

76446 Knight Bus Adventure

Adapted by Jordi Isus. Tested by Jolene Nemeth.

All aboard for a thrilling Knight Bus™ adventure with this LEGO® Harry Potter™ magic vehicle toy for kids (76446). A unique birthday present idea or treat toy for boys and girls aged 8 and up and any casual fans who are discovering the magic of the Wizarding World, this is the most detailed LEGO brick model ever of the iconic triple-decker Knight Bus. The upper levels can be detached for easy access to the interior, which has moving beds and a swinging chandelier for realistic play.

This magical toy building set also features 5 LEGO Harry Potter characters – Harry Potter, Ernie Prang, Stan Shunpike, a sleeping witch, and Padfoot™ – to recreate memorable Harry Potter and the Prisoner of Azkaban™ scenes. Other authentic details, including a buildable lamppost where Harry waited (and was scared by Padfoot!) before the Knight Bus arrived, Harry's trunk and a Daily Prophet newspaper element with the headline 'Escape from Azkaban' add to the creative role-play possibilities.

Magic vehicle toy for kids – Build an iconic vehicle from the Wizarding World and recreate Harry Potter and the Prisoner of Azkaban™ scenes with this LEGO® Harry Potter™ Knight Bus™ Adventure set

5 LEGO® Harry Potter™ characters – Harry Potter, Ernie Prang, Stan Shunpike and sleeping witch minifigures, plus a Padfoot™ figure for creative role play

The most detailed LEGO® brick model of the Knight Bus™ – The upper levels of the bus can be detached for easy access to the interior, which features moving beds and a swinging chandelier

Playful details – This magical toy playset also includes a buildable lamppost and bench, Harry's trunk with a Galleon coin element and letter from Hogwarts™, plus a Daily Prophet newspaper element

Unique birthday present for kids aged 8 and up – This LEGO® Harry Potter™ vehicle set makes a fun treat toy for boys, girls and any casual fans who are discovering the magic of the Wizarding World

A fun way to build – Let the LEGO® Builder app guide kids on an intuitive building adventure, where they can zoom in and rotate models in 3D while they build, track their progress and save sets

Part of an extensive collection – LEGO® Harry Potter™ toy building sets let young witches, wizards and Muggles™ play out iconic scenes, make up their own stories or simply display the models

Dimensions – The Knight Bus™ vehicle in this 499-piece LEGO® Harry Potter™ playset measures over 6 in. (15 cm) high, 6.5 in. (17 cm) long and 2.5 in. (6 cm) wide.

The front of the box has a blue background, showing a full moon and a cityscape with the Knight Bus on the street. In front of the bus, Harry Potter is pulling his trunk. Behind him, there's a lamppost, a bench, and Padfoot in his dog form!

At the top left, there's the Lego logo and the Harry Potter name. Below that, it says: 8+ / 76446 / Knight Bus Adventure / 499 pieces!

At the bottom left, there are the five minifigures included in this set. On the right, there's a picture of Harry Potter, plus Ron Weasley and Hermione Granger, though Ron and Hermione are not in this set!

The back of the box has a blue background with a city scene. In the center, the Knight Bus is standing tall! Ernie Prang, the driver, is on the street, while Stan Shunpike, the conductor, is loading Harry's trunk. Harry is behind the bus, holding the Daily Prophet newspaper under a lamppost! At the top center of the box, you can see the first floor of the bus. On the right side, there's a simple drawing of the bus, showing all three floors and the roof!

This build has 499 pieces and is for ages 8+.

Bag 1 includes the pieces for Harry Potter and his trunk, the lamppost, the bench, the flowers next to the bench, Padfoot and the Knight bus.

Bag 2 includes the pieces for Ernie Prang and the Knight bus.

Bag 3 includes the pieces for Stan Shunpike and the Knight bus.

Bag 4 includes the pieces for sleeping witch and the Knight bus.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.

- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/76446>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3 and put them in one container.

