

76301 Batman & Batmobile vs. Mr. Freeze

Adapted by John Le and tested by Jolene Nemeth.

This Batman™ & Batmobile™ vs. Mr. Freeze™ (76301) toy is a creative LEGO® set designed to help kids aged 4 and up develop their building skills as they role-play Super Hero™ adventures. The LEGO DC playset is packed with hands-on fun for preschoolers and young fans of Batman and cool vehicles.

The set includes Mr. Freeze and Batman minifigures, plus a buildable Batmobile that has room for the Batman minifigure to sit inside. Kids can launch ice elements from a shooter that has a hole in the top to hold Mr. Freeze's ice blaster or his popsicle. 2 ice diamonds can be attached to various places on the Batmobile, so kids can decide where Mr. Freeze 'freezes' the Batmobile.

Batman™ playset – This Batman & Batmobile™ vs. Mr. Freeze™ kids' toy helps boys and girls aged 4 and up learn to build as they enjoy endless Super Hero™ adventures.

Super Hero™ toys – The set includes Mr. Freeze™ and Batman™ minifigures, plus a buildable Batmobile™ featuring a large Starter Brick that makes construction fun and fast.

Batman™ vehicle adventures – In this good vs. evil LEGO® set, the toy's features and accessories inspire imaginative role play with the legendary Super Hero™.

Authentic accessories – Set includes a Batarang™, ice shooter with 2 ice elements, popsicle and a non-shooting ice blaster, plus 2 ice diamonds that can be attached to the Batmobile™ to 'freeze' it.

63-piece playset – The Batmobile™ measures over 2 in. (5 cm) high, 4 in.(11 cm) long and 2 in. (5 cm) wide.

The front of the box shows Batman in his batmobile riding down the street throwing a batarang at Mr. Freeze!

The back of the box shows all the accessories that the set comes with! It comes with Batman, Mr. Freeze, a batmobile, batarang, ice blaster, a barrier, ice, popsicle, and a diamond!

The top of the box shows a real size image of Batman.

The build is 63 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Mr. Freeze and his barrier.

Bag 2 includes the pieces for Batman and his batmobile.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.

- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/76301>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bags labeled 1 and 2, a cardboard box with a cape, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Mr. Freeze and Barrier

Group 1 - Pages 6-9.

Group 2 - Pages 10-26.

Bag 2 - Batman and Batmobile

Group 3 - Pages 4-5.

Group 4 - Pages 6-35

Group 5 - Pages 36-49.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Mr. Freeze

6-7. Locate 1 sand blue pair of legs, 1 sand blue torso printed with armor, 1 white head printed with a dark grey pair of glasses with red lens, 1 transparent helmet. Assemble your minifigure then put the dome on his head!

8-9. Attach a transparent red diamond and a white blaster to his hands! Now make sure the studs of the blaster face left, right, and front. Then place a transparent light blue crystal upright on the front-facing stud. This is the ice blaster! Now put away your Mr. Freeze while we make the barrier!

Group 2 - Barrier

10-11. Horizontally place a dark grey 3x6 trapezoid plate in front of you so the short side faces the front.

12-13. Place a transparent light blue 1x1 round brick on the back left corner. Then repeat symmetrically to the right.

14-15. Horizontally place a light grey 1x4 brick with a slot on the back row so it is centered horizontally.

16-17. Horizontally place a light grey 1x6 plate on the back row so it is centered horizontally. Now place a dark grey 2x2 tile on the front 2 rows so it is centered horizontally.

18-19. Horizontally place a light blue 1x2 jumper plate on the back row so it is centered horizontally. Now horizontally place a dark grey 1x2 grill slope tile to the left and right so they slope outwards.

20-21. Horizontally place a transparent blue popsicle on the jumper plate.

22-26. Locate 2 transparent light blue 2x2 round tiles with splats! You can use these to shoot out of the slot of the barrier! Now put away your barrier while we make Batman and his batmobile!

Building Instructions (Bag 2, Book 2):

Group 3 - Batman

4-5. Locate 1 black pair of legs, 1 black torso printed with a bat on a yellow oval on his chest, 1 tan head printed with eyes and lips, 1 black mask, 1 black cape, and 1 black batarang. Assemble your minifigure and make sure the cape is on his back and the mask faces the front, then attach the batarang to his hand!

Group 4 - Batmobile

6-7. Horizontally place a black 4x10 brick with 4 pins in front of you.

8-9. Vertically place a dark grey 1x2 brick with a side stud on the rightmost column so it is centered vertically and the side stud faces the right.

10-11. Vertically place a yellow 1x2 tile with an overhead bar on the 2nd column from the right so it is centered vertically and the bar is on the right. Then place a yellow 2x2 tile with 2 studs to the left so it is centered vertically and the studs are on the left.

12-13. Horizontally place a black 2x4 plate with an arch on the front right corner so the arch overhangs 1 row to the front. Then repeat symmetrically to the back.

14-15. Vertically place 2 dark grey 1x2 plates, 1 in front of the other, on the front and back right corners.

16-17. Place a dark grey 1x1 plate with 2 side studs hanging down on the front left corner of the front 2x4 plate with an arch so the side studs face the left. Then repeat symmetrically to the back.

18-19. Vertically place a black 1x2 slope tile upright on the front left-facing side studs so it slopes to the front. Then repeat symmetrically to the back.

20-21. Place a short tan 1x1 brick behind the front upright 1x2 slope tile. Then repeat symmetrically to the back.

22-23. Vertically place a yellow 1x2 steering wheel in between the 1x1 short bricks from the previous step so the steering wheel faces the right.

24-25. Vertically place a black 1x4 tile on the rightmost column so it is centered vertically.

26-27. Horizontally place a black 1x3 slope brick to the left of the front row of the 1x4 tile from the previous step so it slopes to the left. Then repeat symmetrically to the back.

28-29. Place a dark grey 2x2 brick to the left of the 1x2 steering wheel so it is centered vertically.

30-31. Place a black 5x5 sloped curved car front with 4 side studs on the 5 leftmost columns so the 2x2 brick fits in the 2x2 gap and it slopes to the left. The 4 side studs should also face the left!

32-33. Horizontally place a dark grey 1x2 plate to the left of each of the black 1x3 slope bricks.

34-35. Vertically place a yellow 1x2 grill tile to the left of the steering wheel so it is centered vertically.

Group 5 - Batmobile

36-37. Place a black 2x2 sloped curved tile printed with a bat on a yellow oval on the 2 leftmost columns so it is centered vertically and slopes to the left. Then horizontally place a black 1x4 tile printed with a car grill and headlights on the left-facing side studs.

38-39. Vertically place a transparent 2x4 windshield to the left of the 1x2 grill tile so it is centered vertically. The grill tile should fit in the gap of the windshield!

40-41. Horizontally place a black 1x4 tile with a hole and a large wing on the front right corner so the wing faces the right. Then repeat symmetrically to the back.

42-43. Insert 4 black wheels into 4 black tires. Now attach the wheels to the front and back facing pins so the hollow sides face outwards.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!
