

## **77070 Durr Burger**

Adapted by John Le and tested by Natalie Charbonneau.

Based on the LEGO Fortnite video game, the set lets fans create a display model of Durr Burger, the iconic restaurant mascot from the Fortnite universe. Young gamers will have loads of fun and victory well done building the model before discovering its exciting details, including the instantly recognizable eyes, tongue and olive on a toothpick.

Video game figure – The building set is based on the iconic Durr Burger restaurant, which also appears in the LEGO® Fortnite video game.

Savor the details – Fortnite fans will love discovering the Durr Burger's eyes and tongue, plus the recognizable olive on a toothpick.

Collectible display toy – Once complete, the burger toy becomes a display model that video game-lovers can showcase proudly in their bedrooms or games rooms.

Dimensions – The building set contains 193 pieces and measures over 4.5 in. (11 cm) high, 3.5 in. (8 cm) wide and 3.5 in. (9 cm) deep.

The front of the box shows the Durr burger. It is a cheeseburger with a pink tongue and olive with a toothpick on top! It has 2 big eyes that come out of the burger!

The back of the box shows a picture of the burger looking out into the mountains!

The top of the box shows a real size image of a pink 1x2 curved tile.

The build is 193 pieces in total and is for ages 7+.

Bag 1 includes the pieces for half of the burger.

Bag 2 includes the pieces for the rest of the burger.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.

- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/77070>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bags labeled 1 and 2, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Burger

Group 1 - Steps 1-7 and 2 green 1x4 plates from Step 8.

Group 2 - Rest of Step 8 and Steps 9-12.

Group 3 - Steps 13-21.

Group 4 - Steps 22-29.

Group 5 - Steps 30-31.

Group 6 - Steps 32-37.

Bag 2 - Burger

Group 7 - Steps 38-48.

Group 8 - Steps 49-55.

Group 9 - Steps 56-62.

Group 10 - Steps 63-69.

Group 11 - Steps 70-71.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Burger

1. Horizontally place a dark grey 2x6 plate with 4 side studs in front of you so the side studs face the back. Then vertically place a lime green 1x6 plate on the leftmost column so it overhangs 4 studs to the front. Then repeat symmetrically to the right.
2. Place a white 2x2 plate underneath the back 2 studs of the left overhang so 1 column is exposed to the right. Then repeat symmetrically to the right.
3. Horizontally place a dark grey 2x6 plate with 4 side studs underneath the front overhang so it is centered horizontally and the side studs face the front.
4. Place 4 light grey 2x2 corner tiles around the middle 2x2 gap. They should form a square.
5. Horizontally place a tan 1x4 brick with 4 side studs on the front row so it is centered horizontally and the side studs face the front. Then repeat symmetrically to the back.
6. Vertically place a tan 1x4 brick with 4 side studs on the leftmost column so it is centered vertically and the side studs face the left. Then repeat symmetrically to the right.
7. Place a light grey 1x1 brick with 2 side studs in each of the corners so the side studs face outwards.

You will have 2 extra green 1x4 plates. Save them for later!

Group 2 - Burger

- 8.1. Let's make 2 identical parts! Horizontally place a white 2x6 plate with 4 side studs in front of you so the side studs face the front. Then horizontally place a green 1x4 plate from group 1 on the front row so it is centered horizontally.
- 8.2. Horizontally place a tan 1x2 log brick on the back row so it is centered horizontally. Then place a brown 2x2 corner brick in the back left corner so it looks like the braille letter f. Then repeat symmetrically to the right.
- 8.3. Horizontally place a black 1x4 plate on the front row so it is centered horizontally.
- 8.4. Horizontally place a brown 2x4 plate on top so it is centered horizontally.
- 8.5. Now you should have 2 identical parts! Flip your main build upside down so the 2x4 side studs face the front and back. Now horizontally place 1 part upright on the right-facing side studs so it is centered horizontally and the side studs face up. Then repeat symmetrically to the left.

9.1. Let's make the burger bun now! Place an orange 10x10 octagon plate in front of you. Then place 4 orange 2x6 sloped curved bricks on edges around the plate so they form a circle.

