

10349 Happy Plants

Set adapted by Alex Charbonneau and tested by Natalie Charbonneau.

Plant seeds of joy with the LEGO® Botanicals Happy Plants (10349) building set for kids aged 9 and up. Blooming with adorable details, this set lets girls and boys get creative as they build 2 joyful LEGO plants. The adorable set features a baby dracaena plant that stands up and a baby pilea plant that sits down. It also features a yellow plant pot and a blue plant pot that are adorned with cheerful cartoon faces and are interchangeable, letting kids decide which colored pot they would like to use for each plant. Once budding gardeners have finished assembling the plants, they can display them together or separately as bedroom or shelf decor that will bring smiles to any space. A great craft project for kids to complete independently or with a friend, this plant building kit makes a thoughtful gift for girls, boys and plant lovers, who will delight in creating plant decor that will last forever. Set contains 217 pieces.

LEGO® plants:

- Encourage creativity to grow with the LEGO Botanicals Happy Plants building set for kids aged 9 and up, which becomes shelf decor.

Colorful planters:

- The set features a baby dracaena plant that's standing up and a baby pilea plant that's sitting down, as well as interchangeable blue and yellow plant pots.

A joyful build:

- Kids can build the plants independently or share the fun by building them with a friend or family member.

Bedroom decor:

- Once complete, these LEGO® plants become decorations that will add a touch of cheer to kids' bedrooms, or to any living or working space when used as home or office decor.

Gift idea for kids:

- The building kit makes a great gift for girls and boys, as well as a gift for plant lovers and adults who like crafting and nature.

Build more blooms:

- These brick-built plants can be combined with other sets (sold separately) in the LEGO® Botanicals collection, which includes other trees and LEGO flowers.

LEGO® Botanicals range:

- LEGO Botanicals building kits encourage kids and nature lovers to let their creativity bloom as they build lifelike flowers and plants.

Dimensions:

- The dracaena plant in this 217-piece set measures over 4.5 in. (12 cm) high and 3 in. (8 cm) wide, while the pilea plant measures over 3 in. (7 cm) high and 3.5 in. (9 cm) wide.

The box is dark green with a bright green border. On the front are two small flower pots, one pale yellow and one light blue. Both flower pots have short arms and legs, as well as faces! The yellow flower pot is smiling and standing up. The blue flower pot has a neutral expression and is sitting down. The yellow flower pot has a tall plant growing in it, while the blue pot has a shorter, rounder plant.

The top of the box has a life sized image of one of the tiles printed with a smile.

The back of the box has another view of the flower pots, who are now closer together so they look like they're holding hands. The plants in the pots have been switched. There is a small inset image showing that the plants can be interchanged between the pots!

Welcome to text-based instructions from Bricks for the Blind. Before you start building,

here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of the piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each kit, PDF versions are always online at LEGO.com: (<https://www.lego.com/en-us/service/building-instructions/10349>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

This LEGO set comes with four bags labeled 1-4, and an instruction booklet. Sort the pieces into groups as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split across two groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

This build is 217 pieces, and 87 building steps.

Bag 1 (4 groups of bricks)

Main Build 1: Yellow Flower Pot

Group 1 contains the pieces for steps 1-10 of the yellow flower pot.

Group 2 contains the pieces for steps 11-23.

Group 3 contains the pieces for steps 24-30.

Group 4 contains the pieces for steps 31-35.

Bag 2 (1 group of bricks)

Sub-Build 1: Tall Plant

Group 5 contains the pieces for steps 36-43.

Bag 3 (4 groups of bricks)

Main Build 2: Blue Flower Pot

Group 6 contains the pieces for steps 1-12 of the blue flower pot.

Group 7 contains the pieces for steps 13-19.

Group 8 contains the pieces for steps 20-28. Include the pale blue 2x6 tile with a face printed on it.

Group 9 contains the pieces for steps 29-35.

Bag 4 (2 groups of bricks)

Sub-Build 2: Short Plant

Group 10 contains the pieces for steps 36-41.

Group 11 contains the pieces for steps 42-44.

Building Instructions:

Main Build 1: Yellow Flower Pot

Bag 1.

Group 1.

