

## **10446 3in1 Wild Animal Families**

Adapted by Jordi Isus. Tested by Natalie Charbonneau.

Looking for a gift for an animal-loving preschool kid? Toddlers take an adventure tour of the world with the 3in1 Wild Animal Families (10446) toy. Packed with educational features, this learning toy includes 10 LEGO® DUPLO® animal figures.

This toddler toy features a savannah scene where a tigress and a tiger cub figure feed on a bone then play on the rocks, and an elephant figure leads its calf to a waterfall. Toddlers use fine motor skills as they clip the baby to the adult elephant's tail. At the beach, the turtles' figures are laying eggs. In the forest the panda figure and its cub play under cherry blossom, while cute deer figures graze in the glade.

Toddlers who love nature toys hone a raft of skills. This matching and sorting toy lets those pair and make comparisons between the parent and the baby and decide which food each animal eats. They'll use creativity to rebuild this 3in1 LEGO DUPLO set in limitless ways and use their imaginations to care for the animal toys.

Learning toy for little animal-lovers – The 3in1 Wild Animal Families toddler toy takes preschoolers on a learning adventure around the world, while teaching toddlers a raft of early skills

Nature toy teaches nurturing relationships – Toddlers explore where the LEGO® DUPLO® animals figures live, what they eat and how they care for their young

Imagination toy with 10 LEGO® DUPLO® wild animals for creative story-making – Includes tiger, elephant, deer, and panda figures, each with a baby, and 2 turtle figures

Skill-building play – Educational learning toy promotes imagination and creativity, teaching, sorting, matching, and comparing skills and shows kids how to care for others

Birthday gift idea for toddlers – Make the day of any preschooler aged 2 plus with this feature-packed playset, the perfect special occasion or holiday gift for animal-loving boys and girls

Digital building instructions – The LEGO® Builder app features a digital version of the instructions included with this creativity toy, which has been tested to ensure a safe play experience

Building happy hearts and creative minds – With cute animal figures, recognizable situations and diverse real-life heroes, LEGO® DUPLO® creativity toys help toddlers understand the world around them

Dimensions – With each animal area lined up end to end, this 92-piece set includes a savannah scene measuring over 7.5 in. (20 cm) high, 13.5 in. (34 cm) wide and 8.5 in. (22 cm) deep.

The front of the box is bright white and shows a fun picture of the LEGO DUPLO set all built! There are lots of wild animals in a colorful savannah. You can spot a big elephant with its baby, a stripy tiger, a smiling turtle, two happy deer, and two cute pandas! Trees and plants make the scene look like a real animal adventure!

In the bottom left corner, there's the LEGO DUPLO logo and the set name: 10416 3-in-1 Wild Animal Families. The bottom right shows it's for kids aged 2 and up and has 92 pieces.

On the back of the box, you'll see the main model, which includes four fun animal scenes:

- a) A panda family relaxing near bamboo and a pink cherry tree
- b) Turtles laying eggs on the beach

c) Deer grazing on green grass

d) A savannah with tigers playing and eating, and an elephant walking with its baby to a waterfall

Because it's a 3-in-1 set, there are two other ways to build it: The second model includes two builds: turtles in a rocky seaside scene and tigers in a jungle where the baby climbs a tree and the mama tiger eats nearby! The third model is one big two-story build that shows pandas, elephants, and deer living together in a cool nature park with trees and grassy areas!

This build has 92 pieces and is for ages 2+.

The first pages of the book -pages 1-10- contain pictures of each animal family, except the deer, showing how the mama takes care of its cub.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/10446>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

## Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3 and put them in one container.

This LEGO set comes with 7 non-labeled bags, some loose pieces and 1 set of instructions. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder!

LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Please note that this is a 3in1 set, so each model uses the same bricks. To create an alternative model, the previous one must be disassembled.

## Main model

### All bags, book 1

Group 1 pandas scene: steps 1-5, pages 11-13.

Group 2 turtles scene: steps 1 and 2, pages 14 and 15.

Group 3 deer scene: steps 1-3, pages 16 and 17.

Group 4 tigers and elephants scene: steps 1-14, pages 18-27.

