

75372 Clone Trooper™ & Battle Droid™ Battle Pack

Adapted by John Le and tested by Saqib Shaikh.

Inspire youngsters to recreate thrilling Star Wars: The Clone Wars scenes with this LEGO® Star Wars™ Clone Trooper & Battle Droid Battle Pack (75372) for ages 7 and up. It features 4 LEGO Star Wars minifigures and 5 LEGO figures – a Clone Shock Trooper, 3 Clone Troopers, 3 Super Battle Droids, and 2 Battle Droids – with iconic weapons for action play. This LEGO building set also includes a stud-shooting Star Wars speeder bike for 2 Clone Troopers and a buildable STAP speeder vehicle toy for a Battle Droid. A tri-droid with 3 flick shooters and a defensive post with a stud shooter add even more creative play possibilities.

Clone Trooper & Battle Droid Battle Pack for kids – Recreate Star Wars: The Clone Wars scenes with this buildable action toy, featuring LEGO® figures, a speeder bike vehicle, and more.

4 LEGO® Star Wars™ minifigures and 5 LEGO figures for action play – A Clone Shock Trooper, 3 Clone Troopers, 3 Super Battle Droids, and 2 Battle Droids with assorted accessories.

Buildable LEGO® Star Wars™ speeder bike – The speeder bike has 2 stud shooters, 2 holders for blasters, and space for 2 Clone Troopers.

Compact 215-piece set – The tri-droid measures over 4.5 in. (12 cm) high, 6 in. (15 cm) long and 5 in. (13 cm) wide.

The front of the box shows a big tri-droid in the back shooting lasers at the clone troopers! The battle droids are coming shooting lasers! The clone troopers are hiding behind cover and riding a speeder shooting back!

The back of the box shows the tri-droid in the back. A clone trooper on a cliff is shooting at it while another 1 is under it running to plant a bomb! In the front 2 clone troopers are taking 4 battle droids hostage while another battle droid on a vehicle is coming in hot to save them!

The top of the box shows a real size image of a clone trooper.

The build is 215 pieces in total and is for ages 7+.

Bag 1 and 2 include the pieces for the clone troopers, battle droids, cover, and vehicles.

Bag 3 includes the pieces for the tri-droid.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.

- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/75372>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, and 3, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Clone Troopers and Speeder
 Group 1 - Pages 5-7.
 Group 2 - Steps 1-20.

Bag 2 - Clone Trooper, Droids, Cover, and STAP Vehicle
 Group 3 - Page 28.

Group 4 - Pages 29-30.

Group 5 - Page 31.

Group 6 - Steps 1-10.

Group 7 - Steps 1-13.

Bag 3 - Tri-droid

Group 8 - Steps 1-8.

Group 9 - Steps 9-17.

Group 10 - Steps 18-22.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Clone Troopers

Sub-build 1. Locate 1 white pair of legs printed with armor, 1 white torso printed with armor, 1 tan head printed with scars on his face, 1 white and black helmet, 1 black rifle, and 1 black candle stick with a bar. Assemble your minifigure, then attach the candle stick to the barrel of the rifle, then put it in your minifigure's hand! Now repeat the steps for the clone troopers, you should have 3 in total! There should only be 1 rifle.

Sub-build 2. Place a light grey 2x2 box in front of you. Then place a light grey 1x1 round tile printed with a bomb on it inside. Then place a dark grey 2x2 tile with a stud on top! Now put everything away while we make a speeder!

Group 2 - Speeder

1. Horizontally place a dark grey 2x6 plate in front of you. Then vertically place a dark grey 1x2 rounded plate on the leftmost column.
2. Vertically place a dark tan 1x2 plate with 2 side studs hanging down on the leftmost column so the side studs face the left. Then horizontally place 2 light grey 1x2 bricks with 2 side studs to the right so the side studs face the front and back.
3. Horizontally place a dark grey 1x2 slope tile upright on the left-facing side studs so the thick side is on top.
4. Vertically place a light grey 1x2 brick with 2 side studs on the rightmost column so the side studs face the right. Then vertically place a black 1x2 log brick to the left. Now place 2 dark red 1x1 bricks with a side stud to the left so the side studs face the front and back.
5. Horizontally place a dark grey 1x2 rounded plate upright on the right-facing side studs. Then place 2 dark grey 1x1 cone bricks next to each other on the right-facing side studs.
6. Horizontally place 2 light grey 1x2 plates with a bar on the short side, 1 in front of the other, on the leftmost column so it sits on the 1x2 slope tile and the bars face the left.