1. Let's build the yellow flower pot! Place a pale yellow 2x6 plate, horizontally, in front of you.
2. Place a blue 1x4 brick with four studs on one long side, horizontally with the side studs at the front, centered horizontally on the front row of the previous piece. Repeat symmetrically on the back side.
3. Place a pale yellow 1x1 brick with a stud on one side, with the side stud at the front, on each of the two front corners of the 2x6 plate. Repeat symmetrically on the back side.
4. Now we'll make the legs of the yellow flower pot. Keeping it horizontal, flip the flower pot over so the anti-studs are on top. Place a pale yellow 1x2 plate with rounded ends, upside down and vertically, on the leftmost column. Repeat symmetrically on the right side.
5. Place a pale yellow 2x2 plate, upside down, to the right of the left piece from the previous step. Repeat symmetrically on the right side.
6. Place a pale yellow 2x2 round brick, upside down, on the left two columns of the flower pot. Repeat symmetrically on the right side.
7. Place a 2x2 inverted round tile, upside down, on each of the previous two pieces.
8. Keeping it horizontal, flip the flower pot rightside up. Place a brown 1x2 hollow slope with a handle bar on top, vertically with the tall side on the left, on the third column from the left. Repeat symmetrically on the right side. These two pieces should touch and form a V-shaped gap.
- 9.1. Next we'll add the arms. Place a pale yellow 2x2 plate in front of you.
- 9.2. Place a pale yellow 1x2 brick with a hole, vertically, on the left column of the previous piece. Place another to the right of the first.

9.3. Push the pin side of a dark gray 3L axle/pin combo into the hole on the left piece from the previous step. Push it all the way in so the axle side extends 1L to the left.

9.4. Find a pale yellow 90 degree curved pin connector. This piece looks just like a macaroni noodle. Push the hole on one side onto the axle of the previous piece. This will be the flower pot's arm, and you can rotate it to position it how you like. For now, rotate it so the free hole is on top.

9.5. Repeat steps 9.1-9.4.

9.6. Place one arm assembly, with the arm on the left, on the left two columns of the flower pot. Repeat symmetrically on the right side with the other arm.

10.1. Place a dark brown 1x2 plate, vertically, on the second column from the left on the flower pot. Repeat symmetrically on the right side.

10.2. Place a brown 1x2 brick, vertically, on each of the previous two pieces.

Group 2.

11. Place a pale yellow 1x2 brick, vertically, to the left of the left piece from the previous step. Repeat symmetrically on the right side.

12. Place a pale yellow 1x1 brick with a stud on one side, with the side stud at the front, on the front stud of each of the previous two pieces. Repeat symmetrically on the back side.

13. Now we'll build the back side of the flower pot. Set the rest of the flower pot aside for now. Place a brown 4x4 plate in front of you.

14. Place a blue 2x2 round plate, centered vertically and horizontally, on the previous piece.

15. Place a pale yellow 1x1 plate with a 1x1 curved slope on one side, with the curved slope at the back, behind each of the two columns of the previous piece. The curved slope should overhang the back of the 4x4 plate.

16. Place a pale yellow 1x1 plate with a 1x1 curved slope on two adjacent sides, with the curved slopes at the back and left, to the left of the left piece from the previous step. Repeat symmetrically on the right side.

17. Place a pale yellow 1x4 plate with a 1x4 curved slope on one side, vertically with the curved slope on the left, in front of the left piece from the previous step. Repeat symmetrically on the right side.

18.1. Place a pale yellow 2x2 plate between the front two rows of the previous two pieces. Only the back row will be attached.

18.2. Place a pale yellow 1x4 tile, horizontally, on the front row of the assembly.

19. Place a pale yellow 2x4 tile, horizontally, behind the previous piece. Place another behind the first.

20.1. The backside assembly has two rounded corners which are at the back. Keeping the rounded corners at the back, flip the back side over so the anti-studs are on top. Place a pale yellow 2x2 plate, upside down and centered horizontally, on the back two rows of the assembly.

20.2. Place a pale yellow 2x2 corner plate with a rounded corner, upside down with the rounded corner at the back left, to the left of the previous piece. Repeat symmetrically on the right side.