## Let's get to building!

### Group 1: Pandas

1.1 Horizontally place a lime 12 x 6 Plate with rounded edges in front of you so the back row has 10 columns, and the front row has 6. Place a grey 2x2 Brick on the 2 back rows on the 3rd and 4th columns from the left. Please note that the base isn't even—some rows are longer than others because they have more columns. When placing a piece that sits on multiple rows, whether it's two, three, or even six different rows, always count columns using the longest row involved throughout these instructions, meaning the row with the most columns. In this case the back row has 10 columns and the row in front has 12, and the piece covers these rows, we use the 12-column row to decide where to place it. Instructions say to position it on the 3rd and 4th columns from the left, which refers to the row with 12 columns. If you counted using the back row which is shorter, the position would be off. So, whenever a piece goes across more than one row, always use the longest row in that section to count columns correctly.

1.2 Horizontally place a reddish brown 2 x 3 slope curved Brick on the 2 back rows on the 3rd through 5th columns from the right, so it curves and slopes to the right. Again, we are using the longer row in this case the 2nd row from the back for the column counting reference.

2. Place a lime 2x2x2 round Brick with bamboo stem pattern on the ppp so the pattern faces the front. The pattern is slightly raised. Place another one on the 2nd and 3rd rows from the back on the 5th and 6th columns from the left so the bamboo stem pattern faces the front.

3. Let's build the cherry blossom tree. Place a reddish brown 2x2x2 Round brick on the 2 back rows on the 3rd and 4th columns from the right, which is on top of the 2x3 curved sloped brick from step 1. Place a reddish brown 4x4 round plate vertically and horizontally centered on the ppp.

4. Horizontally place a reddish brown 2x3 Curved bottom slope brick on the 2 back rows of the ppp on the 2 right columns of the ppp, so it curves and slopes to the right and 1 column overhangs to the right. Repeat symmetrically to the left. They are the low branches. Then place a reddish brown 2x2 Brick on the ppps so it is horizontally centered. This is the top branch.

5.1 Place a coral 3x3 Plant flower with 5 leaves and top stud on the back row on the left column of the ppp. Place another on the front row on the leftmost column of the lower branch.

5.2 Place a pink 3x3 Plant flower with 5 leaves and top stud on the back row on the rightmost column of the lower branch. Then place another on the front row on the left column of the 4x4 round plate. Place another on top of the 2x2x2 Round brick with bamboo stems pattern located on the 2 back rows on the 3rd and 4th columns from the left. Place it on the center so it doesn't sit on any studs.

5.3 Place a green 3x3 Flower plant with 5 pointed leaves and top stud on the 3rd column from the left of the front row.

5.4 Let's place the big panda! The mama panda is mostly white, with black legs, ears, and the tip of her snout, and striking black-and-white patches around her eyes. Place her on the 2nd through 4th rows from the front on the 3rd through 5th columns from the right. Mama panda is facing the left. Again, we have used the 4th row since it is the longer row, as a reference for the column counting. The panda cub has the same colors as its mama. Place it on the 2nd and 3rd columns from the left of the 3rd row from the front, so it is facing to the front.

## Group 2: Turtles

1.1 Horizontally place a blue 12 x 6 Plate with rounded edges in front of you so the back row has 10 columns, and the front row has 6. Horizontally place a yellow 2x4 Curved double slope brick on the 2nd and 3rd rows from the back on the 4 right columns. There is no overhang.

1.2 Stack 2 light brown 2x2x2 Round bricks. Place the stack on the yellow 2x4 Curved double slope brick.

1.3 Let's place the eggs! Locate a white 3x3 Fruit Pyramid with Round Bottom, it's a soft, white piece shaped like a small pyramid with smooth bumps. It looks like a bunch of turtle eggs. Place it on the 3 back rows on the 5th through 7th columns from the right. Remember to use the longer row when counting the columns.

2.1 Horizontally place a yellow 2x3 curved slope brick on the 2nd and 3rd rows from the back on the 3rd through 5th columns from the left, so it curves and slopes to the left. Horizontally place a yellow 2x4 Curved double slope brick on the 2nd and 3rd rows from the front on the 4th through 7th columns from the left.

2.2 Attach a lime Plant stem on the front row on the left column of the ppp, so the leaves point left to right. Place another between the 2nd and 3rd rows from the front and between the 3rd and 4 columns from the right, so it doesn't sit on any studs. The leaves face left to right.

2.3 Place a green 2x2 Plant palm with 5 leaves on top of the stacked light brown 2x2x2 Round bricks which are behind the ppp.

2.4 Let's place the turtles! The turtles are lime and have brown spots on their shells. Place the first turtle on the 3rd row from the back on the leftmost column so it faces to the front left. Place the second loosely on the right of the build outside the platform. It is facing to the left.

