Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/43275>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3 and put them in one container.

This LEGO set comes with 7 bags labeled 1 to 7, 5 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

4. Horizontally place a light blue 1x4 brick on the front left corner. Then place a light blue 1x1 brick on the 2nd row from the front on the rightmost column.
5. Place a white 2x2 tile with a stud on the leftmost column on the 3rd and 4th rows from the back so it overhangs 1 column to the left.
6. Vertically place a lime green 4x8 plate with a round side underneath the overhang so it is centered vertically to the build and the round side faces the left.
7. Place a brown 2x2 tile on the 3rd and 4th rows from the front, on the 4th and 5th columns from the left, so it sits in front of the 2x2 tile with a stud.
8. Place a light blue 1x2 curved brick on the front 2 rows on the 7th and 8th columns from the right so the curve faces the front left. Then repeat symmetrically to the back.
9. Vertically place a brown 1x2x2 panel with a rounded window behind the left column of the front ppp so the wall faces the left. It should sit to the left of a 2x2 tile. Then vertically place a light blue 1x2 brick behind the ppp.
- 10.1. Horizontally place a white 1x6x5 panel with a sticker on the back right corner so the wall faces the back.
- 10.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 9 on the white 1x6x5 panel. This sticker has a bunch of pictures of a dress, a dog, and words hung up on the wall! Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

11. Place a light blue 1x2 curved brick on the front 2 rows on top of the previous 1x2 curved brick so there is no overhang. Then repeat symmetrically to the back. Now place a blue 2x2 inverted slope brick behind the 1x2x2 panel with a rounded window so it slopes and overhangs to the left.

12.1. Let's make a part! Stack 2 light blue 2x2 plates so there is no overhang, then place them in front of you.

12.2. Vertically place a black 1x2 plate on the left column. Then horizontally place the 1x2 plate part of the horse hitch on the right column so the 2x2 plate overhangs to the right. Now place a light blue 2x2 tile on the 2 leftmost columns.

12.3. Place the 2 rightmost columns of your part on top of the 2 leftmost columns of your previous part so it is centered vertically and overhangs to the left.

Group 29 - Carriage

13. Horizontally place a light pink 1x2 plate on the front row on the 6th and 7th columns from the right. Then repeat symmetrically to the back.

14. Horizontally place the rightmost column of a light grey 2x6 plate on the 4th column from the right so it is centered vertically.

15. Place a light blue 2x2 tile on the 2nd and 3rd columns from the right so it is centered vertically. Then repeat symmetrically to the left, without counting the overhang.

16. Vertically place a light blue 1x2 jumper plate on the rightmost column so it is centered vertically. Then repeat symmetrically to the left, without counting the overhang.

17. Place a light blue 1x1 plate on the front row in front of the right 2x2 tile. Then repeat symmetrically to the back. Now repeat both parts symmetrically to the left.

18. Vertically place a white 1x4 brick on the 3rd column from the right so it is centered vertically.

19. Vertically place a tan 1x2 brick to the left of the ppp so it is centered vertically. Now place a green 1x1 brick with a side stud in front so the side stud faces the front. Then repeat symmetrically to the back.

20. Vertically place 2 light pink 1x2 sloped curved bricks, 1 in front of the other, to the left of the ppp so they are centered vertically and slope to the left.

21. Vertically place a light pink 2x4 tile to the left of the ppp so it is centered vertically.

22. Vertically place 2 brown 1x2 panels with a long wall and middle wall, 1 in front of the other, to the left of the ppp so they are centered vertically and the middle walls face the right.

23. Vertically place a tan 1x2 brick to the left of the ppp so it is centered vertically. Now place a green 1x1 brick with a side stud in front so the side stud faces the front. Then repeat symmetrically to the back.

24. Vertically place 2 white 1x2 bricks with 2 side studs, 1 in front of the other, to the left of the ppp so they are centered vertically and the side studs face the left.

25.1. Let's make 4 identical parts. Place a white 3x3 corner sloped curved brick in front of you so it slopes to the front left. Then place a light blue 1x1 plate underneath the back right corner.

25.2. Now you should have 4 identical parts! Place the middle column of the back row upright on the top left front-facing side stud so the curve faces the front left. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the back.

Group 30 - Carriage

26.1. Let's make 2 identical parts! Horizontally place a light blue 2x6 plate with a rounded side in front of you so the rounded side faces the back.

26.2. Place a white 1x3 curved plate on the back left corner so it overhangs 1 row to the front and the curve faces the back left. Then repeat symmetrically to the right. Now place a light blue 1x1 plate underneath the leftmost overhang. Then repeat symmetrically to the right.

26.3. Place a gold 1x1 round flower plate on the front left corner. Then repeat symmetrically to the right.

26.4. Now you should have 2 identical parts! Vertically place 1 on the 3rd and 4th columns from the right so it is centered vertically and the rounded side faces the right. Then repeat symmetrically to the left.

27.1. Let's make 2 identical parts! Horizontally place a white 2x3 sloped curved brick in front of you so it slopes to the left. Now horizontally place a white 1x2 plate with a clip on the short side underneath the back left corner so the clip faces the left. Then repeat symmetrically to the front.

27.2. Vertically place a gold 1x2 plate with a bar on the long side underneath the rightmost column so the bar faces the right.

27.3. Now you should have 2 identical parts! Vertically attach the clips of 1 part to the front-facing bar so the sloped curved brick faces the front and the bar faces up. Then repeat symmetrically to the back.

28. Vertically place a white 1x2 plate with 2x2 side studs hanging down on the 3rd column from the right so it is centered vertically and the side studs face the right.

29. Place a gold 1x1 heart tile in front of the ppp so the tip faces the back left. Then repeat symmetrically to the back.

30. Place a white 1x1 rounded brick with a side stud on the front stud of the 3rd column from the right so the side stud faces the front right. Then repeat symmetrically to the back.

31. Vertically place a white 1x2 jumper plate on top of the 2 ppp so it is centered vertically. Then place a transparent 1x1 gem tile on top.

32.1. Place a white 2x3 pentagonal tile with a sticker upright on the right-facing side studs so the angled side overhangs 1 row to the top.

32.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 9 on the white 2x3 pentagonal tile. This sticker has a white pumpkin in a gold circle on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

33. Place 1 gold curved bar with a swirl upright on the front right facing side stud so the bar faces the left. Then repeat symmetrically to the back.

34. Place a gold 1x1 round flower plate upright on the front left-facing side stud. Then repeat symmetrically to the back. Now place another 1 on the front stud of the 3rd column from the left, without counting the overhang. Then repeat symmetrically to the back.

35.1. Place a white 2x3 pentagonal tile with a sticker upright on the left-facing side studs so it is centered horizontally and the angled side overhangs 2 rows to the top.

35.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 9 on the white 2x3 pentagonal tile. This sticker has a white pumpkin in a gold circle on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

36. Attach 2 gold wheels with swirls to the front-facing pins so they curve outwards. Then repeat symmetrically to the back.

37. Bring back your horse and horizontally place it in front of you so the head faces the left. Then take off the 2x2 plate and 2x2 half cylinder brick.

38. Attach the 2 leftmost columns of overhang to the horse so it can pull the carriage!
