Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.

- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/43246>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 11 bags labeled 1 to 11, 4 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Rings and Ariel

Sub-build 1. Locate 2 light orange rings with a stud on them. Then locate 4 2x2 round tiles printed with different things. 1 has a pink surface and a dark pink head on it, 1 has a light blue surface and a dark blue head on it, 1 has a light green surface with a dark green head on it, and the last 1 has a light blue surface with a dark blue head on it! Now place 2 of them on top of the rings! You can switch them out if you want!

Sub-build 2. Locate 1 aqua dress with a light blue gown, 1 aqua pair of legs with brown boots, 1 aqua torso with a light blue top printed with a purple clam, 1 tan head printed with red lips and blue eyes, and 1 red hair. Assemble your minifigure then put her aside while we make the fountain and bench! You can interchange the dress and pair of pants if you like!

Group 2 - Fountain and Bench

1. Horizontally place a tan 2x16 plate in front of you.
2. Place a white 2x2 tile with a stud on the 2 leftmost columns. Then place a light grey 2x2 round tile to the right.
3. Vertically place a light grey 1x2 rounded plate to the right of the 2x2 round tile. Then place a light grey 2x2 round tile to the right. Then vertically place another light grey 1x2 rounded plate to the right. Then place another 2x2 round tile to the right.
4. Place a dark tan 1x1 round tile with an upward bar on the left 2x2 tile with a stud. Then place a white 2x2 half-cone brick upside down on the bar.
5. Vertically place a brown 1x2 plate with a bar on the short side on top of each of the 1x2 rounded plates so the bars face the back.

6. Attach the clip of a brown 1x2 plate with a clip on the short side to each of the back-facing bars so they overhang in the back.

7. Horizontally place 2 light brown 1x6 tiles, 1 in front of the other, on the front 2 rows on top of 1x2 plates with a bar, so together they are centered horizontally.

8. Repeat the previous step symmetrically to the back 2 rows, on top of the 1x2 plates with a clip. Now flip the overhang part up so the tile side faces the front! This is a bench!

9. Place a green plant with 3 stems in the center of the upside down 2x2 half-cone brick that is on the 2 leftmost columns. Now place a magenta 1x1 round flower plate on each of the stems!

Group 3 - Fountain and Bench

10. Place a green plant with 3 stems on top of the previous plant with 3 stems. Now place a light purple 1x1 round flower plate on each of the stems!

11.1. Let's make a part! Place a green 6x6 rounded plate in front of you. Then place a light blue 4x4 round plate on top so it is centered. Now flip your part upside down. Then place a green 2x2 plate on the back 2 rows so it is centered horizontally. Then repeat symmetrically to the front.

11.2. Flip your part over so it is right-side-up and the 2x2 plates from the previous step are in the front and back. Now place your part on the 6 rightmost columns so it is centered vertically.

12. Place 4 white 1x3 sloped curved bricks all around the previous 4x4 round plate so they slope outwards of the 4x4 round plate.

13. Place a white 2x2 half-cone brick on top of the 4x4 round plate so it is centered. Then place a dark tan 1x1 round tile with an upward bar on top.

14. Place a white 3x3 dish upside down on top of the bar from the previous step.

15. Place a transparent light blue 1x1 cone brick upside down on top of the dish from the previous step. Now place a transparent light blue 2x2 dish upside down on top of the cone brick. This is a water fountain!