### Group 3: Deer

1.1 Horizontally place a lime 12 x 6 Plate with rounded edges in front of you so the back row has 10 columns, and the front row has 6. Place a light brown 2x2 Brick with a reddish-brown deer droppings and light gray flies pattern, printed on one side, on the two back rows, on the 4th and 5th columns from the left. Make sure the printed side faces the front. The pattern is slightly raised. Remember to use the longer row when counting columns.

1.2 Place a grey 2x2 Brick on the 2nd and 3rd rows from the back on the 6th and 7th columns from the left. Place a grey 2x2x2 slope brick on the 2 back rows on the 4th and 5th columns from the right so it slopes to the right. Place another on the 2 back rows on the 2nd and 3rd columns from the left so it slopes to the left. This goes to the left of the light brown 2x2 Brick with a reddish-brown deer droppings and light gray flies pattern from the previous step.

2.1 Horizontally place a grey 2x4 Brick on the 2 back rows on the 4th through 7th columns from the left, between the ppps, so it sits on the light brown 2x2 Brick with a reddish-brown deer droppings and light gray flies pattern and on the back row of the grey 2x2 brick.

2.2 Place a light brown 2x2 Brick, printed on one side with a pattern of four red mushrooms with white spots, on the third and fourth rows from the front, on the second and third columns from the right. Make sure the printed side faces the front. The pattern is slightly raised.

3.1 Place a green 4x4x3 pine tree on top of the ppp. Place a grey 2x2x2 slope brick on the 2 back rows on the 5th and 6th columns from the right so it slopes to the right. Repeat symmetrically to the left. They go on top of the horizontal grey 2x4 brick. Place a green 4x4x3 pine tree on the ppps.

3.2 Place a green 3x3 Flower plant with 5 pointed leaves and top stud on the leftmost column of the 3rd row from the front. Place a red 3x3 Plant flower with 5 leaves and top stud on the ppp. Place another green 3x3 Plant flower with 5 pointed leaves and top stud outside the platform to the left of the 2 front rows so it faces the front.

3.3 Let's place the deer! The two deer are a warm shade of brown, with little white spots speckled across their bellies. Place the baby deer horizontally on the 2 front rows so it is horizontally centered. Place the mama deer loosely outside the platform in front of its cub.

### Group 4: Tigers and elephants

1. Horizontally place a yellow 4x8 Plate in front of you. Vertically place a blue 2x4 Brick on the 2 left columns. Place an orange 1x2x2 Brick vertically to the right of the 2 front columns of the ppp.

2.1 Stack 2 blue 2x4 Bricks. Vertically place the stack on the 2 left columns. Then place an orange 1x2x2 Brick on the 2 front rows on the rightmost column. Place another vertically to the left of the ppp.

2.2 Vertically place a yellow 1x2x2 Brick on the 2 back rows on the rightmost column.

3.1 Place an orange 2x2x2 slope brick on the 2 front rows on the 2 right columns, on top of the 2 orange 1x2x2 Bricks. It should slope to the right. Then vertically place an orange 1x2x2 brick on the 2 front rows on the 3rd column from the left, on top of the one from step 1.

3.2 Vertically place a yellow 1x2x2 Brick on the 2 back rows on the rightmost column. Horizontally place a light brown 2x3 Curved bottom brick on the 2 back rows on the 2 left columns, on the 2 back rows of the vertically placed blue 2x4 brick, so 1 column overhangs to the right.

4.1 Place a blue 2x2 Brick in front of the 2 left columns of the ppp. Place another behind the ppp. Horizontally place a yellow 2x6 Plate to the right of the ppp. It sits on the right overhanging column of the light brown 2x3 Curved bottom brick and on the yellow 1x2x2 brick.

5. Place a yellow 2x2x1 Curved slope brick on the 2 back rows on the 3rd and 4th columns from the left, so it curves and slopes to the right. Horizontally place a yellow 2x6 Plate on the 2 front rows on the 2nd through 7th columns from the left. On the left it sits on the right column of the blue 2x2 brick and the orange 1x2x2 brick whereas on the right it sits on the orange 2x2x2 slope brick.

6. Horizontally place a blue 2x10x2 arch brick on the 2 back rows on the 2 left columns. 8 columns overhang to the left. Place a light brown 2x2 Curved slope brick on the 2 right columns of the ppp so it curves and slopes to the right.

7. Let's make a part! Horizontally place a blue 2x8 Plate in front of you. Then vertically place a light green 2x3 Brick on the 2 left columns, 1 row overhangs to the front.

