

75681 Glinda, Elphaba & Nessarose at Shiz University

Adapted by John Le and tested by Jolene Nemeth

Transport girls and boys aged 7 plus to the land of Oz with the Glinda, Elphaba & Nessarose at Shiz University (75681) fantasy toy. It's the ideal gift for kids who love dollhouse playsets and fans of the Wicked movie.

Fans embark on their LEGO® Wicked adventure as Glinda arrives at Shiz University on a sailboat toy for kids. The boat toy has a hinged sail and comes in a pink shade, just like the one from the movie. Inspired by the Wicked movie, this best-friend gift lets kids play out friendship stories between the Glinda, Elphaba and Nessarose mini-doll figures.

Magical dollhouse playset and sailboat for kids – The LEGO® Wicked Glinda, Elphaba & Nessarose at Shiz University set recreates an iconic moment from the movie where the girls meet for the first time.

Comes with 3 characters from the movie – This fantasy toy for kids aged 7 plus includes Glinda, Elphaba and Nessarose mini-dolls, a toy wheelchair, travel cases, a book stand and a spell book.

Recreate movie magic – This set is packed with recognizable features from the movie, including Glinda's sailboat and Elphaba's journal, plus lots of magical toy elements.

Measurements – This 304-piece set includes a university toy measuring over 6 in. (15 cm) high, 6 in. (16 cm) wide and 4 in. (10 cm) deep.

The front of the box shows Shiz University on the coast! Glinda is on a sailboat coming to the university. Elphaba and Nessarose are waiting at the front of the university to greet her!

The back of the box shows the back of the university. There are a bunch of books to read from and different potions to learn!

The top of the box shows all the minifigures hanging out with each other reading books!

The build is 304 pieces in total and is for ages 7+.

Bag 1 includes the pieces for the sailboat and part of the university.

Bag 2 includes the pieces for part of the university.

Bag 3 includes the pieces for the rest of the university.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back

- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/75681>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1, 2, 3, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Sailboat and University

Group 1 - Page 4.

Group 2 - Page 5

Group 3 - Steps 1-6.

Group 4 - Step 7.

Group 5 - Steps 1-15.
Group 6 - Steps 16-26.

Bag 2 - University

Group 7 - Steps 27-29 and 1 transparent light blue diamond and 1 transparent light blue 1x1 cone brick from Step 30.

Group 8 - Rest of Step 30 and Steps 31-33.

Group 9 - Steps 34-44.

Group 10 - Steps 45-51.

Group 11 - Step 51.

Group 12 - Step 52.

Bag 3 - University

Group 13 - Page 63.

Group 14 - Steps 53-54 and 2 tan 1x1 round plates from Step 55.

Group 15 - Rest of Step 55 and Steps 56-60.

Group 16 - Steps 61-71

Group 17 - Steps 72-75.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Glinda

Sub-build 1.1. Locate 1 tan pair of legs printed with light pink shoes and a light purple and pink skirt, 1 light purple and pink torso printed with a jacket, 1 tan head printed with pink lipstick and eyelashes, tan hair, and a light purple bow. Assemble your minifigure then attach the bow to the top of her head!

Sub-build 1.2. Attach a pink panel with a bar with a sticker to her hand! This is a notebook!

Sub-build 1.3. Skip this step if you have already placed your sticker! Ask a helper to place sticker 3 on the pink panel with a bar. This sticker has a strap with a lock on it! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Group 2 - Nessarose

Sub-build 2. Locate a light brown pair of legs printed with pink and blue shoes, and a sand blue skirt, 1 light brown torso printed with a pink and blue top, 1 light brown head printed with light pink lipstick, eyelashes, and brown eyes, and 1 black hair. Assemble your minifigure then put her aside while we make her wheelchair!

Sub-build 3.1. Vertically place a gold wheel chair base with a sticker in front of you so the pins are in the front and face left and right.

Sub-build 3.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 2 on the front-facing side of the wheelchair. This sticker is gold and has a brown square and a swirl design. Make

sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Sub-build 3.3. Flip your wheelchair upside down so the pins are in the front and face left and right. Now horizontally attach 2 small wheels with a bar on the back top-facing clips! Then attach a larger black wheel to each of the pins!

Sub-build 3.4. Now flip it back over so it is upright then place your minifigure on top!

