

21268 The Baby Pig House

Adapted by John Le and tested by Jolene Nemeth.

The Baby Pig House (21268) is the ideal toy for Minecraft® players with a passion for home-building, animals and farms. This hands-on Minecraft toy for girls and boys makes a great birthday, holiday or any-day gaming gift for kids aged 7 and up.

Set in the Minecraft forest biome, this creative home-building toy includes many figures from the popular video game: a hero character in a wolf skin, a baby pig, bee, an adult pig and a zombified piglin. Kids can replicate action from the game, like saddling up the adult pig and dangling a carrot in front of it to take a ride around the pig-shaped house and garden. There's a farm plot with potatoes and beets to grow, and a field with a gate to guide the baby pig through. Kids can avoid the zombified piglin, who wants to spoil the fun, by going inside the house, where there's a bed, bookcase and a crafting table to inspire imaginative play.

LEGO® Minecraft® toy with animals – The Baby Pig House for kids aged 7 and up is packed with hands-on fun for girls and boys with a passion for Minecraft, home-building, animals and farms.

238-piece set – The completed playset measures over 3 in. (8 cm) high, 7.5 in. (19 cm) wide and 6 in. (16 cm) deep.

The front of the box shows a house that looks like a pig! It has a farm, grass area, a birch tree, and a pond! There are 2 pigs in the front, and the hero is riding on one using a carrot on a stick to lead it! He has to be careful though because there is a zombified piglin lurking around in the back!

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set:

(<https://www.lego.com/en-us/service/buildinginstructions/21268>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same

brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Sub-build 2.3. Place a light brown 2x2 tile with 2 studs on the 2 leftmost columns so the studs are on the left. Then vertically place a pink 1x2 tile with a square pig head printed with eyes and nose on the rightmost column so the head faces the right. Now put your pig away while we make a container!