8. Place a blue 4x8 half circle plate in front of the ppp. The 2 left columns of the back row attach under the overhang. The rounded edge should face the front.

9.1 Vertically place a blue 2x4 Brick on the 4 back rows on the 3rd and 4th columns from the left. Place a blue 2x2 Brick to the right of the 2 back rows of the ppp. Vertically place a transparent blue 1x2x2 brick to the right of the ppp. Horizontally place a blue 2x4 Brick to the left of the ppp.

10.1 Stack 2 blue 2x2 Bricks and place the stack on the 2 back rows on the 4th and 5th columns from the left.

10.2 Stack 2 transparent blue 2x2 Bricks and place the stack to the right of the previous stack.

11. Place a light blue 2x2 Brick on the 2 back rows on the 4th and 5th columns from the left to the left of the ppp. Place a lime Plant with 5 leaves between the 2nd and 3rd row and between the 2nd and 3rd columns from the right. it does not sit on any studs. Place a purple 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

12. Rotate the sub build 90 degrees clockwise so the rounded edge faces the left. Attach it to the main build by placing the 4th and 5th rows from the back of the 2 right columns underneath the 2 left columns of the left overhang.

13.1 Horizontally place a light brown 2x6 Plate on the 4th and 5th rows from the front on the 6th through 11th columns from the right. it sits on the light brown 2x3 curved slope brick and on the 4 right columns of the blue 2x10x2 arch. Place a light brown 2x2 Brick on the 2 left columns of the ppp. Place a green 3x3 Plant flower with 5 pointed leaves and top stud between the 2 back rows of the 2 right columns and between the 1st and 2nd columns from the right. it does not sit on any studs.

13.2 Place a purple 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

14.1 Horizontally place a transparent blue 1x2x2 brick on the 3rd row from the front on the 5th and 6th columns from the left, there should be no studs on the right side because there's an empty space at the base between the left and right parts of the build, which are connected at the top by the arch. Note that the main build became wider after attaching the sub-build in step 12, so we are counting the sub-build as part of the main build for the row and column reference. Place the front row of a transparent blue 2x2 Brick on top of the ppp. Place a green 2x2 round rock with hole on the 4th and 5th rows from the front on the 9th and 10th columns from the left, on top of the higher light brown 2x2 brick. Place a green 4x4 Plant tree top with 4 top studs and curved sides on the 2 back rows of the 7th and 8th columns from the right, on the 2 right columns of the light brown 2x6 plate from step 13.1.

14.2 Let's place the tiger cub! The tiger cub is orange with black stripes along its back. The insides of its ears are white, and so is the area under its mouth. Place it vertically under the right roof on the 2 front rows of the 3rd and 4th columns from the right. It is facing to the front. Horizontally place a white bone loosely in front of the tiger cub.

14.3 Let's place the mama tiger. Mama tiger is orange with black stripes along her back. The area around her snout is white. Place her horizontally and loosely in front of the bone. She is facing to the left.

14.4 Let's place the mama elephant! Mama elephant is gray, with big ears, a trunk that points downward, and white tusks. Place her vertically under the arch so she faces the front.

14.5 Let's place the baby elephant! The baby elephant is gray, with big ears, and a trunk that points upward. Place it horizontally loosely to the front left of the mama elephant so it is facing at its mama. The main model with its 4 animal scenes is complete! Next up is the 2nd model!

## Second model

All bags, book 1

Group 1 turtles: steps 1-5, pages 29-33.

Group 2 tigers: steps 1-6, pages 34-39.

Let's get to building!

### Group 1: Turtles

1.1 Horizontally place a lime 12 x 6 Plate with rounded edges in front of you so the front row has 10 columns, and the back row has 6. Place an orange 2x2x2 slope brick on the 2nd and 3rd rows from the back on the 2nd and 3rd columns from the right, so it slopes to the back. Please note that the base isn't even—some rows are longer than others because they have more columns. When placing a piece that sits on multiple rows, whether it's two, three, or even six different rows, always count columns using the longest row involved throughout these instructions, meaning the row with the most columns. In this case the 2nd row from the back has 8 columns and the row in front has 10, and the piece covers these rows, we use the 10-column row to decide where to place it. instructions say to position it on the 2nd and 3rd columns from the right, which refers to the row with 10 columns. If you counted using the 2nd row from the back instead of the 3rd row from the back, the position would be off since the 2nd row from the back is shorter. So, whenever a piece goes across more than one row, always use the longest row in that section to count columns correctly. Place a yellow 2x2 curved slope brick on the 2nd and 3rd rows from the front on the 2 right columns so it slopes to the right. Vertically place the 2 back rows of a yellow 2x4 Curved double slope brick to the left of the ppp, so 1 row overhangs to the front and the back edges are even.