21. Place a pale yellow 1x4 plate, upside down and vertically, in front of the left column of the left previous piece. Repeat symmetrically on the right side.

22. Place a brown 2x3 plate, upside down and vertically, to the right of the back three studs of the left previous piece. Repeat symmetrically on the right side.

23. Now we'll place the assembly we made on the flower pot. Set the flower pot in front of you, with the arms on the left and right. Right now, it doesn't matter which side is at the front. Rotate the backside assembly so the anti-studs are at the back and so the rounded corners are at the bottom. Place it on the side studs on the front side of the flower pot so the tops are even. Great job!

Group 3.

24. Now we'll build the front of the flower pot! Set the rest of the flower pot aside for now. Place a brown 4x4 plate in front of you.

25. Place a blue 2x2 round plate, centered vertically and horizontally, on the previous piece.

26. Place a pale yellow 1x1 plate with a 1x1 curved slope on one side, with the curved slope at the back, behind each of the two columns of the previous piece. The curved slope should overhang the back of the 4x4 plate.

27. Place a pale yellow 1x1 plate with a 1x1 curved slope on two adjacent sides, with the curved slopes at the back and left, to the left of the left piece from the previous step. Repeat symmetrically on the right side.

28. Place a pale yellow 1x4 plate with a 1x4 curved slope on one side, vertically with the curved slope on the left, in front of the left piece from the previous step. Repeat symmetrically on the right side.

29. Place a pale yellow 1x4 tile, horizontally, on the back row of studs. There should be four free studs in front of the left and right studs of this piece.

30. Place a pale yellow 2x4 tile with a face print, horizontally, in front of the previous piece. The printing on this piece is directional, so you may want to ask a sighted person for assistance or use an app to get this right-side up. The piece has two eyes and a smile printed on it, and the corners of the mouth should be at the front so it looks like it's frowning. We'll flip it around so it will be smiling when we're done!

Group 4.

31.1. Place a pale yellow 2x2 plate, centered horizontally, in front of the previous piece. Only the back row will be attached.

31.2. Place a pale yellow 2x4 tile, horizontally and centered horizontally, on the previous piece.

32.1. The front side assembly has two rounded corners which are at the back. Keeping the rounded corners at the back, flip the back side over so the anti-studs are on top. Place a pale yellow 2x2 plate, upside down and centered horizontally, on the back two rows of the assembly.

32.2. Place a pale yellow 2x2 corner plate with a rounded corner, upside down with the rounded corner at the back left, to the left of the previous piece. Repeat symmetrically on the right side.

33. Place a pale yellow 1x4 plate, upside down and vertically, in front of the left column of the left previous piece. Repeat symmetrically on the right side.

34. Place a brown 2x3 plate, upside down and vertically, to the right of the back three studs of the left previous piece. Repeat symmetrically on the right side.

35. Now we'll place the assembly we made on the flower pot. Set the flower pot in front of you, with the arms on the left and right and the tiled backside at the back. Careful because the flowerpot might have a hard time standing up right now! Rotate the front side assembly so the anti-studs are at the back and so the rounded corners are at the bottom. Place it on the side studs on the front side of the flower pot so the tops are even. The smile should now look like a smile, not a frown!

Bag 2.

Sub-Build 1: Tall Plant

Group 5.

36.1. Now we'll make a plant! Set the yellow flower pot aside for now. Find a brown 4L antenna. This piece looks like a 1x1 round plate with a 4L bar sticking out of the top. Place this, horizontally with the round plate on the right, in front of you.

36.2. Push a brown axle connector with four bars sticking out of it onto the left side of the previous piece. Push it all the way to the right.

37.1. Place a brown pin connector with four clips sticking out of it, with the hole facing up and down, in front of you.

37.2. Push a red 1L pin with a stud on one side, with the stud on top, into the hole of the previous piece.

37.3. Place a dark brown 1x1 round plate with a hollow stud on the stud of the previous piece.

37.4. Rotate the pin connector with four clips so the previous piece is on the right and push the left side of the antenna into the hollow stud of the previous piece. Push it all the way to the right so it touches the axle connector with four bars. Rotate the clips so they are offset 45 degrees from the four bars.