7. Horizontally place a white 2x8 plate on top so all the studs are covered and it overhangs over the cone bricks.

8. Horizontally place a dark grey 1x4 stud shooter upright on the front-facing side studs so the leftmost stud is free. The 1x1 plate part should be on the left and the barrel should face the right. Then insert a dark grey rounded part with 3 curved tips upright into the front of it.

9. Horizontally place a dark red 1x2 sloped curved tile upright on the front-facing side studs so it slopes to the left.

10. Let's make a part! Insert the handle of a black pistol blaster into a black bar holder with a clip. Now repeat again so you have 2 parts. Now attach the clips to the leftmost bars so the barrels of the blasters face the left.

11. Rotate your build 180 degrees so the blasters face the right. Horizontally place a dark grey 1x4 stud shooter upright on the front-facing side studs so the rightmost stud is free. The 1x1 plate part should be on the right and the barrel should face the left. Then insert a dark grey rounded part with 3 curved tips into the top of it.

12. Horizontally place a dark red 1x2 sloped curved tile upright on the front-facing side studs so it slopes to the right.

13. Place a dark red 2x2 sloped curved brick on the 2 leftmost columns so it slopes to the left.

14. Vertically place a dark red 1x2 jumper plate to the right of the previously sloped curved brick. Then place a light grey 1x1 clip on top so the clip hands are on the left and right.

15. Attach black handlebars to the previous clip so they face the right.

16. Vertically place a black 1x2 tile with an overhead bar on the 3rd column from the right so the bar is on the right.

17.1. Let's make a part! Insert 2 black bars with a stop into the bottom of a dark grey 1x2 rounded plate. Make sure the side with the stop is inserted into the plate.

17.2. Attach 2 black candle sticks with a bar into the tips of the bars that are sticking out from the rounded plate.

17.3. Insert the bar side of the long bars into the left-facing cone bricks.

18. Attach the clip of a triangle panel to the previous bar in the front so it sits to the right of the 1x2 rounded plate and the flat side of the triangle faces the front. Then repeat symmetrically to the back.

19-20. Locate 4 transparent light blue 1x1 round tiles. Insert these into the stud shooters and shoot them out! Put everything away while we make another clone trooper!

Building Instructions (Bag 2, Book 1):

Group 3 - Clone Shock Trooper

Sub-build 3. Locate 1 white pair of legs with red armor, 1 white torso printed with red armor, 1 tan head printed with scars, 1 white and red helmet, 1 small black blaster, and 1 dark grey binoculars. Assemble your minifigure then attach the blaster and binoculars to his hands!

Group 4 - Battle Droids

Sub-build 4. Locate 1 tan pair of legs, 1 tan torso, 2 tan arms, 1 tan head with 2 eyes, and 1 dark grey blaster. Assemble your droid then put the blaster in his hand.

Sub-build 5. Locate 1 tan pair of legs, 1 tan torso, 2 tan arms, 1 tan head with 2 eyes, 1 light grey 1x1 clip, and 1 dark grey blaster. Assemble your droid and then put the clip on his back-facing stud so the clip hands face up and down. Now attach the handle of the blaster to it so the barrel faces up.

Group 5 - Super Battle Droids

Sub-build 6. Locate 1 dark grey pair of legs, 1 dark grey torso, and 2 dark grey arms. Assemble your droid and make sure the shorter side of the arms are attached to the torso. Now repeat 2 more times so you have 3 of these droids in total! Now put everything away while we make some cover!

