

40746 Santa's Delivery Truck

Adapted by John Le and tested by Jolene Nemeth

Fuel festive fun with this LEGO® Santa's Delivery Truck (40746) Christmas building set for boys and girls aged 8 and over, which sparks magical pretend play.

Packed with enchanting elements, this LEGO Christmas playset lets kids become Santa's helpers as they assemble the truck toy while discovering the magic inside. The vehicle opens to reveal Christmas presents and comes with a mini Christmas tree toy that can be placed on the roof. Other enchanting elements include a letter, Santa's sack, and a sticker sheet for decoration. Bringing the magic to life, the truck is driven by an elf minifigure, who can be seated inside the truck and sparks imaginative role-play as kids dream up adventures from the North Pole.

Drive creativity – Kids enjoy a festive build with the LEGO® Santa's Delivery Truck toy building kit for boys and girls aged 8 and up

Fueled by details – The truck opens to reveal presents inside and features a mini LEGO® Christmas tree, which fits on top of the vehicle

Minifigure magic – The Christmas LEGO® set is brought to life by an elf minifigure, who sits in the driving seat of Santa's truck

Dimensions – The 224-piece LEGO® truck measures over 5.5 in. (15 cm) high, 5 in. (13 cm) long, and 2.5 in. (7 cm) wide when the Christmas tree is placed on top

The front of the box shows the Elf on Santa's truck racing off into the Arctic to deliver presents! He has to slow down though because presents are falling off the truck!

The back of the box shows the truck opened up. Inside is a workshop to make presents! There is a Christmas tree that you can attach to the top of the truck!

The top of the box shows a real-sized image of an elf.

The build is 224 pieces in total and is for ages 8+.

Bag 1 includes the pieces for the Elf and Santa's Truck.

Bag 2 includes the pieces for Santa's Truck.

Bag 3 includes the pieces for Santa's Truck.

Bag 4 includes the pieces for Santa's Truck.

Bag 5 includes the pieces for Santa's truck and the Christmas tree.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/40746>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 5 bags labeled 1 to 5, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Elf and Santa's Truck

Group 1 - Page 3.

Group 2 - Steps 1-3.

Group 3 - Step 4.

Group 4 - Step 5 and 2 yellow 1x2 plates from Step 6.

Group 5 - Rest of Step 6 and Steps 7-10.

Bag 2 - Santa's Truck

Group 6 - Steps 11-20.

Bag 3 - Santa's Truck

Group 7 - Steps 21-25.

Group 8 - Steps 26-37.

Group 9 - Steps 40-43.

Bag 4 - Santa's Truck

Group 10 - Steps 44-54.

Group 11 - Steps 55-64.

Bag 5 - Santa's Truck and Christmas Tree

Group 12 - 1 orange 1x1 plate and 1 pink 2x2 plate from Step 65.

Group 13 - Rest of Step 65.

Group 14 - 1 pink 1x1 plate and 1 light green 2x2 plate from Step 66.

Group 15 - Rest of Step 66.

Group 16 - 1 light blue 1x1 plate and 1 yellow 2x2 plate from Step 67.

Group 17 - Rest of Step 67.

Group 18 - Step 68 and 2 tan 1x1 round plates from Step 69-70.

Group 19 - Rest of Step 69-70 and Step 71.

Group 20 - 2 transparent yellow 1x1 round plates from Step 72.

Group 21 - Rest of Step 72.

Group 22 - 2 transparent red 1x1 round plates from Step 73.

Group 23 - Rest of Step 73 and Steps 74-77.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Elf

Sub-build 1. Locate 1 short dark tan pair of legs, 1 torso printed with a light green uniform with a pocket and dark brown belt, 1 yellow head printed with white eyebrows and beard, and glasses, and 1 light green elf hat with yellow ears. Assemble your minifigure then put him aside while we build Santa's Truck

Group 2 - Santa's Truck

1-2. Horizontally place a black 2x14 plate in front of you. Then place a black 3x3 L-shaped plate on the back right corner so it overhangs 2 studs to the back. The studs should look like the braille letter j. Then repeat symmetrically to the front.

3.1. Let's make a part! Vertically place a black 2x6 plate in front of you. Then horizontally place a green 1x3 plate on the back row so it overhangs 1 stud to the left.