38.1. Place a dark brown 2x2 round plate in front of you.

38.2. Place a brown 2x2 round brick on the previous piece.

38.3. Place a brown 2x2 round tile with a single stud on the previous piece.

38.4. Rotate the antenna assembly so the anti-stud of the antenna is on top with the antenna pointing down, and push the antenna into the hollow stud of the previous piece. Push it down as far as it will go. Rotate the bars so they are at the front, left, and right sides, and so the clips are still offset 45 degrees.

39. Push the bottom hollow stud of a dark green 1x2 plate with rounded ends and a large leaf, upright with the anti-stud at the front and the leaf on top, onto the front bar. Work your way around the plant, putting a total of four leaves, with the anti-studs all facing away from the center

40.1. Now we'll add some more leaves! Place a dark green 1x2 plate with rounded ends and a large leaf, horizontally with the leaf on the left, in front of you.

40.2. Place a brown 1x2 plate with a bar on one short side, horizontally with the bar on the right, on the previous piece.

40.3. Repeat steps 40.1-40.2.

40.4. Clip one of the leaf assemblies, with the leaf at the front left and the studs on top, onto the front left clip on the plant assembly. Rotate the leaf up as far as it will go. Repeat symmetrically on the opposite side.

41. Clip the bar of a dark green hexagonal leaf with a bar on one side, with the concave side at the top, into the front right clip of the plant. Rotate this leaf up as far as it will go. Repeat symmetrically on the opposite side.

42.1. Now we'll add some roots. Place a dark brown 1x1 round plate on the circular anti-stud of the 2x2 round plate at the bottom of the plant.

42.2. Push the bar of a tan bar with three tiny stems on it, with the stems at the bottom, into the hollow anti-stud of the previous piece. These are the roots of the plant!

43. Now we'll place the plant into the flower pot. Place the flower pot in front of you, with the arms on the left and right and the face at the front. Set the plant, centered horizontally and vertically, inside the flower pot. The plant will not actually connect to anything and will rotate easily inside the pot.

Main Build 2: Blue Flower Pot

Bag 3.

Group 6.

1.1. Now we'll build the light blue flower pot! Set the yellow flower pot and flower aside for now. Place a white 2x6 plate with four studs on one side, horizontally with the side studs at the front, in front of you.

1.2. Place a yellow 1x4 plate, horizontally and centered horizontally, on the back row of the previous piece.

2.1. Place the back row of a pale blue 2x2 plate to the left of the previous piece. Repeat symmetrically on the right side.

2.2. Place a pale blue 1x2 plate, vertically, under the left column of the left previous piece. Repeat symmetrically on the right side.

3. Place a brown 1x2 hollow slope with a handle bar on top, vertically with the tall side on the left, on the fourth column from the left on the flower pot. Repeat symmetrically on the right side. These two pieces should touch and form a V-shaped gap.

4.1. Place a brown 1x2 brick with two studs on one long side, horizontally with the side studs at the front, on the front row to the left of the left previous piece. Repeat symmetrically on the back side.

4.2. Repeat the previous step symmetrically on the right side.

5.1. Now we'll add the mounts for the arms. Place a pale blue 1x2 brick with a hole, vertically, to the right of the previous two pieces. Repeat symmetrically on the left side.

5.2. Push the pin side of a blue 2L axle/pin combo, with the axle on the left, into the hole of the left previous piece. Repeat symmetrically on the right side.

6. Let's add the arms. Push the hole on one side of a pale blue 90 degree curved pin connector, with the other hole pointing down, onto the axle of the left previous piece. Remember this piece looks just like a macaroni noodle. Repeat symmetrically on the right side.

7. Place a light brown 1x1 tall plate on each of the two studs to the left of the left 1x2 hollow slope from step 3. Repeat symmetrically on the right side.

8. Stack two pale blue 2x2 plates and place the stack to the left of the left pair of pieces from the previous step. Repeat symmetrically on the right side.

9. Place a pale blue 1x2 quarter cylinder, vertically with the flat side on the left, on the left column of the left stack from the previous step. Repeat symmetrically on the right side of the flower pot.