9.2. Make sure your main build is still upside down and horizontal. Then place your part on top so it is centered.

10. Flip your build upside down so it is horizontal. Then place 1 brown 2x2 plate upright on the right-facing side studs so it is centered horizontally. Then repeat symmetrically to the left.

11.1. Let's make the inside of the burger! Place a white 4x4 round brick with side holes in front of you so the holes face the front left and front right corners, and back left and back right corners. Now place a green 2x2 round tile with a hole on top so it is centered.

11.2. Insert a red 1L pin with a stud into the back left and front right holes so the stud side faces outwards.

11.3. Place a green 1x1 pyramid tile upright on each of the side studs.

11.4. Place your part in the center on the 4x4 lower stud area so the pyramid tiles face the back left and front right. This part will be used later to insert an axle into to hold the burger together!

12. Horizontally place a black 1x4 plate on the back row so it is centered horizontally. Then repeat symmetrically to the front.

### Group 3 - Burger

13. Horizontally place 3 yellow 2x3 plates, 1 in front of the other, on the leftmost column to the left of the previous 1x4 plates. They should only connect to 1 column of studs. Now repeat symmetrically to the right.

14. Let's make part of the meat! Horizontally place a dark grey 2x6 plate with 4 side studs in front of you so the side studs face the back. Then vertically place a light blue 1x2 plate on the leftmost column. Then repeat symmetrically to the right.

15. Horizontally place a light blue 1x2 plate on the front row so it is centered horizontally.

16.1. Let's make 2 identical parts! Vertically stack 2 brown 1x2 plates with a rail on top of each other so the rails face the right. Then horizontally place a brown 2x4 plate on top so it overhangs 3 columns to the left.

16.2. Horizontally place 1 part on top of the 3 leftmost columns of your previous part so the rails face the left. Then repeat symmetrically to the right.

17. Horizontally place a brown 2x6 plate on top so it is centered horizontally.

18. Horizontally place a brown 2x4 plate on top so it is centered horizontally.

19. Vertically place a brown 1x2 rounded plate on the leftmost and rightmost columns of the 2x4 plate from the previous step.

20. Bring back your main build so it is oriented the same way. Now horizontally place your part upright on the front-facing side studs so it is centered horizontally and the side studs face up. This is part of the burger meat!

21. Horizontally place a yellow 2x2 angled plate on the right 2 studs of the front row so the angled side faces the front right and the short side faces the right. Then repeat symmetrically to the left.

#### Group 4 - Burger

22.1. Let's make the tongue of the burger! Horizontally place an orange 2x3 plate in front of you.

22.2. Place a pink 1x2 curved tile on the front right corner so it overhangs to the front and the flat sides face the back and left. Then repeat symmetrically to the back.

22.3. Place 2 pink 1x1 quarter tiles, 1 in front of the other, on the middle column so they fit in between the 1x2 curved tiles.

22.4. Vertically place your part upright on the front-facing side studs so it is centered horizontally and the curved tiles are on the bottom.

23. Let's make part of the meat! Horizontally place a dark grey 2x6 plate with 4 side studs in front of you so the side studs face the front. Then vertically place a light blue 1x2 plate on the leftmost column. Then repeat symmetrically to the right.

24. Horizontally place a light blue 1x2 plate on the back row so it is centered horizontally.

25.1. Let's make 2 identical parts! Vertically stack 2 brown 1x2 plates with a rail on top of each other so the rails face the right. Then horizontally place a brown 2x4 plate on top so it overhangs 3 columns to the left.

25.2. Horizontally place 1 part on top of the 3 leftmost columns of your previous part so the rails face the left. Then repeat symmetrically to the right.

26. Horizontally place a brown 2x6 plate on top so it is centered horizontally.

27. Horizontally place a brown 2x4 plate on top so it is centered horizontally.

28. Place a brown 2x2 plate on top so it is centered horizontally.

29. Now horizontally place your part upright on the back-facing side studs of your main build so the side studs face up.

#### Group 5 - Burger

30. Horizontally place a yellow 1x8 plate on the back row so it is centered horizontally.

31.1. Let's make the cheese! Horizontally place a yellow 1x6 plate in front of you. Then horizontally place a yellow 1x2 tile on top so it is centered horizontally. Now vertically place a yellow 2x4 tile on the leftmost column so it overhangs 3 rows to the front. Now repeat symmetrically to the right.