3.2. Horizontally place a green 1x3 plate on the front row so it overhangs 1 stud to the left.

3.3. Vertically place a black 4x6 angled plate underneath the overhang so it is centered vertically and the short end faces the left.

3.4. Vertically place a red 2x4 plate in between the left 2 studs of the previous 1x3 plates.

3.5. Place your part to the left of the L-shaped plates so it is centered vertically and the short end of the angled plate faces the left.

Group 3 - Santa's Truck

4. Vertically place a black 2x4 plate to the left of the 4x6 angled plate so it is centered vertically. Then place a blue 2x2 plate to the left so there is no overhang.

Group 4 - Santa's Truck

5. Vertically place a dark tan 2x4 tile in between the right stud of the previous 1x3 plates so it sits to the right of the 2x4 plate. Then vertically place a dark tan 1x4 plate to the right so it is centered vertically. Now horizontally place a red 2x4 plate to the left of the vertical 2x4 plate so it is centered vertically.

You will have 2 extra yellow 1x2 plates. Save them for later.

Group 5 - Santa's Truck

6.1. Let's make a part! Horizontally place a dark grey 2x6 plate with bricks with axle holes on the side in front of you. Then insert a tan 2L axle pin into the left-facing hole so the pin faces the left. Then repeat symmetrically to the right.

6.2. Vertically place a light grey 1x2 plate on the 2nd column from the left so there is no overhang. Then repeat symmetrically to the right.

6.3. Vertically place a yellow 1x2 plate from group 4 on top of each of the previous 1x2 plates so there is no overhang.

6.4. Flip your main build upside down so it is horizontal and the short end faces the left. Then vertically place your part upside down on the 2nd and 3rd column from the right so it is centered vertically.

7. Horizontally place a dark grey 2x8 plate upside down to the left of your previous part so it is centered vertically.

8. Flip your build back over so it is horizontal and the short end faces the left. Then vertically place a dark grey 2x4 plate with bricks with axle holes on the side underneath the 2nd and 3rd columns from the left so it is centered vertically. Then insert a tan 2L axle pin into the front-facing hole so the pin faces the front. Then repeat symmetrically to the back.

9.1. Let's make a part! Horizontally place a black 1x2 plate with 1x4 side studs in front of you so the side studs face the front. Then horizontally place a light grey 1x2 plate upright to the front-facing side studs so it is centered horizontally.

9.2. Horizontally place a light grey 1x2 sloped curved tile upright on the rightmost front-facing side stud so it overhangs and slopes to the right. Then repeat symmetrically to the left. Now horizontally place a white 1x2 tile with a sticker upright on the front-facing side studs so it is centered horizontally.

9.3. Skip this step if you have already placed your sticker! Ask a helper to place sticker 3 on the white 1x2 tile. This sticker is black and says 40756 in white! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

9.4. Vertically place your part on the leftmost column so it is centered vertically and the 1x2 tile with a sticker faces the left.

10. Horizontally place a dark green 2x4 plate on top of the 4 leftmost columns so it is centered vertically. Then place a black 2x2 corner plate on the front row in front of the front right stud of the previous 2x4 plate so it overhangs to the front and looks like the braille letter d. Then repeat symmetrically to the back.

Building Instructions (Bag 2, Book 1):

Group 6 - Santa's Truck

11. Place 3 green 2x2 inverted sloped curved bricks, 1 in front of the other, on the rightmost column so together they are centered vertically and they slope and overhang to the right.

12. Place 2 dark tan 2x2 tiles with 2 studs, 1 in front of the other, on the 2nd and 3rd columns from the right so together they are centered vertically and the studs are on the right.

13. Place a dark tan 2x2 tile with 2 studs on top of the 2 rightmost columns so it is centered vertically and the studs are on the right. Then horizontally place a black 1x2 plate with a clip and a stud in front and behind it so the clips are on the right. Then place a green 1x1 plate with a side stud on the front right and back right corners so the side studs face the right.

14. Stack 2 green 1x6 plates together so there is no overhang, then horizontally place it on the front row to the left of the previous 1x1 plate with a side stud. Now repeat symmetrically to the back.