10.1. Place a brown 1x2 brick with two studs on one long side, horizontally with the side studs at the front, on the front row to the right of the left previous piece. Repeat symmetrically on the back side.

10.2. Repeat the previous step symmetrically on the right side.

11. Place a brown 1x2 plate with two studs sticking up from one long side, vertically with the side studs on the right, on the right studs of the previous two pieces. Repeat symmetrically on the left side of the flower pot.

12.1. Place a pale blue 1x2 plate, vertically, on the side studs of each of the previous two pieces.

12.2. Place a pale blue 1x2 tile, vertically, on each of the previous two pieces.

Group 7.

13.1. Now let's make the back side of the blue flower pot! Set the rest of the pot aside for now. Place a brown 4x6 plate, horizontally, in front of you.

13.2. Place a yellow 1x4 plate, horizontally and centered horizontally, on the back row of the previous piece.

14. Place a pale blue 1x1 plate with a 1x1 curved slope on one side, horizontally with the slope on the left, to the left of the previous piece. Repeat symmetrically on the right side.

15.1. Place a yellow 2x2 round plate, centered horizontally, in front of the 1x4 plate from step 13.2.

16.1. Place a pale blue 2x4 plate, horizontally and centered horizontally, in front of the previous piece. This piece will overhang one row to the front of the 4x6 plate.

16.2. Place the front two rows of a pale blue 1x4 plate with a 1x4 curved slope on one side, vertically with the curved slope at the left, to the left of the previous piece. Repeat symmetrically on the right side.

17. Place a pale blue 2x6 tile, horizontally, on the back two rows of the backside assembly. Place another in front of the first.

18.1. Place a pale blue 1x2 tile, horizontally, in front of the front previous piece so the left sides are even.

18.2. Place a pale blue 1x4 tile, horizontally, to the right of the previous piece.

19. Keeping the previous two pieces at the front, flip the backside assembly over so the anti-studs are on top. Place a pale blue 1x8 plate, upside down and horizontally, on the back row of the backside.

Group 8.

20. Place a pale blue 1x4 plate, upside down and vertically, in front of the left stud of the previous piece. Repeat symmetrically on the right side.

21. Place a brown 2x3 plate, upside down and vertically, to the right of the back three studs of the left piece from the previous step. Place two more to the right of the first.

22. Now we'll place the assembly we made on the flower pot. Set the flower pot in front of you, with the arms on the left and right. The side with the most side studs should be at the back. Rotate the backside assembly so the anti-studs are at the back and so the 1x8 plate from step 19 is at the bottom. Place it on the side studs on the front side of the flower pot so the tops are even.

23. Now let's build the front side of the blue flower pot. Set the rest of the flower pot aside for now. Place a brown 4x6 plate, horizontally, in front of you.

24. Place a pale blue 1x8 plate, horizontally and centered horizontally, on the back row of the previous piece. It should overhang one stud to the left and right of the 4x6 plate.

25. Place a pale blue 1x1 plate under each of the two overhanging studs of the previous piece.

26. Place a yellow 2x2 round plate, centered horizontally, in front of the 1x8 plate from step 24.

27.1. Place a pale blue 2x4 plate, horizontally and centered horizontally, in front of the previous piece. This piece will overhang one row to the front of the 4x6 plate.

27.2. Place the front two rows of a pale blue 1x4 plate with a 1x4 curved slope on one side, vertically with the curved slope at the left, to the left of the previous piece. Repeat symmetrically on the right side.

28. Place a pale blue 1x4 tile, horizontally and centered horizontally, on the back row of the front side assembly.

You will have a pale blue 2x6 tile with a face print leftover when you finish this group.

Group 9.

29.1. Place the leftover pale blue 2x6 tile with a face print, horizontally and centered horizontally, in front of the previous piece. The printing on this piece is directional, so you may want to ask a sighted person for assistance or use an app to get this right-side up. The piece has two eyes and a subtle smile printed on it, and the smile on the face print should be slightly behind the eyes.

29.2. Place a pale blue 2x6 tile, horizontally, in front of the previous piece.

30. Keeping the previous piece at the front, flip the backside assembly over so the anti-studs are on top. Place a pale blue 1x8 plate, upside down and horizontally, on the back row of the front side assembly.