1.2 Horizontally place a yellow 4x8 Plate in front of the build, place the right corner underneath the overhang so it attaches to the main build.

2. Vertically place a yellow 2x3 curved slope brick on the 4th, 5th, and 6th rows from the back on the 3rd and 4th columns from the right, on top of the 2x4 double slope brick from the previous step with the back edges aligned, so it curves and slopes to the front. Place a yellow 1x2x2 brick horizontally to the left of the back-facing slope brick on the 3rd row from the back. Place another horizontally to the left of the ppp. Vertically place a yellow 2x6 Plate on the 3rd and 4th columns from the left so it is vertically centered. the back row sits on the ppps and on the left facing orange 2x2x2 slope brick.

3. Horizontally place a yellow 2x6 Plate on the 3rd and 4th rows from the back on the 5th through 10th columns from the left. The front row of the 4 left columns overhangs to the front. Vertically place the 2 back rows of a light brown 2x3 curved Slope brick to the left of the ppp, so it curves and slopes to the front. Place 2 stacked light brown 2x2x2 Round bricks on top of the ppp.

4. Horizontally place a yellow 2x4 Curved double slope brick on the 3rd and 4th rows from the back on the 4th through 6th columns from the right. Place a pink 3x3 flower plant with 5 leaves and top stud on the back row on the left column of the ppp. Place another on the front row of the leftmost column of the main build. Locate a white 3x3 Fruit Pyramid with round bottom, it's a soft, white piece shaped like a small pyramid with smooth bumps. It looks like a bunch of turtle eggs. Place it on the 4th through 6th rows from the front and on the 5th through 7th columns from the left.

5.1 Place a green 2x2 Plant palm with 5 leaves on top of the stacked brown 2x2x2 Round bricks. Then place a lime Plant stem on the 5th row from the back on the 3rd column from the right, this is on the front row and on the right column of the yellow 2x3 curved slope brick, so the leaves face left to right. Place another on the 3rd column from the right of the 3rd row from the front so the leaves face left to right.

5.2 Let's place the turtles! The turtles are lime and have brown spots on their shells. Place the first one on the right front corner so it faces to the left. Place the second turtle on the leftmost column of the 3rd row from the front, it is facing to the right.

## Group 2: Tigers

1. Horizontally place a lime 12 x 6 Plate with rounded edges in front of you so the back row has 10 columns, and the front row has 6. Horizontally place a grey 2x4 Brick on the 2 back rows on the 4 right columns. The back right corner overhangs. Place a light brown 2x2 Brick, printed on one side with a pattern of four red mushrooms with white spots, on the third and fourth rows from the front, on the second and third columns from the right, in front of the ppp so it is horizontally centered to it. Make sure the printed side faces the front. The pattern is slightly raised. Remember when counting the columns to use the longest row.

2. Horizontally place a reddish brown 2x3 Curved bottom slope brick on the ppp, so it curves and slopes upward to the right and 1 column overhangs to the right. Place a grey 2x2x2 slope brick on the 2 back rows on the 2 right columns, so it slopes to the right. Place another symmetrically to the left of the ppp. Place a grey 2x2 Brick on the 2 back rows on the 2nd and 3rd columns from the left. Place a lime 2x2x2 round Brick with bamboo stem pattern on the ppp so the pattern faces the front. The pattern is slightly raised. Place another on the 3rd and 4th rows from the front on the 3rd and 4th columns from the left so the bamboo stem pattern faces the front. The stem pattern is slightly raised.

3.1 Horizontally place a blue 2x10x2 arch brick on the 2 back rows so it is horizontally centered. Horizontally place a light brown 2x3 Curved bottom slope brick on the 2 left columns of the ppp,

so it curves and slopes upward to the left and 1 column overhangs to the left. Place a reddish brown 2x2x2 Round brick on the 3rd and 4th rows from the front on the 2nd and 3rd columns from the right, on the 2 left columns of the reddish Brown 2x3 bottom slope brick. Vertically place the 2 front rows of a reddish brown 2x3 curved slope brick on top of the ppp, so it curves and slopes to the front. Place a grey 2x2x2 Slope brick on the 3rd and 4th rows from the front on the 4th and 5th columns from the right, so it slopes to the left.