15. Place 2 short tan 2x2 grooved bricks, 1 in front of the other, in between the 2 leftmost studs of the previous 1x6 plates.

16. Vertically place a green 1x6 plate on top of the left column of the previous ridged bricks so there is no overhang. Then horizontally place a green 1x4 plate on the back row to the right of the 1x6 plate. Now vertically place a tan 1x4 tile in front of the leftmost stud of the 1x4 plate. Then place a green 2x2 corner

plate to the right of the 1x4 plate so the studs look like the braille letter f. Now place a black 1x1 plate with a clip on the front row to the right of the previous vertical 1x6 plate so the clip faces the front. Then horizontally place a green 1x3 tile to the right. Then place a green 2x2 corner tile to the right so it looks like the braille letter h.

17. Place 2 transparent red 1x1 round tiles on the right-facing side studs of the 1x1 plates.

18. Vertically place a dark tan 1x2 log brick to the left of the previous vertical 1x6 plate so it is centered vertically. Then place a tan 2x2 plate to the left so it is centered vertically. Now horizontally place a black 2x3 angled brick in front of the previous pieces so the angled side faces the front and the short end faces the left. Now repeat symmetrically to the back.

19. Vertically place a tan 1x2 slope tile on top of the previous 1x2 log brick so it slopes to the left. Then vertically place a white 1x2 rounded plate in front and behind it.

20. Horizontally place a green 1x3 sloped curved brick on the back stud of the front 1x2 rounded plate so it slopes to the left. Then repeat symmetrically to the back. Now vertically place a green 2x4 brick to the left of the previous 1x3 sloped curved bricks so it is centered vertically. Then vertically place another 2x4 brick to the left so there is no overhang.

Building Instructions (Bag 3, Book 1):

Group 7 - Santa's Truck

21. Let's make a part! Horizontally place a red 2x4 plate in front of you. Then horizontally place a brown 1x4 tile on the back row so there is no overhang.

22. Place a tan 1x1x3 brick on the rightmost stud.

23.1. Horizontally place a tan 1x4x3 panel with 2 stickers to the left so the wall faces the back and it overhangs 1 stud to the left.

23.2. Skip this step if you have already placed your sticker! This is 1 of 2 stickers! Ask a helper to place sticker 1 on the inside wall of the tan 1x4x3 panel. This sticker says workshop at the top and has racks of paint and paintbrushes! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

24. Horizontally place a red 1x3 plate underneath the overhang.

25. Stack 2 tan 1x2 plates together so there is no overhang then horizontally place them on the 2 leftmost studs. Horizontally place a white 1x2 plate with a clip on the short side on top of the previous plates so the clip faces the left. Now horizontally place a tan 1x2x2 brick on top.

Group 8 - Santa's Truck

26. Vertically place a black 1x2 plate with a clip on the short side on the leftmost stud so it overhangs 1 stud to the back and the clip faces the back. Then horizontally place a green 1x6 plate to the right.

27. Rotate your part 180 degrees so the 1x4 tile faces the front. Skip this step if you have already placed your sticker! This is the 2nd sticker! Ask a helper to place sticker 4 on the outside wall of the tan 1x4x3 panel. This sticker is red and green and says "POST" in gold! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

28. Horizontally place a red 1x2 inverted slope brick underneath the front left corner so there are no exposed studs and it slopes to the right.

29. Rotate your part 180 degrees so the previous brick faces the back right. Now horizontally place your part on the back right corner so only the 1x4 tile and 1x2 inverted slope brick overhang to the back.

30.1. Let's make a part! Horizontally place a tan 2x4 plate in front of you. Then vertically place a tan 1x2 plate with a bar on the short side on the leftmost column so the bar overhangs to the back. Then repeat symmetrically to the right.

30.2. Place a tan 2x2 turntable plate in between the previous 1x2 plates with a bar so there is no overhang. Now place a light grey 2x2 round turntable plate on top of the previous 2x2 plate so it can spin!

30.3. Place a dark tan 2x2 round tile with a stud on top of the previous plate so there is no overhang and it can freely spin. Now place a silver toy winder key on top.