This LEGO set comes with 4 bags labeled 1, 2, 3 and 4, a sticker sheet and 1 set of instructions. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder!

LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 – Harry Potter with his trunk, lamppost, and bench, Padfoot and Knight bus

Group 2: page 5

Group 3: page 6-10.

Group 4: contains the pieces for steps 1-5

Group 5: contains the pieces for steps 6-8

Group 6: contains the pieces for steps 9-15.

Group 7: contains the pieces for steps 16-24.

Group 8: contains the pieces for steps 25-33.

Group 9: contains the pieces for steps 34-36.

Group 10: contains de pieces for step 37.

Bag 2 – Ernie Prang and the Knight bus

Group 11: page 33.

Group 12: contains de pieces for steps 38-49.

Group 13: contains de pieces for steps 50-60.

Bag 3 - Stan Shunpike and the Knight bus.

Group 14: page 57.

Group 15: contains de pieces for steps 61-74.

Group 16: contains the pieces for steps 75-82.

Group 17: contains pieces for steps 83-92.

Bag 4 – Sleeping witch and the Knight bus

Group 18: page 80.

Group 19: contains the pieces for steps 93-106.

Group 20: contains the pieces for steps 107-119.

Group 21: contains the pieces for steps 120-123.

Group 22: contains the pieces for steps 124-127

Group 23: contains the pieces for steps 128-132.

Group 24: contains the pieces for steps 133 and 134.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 – Harry Potter

Sub build 1. Locate a short tan pair of legs, a torso with a printed blue jacket, a tan head printed with glasses and lips, a black hairpiece, and a brown set of wands. Assemble the Harry Potter minifigure, then break off a wand and attach the brown wand to his right hand.

Group 2 – Trunk.

Sub build 2. Horizontally place a brown 2x4 treasure chest bottom in front of you so the higher side faces the front. Horizontally attach a brown 2x4 treasure chest lid to the ppp so the bottom facing bar is in the front and the studs are on top. Then attach a gray 2x2 plate with pinholes

underneath the 2 leftmost columns so the pinholes face the front and back. Repeat symmetrically to the right. These are the wheels. Then attach the right handle of the trunk to Harry's left hand, he is pulling it! Place a tan 1x2 tile with a printed red seal loosely inside the trunk, this is a letter from Hogwarts. Then place a metallic gold 1x1 tile with printed details resembling wizarding currency loosely inside the trunk, this is a galleon coin.

Group 3: Lamppost, bench, and Padfoot.

Sub build 3. 1. Place a gray 2x8 plate horizontally in front of you. Then place a gray 2x2 round tile with open stud on the right 2 columns.

2. Stack three grey candlesticks, one on top of the other with the bar pointing down. Attach them to the ppp so that they point upright.

3. Place a gray 6L bar with stop ring on the top candle, with the stop ring end pointing up. Place a gray bar holder with handle on top of the ppp. The handle on top of the bar holder with handle should be oriented horizontally. Then attach a gray bar holder with clip to the ppp by clipping it to the bar. Push it forward so that it points to the front.

4.1 Let's make a part! Vertically place a gray 1x2 inverted curved slope tile in front of you so the lower stud faces the front. Then place a gray 1x1 round plate with horizontal bar on the front stud so the bar overhangs to the front. Then vertically place a transparent yellow 1x2 tile on top. This is the light.

4.2 Attach the light sub build to the lamppost by inserting the bar into the front pointing hollow side of the gray bar holder with clip.

5. Let's make a part! Let's build the backrest of the bench. Place a brown 2x4 tile horizontally and upright in front of you so the anti studs face the front. Attach the side studs of a brown 1x2 plate with 2x2 side studs to the left 2 columns so the 1x2 plate is on the bottom. Repeat symmetrically to the right. Place your part to the left of the lamp post on the back row.