Sub-build 3.5. Locate 2 halves of a brown briefcase attached together, then push them together so they form a briefcase! Then place it beside her!

Group 3 - Sailboat

1. Horizontally place a pink sail boat in front of you so the curved side faces the left. Then place a light pink 2x2 container on the front 2 rows on the 2nd and 3rd columns from the right. Then place a pink 2x2 tile with a gold swirl design on top.

2. Place a light pink 2x2 round brick to the left of the previous container. Then place a light purple 2x2 round tile with a stud on top.

3. Place a light pink 2x2 brick on the back 2 rows on the 3rd and 4th columns from the right. Then place a pink 2x2 tile with a stud on top.

4. Place the back left corner of a light pink 2x2 container on the stud of the 2x2 tile from the previous step. Then place a light blue flower inside. Now place a pink 2x2 tile with a gold swirl design on top.

5.1. Let's make a part! Vertically place a white pin hole with an axle hole in front of you so the axle hole faces the front and the pinhole faces up and down. Now insert a black 2L pin into the top-facing hole.

5.2. Insert a white 2L bar with a stop into the front-facing axle hole.

5.3. Horizontally place a white pin hole with 2 bent axle holes on top of the pin so the axle holes face the back left and back right.

5.4. Insert a dark grey bar with a ball into the top-facing pin.

5.5. Insert a white 4L bar into the back right facing axle hole. Then insert a white axle connector with an axle hole into the bar so the axle connector faces up and down. Now insert a dark grey bar with a ball into the top so the ball faces up.

5.6. Insert the axle of a white curved bar with a stud into the back left facing axle hole so it curves to the back. Now insert a dark grey bar with a ball into the top of the stud so the ball faces up.

5.7. Insert the front-facing bar of your part into the leftmost stud that is on the edge of the boat so the curved bar faces up and the balls face the front!

6.1. Let's make a part! Vertically place a white pin hole with an axle hole in front of you so the axle hole faces the front and the pinhole faces up and down. Now insert a black 2L pin into the top-facing hole.

6.2. Insert a white 2L bar with a stop into the front-facing axle hole.

6.3. Horizontally place a white pin hole with 2 bent axle holes on top of the pin so the axle holes face the back left and back right.

6.4. Insert a dark grey bar with a ball into the top-facing pin.

6.5. Insert a white 4L bar into the back left facing axle hole. Then insert a white axle connector with an axle hole into the bar so the axle connector faces up and down. Now insert a dark grey bar with a ball into the top so the ball faces up.

6.6. Insert the axle of a white curved bar with a stud into the back right facing axle hole so it curves to the back. Now insert a dark grey bar with a ball into the top of the stud so the ball faces up.

6.7. Insert the front-facing bar of your part into the rightmost hole that is on the edge of the boat so the curved bar faces up and the balls face the front!

7. Now attach a tan plastic triangular sail with a gold swirl design to the previous part you placed on the left so the outer curve faces the left! Now repeat symmetrically to the right with a sail that has a swirl design inside of a circle! Put this sailboat away now while we make the university!

Group 4 - University

1. Horizontally place a white 4x6 tile with 3 sides of studs and a sticker in front of you so the 1x6 studs face the front!

2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 1 on the white 4x6 tile with 3 sides of studs. This sticker is white and has a gold swirl design with gold etchings around the edges. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

3. Horizontally place a light blue 1x4 plate underneath the front row so it is centered horizontally.

4. Vertically place a light blue 2x8 plate underneath the leftmost column so 1 column is exposed to the left and 4 rows are exposed to the back. Then repeat symmetrically to the right.

5. Horizontally place a white 1x6 plate behind 4x6 tile with 3 sides of studs so it is centered horizontally. Then horizontally place a white 2x6 tile behind it so it is centered horizontally.

6. Horizontally place a white 4x8 plate with a rounded side on the back row so it is centered horizontally and the rounded side overhangs 3 rows to the back.

