facing towards the ceiling and the flower faces away from you. Locate a gray technic 1L pin. Place the long end of the pin into the hole formed in the rounded side of the two plates.

Repeat steps 9.1 to 9.4.

10. Rotate the small builds so the flower is facing towards you. Insert the hollow stud of the technic 1L pin into the 2-stud-long-bars sticking out from the tree towards you. Repeat this step with the second small build.

Group 5: Second Section 11-14

11. Locate a 1x2 log brick with rounded edges. Place it horizontally on the front row of the 2x2 round brick at the top of the tree. Locate two 1x1 brown bricks with extruding scrolls. These bricks have an upward-facing stud on the side of them at a 90 degree angle to them. Place these horizontally behind the 1x2 log brick so the extrusions (the 90-degree studs) face away from each other.

12. Locate a 1x2 rounded green plate. Place it horizontally on the front two studs at the top of the tree. Place two 2x1 leaves horizontally with the leaves at the left and right on the back row of the build.

13. Locate a green 2x2 round jumper plate and place it on top of the build in the center. Place two 1x1 flower plates on the leftmost and rightmost studs of the leaves.

14. Locate the rabbit and the squirrel. Place the rabbit and the squirrel into the rotating baskets on the tree. They should sit in the basket but are not attached by any studs. By spinning the wheel on the rear of the tree the animals can enjoy the fun forest playground.

Thank you so much for building this set!