6. Place a black 1x1 round plate on the front row on the 3rd column from the left. Repeat symmetrically to the right.

7. Horizontally place a brown 2x4 plate on the ppps. This is the seat of the bench!

8. Horizontally place a green 1x2 sloped brick on the left 2 columns of the back row so it slopes to the left. Place a green 1x1 round plate with 3 leaves on top of the ppp, with the leaves pointing to the left. Then place a second green 1x1 round plate with 3 leaves on the front row on the 2nd column from the left so the leaves face the front.

9. Locate the Padfoot minifigure and place it loosely to the left of the bench so that it looks to the front. Put the sub builds aside while we start building the knight bus.

Group 4: Knight bus

1. Place a gray 2x16 plate horizontally in front of you. Vertically place a black 1x2 log brick on the rightmost column.

2. Place a gray 2x2 plate to the left of the ppp on the 2nd and 3rd columns from the right.

3. Vertically place a gray 2x4 plate with a pin on each short side on top of the ppp so it is centered vertically, and the pins face the front and back.

4. Place a gray 2x2 plate on the ppp so it is centered vertically.

5.1 Horizontally place the higher side of a black 2x3 stair plate on the left column of the ppp so it is centered vertically.

5.2 Vertically place a gray 1x2 rounded plate to the right of the ppp on the 2nd column from the right.

5.3 Horizontally place a white 2x6 plate to the left of the bottom side of the 3x2 stair plate on the 6th, 7th, 8th, 9th, 10th, and 11th columns from the left.

Group 5:

6.1 Place a gray 2x2 plate on the 2nd and 3rd columns from the left.

6.2 Vertically place a gray 2x4 plate with a pin on each short side centered vertically on the ppp so that the pins point to the front and back.

6.3 Place a gray 2x2 plate vertically centered on the ppp.

6.4 Place a black 3x2 stair plate horizontally with the higher side on the left column of the ppp. The bottom side should overhang by 1 column to the left. Horizontally place another on the right column of the 2x2 plate so it is symmetrical to the ppp.

7. Horizontally place a gray 2x8 plate on the build so it is centered horizontally.

8. Vertically attach 4 black 2x3 stair plates, one to the right of the other, to the front row of the ppp, so they overhang 2 rows to the front and the higher ends are on the ppp.

Group 6:

9. Place the rightmost column of a black 4x4 corner plate underneath the leftmost column so the right angle faces the front left, and 3 columns are exposed to the left.

10. Vertically place a gray 1x2 rounded plate on the 3rd column from the left to the left of the black 3x2 stair plate located on the left of the build. Then place a purple 2x3 plate vertically to the left of the ppp. The front 2 rows of the purple 2x3 plate should be to the left of the ppp.

11. Horizontally place a black 2x4 plate on the ppps.

12. Horizontally place 2 purple 1x4 bricks on the front row between the front facing pins. Repeat symmetrically to the back.

13. Place a black 2x4 mudguard horizontally on the front row of the 2nd and 3rd columns from the right so it is centered on the 2 studs and overhangs 1 row to the front. Repeat symmetrically to the back.

14. Vertically place a black 2x4 plate between the 2 ppps on the 2nd and 3rd columns from the right. Then place a purple 1x4 plate to the left of the ppp so it is centered vertically.

15. Place a black 1x1 round plate on the front row on the 5th column from the right to the left of the front mudguard. Repeat symmetrically to the back.

Group 7:

16. Horizontally place a black 1x2 plate on the ppp and the leftmost column of the back mudguard. Repeat symmetrically to the front.

17. Horizontally place a black 1x3 plate on the back row on the 2nd, 3rd, and 4th columns from the right. Then place a purple 1x1 plate to the left of the ppp. Repeat symmetrically to the front.

18. Vertically place a tan 1x4 brick on the 5th column from the right so it is centered vertically. Then vertically place a gray 1x2 short panel to the left of the ppp so it is centered vertically, and the wall faces the right.

19. Place a black 2x2 turntable plate to the left of the ppp so it is centered vertically. Then attach a gray 2x2 inverted round tile with bottom facing bar to the center of the ppp. It should spin freely.