Group 5 - University

7. Rotate your build 180 degrees so the rounded plate faces the front. Now horizontally place a light blue 4x8 plate with a rounded side underneath the front overhang so it is centered horizontally and the rounded side is exposed 1 row to the front.
8. Vertically place a white 2x3 plate on the back left corner so it overhangs 1 column to the left. Then repeat symmetrically to the right.
9. Place the back left corner of a light blue 6x6 plate with a curved side underneath the back right overhang so the curved side faces the front right. Then repeat symmetrically to the left.
10. Place a white 4x4 plate with an inverted curve in front of the right 2x3 plate so the inverted curve faces the front right. Then repeat symmetrically to the left.
11. Vertically place a white 1x2 tile on the back 2 rows to the left of the left 2x3 plate. Then place a white 2x2 tile with a stud to the left. Now vertically place a white 1x2 plate to the left.
12. Place a white 2x2 plate with a cutoff corner in front of the 1x2 plate and left column of the 2x2 tile with a stud from the previous step so the cutoff corner faces the front left.
13. Horizontally place a white 2x3 plate on the back 2 rows to the right of the right 2x3 plate. Then vertically place a white 1x2 plate to the right. Now horizontally place another 1x2 plate in front of the left 2 columns of the 2x3 plate. Then place a white 2x2 plate with a cutoff corner to the right so the cutoff corner faces the front right.
14. Vertically place a tan 1x2 brick with a bar on the short side on the back 2 rows on the 2nd column from the left so the bar faces the back. Then repeat symmetrically to the right.
15. Place a light brown 2x2 corner brick with a cutoff corner in front of the left 1x2 brick with a bar that is on the left so the cutoff corner faces the front left. Then place a light brown 1x1 brick to the right of the front row of the corner brick with a cutoff corner. Then place the front row of a light brown 2x2 corner brick with a cutoff corner to the right so the cutoff corner faces the front right. Now repeat all parts symmetrically to the right.
16. Horizontally place a tan 1x2 log brick on the 3rd row from the back on the 7th and 8th columns from the left. Then place a light blue 2x2 tile in front. Now repeat both parts symmetrically to the right.
17. Horizontally place a tan 1x2 log brick on top of each of the log bricks from the previous step.
18. Horizontally place a tan 1x2x2 brick with 2x2 side studs on top of each of the log bricks from the previous step so the side studs face the front.
19. Place a dark grey 1x1 plate on top of the left stud of the left 1x2x2 brick with 2x2 side studs from the previous step. Then place a tan 1x1 plate with a clip to the right so the clip faces the back. Now repeat symmetrically to the right.
20. Place a tan 1x1 brick on top of the left 1x1 plate from the previous step. Then place a tan 1x3x3 half arch to the right so it overhangs to the right. Now repeat both parts symmetrically to the right.

21. Rotate your build 180 degrees. Then horizontally place a light grey 1x2 panel behind the 2x2 tile with a stud that is in the front right corner so the wall faces the front.
22. Place a tan 1x1x5 brick on the front row on the 7th column from the left. Then repeat symmetrically to the right.
23. Vertically place a tan 1x3 arch brick on top of the left 1x1x5 brick so it attaches to the 1x1 brick in the back. Then repeat symmetrically to the right.
24. Place a tan 2x2 corner brick on top of the back 2 studs of the left 1x3 arch brick it looks like the braille letter f. Then repeat symmetrically to the right.
25. Horizontally place a tan 1x6 plate on top of the previous corner bricks and 1x3x3 arch bricks so it is centered horizontally.
26. Vertically attach a black 1x1 telescope bar upside down to each of the front-facing clips. Then attach a transparent orange candle flame to the top of each of the telescope bars.

Building Instructions (Bag 2, Book 1):

Group 7 - University

- 27.1. Let's make a part! Horizontally place a brown 1x2 log brick in front of you. Then horizontally place a light grey 1x2 panel with small clips on top so the wall faces the back.
- 27.2. Place a light grey 2x2 plate with a small bar underneath so it overhangs to the back. Now horizontally place a light grey 1x2 tile on the back row. Then horizontally place a light grey 1x2 panel in front so the wall faces the front.
- 27.3. Rotate the top part so it slopes to the front!
- 27.4. Horizontally place your part on the 2nd row from the front on the 4th and 5th columns from the left so it slopes to the front.

28. Let's make a part! Horizontally place a dark tan 2x3 plate in front of you.

29. Vertically place a light grey 1x2x2 brick on the leftmost column. Then horizontally place another 1 on the back right corner.

30.1. Place a transparent light blue 1x1 cone brick in the front right corner. Then place a transparent light blue diamond on top.

