

## **77053 Stargazing with Celeste**

Adapted by John Le and tested by Jolene Nemeth.

Looking for a treat for a kid who loves the latest LEGO® Animal Crossing™ toys? The Stargazing with Celeste (77053) building kit is a fun anytime gift for girls and boys aged 6 plus who love astronomy toys and creative role play.

Kids build an outdoor scene inspired by the video game series. They can set up the telescope toy and role-play with a minifigure of Celeste the owl as she consults her astronomy book. Fans of the game will recognize the scene as they wish upon a shooting star then collect the fallen star fragments to decorate the crescent-moon chair.

Astronomy playset for kids who love creative role play – Stargazing with Celeste is a creative anytime treat for girls and boys aged 6 plus as well as fans of the Animal Crossing™ video game series.

Nature playset inspires imaginative play – Comes with a minifigure of Celeste the owl from Animal Crossing™, a telescope toy, astronomy book, campfire, teapot, cup, cupcake and precious star fragments.

Cosmic fun – Kids role-play learning how to use the telescope with Celeste and making a wish on a shooting star, before gathering the star fragments and decorating the crescent-moon chair.

Measurements – This 78-piece toy camping set measures over 2.5 in (6 cm) high, 5 in(12 cm) wide and 3.5 inches (9 cm) deep.

The front of the box shows a large moon in the back on top of some grass and there is a tree to the right! In front there is a small table with a tea set! To the left, Celeste the owl is using a telescope to stargaze!

The back of the box shows the telescope on top of the grass in between the moon and tree! Celeste is in front holding an astronomy book!

The top of the box shows a real size image of Celeste the owl!

The build is 78 pieces in total and is for ages 6+.

2 bags labeled 1 include the pieces for Celeste the owl, telescope, moon, and grass area.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.

- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/77053>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bags labeled 1, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Celeste, Telescope, and Grass Area

Group 1 - Pages 5-7.

Group 2 - Step 1.

Group 3 - Steps 2-3.

Group 4 - Steps 4-6.

Group 5 - Steps 1-6 and 1 green 4x4 rounded plate from Step 7.

Group 6 - Rest of Step 7 and Steps 8-18.

Group 7 - Steps 19-27.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Celeste

Sub-build 1. Locate 1 short red pair of legs printed with yellow toes, 1 red torso printed with a red and white plaid circle on the front, 1 red and white round owl head printed with black eyes and a yellow nose. Assemble your minifigure then put her in front of you!

Sub-build 2. Let's make an astronomy book! Vertically place a brown book cover with 2 studs in front of you so the bar is on the right. Then vertically place a dark blue 1x2 tile printed with stars on top. Now attach a brown book cover to the top of the left side, then close it! Now attach the book to Celeste's hand! Now put everything away while we make a telescope!

Group 2 - Telescope

1. Place a transparent 1x1 round plate in front of you. Then place a white 1x1 round brick on top.

Group 3 - Telescope

2. Place a black 1x1 round plate on top. Then place a white 1x1 round brick on top.

3. Place a black 1x1 rounded plate with a bar on top so the bar faces the front.

Group 4 - Telescope

4. Place a white 1x1 round plate with a bar hanging down on top so the bar faces the right. Then place a white 1x1 round plate on top.

5. Place a black 1x1 faucet on top so the bar faces the back. This is the telescope! Now let's make the stand for it!

6. Let's make a part! Place a black 2x2 round tile with a stud in front of you. Then place a light grey 1x1 telescope bar on top. Now place a light grey 1x1 tile with a clip on top so the clip hands are in the front and back. Now attach the front-facing bar of the telescope to the clip so the anti-stud faces the back! Now put your telescope away while we make the grass area!

Group 5 - Grass Area

1. Place a light green 6x6 rounded plate in front of you.

2. Vertically place the front 2 rows of a green 2x4 plate underneath the back 2 rows so it is centered horizontally. Then horizontally place the 2 leftmost columns of a green 2x4 plate underneath the 2 rightmost columns so it is centered vertically underneath the 6x6 rounded plate.

3. Place a brown 2x2 round brick with roots on the 2nd and 3rd columns from the left, and 2nd and 3rd rows from the back of the 6x6 rounded plate. Then place a brown 2x2 round brick on top.