4. Horizontally place a light brown 2x6 Plate on the 2 back rows on the 2nd through 7th columns from the left. The left side is even with the round bottom 2x3 brick. Place a light brown 2x2 Brick with a reddish-brown droppings and light gray flies pattern, printed on one side on the 2 left columns of the ppp with the left edges even. Make sure the printed side faces the front. The pattern is slightly raised. Place a reddish brown 4x4 round plate with hole on the 3 back rows on the 2nd and 3rd columns from the right 1 column overhangs to the right and 1 row overhangs to the back.

5. Horizontally place a reddish brown 2x3 Curved bottom slope brick on the 2 right columns of the ppp so it is vertically centered. It curves and slopes upward to the right. 1 column overhangs to the right. Place a reddish brown 2x2 Brick on the 2 left columns of the ppp. Place a green 3x3 flower plant with 5 pointed leaves and top stud on the back row of the 5th column from the right, on the back row of the leftmost column of the reddish brown 4x4 round plate. Place a green 4x4x3 pine tree on the 2 back rows of the 2nd and 3rd columns from the left, on top of the light brown 2x2 Brick with a reddish-brown droppings and light gray flies pattern, printed on the front side. Place a green 3x3 flower plant with 5 pointed leaves and top stud between the 2 back rows, not counting the overhanging row of the 4x4 round plate, and between the 5th and 6th columns from the left, 3 columns to the right of the pine tree. It does not sit on any studs. Place a red 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

6.1 Place a green 3x3 flower plant with 5 pointed leaves and top stud on the 3rd column from the left of the 3rd row from the front, on the front row and on the rightmost column of the lime 2x2x2 round brick with bamboo stem pattern. Then place a purple 3x3 flower plant with 5 leaves and top stud on top of the ppp. Place a green 2x2 round rock with hole on the 2nd and 3rd rows from the back of the 2nd and 3rd columns from the right. it goes on top of the reddish brown 2x2 Brick.

6.2 Let's place the tiger cub! The tiger cub is orange with black stripes along its back. The insides of its ears are white, and so is the area under its mouth. Place it inside the hole of the ppp so its head faces the front right.

6.3 Let's place the mama tiger. Mama tiger is orange with black stripes along her back. The area around her snout is white. Place her vertically on the 2nd through 6th rows from the front so she is horizontally centered. She is facing the front. Horizontally place a white bone loosely outside the build in front of the tiger. The second model with its 2 animal scenes is complete! Next up is the 3rd model!

Third model

All bags, book 1

Group 1: steps 1-6, pages 41-46.

Group 2: steps 7-13, pages 47-53.

Let's get to building!

Group 1:

1. Horizontally place a lime 12 x 6 Plate with rounded edges in front of you so the front row has 10 columns, and the back row has 6. Place a blue 12 x 6 Plate with rounded edges symmetrically to the front. Horizontally place a blue 2x8 plate so it is vertically and horizontally centered. The 2 12 x 6 Plates with rounded edges are now attached. Horizontally place a blue 2x4 Brick on the 4 left columns of the ppp. Repeat symmetrically to the right.

2. Horizontally place a blue 4x8 half circle plate in front of the ppps so the rounded side faces the front. Vertically place a blue 2x4 Brick on the 2nd through 5th rows from the back on the 3rd and 4th columns from the left, behind the raised center wall, so the left sides are even. Please note that the base isn't even—some rows are longer than others because they have more columns. When placing a piece that sits on multiple rows, whether it's two, three, or even six different rows, always count columns using the longest row involved throughout these instructions, meaning the row with the most columns. In this case the 2nd row from the back has 8 columns and the 5th row from the back has 12, and the piece covers these rows, we use the 12-column row to decide where to place it. instructions say to position it on the 3rd and 4th columns from the left, which refers to the row with 12 columns. If you counted using the 2nd row from the back instead of the 5th row from the back, the position would be off since the 2nd row from the back is shorter. So, whenever a piece goes across more than one row, always use the longest row in that section to count columns correctly. Repeat symmetrically to the right.

3.1 Place a blue 2x2 Brick on the 4th and 5th rows from the front on the 4th and 5th columns from the left, on the 2 back rows and on the 2nd and 3rd columns from the left of the half circle plate. Repeat symmetrically to the right.

3.2 Place a transparent blue 2x2 Brick to the left of the ppp between the ppps. Vertically place a blue 2x4 Brick on the 2 left columns so it is vertically centered. Vertically place a yellow 2x6 Plate on the 2 right columns so it is vertically centered. Place another vertically on top of the ppp.