31.2. Horizontally place the overhang of your part on the back 3 rows so the back row sits on the upright pieces and it is centered horizontally.

#### Group 6 - Burger

32. Let's make a part! Horizontally place a light grey 2x6 plate in front of the 2x4 tiles from the previous step so it is centered horizontally. Then place a green 2x2 round tile with a hole on top so it is centered horizontally. Now horizontally place a light green 1x6 plate in front of the 2x6 plate so it is centered horizontally.

33. There are left and right orientations of this piece, make sure you use the right one! Vertically place a yellow 1x2 angled sloped curved tile on the back row to the right of the 2x4 tile that is in the back right so it overhangs to the back and the angled side faces the back right. Then vertically place another 1 to the right so it also overhangs to the back and the angled side faces the back right. Now repeat both parts symmetrically to the left.

34. Vertically place a yellow 2x4 tile on the 2 rightmost columns in front of the previous angled sloped curved tile. Then repeat symmetrically to the left.

35.1. Let's make part of the tomato! Horizontally place a red 2x4 plate in front of you. Then horizontally place a yellow 1x2 tile on the back row so it is centered horizontally. Now place 4 red 1x1 half-cylinder bricks, 1 to the right of the other, on the front row so they slope to the front and back.

35.2. Horizontally place your part on the front 2 rows so it is centered horizontally and the 1x2 tile faces the back.

36. Place a yellow 2x2 sloped curved tile on the front row to the right of your previous part so it slopes and overhangs to the front. Then vertically place a yellow 1x2 angled sloped curved tile to the right so it slopes to the front and the angled side faces the front right corner. There are left and right orientations of this piece, make sure you use the right one! Now repeat both parts symmetrically to the left.

37. Place a tan 2x2 round brick on the back 2 rows in between the 2x4 tiles so it is centered horizontally. Then place a green 2x2 round tile with a hole on top.

#### Building Instructions (Bag 2, Book 1):

#### Group 7 - Burger

38. Vertically place a dark grey 1x6 tile behind the rightmost 1x1 half-cylinder brick that is on the front row. Then repeat symmetrically to the left.

39.1. Let's make 2 identical parts that the burger bun will sit on! Horizontally place a dark grey 1x2 plate with 2 side studs in front of you so the side studs face the front. Then horizontally place a dark tan 1x3 plate on top so it overhangs 1 stud to the right.

39.2. Place a dark grey 1x1 plate with a side stud underneath the overhang so the side stud faces the front.

39.3. Place a red 1x1 round tile on the leftmost and rightmost studs. Then horizontally place a dark tan 1x3 plate upright on the front-facing side studs.

39.4. Now you should have 2 identical parts! Vertically place 1 on the 3 studs that are to the right of the right 1x6 tile you previously placed so the side studs face the right. Then repeat symmetrically to the left.

40.1. Let's make 2 identical parts! Place a red 1x1 plate in front of you. Then place a red 1x6 half-arch with a 1x2 plate part on top so it overhangs to the right.

40.2. Now you should have 2 parts! Place the plate part of 1 part upright on the back 2 right-facing side studs of the 1x3 plate so it curves to the back left. Then repeat symmetrically to the left.

41. Place the plate part of a red 1x3 half-arch brick on the front right-facing stud of the previous 1x3 plate so it curves to the front left. Then repeat symmetrically to the left.

42. Horizontally place a red 1x3 tile upright on the right-facing side studs of your previous half-arches. Then repeat symmetrically to the left.

43. Place a pink 4x4 sloped curved panel with a bar upright on the front-facing side studs so it is centered horizontally and slopes up and to the back.

44. Let's make the inside of the top burger bun! Horizontally place a brown 1x5 rounded plate with a axle hole in the middle in front of you. Vertically place a black 1x3 rounded plate on the 2nd stud from the right so it is centered vertically.

45. Horizontally place the right stud of a black 1x3 rounded plate underneath the front overhang. Then repeat symmetrically to the back.

46. Vertically place a brown 1x5 rounded plate to the left of the vertical 1x3 rounded plate so it is centered vertically. Then place a light blue 1x1 round plate underneath the front overhang. Then repeat symmetrically to the back.