Group 6 - Cover

1. Horizontally place a dark grey 3x6 plate with angled sides in front of you so the short side faces the front. Then place a light grey 2x2 round brick on the back 2 rows so it is centered horizontally.
2. Place a dark red 2x2 triangle tile on the front left corner so the long side of the tile is aligned with the angled part of the 3x6 plate. Then repeat symmetrically to the right.
3. Place 2 black 1x1 plates with a clip on the right column of the 2x2 round brick so the clips face the right. Now repeat symmetrically to the left.
4. Place a dark grey 2x2 round tile with a stud on top of the previous 1x1 plates.
5. Place a light grey 2x2x2 slope brick in front of the previous 2x2 round tile so it slopes and overhangs to the front.
6. Horizontally place a dark grey 1x2 rounded plate underneath the overhang.
7. Attach the bar of a dark grey panel with 4 studs and sloped edges to the front right-facing clip. Then repeat symmetrically to the left.
8. Rotate the right dark grey panel with a bar so the studs face the front right. Then repeat symmetrically to the left.
9. Place a dark grey stud shooter on the 2x2 round tile with a stud so the barrel faces the front. Then insert a dark grey rounded part with 3 rounded tips into the stud shooter.

10. Locate 2 transparent light blue 1x1 round tiles. You can shoot these out of the stud shooters! Put everything away now while we make a single trooper ariel platform vehicle!

Group 7 - STAP (Single Trooper Aerial Platform) Vehicle (A hovering vehicle piloted by Battle droids)

1. Place a dark grey 1x1 brick with a side stud on each side in front of you. Then place a transparent 1x1 round plate upright on the left-facing side stud.

2. Place a dark blue 1x1 slope tile upright on the front-facing side stud so it slopes up. Then repeat symmetrically to the back.

3.1. Let's make a part! Place a dark grey 1x1 brick with a side stud on each side in front of you. Then place a light grey 1x1 round tile with an upward bar upright on the right-facing side stud.

3.2. Now insert a dark grey clip with a bar into the left-facing side stud so the clip hands face up and down.

3.3. Now insert the bar of the 1x1 round tile into the previous left-facing 1x1 round plate, on our main build.

4. Horizontally place a dark blue 1x3 plate on top of the 2 1x1 bricks with side studs. Then place a dark grey 1x1 plate on the middle stud. Now horizontally place a dark blue 1x4 sloped curved brick on the right 2 studs so it slopes and overhangs to the right.

5. Place a dark blue 1x1 slope tile on the left stud so it slopes to the left.

6. Place a transparent 4x4 dish in front of you. Then attach the anti-stud of a transparent bar on top. Now insert the right-facing stud of your part into the top of the bar so the 1x4 sloped curved tile faces the front.

7. Attach the bar of a black megaphone upright on the right-facing stud so the stud faces the front. Then repeat symmetrically to the left.

8. Let's make a part! Place a dark grey 2x2 round plate with a smooth underside in front of you. Then horizontally place a light grey 1x2 plate with a bar on the long side on the back row so the bar faces the back.

9. Horizontally place a dark grey 1x2 plate with 2 bars on the front row so the bars face the front.

10. Place a dark blue 2x2 sloped curved brick on top so it slopes to the front.

11. Insert the larger stud of a light grey bar with 2 studs into the right front-facing bar. Then repeat symmetrically to the left.

12. Attach the back-facing bar of your part to the top-facing claw.

13. Rotate your previous part so the light grey bars with 2 studs face the front! Now place a droid on it so he can control and shoot it! It should just hold on and hang—it won't connect to any studs! Put everything away now while we make a tri-droid!

Building Instructions (Bag 3, Book 2):

Group 8 - Tri-droid

1. Place a black tri-axle connector with a hole in front of you so 1 of the connectors faces the front. Then insert a black 2L pin into the top-facing hole.
2. Attach a light grey wheel to the top-facing pin.
3. Attach the axle of a dark grey L-shaped axle with a pinhole into the front-facing connector so the other axle faces down. Then repeat symmetrically to the other 2 axle connectors.
- 4.1. Let's make a part! Place a dark blue 2x2 round tile with a stud in front of you. Then place a light grey 2x2 dish on top.
- 4.2. Place a transparent light blue 1x1 round tile on top.
- 4.3. Flip your part upside down. Then insert the side with a stop of a long dark grey bar into the top-facing anti-stud so it is centered.
- 4.4 Now attach the bottom-facing 2L pin of your main build into the top of the bar. Make sure it goes all the way through.
5. Let's make a part! Insert a red 1L pin with a stud into the top of a black tri-axle connector with a hole so the stud faces up. Then insert your part into the top of the bar so it goes all the way down and the stud faces up.
6. Insert a dark blue 4x4 round container bottom into the top of the bar so it goes all the way down. The opening should face up.
7. Insert a transparent pink 1x1 round brick into the top of the bar so it goes all the way down.
8. Place a light grey 4x4 round container top on top of the previous container. Make sure it connects!