Group 8 - University

30.2. Place a transparent light green 1x1 cone brick to the left of the previous cone brick. Then place a transparent light green diamond on top.

31. Horizontally place a dark tan 2x3 plate on top so it is centered.

32. Vertically place a light grey 1x2x2 brick on the leftmost column.

33.1. Horizontally place a light grey 1x2x2 brick with a sticker on the back right corner so the sticker faces the back.

33.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 4 on the light grey 1x2x2 brick. This sticker is a QR code. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Group 9 - University

34. Place a transparent 1x1 round brick in the front right corner. Then place a light grey 1x1 round tile on top. Now place a light pink 1x1 cone brick to the left. Then place a transparent diamond on top.

35. Horizontally place a dark tan 2x3 plate on top so it is centered.

36. Horizontally place your part on the front 2 rows to the left of the 1x2 brick with a bar that is in the front right corner.

37. Rotate your build 180 degrees. Then place a light brown 2x2x5 corner panel with a cutoff corner on top of the leftmost 2x2 corner brick with a cutoff corner so the cutoff corner faces the front left. There should be no overhang. Then vertically place a tan 1x2x5 brick behind it. Then repeat both parts symmetrically to the right.

38.1. Let's make 2 identical parts! Stack 3 tan 1x1x2 bricks with 2 side studs on top of each other so the side studs face the front. Then place a light blue 1x1 tile with a rounded side upright on the topmost front-facing stud so the rounded side faces up. Now vertically place a white 1x6 tile with blue swirls and a heart upright on the 5 front-facing side studs so it overhangs 1 stud down.

38.2. Now you should have 2 identical parts! Place 1 to the right of the front row of the previous 2x2x5 corner panel with a cutoff corner that you placed on the left. Then repeat symmetrically to the right.

39. Place a light brown 2x2x5 corner panel with a cutoff corner to the right of the previous part you placed on the left so there is no overhang. The cutoff corner should face the front right. Then repeat symmetrically to the right.

40. Horizontally place the leftmost stud of a tan 1x6 arch brick on the back row on top of the 2nd column from the left so the other end sits on the brick. Then repeat symmetrically to the right.

41. Place a tan 1x1 brick on the 2nd column from the left in front of the 1x6 arch brick. Then repeat symmetrically to the right.

42. Place a tan 1x1 brick with a side stud and a bottom lip on the 2nd column from the left in front of the 1x1 brick so the side stud faces the front. Place another 1 to the right so there is a 1x3 gap in between so the side stud faces the front. It should sit on the back stud of the 2x2x5 corner panel with a cutoff corner. Now repeat both parts symmetrically to the right.

43. Place 3 tan 1x1 bricks with a side stud and a bottom lip, 1 to the right of the other, on the front studs of the left 2x2x5 corner panels with a cutoff corner and a 1x1x2 brick with side studs so the side studs face the front. Then repeat symmetrically to the right.

44. Horizontally place a tan 1x3 plate on top of each of the previous 3 1x1 bricks with side studs that you placed on the left in the previous step. Then horizontally place a tan 1x6 plate behind it so there is no overhang on the sides. Then repeat both parts symmetrically to the right.

Group 10 - University

45. Horizontally place a tan 2x16 plate on the back 2 rows so it is centered horizontally.

46. There are 2 sets of 1x5 front-facing side studs, 1 on the left side and 1 on the right side. Place a tan 1x1 slope tile upright on the rightmost front-facing side stud of the left set of 1x5 side studs so it slopes to the right. Then repeat symmetrically to the right. Now place another 1 upright on the rightmost front-facing side stud of the right set of 1x5 side studs so it slopes to the right.

47. Horizontally place a dark grey 1x2 rounded plate on the 3rd row from the back and 7th and 8th columns from the left. Make sure not to forget the lower column! Then horizontally place a tan 1x2 brick with 2 side studs on top so the side studs face the front. Now repeat both parts symmetrically to the right.

48. Horizontally place a light brown 1x3 tile with 2 studs upright on the left 1x3 front-facing side studs. Then repeat symmetrically to the right.

49.1. Let's make 2 identical parts! Horizontally place a tan 2x10 plate in front of you. Then vertically place a light blue 1x2 brick on the rightmost column.