4.1 Place a transparent blue 2x2 Brick on the 5th and 6th rows from the front so it is horizontally centered.

4.2 Place a blue 2x2 Brick on the 5th and 6th rows from the back on the 2 left columns, on the 2 back rows of the left 2x4 brick from step 3.2 even with the back.

5.1 Place a light brown 2x2 Brick with a reddish-brown deer droppings and light gray flies pattern, printed on one side, on the 2nd and 3rd rows from the back on the 3rd and 4th columns from the left. Make sure the printed side faces the back. The pattern is slightly raised. It sits on the 2 back rows of the blue 2x4 brick from step 2.

5.2 Place a light brown 2x2 Brick, printed on one side with a pattern of four red mushrooms with white spots symmetrically to the right. Place a blue 2x2 Brick on the ppp. Repeat symmetrically to the left. Horizontally place an orange 1x2x2 brick on the 3rd row from the back on the 3rd and 4th columns from the left. Repeat symmetrically to the right.

5.3 Horizontally place a yellow 1x2x2 brick behind the ppp. Repeat symmetrically to the left. Stack 2 lime 2x2x2 Round bricks with bamboo stem pattern so the bamboo stem pattern faces the front. Place it on the 4th and 5th rows from the back on the 2 right columns, on the back 2 rows of the yellow 2x6 plate from step 4.

6.1 Place a grey 2x2x2 slope brick on the 4th and 5th rows from the front on the 4th and 5th columns from the left, so it slopes to the front. The back row goes to the left of the front row of the center blue transparent 2x2 brick from step 3.2. Repeat symmetrically to the right. Horizontally place an orange 1x2x2 brick behind the ppp. Repeat symmetrically to the left.

6.2 Horizontally place a transparent blue 1x2x2 brick on the 6th row from the front, on the back row of the blue transparent 2x2 brick, so it is horizontally centered. Place a blue 2x2 Brick on the 5th and 6th rows from the back on the 2 left columns, on top of the one from step 4.2. Then place a lime Plant stem on the 3rd row from the front on the 2nd column from the right so the leaves face left to right. Place another on the 5th row from the front on the 2nd columns from the right, 2 rows behind the ppp.

Group 2:

7. Place a grey 2x2x2 Slope brick on the 5th and 6th rows from the front on the 4th and 5th columns from the right, on the front facing slope brick, so it slopes to the front. Repeat symmetrically to the left. Place a light brown 2x2x2 Round brick on the 5th and 6th rows from the back on the 2 left columns, on top of the left blue stacked 2x2 bricks. Place a green 3x3 Flower plant with 5 pointed leaves and top stud on the 5th row from the front on the leftmost column, on the left column and on the front row of the left blue 2x4 brick. Place a purple 3x3 Flower plant with 5 leaves and top stud on top of the ppp.

8. Orient a lime 12 x 6 Plate with rounded edges horizontally so the front row has 10 columns. Attach it to the main build on the 7th through 11 rows from the front, so the front row sits on the row behind the top front-facing slope bricks. 1 row overhangs to the back. In the front, it attaches to the light brown 2x2x2 round brick on the left and to the 2 stacked lime 2 2x2x2 round bricks with bamboo stem pattern on the right. Each end of the back two rows attach to the yellow and orange 1x2x2 bricks. Horizontally place a trans blue 1x2x2 brick on the 6th row from the front, so it is horizontally centered. it goes between the top 2x2x2 slope bricks.

9.1 Place a grey 2x2 Brick on the 6th and 7th rows from the front on the 4th and 5th columns from the left, so it connects the top left front-facing 2x2x2 slope brick with the lime 12x6 plate. Place a light brown 2x3 curved Slope brick on the 4th through 6th rows from the back and on the 2nd and 3rd columns from the left, the front row goes to the left of the back row of the ppp, so it curves and slopes to the front.

9.2 Place a transparent blue 2x2 Brick on the 5th and 6th rows from the back so it is horizontally centered. It goes behind the transparent blue 1x2x2 brick from the previous step. Vertically place a grey 2x4 Brick on the 4th through 7th rows from the back on the 4th and 5th columns from the right. it goes to the right of the ppp vertically centered.