4. Place a green 4x4x2 half-cone brick on top of the previous 2x2 round brick so it is centered on it. Then place a green 2x2x2 cone brick on top. This is a tree!

5. Place a dark green 1x1 plate with 3 leaves on the 3rd row from the front and 2nd column from the right of the 6x6 rounded plate so the leaves face the front. Now place the 2 leftmost columns of a light green 6x6 rounded plate on top of the 2 rightmost columns so it is centered vertically to it.

6. Vertically place the back 2 rows of a green 2x4 plate underneath the front 2 rows of the right 6x6 rounded plate so it is centered horizontally underneath it. Then horizontally place the 2 leftmost columns of a green 2x4 plate underneath the 2 rightmost columns so it is centered vertically.

7.1. Place the 2 leftmost columns of a light green 4x4 rounded plate on the 2 rightmost columns so it is centered vertically.

#### Group 6 - Grass Area

7.2. Place the back 2 rows of a blue 4x4 rounded plate on top of the front 2 rows of the 2x4 plate so it is centered horizontally on it.

8. Horizontally place a yellow 2x4 plate on the back 2 rows of the right 6x6 rounded plate so it is centered horizontally on it.

9. Let's make a moon now! Horizontally place a yellow 2x6 plate in front of you. Then vertically place a yellow 1x2 plate on the rightmost column.

10. Vertically place a yellow 1x2 plate on the rightmost column.

11. Horizontally place 2 yellow 1x3x2 inverted half arch bricks, 1 in front of the other, to the left of the 1x2 plates so they slope to the left.

12. Vertically place a yellow 1x2 plate on the leftmost column. Then vertically place a yellow 1x2 tile to the right.

13. Vertically stack 2 yellow 1x2x2 bricks with 2x2 side studs on the rightmost column so the side studs face the right.

14. Horizontally place 2 yellow 1x3x3 half arch bricks, 1 in front of the other, on the 2nd column from the right so they arch to the left.

15. Place a yellow 2x2 brick on the 2 rightmost columns.

16. Place a yellow 2x2 plate on the 2nd and 3rd columns from the right. Then horizontally place 2 yellow 1x4 sloped curved tiles, 1 in front of the other, on top of the 4 rightmost columns.

17. Let's make a part for the moon! Place a yellow 2x2 plate in front of you. Then horizontally place a yellow 2x3 sloped curved tile on top so it slopes and overhangs 2 columns to the left. Then repeat symmetrically to the right. Now vertically place your part upright on the right-facing side studs so there is no overhang.

18. Horizontally place your moon on the yellow 2x4 plate on your build so 1 column overhangs to the left and the upright tiles face the right.

#### Group 7 - Picnic Set, Flowers, and Star Fragments

19. Let's make the picnic table! Place a white 3x3 plate in front of you! Then place a red 1x1 tile on the back right corner.

20. Place a red 1x1 tile on the center of the 3x3 plate. Then place another 1 on each of the corners. Now fill in the rest with 4 white 1x1 plates.

21. Place a white 1x1 round brick on the back row. Then place an orange candle flame on top.

22. Place a white tea pot on the rightmost column so the handle is on the left. Then place a white teacup on the leftmost column so the handle is on the left.

23. Then place a mint blue cupcake wrapper on the front row. Then place a light purple swirl on top.

24. Place your picnic set behind the 3 rightmost columns of the front 4x4 rounded plate.

25. Place a green plant with 3 stems on top of the 1x1 plate with 3 leaves. Then attach 1 purple flower to each of the stems!

26. Place a yellow 1x1 star on the back left corner of the front 4x4 rounded plate. Then place another 1 on the rightmost column of the front 4x4 rounded plate on the 3rd row from the front.

27. Let's make a star fragment! Place a white 1x1 brick with a side stud on each side in front of you. Now place 5 light orange 1x1 pyramid tiles on it, 1 on each stud! This is a star fragment! Now place it on the front row of the front 4x4 rounded plate, on the 2nd column from the left.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at [info@bricksfortheblind.org](mailto:info@bricksfortheblind.org) and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!