49.2. Horizontally place 2 light yellow 2x4 plates, 1 to the right of the other, to the left of the 1x2 brick.

49.3. Place a teal 1x1 sloped curved quarter brick on the front left corner so the curve faces the front left. Then repeat symmetrically to the back.

49.4. Horizontally place 2 light yellow 2x4 half cylinder bricks, 1 to the right of the other, on top of the 2x4 plates.

49.5. Vertically place a light blue 1x2 tile on the rightmost column. Now you have 2 identical parts!

49.6. Vertically place the top row of 1 part upright on the left front-facing side studs of the 1x2 brick so it hangs down. Make sure the 1x2 tile is on the bottom. Then repeat symmetrically to the right.

50.1. Let's make 2 identical parts! Place a gold wine glass in front of you. Then place a green 1x1 plate with 3 leaves on top so the leaves face the front. Now insert a green stem with 3 leaves into the top. Then place a light pink flower on top.

50.2. Now you should have 2 identical parts! Place 1 to the left of the previous part you placed upright on the left. It should be on the lower level! Then repeat symmetrically to the right.

Group 11 - University

51. Place a red 1x1 plate with 3 leaves upright on the left front-facing side stud of the left 1x3 tile so the leaves face the left. Then place another 1 upright to the right so the leaves face the right. Then place another 1 upright on the left front-facing side stud of the right 1x3 tile so the leaves face the left. Then place a pink 1x1 round flower plate upright to the right.

Group 12 - University

52.1. Let's make a part! Horizontally place a red leaf plate with 6 studs in front of you so the end stud with the longer branch faces the right. Then place a pink 1x1 round flower plate on top of the leftmost stud.

52.2. Place a pink 1x1 round flower plate on top of the left stud of the front row.

52.3. Place a pink 1x1 plate with 3 leaves underneath the rightmost stud so the leaves face the right.

52.4. Place a dark red 1x1 round plate with a bent bar on the bottom underneath the leftmost stud so the bar faces the front.

52.5. Attach the bent bar of your part upright on the leftmost front-facing side stud so the leaf plate hangs down and faces the front left.

Building Instructions (Bag 3, Book 1):

Group 13 - Elphaba

Sub-build 4.1. Locate a pair of legs printed with black shoes, and a dark grey skirt with leggings, 1 green torso printed with a light blue and grey shirt, 1 green head printed with eyes, nose, and lips, 1 black hair, and 1 brown panel with a bar and a sticker. Assemble your minifigure then attach the panel to her hand! This is a notebook!

Sub-build 4.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 5 on the brown panel with a bar. This sticker has a notebook cover with a space to write your name! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Group 14 - University

53. Vertically place a tan 1x2x2 slope brick on the back 2 rows on the 2nd column from the left so it slopes to the back. Then repeat symmetrically to the right.

54. Vertically place a dark tan 1x2x3 slope brick on the back 2 rows behind the left stud of the left 1x2 brick with 2 side studs so it slopes to the back. This is the 7th column from the left! Then repeat symmetrically to the right.

You will have 2 extra tan 1x1 round plates. Save them for later!

Group 15 - University

55. Place a dark grey 1x1 round plate to the left of the front row of the left 1x2x3 slope brick you placed in the previous step. Then place a tan 1x1 brick on top. Now place a tan 1x1 round plate from group 14 on top. Now repeat all parts symmetrically to the right.

56. Place a gold 1x1 telescope bar in front of the previous left 1x1 round plate you placed in the previous step. Now place another 1 in front of the 1x2x2 slope brick that is on the 2nd column from the left. Then place 3 more, 1 to the right of the other, on the 1x3 plate in front of and between the previous telescope bars. Now repeat everything symmetrically to the right.

57. Vertically place a tan 1x2 rounded plate on the 2nd column from the left on top of the slope brick and telescope bar. Then horizontally place a light brown 1x3 rounded plate to the right on top of the 3 telescope bars. Then vertically place another 1x2 rounded plate to the right so it sits on the 1x1 round plate and telescope bar. Now repeat everything symmetrically to the right.

58. Horizontally place a tan 1x2 log brick on top of each of the 1x2 bricks with side studs that are in front of the 1x2x3 slope bricks. Then horizontally place a gold 1x4 fence with a curved bar design in between them.