Group 9 - Tri-droid

9. Let's make 3 identical parts now! Horizontally place a light grey 1x2 plate with a hinge connector on the short side in front of you so the connector faces the left. Then horizontally place a light grey 1x3 plate on top so it overhangs 1 stud to the right.
10. Horizontally place a dark grey 1x2 plate with a hinge and a stud underneath the overhang so the hinge faces the right.
11. Flip your part upside down so it is horizontal and the hinge connector faces the left. Then horizontally place a dark grey 1x2 rounded plate on top so it is centered horizontally.

12. Horizontally place 2 light grey 1x2 sloped curved plates with a smooth underside on top so they slope outwards and there is no overhang.

13. Flip your part over so it is upright, horizontal, and the hinge is on the right. Now attach the hinge connector of a dark grey axle connector to the hinge. Then rotate it so the axle connector faces the right.

14. Horizontally attach the hinge of a light grey 1x4 brick with a hinge connector and a hinge to the left-facing hinge connector.

15. Place a dark grey 1x1 slope tile on the leftmost stud so it slopes to the right. Then horizontally place a dark blue 1x2 grill tile to the right. Now horizontally place a dark grey 1x2 sloped curved tile to the right so it slopes to the left. It should overhang to the right.

16.1. Let's make a part! Horizontally place a light grey 1x3 plate in front of you.

16.2. Horizontally place a dark blue 1x4 plate on top so it overhangs 1 stud to the right.

16.3. Horizontally place a light grey 1x2 sloped curved plate with a smooth underside underneath the overhang so it slopes to the right. There should be 1 stud exposed to the right too!

16.4. Horizontally place a dark grey 1x2 slope brick on the 2 leftmost studs so it slopes to the right. Then place a dark grey 1x1 round plate to the right. Now horizontally place a dark grey 1x2 plate with a hinge and a stud to the right so the hinge is on the right.

16.5. Horizontally place a dark grey 1x2 rounded plate on top of the 1x1 round plate and stud of the hinge connector.

16.6. Flip your part upside down so it is horizontal and the 1x2 slope brick is on the left. Then attach the bottom-facing hinge that is on the right to the left-facing hinge connector of your previous part. This is 1 of the tri-droid's legs! Repeat steps 9-16 again so you have 3 of these legs in total!

17. Attach the right-facing axle connector to the front bottom-facing axle of your tri-droid. Make sure the 1x2 brick at the bottom faces the back. Now repeat symmetrically with the other bottom-facing axles. Now you can bend all the legs so it can stand!

Group 10 - Tri-droid

18. Insert a black bar into each of the axle holes that are right below the dark blue bottom container part. You should have inserted 3 bars in total!

19. Insert a thin light grey axle connector into each of the previous bars. It is like a ring! Then push them all the way in!

20. Let's make a part! Place a transparent red 1x1 round tile on top of a dark grey 1x1 plate with a clip. Then repeat 2 more times so you have 3 parts in total. Now attach the clips of them to each of the previous bars so they sit in front of the thin axle connectors and 1x1 round tiles are on top and face outwards.

21. Let's make a part! Place a transparent red 1x1 cone brick on top of a light grey bar with a stud. Now repeat 2 more times so you have 3 parts in total! Now orient your tri-droid so 1 leg faces the front. Now insert the bar side of 1 part into the right-facing pinhole of the front leg so the 1x1 cone brick faces the right. Now repeat symmetrically with the other 2 legs. They should all go in the same direction!

22. You can flick the previous parts with your finger to shoot them out!

Thank you so much for building this set!

Visit bricksfortheblind.org for more accessible instructions, sign up for our newsletter, and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 2 LEGO Starwars Theme kits:

75384 The Crimson Firehawk™

75372 Clone Trooper™ & Battle Droid™ Battle Pack