20. Horizontally place a purple 1x4 brick on the front row on the 6th through 9th columns from the right. Repeat symmetrically to the back.

21.1 Place a black 1x1 brick with side stud and bottom lip on the front row on the 10th column from the right so that the side stud points to the front. Then attach a gray 1x1 tile with rounded side on the side stud with the rounded side pointing up. Place a purple 1x2 brick horizontally on the front row to the left of the ppps.

21.2 Repeat the previous step symmetrically to the back.

22. Vertically place a black 1x4x3 window frame vertically centered on the 12th column from the right between the purple 1x2 bricks from the previous step, with the ridges facing to the left.

23. Place a black 2x4 mudguard horizontally on the front row of the 6th and 7th columns from the left. It only attaches to 2 studs, and overhangs 1 row to the front. Place a purple 1x1 plate on the front row on the 8th column from the left. Then repeat both placements symmetrically to the back. Place a purple 1x1 plate on the front row on the 5th column from the left. Repeat symmetrically to the back.

24. Horizontally place a purple 1x4 plate on the 3 ppps on the back row. Repeat symmetrically to the front.

Group 8:

25. Vertically place a black 2x3 stair plate on the front row on the 3rd and 4th columns from the right so that the 1x2 plate overhangs to the front. Repeat symmetrically to the back.

26. Place a purple 1x1 brick on the front row on the 2nd column from the left. It should sit on the right column of the stair plate. Then place a purple 2x2 corner brick to the left so it looks like the braille letter H and overhangs 1 column to the left.

27. Place a black 2x2 right wedge plate with a cut off corner underneath the ppp with the point to the front. 1 column should be exposed to the left. To check if it is a left wedge plate place the angled side to the front, position the narrow side to the right, and ensure the slope rises from left to right.

28. Horizontally place a gray 1x4 tile on the back row on the 4 leftmost columns. Then rotate the build 180 degrees. The ppp should now be on the front right corner.

29. Place a black 1x1 plate with clip on the 2nd row from the front on the rightmost column with the clip pointing to the front and the hands of the clip facing left to right. Then place a black 1x1 round plate to the left of the ppp.

30. Horizontally place a purple 1x2 brick on the back row on the 3rd and 4th columns from the right to the right of the back right facing mudguard. Vertically place a purple 1x2 brick to the right of the ppp on the 5th and 6th rows from the front on the 2nd column from the right. Then vertically place a black 1x3 plate in front of the ppp.

31. Horizontally place a gray 1x2 rounded plate on the 5th row from the front on the 3rd and 4th columns from the right. Place a black 2x3 tile horizontally in front of the ppp on the 2nd, 3rd, and 4th columns from the right. Then place a gray 1x3 tile in front of the ppp on the 2nd row from the front.

32.1 Place a purple 1x1 brick to the right of the ppp. Then vertically place a purple 1x2 brick with sticker behind the ppp.

32.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 5 on the purple 1x2 brick. This sticker has a purple background and a stripe with two silver arrows pointing in opposite directions. At the bottom, there are two yellow circles. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

33. Place a tan 2x2 tile with 2 studs on the 2nd and 3rd rows from the back and on the 3rd and 4th columns from the left with the studs pointing vertically to the left. Then place a gray 1x2 tile with steering wheel vertically to the left of the ppp on the 2nd column from the left.

Group 9:

34.1 Let's make a part! Place a black 1x2 plate with 2x2 side studs hanging down horizontally in front of you and hold it upright so that the 2x2 plate with side studs is at the front and the 1x2 plate is at the top overhanging to the back. Then place a black 1x2 plate with rail horizontally on the bottom row of front facing side studs so the rail faces the bottom.

34.2 Vertically place a black 1x2 curved slope tile on the leftmost column of the front facing side studs so that it slopes upward. Place a black 1x1 slope tile on the bottom row on the right column of the front facing side studs so that it slopes upward.