59. Place a red brown 1x1 plate on top of the middle stud of the left 1x3 rounded plate. Then place a red brown 1x2 curved tile to the left so the curve faces the front left. Then place another 1 to the right of the 1x1 plate so the curve faces the front right. Now repeat all parts symmetrically to the right.

60. Place a red brown 1x1 plate on the 2nd column from the left behind the 1x2 curved tile. Then place a teal 1x1 round tile on top. Now repeat both parts symmetrically to the right.

Group 16 - University

61.1. Let's make 4 identical parts! Stack 2 tan 1x1 round plates then place them in front of you. Now you should have 4 identical parts!

61.2. Place 1 part in front of the left 1x2x3 slope brick. Then place another 1 to the left of the stud of the 1x2x3 slope brick. Now repeat both parts symmetrically to the right.

62. Vertically place a tan 1x2 rounded plate on top of the left 1x2x3 slope brick and 1x1 round plate. Then repeat symmetrically to the right.

63. Horizontally place the plate part of a tan 1x2 sloped curved brick with a plate part on the back stud of the left 1x2 rounded plate so it slopes onto the 1x1 round plate that is to the left. Then place a tan 1x1 round plate in front of the plate part. Now repeat both parts symmetrically to the right.

64. Vertically place a tan 1x2 rounded plate on top of the left 1x1 round plate and 1x2 sloped curved brick with a plate part. Then repeat symmetrically to the right.

65. Place a tan 1x1x2 brick with 2 side studs to the right of the front stud of the left 1x2 rounded plate you placed in the previous step so the side studs face the front. Then repeat symmetrically to the right.

66. Horizontally place a tan 1x3x3 half arch brick on the back stud of the left 1x2 rounded plate so it overhangs to the right. Then repeat symmetrically to the right.

67. Stack 2 tan 1x1 round bricks on top of each other, then place them in front of the leftmost stud of the left 1x3x3 half arch brick. Then repeat symmetrically to the right.

68. Horizontally place a tan 1x3x3 half arch brick to the right of the left stack of the 1x1 round bricks so it overhangs to the right. Now repeat symmetrically to the right.

69. Horizontally place a tan 1x2 inverted sloped curved brick on top of the left stack of 1x1 round bricks and 1x3x3 half arch so it slopes to the left. Then repeat symmetrically to the right.

70. Stack 2 tan 2x4 plates together so there is no overhang, then horizontally place them on top of the 4 1x3x3 half arch bricks so it is centered horizontally.

71. Place a tan 1x1 round brick behind the left column of the left 1x2 inverted sloped curved brick. Then place a teal 1x1 round tile on top. Now repeat both parts symmetrically to the right.

Group 17 - University

72. Horizontally place a teal 1x2 sloped curved brick with a plate part to the right of the left 1x1 round tile from the previous step so it slopes to the left. Then repeat symmetrically to the right. Now horizontally place a tan 1x2 rounded plate in between them.

73. Place a teal 2x2 sloped curved corner brick with a plate part in front of the left 1x2 sloped curved brick with a plate part that is to the left of the 1x1 rounded plate so it overhangs to the front and the curve faces the front left. Then repeat symmetrically to the right. Now vertically place 2 teal 1x2 sloped curved bricks with a plate part, 1 to the right of the other, in between the previous bricks so they slope and overhang to the front.

74. Horizontally place a teal 2x4 plate on top of the plates from the previous steps so it is centered horizontally.

75.1. Let's make 2 identical parts! Horizontally place a tan 1x5 rounded plate in front of you. Insert a white 1x1 round tile with an upward bar into the middle axle hole so the anti-stud faces up. Now

75.2. Place a light blue 1x1 tile with a rounded side on the leftmost stud so the rounded side faces the left. Then place a light blue 1x1 quarter tile to the right so the curve faces the front right. Then repeat both parts symmetrically to the right.

75.3. Now you have 2 identical parts! Vertically place the 2 lowest rows of your part upright on the 2 left front-facing side studs so it hangs up. The curves of the quarter tiles should face the right. Then repeat symmetrically to the right.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 4 LEGO Wicked Theme kits:

75681 Glinda, Elphaba & Nessarose at Shiz University

75683 Glinda & Elphaba's Dormitory

75684 Welcome to Emerald City

75682 Elphaba & Glinda Figures