30.4. Vertically attach the 2 bars of your part to the 2 rightmost top-facing clips so the winder key faces the right.

31. Vertically place a tan 1x4 brick in front of the leftmost column of the previous part you placed on the back row so it sits to the right of the 1x2 slope tile. Then vertically place a green 1x4 plate on top so there is no overhang. Then vertically place a white 1x4 fence on top, then another green 1x4 plate so there is no overhang.

32. Let's make another part! Place a red 2x2 plate in front of you. Then place a tan 1x1x3 brick in the back right corner.

33. Horizontally place a brown 1x4 tile on the front row so it overhangs 2 studs to the left.

34. Place a red 2x2 corner plate underneath the overhang so the exposed stud is in the back right and it looks like the braille letter j.

35.1. Horizontally place a tan 1x4x3 panel with 2 stickers on the back row to the left of the 1x1x3 brick so the wall faces the front and it overhangs 2 studs to the left.

35.2. Skip this step if you have already placed your sticker! This is 1 of 2 stickers! Ask a helper to place sticker 2 on the inside wall of the tan 1x4x3 panel. This sticker says workshop at the top and has racks of saws, hammers, and more tools! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

36. Horizontally place a red 1x4 plate that are 2 1x2 plates connected by a hinge underneath the back 2 studs of the 1x4x3 panel so the rounded part faces the front. It should rotate towards the front.

37. Horizontally place a tan 1x2x3 brick on the 2 leftmost studs of the previous 1x4 plate connected by a hinge.

Group 9 - Santa's Truck

38. Horizontally place a green 1x3 plate on the 3 rightmost studs so there is no overhang. Then horizontally place a green 1x4 plate that are 2 1x2 plates connected by a hinge to the left so the rounded part faces the front!

39. Skip this step if you have already placed your sticker! This is the 2nd sticker! Ask a helper to place sticker 4 on the outside wall of the tan 1x4x3 panel. This sticker is red and green and says "POST" in gold! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

40. Horizontally place a red 1x2 inverted slope brick underneath the front right corner so there are no exposed studs and the slope faces the left.

41. Horizontally place your part on the front right corner so it sits on the tiles and the 2 studs. You can open this part to look inside! Make sure to close this part for now while we build!

42. Vertically place a red 2x6 tile on top of the left 2 columns of your previous part so it is centered vertically. Then horizontally place a red 1x3 tile on the front row to the right of the previous 2x6 tile. Then repeat symmetrically to the back.

43. Place a white 1x1 plate with a vertical tooth on the back right corner so the tooth faces the back. Then repeat symmetrically to the front. Now place another 1 on the back stud of the 1x2 plate with a clip that is overhanging in the back so the tooth faces the left.

Building Instructions (Bag 4, Book 1):

Group 10 - Santa's Truck

44. Vertically place a black 2x6 plate on top of the leftmost 2x4 brick so it overhangs in the front and back. Then vertically place a red 2x4 plate with angled sides to the right so it is centered vertically and the short end faces the left.

45. Horizontally place a red 2x3 plate on top of the previous 2x6 plate so it is centered vertically and there is no overhang. Then vertically place a white 1x2 steering wheel to the right so it is centered vertically and the wheel faces the right.

46.1. Let's make a part! Place a black 1x1 plate with 2 side studs in front of you so the side studs face the front. Then vertically place a black 1x2 jumper plate upright on the side studs so there is no overhang. Then place a transparent yellow 1x1 round plate upright on the jumper plate. Now repeat again so you have 2 parts in total.

46.2. Place 1 part in front of the front left corner of the previous 2x3 plate so the side stud faces the left. Then repeat symmetrically to the back.

47.1. Make a part: Horizontally place a dark green 1x3 sloped curved brick in front of you so it slopes to the right. Then place a dark green 1x2 sloped curved tile on top so it slopes and overhangs to the left. Now repeat again so you have 2 parts in total.

47.2. Horizontally place 1 on the front row of the 2x6 plate in front of the previous part so the 1x3 sloped curved brick slopes to the right onto the 1x1 plate overhang. Then repeat symmetrically to the back.

48. Place a red 2x2 half-cylinder brick on the left 2 columns of the previous 2x3 plate so it slopes to the front and back. Then vertically place a red 1x2 brick to the right so it is centered vertically.

49. Insert a black lattice window with a rounded side into to a green 1x2 rounded window frame. Then vertically place it on the leftmost column so the window faces the left.