34.3 Place a black 1x1 round plate above the ppp on the front facing side stud.

34.4 Then place a transparent 1x1 round tile on the ppp.

34.5 Vertically attach your part to the 2 back rows of the leftmost column so the tiles face the left. This is a light.

35. Vertically place a black 1x2 plate with 2x2 side studs hanging down in front of the ppp so the side studs face the left.

36.1 Let's make a part! Place a black 1x2 plate with 2x2 side studs hanging down horizontally in front of you and hold it upright so that the 2x2 plate with side studs is at the front and the 1x2 plate is at the top overhanging to the back. Place a black 1x2 plate with rail horizontally on the bottom row of front facing side studs so the rail faces the bottom.

36.2 Vertically place a black 1x2 curved slope tile on the rightmost column so that it slopes upward. Place a black 1x1 slope tile on the bottom row on the left column so that it slopes upward.

36.3 Place a black 1x1 round plate on the upper row above the ppp.

36.4 Then place a transparent 1x1 round tile on the ppp.

36.5 Attach the light sub build vertically to the left of the main build in front of the part from the previous step by the 1x2 high plate.

Group 10:

37.1 Let's make a part! Let's build the first bed! Horizontally place a white 2x6 plate in front of you. Vertically place a black 1x2x1 wall panel with center divider on the rightmost column so the long wall faces the right.

37.2 Place a 1x4 coral tile to the left of the ppp on the front row. Repeat symmetrically to the back. Then vertically place a pink 1x2 plate on the leftmost column.

37.3 Vertically place a pink 1x2 tile on the ppp, this is the pillow. Place the bed horizontally inside the knight bus to the right of the grey 1x2x1 wall panel from step 18 attaching it to the turntable so that now the bed can move. Make sure the pillow points to the left.

Building Instructions (Bag 2, Book 1):

Group 11 - Ernie Prang

Sub build 4: Locate a pair of short gray legs, a torso printed with a light green shirt with tie and green vest, a head printed with glasses, lips and a white mustache, a white hairpiece with bald top. Assemble the Ernie Prang minifigure. Put it aside while we continue building the Knight bus.

Group 12:

38. Vertically place a purple 1x2 plate on the leftmost column on the back 2 rows. Place a tan 1x1 brick in front of the ppp. Then place the leftmost column of a purple 2x4 wedge brick horizontally in front of the ppp so the point is on the left.

39. Let's build the driver panel! Place a purple 1x1 brick on the back row on the 3rd column from the left. Then horizontally place a purple 1x12 brick to the right of the ppp. Horizontally place a purple 1x2 brick to the right of the ppp. Place a purple 2x2 corner brick to the right of the ppp so it looks like the braille letter D.

40.1 Place a purple 2x2 corner brick with sticker on the back left corner of the build so it looks like the braille letter F.

40.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 4 on the purple 2x2 corner brick on the side that faces to the left. This sticker has a purple background with a black vent grille and a silver circle. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

41. Horizontally place a black 1x2 curved sloped tile on the front row on the 1st and 2nd columns from the left so that it slopes to the left. Horizontally place a black 1x2 plate to the right of the ppp. Then place a purple 1x12 brick to the right of the ppp.

42. Vertically place a purple 1x2 plate with 2x2 side studs hanging down on the 3rd and 4th rows from the back on the leftmost column so that the side studs point to the left. Then place a purple 1x2 tile horizontally to the right of the ppp on the 4th row from the back surrounding the driver's seat. Place a purple 1x1 plate to the right of the ppp.

43.1 Vertically and upright place a purple 2x4 plate on the left side studs of the build between the lights. Then place a gray 2x4 tile with sticker on the ppp.

43.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 9 on the gray 2x4 tile. This sticker has a black ventilation grille design. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

44. Place a purple 1x1 brick on the back row on the 2nd column from the right. It should sit on the rightmost column of the 2x2 corner plate. Then place a purple 1x2 brick on the back row to the left of the ppp. Place a black 1x1 round plate in front of the purple 1x1 brick.

45. Stack 2 purple 1x2 bricks and place the part vertically on the 2nd and 3rd rows from the front on the rightmost column.