9.3 Place a reddish brown 2x2 Brick on the 3rd and 4th rows from the back on the 2nd and 3rd columns from the right. it goes to the right of the 2 back rows of the ppp. Place a green 3x3 Plant flower with 5 pointed leaves and top stud on the rightmost column of the 2nd row from the back of the higher lime 12x6 plate. Place a coral 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

9.4 Place a green 3x3 Plant flower with 5 pointed leaves and top stud on the leftmost column of the 2nd row from the back. On the same row as the previous one. Then place a red 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

9.5 Place a coral 3x3 Plant flower with 5 leaves and top stud on top of the ppp.

10.1 Place a light brown 2x2x2 Round brick on the 4th and 5th rows from the back on the 2nd and 3rd columns from the left, on top of the light brown 2x3 front-facing curved slope brick. Place a grey 2x2 Brick on the 5th and 6th rows from the back on the 5th and 6th columns from the left, on top of the previous one from the previous step.

10.2 Place a reddish brown 2x2x2 Round brick on the 4th and 5th rows from the back on the 2nd and 3rd columns from the right, on top of the reddish brown 2x2 brick.

11.1 Horizontally place a blue 2x10x2 arch brick on the 4th and 5th rows from the back so it is horizontally centered. each end sits on a 2x2x2 Round brick which you placed on the previous step. Horizontally place a light brown 2x3 Curved bottom brick on the 2 left columns of the ppp so it curves and slopes upward to the left and 1 column overhangs to the left.

11.2 Horizontally place a reddish brown 2x3 Curved bottom brick symmetrically to the right.

12. Horizontally place a light brown 2x6 Plate on the 4th and 5th rows from the back on the 6 left columns so it is even with the left facing light brown 2x3 curved bottom brick. Place a light brown 2x2 Brick on the 2 left columns of the ppp. Place a 4x4 round plate on the 4th and 5th rows from the back on the 4 right columns, so 1 row overhangs to the front and back. It sits on the right facing reddish brown 2x3 curved slope brick and the left column sits on the blue arch. Horizontally place a reddish brown 2x3 Curved bottom brick on the 4th and 5th rows from the back on the 3 right columns, so it curves and slopes upward to the right. Make sure it is vertically centered on the ppp. Horizontally place a reddish brown 2x3 curved Slope brick on top of the ppp, so it curves and slopes to the left.

13.1 Place a green 2x2 Plant palm with 5 leaves on top of the ppp. Then place a pink 3x3 Plant flower with 5 leaves and top stud on top of the ppp. Place a green 2x2 round rock with hole on the 4th and 5th rows from the back on the 2 left columns, on top of the light brown 2x2 brick. Place the panda cub inside the top hole of the ppp. The panda cub is mostly white, with black legs, ears, and the tip of its snout, and striking black-and-white patches around its eyes. Place mama panda on the 5th through 7th rows from the back on the 4th through 6th columns from the right. Mama panda's back should be placed to the left of the front row of the reddish brown 2x2x2 round brick. She is facing to the front. Mama panda has the same colors as her cub.

13.2 Place a green 4x4 Plant tree top with 4 top studs and curved sides on the 4th and 5th rows from the back on the 5th and 6th columns from the left. Place a pink 3x3 Plant flower with 5 leaves and top stud on the 5th row from the back on the 6 column from the left.

13.3 Place a green 4x4x3 pine tree loosely outside the build at the front left. Place another in front of it. Vertically place the baby deer to the left of the ppp, so it faces the front. Horizontally place the mama deer in front of the pine and its baby, so she faces the left. The two deer are a warm shade of brown, with little white spots speckled across their bellies.

13.4 Horizontally place mama elephant loosely outside the build on the front right. she is facing to the left. Horizontally place the calf in front of its mama. It is facing the left. Mama elephant is gray, with big ears, a trunk that points downward, and white tusks. The calf or the baby elephant is gray, with big ears, and a trunk that points upward. The 3rd model is complete!

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our Builders page. It's easy and we will do all the work! Just contact us at [info@bricksfortheblind.org](mailto:info@bricksfortheblind.org) and together we will make it happen!

Please signup for our newsletter and follow us on Facebook and Instagram to be the first to know when new instructions are available!

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following LEGO DUPLO sets: 10442 Wild Animal Families: Penguins & Lions. 10444 Creative Garden & Flowers. 10445 F1 Team Racing Cars & Drivers. 10447 Ambulance & Driver. 10449 First Time: Visit to the Doctor. 10453 Funfair. 10454 Mickey Mouse Clubhouse & Car. 10457 Winnie the Pooh's Birthday Party. 10458 Ice Cream Trip with Bluey. 10459 Bluey's Family House with Memory Game.