50. Place a gold figurine on top of the window frame so it faces the left. Then vertically place a transparent 1x2 panel on top of the previous 1x2 brick that is to the left of the steering wheel so the wall faces the left.

51. Place a dark grey lantern on top of a transparent yellow 1x1 round brick, then attach it to the back-facing clip so it hangs down.

52. Attach a dark tan backpack to the front stud of a rounded 1x2 plate that is on the front row so the bag faces the front. Then insert the upward bar of a white 1x1 round tile into the stud so it holds the bag in place.

53. Attach a dark grey shovel to the left-facing clip on the back row. Then attach a gold claw to the front-facing clip so the claw hands face the left and right.

54. Insert 4 gold wheels into 4 black tires. Now attach them to the front-facing and back-facing pins so the little circles face outwards.

Group 10 - Santa's Truck

55. Let's make a part! Place a white 4x4 plate in front of you.

56. Vertically place a red 4x6 car hood on the 3 left columns so it is centered vertically and slopes to the left.

57. Vertically place a red 4x6 plate with angled sides on the rightmost column so it overhangs 3 columns to the right and centered vertically.

58. Vertically place a gold 1x4 panel with a lattice on the rightmost column so it is centered vertically and the wall faces the left.

59. Horizontally place a red 1x3 panel on the back row to the left of the previous panel so the wall faces the back. Then horizontally place 2 red 1x3 jumper plates, 1 in front of the other, in front of the previous 1x3 panel.

60. Horizontally place a red 1x3 panel on the front row in front of the previous 1x3 jumper plates so the wall faces the front. Then vertically place a gold 1x4 panel with a lattice to the left so it is centered vertically and the wall faces the right. Now place a red 2x2 round tile with a stud on top of the 2 1x3 jumper plates so it is centered.

61. Flip your part upside down so it is horizontal and the car hood slopes to the left. Vertically place a red 1x4 sloped curved brick connected to a 1x4 plate upside down on the rightmost column so it is centered vertically and the slope overhangs to the right.

62. Vertically place a red 1x6 plate upside down on the 2nd column from the right so it is centered vertically. Then horizontally place a red 1x4 plate upside down on the front row to the left of the previous 1x6 plate. Now repeat symmetrically to the back. Then vertically place a red 1x6 plate upside down to the left so it is centered vertically.

63. Vertically place a red 1x6 plate upside down on the 2nd column from the right so it is centered vertically.

64. Flip your part over so it is horizontal and the car hood slopes to the left. Now horizontally place your part on top of the truck so the 1x4 sloped curved brick aligns with the 1x1 plates with a vertical tooth that on the rightmost column. The roof should overhang to the left!

Building Instructions (Bag 5, Book 1):

Group 12 - Santa's Truck

There are no instructions in this step!

You have 1 extra orange 1x1 plate and 1 extra pink 2x2 plate. Save them for later!

Group 13 - Santa's Truck

65.1. Let's make a part! Place a blue 2x2 plate in front of you. Then place a pink 2x2 plate from group 12 on top so there is no overhang. Then place another blue 2x2 tile with a stud on top so there is no overhang. Now place a bronze 1x1 round flower plate on top. This is a present! Place it inside the back of the truck so it sits on the back 2 rows of the 2x4 tile.

65.2. Let's make another present! Place a light blue 1x1 plate in front of you. Then place an orange 1x1 plate from group 12 on top, then place another light blue 1x1 plate on top. Now place a bronze 1x1 round flower plate on top, then place it on the back row to the right of the previous present!

Group 14 - Santa's Truck

There are no instructions in this group. You will have 1 extra pink 1x1 plate and 1 extra light green 2x2 plate. Save them for later.

Group 15 - Santa's Truck

66.1. Let's make a part! Place a red 2x2 plate in front of you, then place a light green 2x2 plate from group 14 on top so there is no overhang. Then place a red 2x2 tile with a stud on top, then a bronze 1x1 round flower plate on top so there is no overhang. Now place your present in front of the previous 2x2 present so it sits on the front 2 rows of the 2x4 tile.

66.2. Let's make another present! Place a yellow 1x1 plate in front of you. Then place a pink 1x1 plate from group 14 on top, then place another yellow 1x1 plate on top. Now place a bronze 1x1 round flower plate on top, then place it in front of the previous 1x1 present!