31. Place a pale blue 1x4 plate, upside down and vertically, in front of the left stud of the previous piece. Repeat symmetrically on the right side.

32. Place a brown 2x3 plate, upside down and vertically, to the right of the back three studs of the left previous piece. Place two more to the right of the first.

33. Flip the front side assembly over so it is horizontal with the 1x4 tile at the front. Place a pale blue 1x2 plate, horizontally, on the front row to the left of the 1x4 tile. Repeat symmetrically on the right side.

34.1. Let's add some legs! The blue flower pot is sitting down with its legs in front of it. Place the front row of a pale blue 2x2 round brick on each of the previous two pieces.

34.2. Place a pale blue 2x2 round tile on each of the previous two pieces.

35. Now we'll place the assembly we made on the flower pot. Set the flower pot in front of you, with the unfinished side at the front. Rotate the front side assembly so the legs are at the front on the bottom and the anti-studs are at the back. Place it on the side studs on the front side of the flower pot so the tops are even.

Bag 4.

Sub-Build 2: Short Plant

Group 10.

36.1. Now we'll build another plant! Set the blue flower pot aside. Place a dark brown 2x2 round plate in front of you.

36.2. Place a brown 2x2 round brick on the previous piece.

37. Place a brown 2x2 round tile with a hole on the previous piece.

38. Push a green 6L bar with a stop ring, with the stop ring near the bottom, through the hole of the previous piece so it fits in the axle hole on the top of the 2x2 round brick from step 36.2. Push it down until it stops.

39.1. Place a brown pin connector with four clips sticking out of it, with the hole facing up and down, in front of you. The clips should be at 12, 3, 6, and 9 o'clock.

39.2. Push the bottom side of a black 2L pin into the hole of the previous piece.

39.4. Push the hole of a brown pin connector with four clips, with the clips offset 45 degrees from the first four clips, onto the top side of the previous piece.

39.5. Push the hollow pin at the center of the clip assembly down over the 6L bar.

40.1. Now let's add some round leaves! Find a dark green round shield with a handle on one side. The handle has a hole through the side. Place the shield in front of you, with the handle vertically on top.

40.2. Push the bar of a 1L bar with a clip on one side, with the clip on the left, through the hole on the handle of the previous piece.

40.3. Flip the shield over so the clip is at the bottom on the left and the smooth side of the shield is on top. Clip the clip onto the very top of the bar of the plant.

41.1. Now we'll make some more leaves! Place a dark green round shield with a handle, with the handle vertically on top, in front of you.

41.2. Push the bar of a 1L bar with a clip on one side, with the clip on the left, through the hole on the handle of the previous piece.

41.3. Clip a green 3L bar, upright, into the clip of the previous piece.

41.4. Push the hole of a bar connector with a short bar on one side, with the bar vertically on top, onto the top side of the previous piece.

41.5. Repeat steps 41.1-41.4 three times.

41.6. Clip one of the leaf assemblies, with the leaf facing outwards, onto each of the four clips in the top set of clips.

Group 11.

42.1. Place a dark green 2x2 disk with a clip on one side, with the clip on top and the clip fingers at the front and back, in front of you.

42.2. Clip the bar of a 1L bar with a clip on one side, with the clip on the left, into the clip of the previous piece.

42.3. Clip a green 3L bar, upright, into the clip of the previous piece.

42.4. Push the hole of a bar connector with a short bar on one side, with the bar vertically on top, onto the top side of the previous piece.

42.5. Repeat steps 42.1-42.4 three times.

42.6. Clip one of the leaf assemblies, with the leaf facing outwards, onto each of the four clips in the bottom set of clips.

43.1. Now we'll add some roots. Place a dark brown 1x1 round plate on the circular anti-stud of the 2x2 round plate at the bottom of the plant.

43.2. Push the bar of a tan bar with three tiny stems on it, with the stems at the bottom, into the hollow anti-stud of the previous piece. These are the roots of the plant!

44. Now we'll place the plant into the flower pot. Place the flower pot in front of you, with the arms on the left and right and the feet at the front. Set the plant, centered horizontally and vertically, inside the flower pot.

Thank you so much for building this set!