46. Place a purple 1x1x1 2/3 brick with 2 side studs behind the ppp so that the side studs point to the back. Rotate the build 180 degrees so that the side studs of the ppp point to the front on the left of the build.

47. Place the front right stud of a purple 2x2 corner plate on the ppp so it looks like the braille letter D. The corner should overhang to the back right. Place a transparent yellow 1x1 round brick on the back right stud of the ppp.

48. Place a black 1x1 plate with clip on the back row of the leftmost column so the clip overhangs to the back. Place a purple 1x1 brick on top of the ppp. Then vertically place a transparent 1x2 brick in front of the ppp.

49. Place a purple 2x2 corner plate on the ppp so it looks like the braille letter H. Then place a purple 2x2 corner brick in front of the right column of the ppp so it looks like a braille letter H. Then place a purple 1x1 brick to the right of the ppp on the front row.

Group 13:

50.1 Let's make a part! Stack 2 purple 1x6 plates. Orient the part vertically.

50.2 Vertically place 3 purple 1x2 curved slope bricks on the previous part so that they slope to the right.

50.3 Vertically and upright attach the part to the side studs on the front left corner of the build so that the slopes slope horizontally curving to the left.

51.1 Let's make a part! Horizontally place a purple 1x4 brick in front of you. Then place a transparent 1x2 brick horizontally on the right 2 columns of the ppp.

51.2 Horizontally place a purple 1x2 curved slope brick to the left of the ppp so that it slopes to the front.

51.3 Place a black 1x2 inverted slope brick with sticker vertically on the rightmost column so it slopes upward and overhangs 1 row to the front.

51.4 Skip this step if you have already placed your sticker! Ask a helper to place sticker 7 on the black 1x2 inverted sloped brick on the sloped side that faces to the front. This sticker has a black background with the capital letters K and B in white. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

51.5 Place a purple 1x1 brick to the left of the ppp. Rotate the sub build 90 degrees counterclockwise so that the inverted slope brick slopes upwards to the right. Vertically place your part on the 5th column from the right so it is centered vertically.

52. Place a black 1x1 round brick on the 9th column from the left on the second row from the back. It should sit on the window frame. Place a black 1x1 brick with clip in front of the ppp so the clip faces the left. Then place a black 1x2 log brick vertically in front of the ppp.

53.1 Let's make 10 identical parts! Place a purple 1x3x2 window frame horizontally in front of you so the ridged side faces the front. Attach a transparent 2x3 glass window pane to the window by pressing it into the front facing ridge. You will hear it snap into place.

53.2 Horizontally place 5 windows, one to the right of the other, on the front row so the window glass faces the front. The rightmost column should be free.

53.3 Horizontally place 4 windows, one to the right of the other, on the back row starting on the 5th column from the left so the window glass faces the back. Then vertically place a window on the front 3 rows of the rightmost column so the window glass faces the right.

54.1 Vertically place a black 1x3 tile on the back 3 rows of the 5th column from the right. Then horizontally place a black 1x4 tile with 2 studs to the left of the back row of the ppp.

54.2 Vertically place the back row of a black 1x6 tile to the left of the ppp so it connects to the front row. Then horizontally place a black 1x3 tile to the right of the ppp on the front row. Then horizontally place a black 1x2 grill tile to the right of the ppp. Horizontally place a black 1x4 tile with 2 studs to the right of the ppp. Then place a black 2x2 corner tile to the right of the ppp so it looks like the braille letter J. Then place a black 1x1 tile behind the right column of the ppp.

55.1 Place a black 1x1 tile on the second row from the back on the 4th column from the right. It should sit on the 1x2 inverted slope brick. Then horizontally place a black 1x4 tile with 2 studs on the back row on the 5th through 8th columns from the left. It should sit to the right of the vertical 1x6 tile.

55.2. Vertically place a black 1x2 grille tile on the 2nd and 3rd rows from the back on the leftmost column. Place the left column of a black 2x2 tile in front of the ppp.