47. Vertically place a black 1x3 rounded plate to the left of the vertical 1x5 rounded plate so it is centered vertically.

48. Vertically place a black 1x2 jumper plate with a rounded side on the leftmost column so the rounded side faces the left. Then repeat symmetrically to the right.

49. Vertically place an orange 1x4x3 sloped curved brick on the back 2 rows so it is centered horizontally and slopes and overhangs 2 rows to the back. Now place another 1 on the 2 rightmost columns so it is centered vertically and it slopes and overhangs 2 columns to the right.

50. Let's make part of the burger bun! Horizontally place an orange 1x4 plate in front of you. Place a black 1x1 brick with an axle hole on the rightmost stud so the hole faces the left and right.

51. Insert a dark grey L-shaped pin connector with 2 axles into the right-facing axle hole so the other axle faces the front.

52. Let's make another part! Vertically place an orange 1x4 plate in front of you. Then place a black 1x1 brick with an axle hole on the back stud so the axle hole faces the front and back. Now insert the axle hole of your part to the front-facing axle of your previous part!

53. Place a tan 1x1 brick with a side stud and a bottom lip in front of the right 1x1 brick with an axle hole so the side stud faces the front. Now place a black 1x1 clip upright on the front-facing side stud so the clip hands face up and down. Now repeat both parts symmetrically to the back left.

54. Horizontally place a white 1x2 jumper plate on top of the bricks on the rightmost column. Then repeat symmetrically to the back left.

55. Place a light blue 1x1 round plate on top of each of the previous 1x2 jumper plates.

#### Group 9 - Burger

56. Attach a gold 1x1 round plate with a bar underneath to the front-facing clip so the stud faces the front. Then place a green 1x1 round plate upright on it. Now repeat both parts symmetrically to the back left.

57. Vertically place an orange 1x3 sloped curved brick on the right 1x1 round plate that is on top of the 1x2 jumper plate so it slopes and overhangs 2 rows to the front. Then repeat symmetrically to the back left.

58. Now bring back your previous part so the 1x4x3 sloped curved bricks face the back and right. Then place your part on the front left corner so it overhangs 2 studs to the front and 2 studs to the left. This is the base of the burger bun!

59. Place an orange 4x4x3 sloped curved quarter brick on the front left corner so the curve faces the front left. It should attach to 1 stud. Now repeat to all the other corners! This is the burger bun!

60. Place an orange 4x4 round plate on top so it is centered.

61. Place a white 1x1 round tile on the left stud of the front row. Then place another 1 on the right stud of the back row. Then place 1 on the back stud of the leftmost column. Then place 1 more on the front stud of the rightmost column. These are sesame seeds!

62. Insert a tan 2L bar with a stop into the front-facing side stud. Then insert another 1 into the left-facing side stud.

#### Group 10 - Burger

63. Place a white ball with a stud upright on the front-facing and left-facing bars from the previous step. Then place a black 1x1 round tile upright on each of them. These are the eyes!

64. Bring back your main burger build and orient it so the pink 4x4 sloped curved panel faces the front. This is the tongue! Now place your part on top so the eyes face the front left and front right.

65.1. Let's make the part that holds the olive! Horizontally place a yellow 9L axle in front of you. Then insert a tan 1x1 cone brick into the left-facing side.

65.2. Insert the axle into the top-facing hole of the 4x4 round plate so the cone brick faces up.

66. Let's make part of the olive! Place a tan 1x1 cone brick in front of you. Then place a light green 1x1 brick with a side stud on each side on top.

67. Place a light green 1x1 tile upright on the front-facing and back-facing side studs.

68. Place a light green 1x1 round plate on top.

69. Place a light green 2x2 dome brick on the left-facing side studs so it is centered. Then repeat symmetrically to the right.

Group 11 - Burger

70. Place a red 1x1 round tile upright on the left-facing side stud. Then insert a tan 2L bar with a stop into the top-facing stud.

71. Now horizontally place your part on top of the tan 1x1 cone brick that is on the burger! This is the olive!

Thank you so much for building this set!

Visit [bricksfortheblind.org](http://bricksfortheblind.org) for more accessible instructions, [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 4 LEGO Fortnite Theme kits:

77072 Peely Bone

77070 Durr Burger

77071 Supply Llama

77073 Battle Bus