Group 16 - Santa's Truck

There are no instructions for this group. You will have 1 extra light blue 1x1 plate and 1 extra yellow 2x2 plate. Save them for later.

Group 17 - Santa's Truck

67.1. Let's make a part! Place a green 2x2 plate in front of you, then place a yellow 2x2 plate from group 16 on top so there is no overhang. Then place a green 2x2 tile with a stud on top, then a bronze 1x1 round flower plate on top so there is no overhang. Now place your present on top of the 2x2 present you placed on the back 2 rows so it is centered on it!

67.2. Let's make another present! Place a purple 1x1 plate in front of you. Then place a light blue 1x1 plate from group 16 on top, then place another purple 1x1 plate on top. Now place a bronze 1x1 round flower plate on top, then place it in front of the previous 1x1 present!

67.3. Place a white 1x2 tile printed with an envelope with a red seal into the backpack on the front row! Now close up your truck and put it away while we make a Christmas Tree!

Group 18 - Christmas Tree

68. Place a brown 1x1 brick with a side stud on each side in front of you. Then insert a black bar into the top-facing stud so it goes all the way in.

You will have 2 extra tan 1x1 round plates. Save them for later.

Group 19 - Christmas Tree

69. Insert a tan 1x1 round plate from group 18 into the top-facing bar so it goes all the way down. Then insert a light green 1x1 round plate into the top-facing bar so it connects to the previous plate.

70. Insert a brown 1x1 brick with a side stud on each side into the top-facing bar so it connects to the previous plate. Now repeat step 69.

71. Place a brown 1x1 brick with a side stud on each side on top of the previous 1x1 round plate. Then place a green 1x1 square plate on top.

Group 20 - Christmas Tree

There are no instructions in this step!

You will have 2 extra transparent yellow 1x1 round plates. Save them for later!

Group 21 - Christmas Tree

72.1. Let's make a part! Vertically place a green 1x2 plate with a slope tile and a stud in front of you so it slopes to the front. Then horizontally place a green 1x2 sloped curved brick on top so it slopes and overhangs to the right.

72.2. Place a green 2x2 angled plate underneath the overhang so the angled side faces the front.

72.3. Horizontally place a green 1x3 sloped curved brick on top of the rightmost stud so it slopes and overhangs to the right.

72.4. Place a transparent yellow 1x1 round plate from group 20 on top of the leftmost stud. Then place a transparent light blue 1x1 round plate on top of the rightmost stud. Now repeat all the steps again so you have 2 parts in total.

72.5. Vertically place 1 part upright onto the front-facing side studs of your previous part so it slopes upward and overhangs 1 column to the right. Now repeat symmetrically to the back.

Group 22 - Christmas Tree

There are no instructions in this step!

You will have 2 extra transparent red 1x1 round plates. Save them for later!

Group 23 - Christmas Tree

73.1. Let's make a part! Vertically place a green 1x2 plate with a slope tile and a stud in front of you so it slopes to the front. Then horizontally place a green 1x2 sloped curved brick on top so it slopes and overhangs to the right.

73.2. Place a green 2x2 angled plate underneath the overhang so the angled side faces the front.

73.3. Horizontally place a green 1x3 sloped curved brick on top of the rightmost stud so it slopes and overhangs to the right.

73.4. Place a transparent red 1x1 round plate from group 22 on top of the leftmost stud. Then place a white 1x1 round plate on top of the rightmost stud. Now repeat all the steps again so you have 2 parts in total.

73.5. Vertically place 1 part upright onto the left-facing side studs of your previous part so it slopes upward and overhangs 1 column to the front. Now repeat symmetrically to the right.

74. Place a brown 3x3 dish in front of you. Then place your Christmas Tree on top so it is centered.

75. Place a green 1x1 cone brick on top. Then insert the bar of a gold 1x1 round plate into the previous cone brick so the stud faces the front.

76. Place a gold star upright onto the front-facing side stud of the previous 1x1 round plate with a bar.

77. Place your Christmas Tree on top of the round 2x2 tile with a stud that is on top of the roof of your truck!

Thank you so much for building this set!