55.3 Horizontally place a black 1x4 tile with 2 studs in front of the right column of the ppp. Then place a black 1x3 tile horizontally to the right of the ppp.

56. Turn the build upside down so it is horizontal, and the lights face the right. Place a black 1x1 plate with horizontal bar on the second column of anti studs from the left and second row from the back so the bar points horizontally to the left. Then place a gray 2x2 inverted round tile with rounded bottom on the 2 front rows of anti studs on the 3rd and 4th columns from the left.

57. Let's make a part! Let's make the front wheels. Place a purple wheel inside a black tire so the hollow side faces the front. Then place a gray 1x1 round plate with open stud on the front facing stud. Now you should have 2 identical parts. Attach one part to the right front facing pin so the 1x1 round plate faces the front. Repeat symmetrically to the back.

58. Let's make 2 identical parts! Let's make the back wheels. Place a purple wheel inside a black tire so the hollow side faces the front. Then place a purple 1x1 round tile on the front facing stud. Now you should have 2 identical parts. Attach one part to the left front facing pin so the 1x1 round tile faces the front. Repeat symmetrically to the back.

59.1 Turn the bus right side up. Then rotate it 180 degrees so the lights face the left.

59.2 Let's make a part! Let's build the vending machine! Horizontally place a tan 1x2x3 brick with sticker in front of you.

59.3 Skip this step if you have already placed your sticker! Ask a helper to place sticker 1 on the tan 1x2x3 brick on the front facing side. This sticker has a colorful keyboard. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

59.4 Horizontally place a tan 1x2 slope tile on the ppp so it slopes forward. Attach the vending machine sub build horizontally on the second row from the back on the 3rd and 4th columns from the right.

60. Attach a gray 6L bar with stop ring upright to the front facing clips to the right of the stairs with the stop ring at the top. Set the first deck of the Knight bus aside for now.

Building Instructions (Bag 3, Book 1):

Group 14 - Stan Shunpike

Sub build 5. Locate a short purple pair of legs, a torso with a printed light purple shirt, a black tie and purple jacket, a tan head printed with eyes and lips, a purple cap, a brown money pouch and a tan 2x2 tile printed with a Daily Prophet newspaper element with the headline in black 'Escape from Azkaban'. Assemble the Stan Shunpike minifigure, then position the money pouch, cross the strap over Stan's left shoulder, so that the pouch rests at the level of his right hip, angled to the right. Finally attach the Daily Prophet newspaper to his left hand with the printed side facing forward. Set Stan Shunpike aside while we start building the second deck of the Knight Bus.

Group 15:

61. Let's make a part! Place a purple 2x2 plate in front of you. Place a gray 1x2 brick with 2 side studs vertically on the right column of the ppp with the side studs pointing to the right.

62. Vertically place a tan 1x4 brick on the left column so it is centered vertically. 1 row should overhang to the front and back.

63. Vertically place a purple 1x2 plate under the back row of the ppp so 1 row is exposed to the back.

64. Horizontally place a purple 1x4 brick on the back row of the left column so it overhangs 3 columns to the left.

65. Place the back right corner of a purple 6x6 plate under the overhang of the ppp.

66. Vertically place a gray 1x2 short panel on the 6th column from the left so it is vertically centered, with the wall facing to the right. Horizontally place a gray 1x2 brick with 2 side studs on the front row on the 6th and 7th columns from the left, with the side studs pointing to the front.

67. Horizontally place a purple 1x12 brick on the left 3 columns of the back row so it overhangs 9 columns to the left.

68. Vertically place the back row of a purple 4x6 plate underneath the 1x12 brick so it sits to the left of the 6x6 plate. The 1x12 brick should still overhang by 5 columns to the left.

69. Horizontally place the right 5 columns of the back row of a purple 6x8 trap door plate underneath the left overhang so the hinges are on the right. Then place a purple 1x6 plate vertically on the leftmost column. then place a purple 1x1 plate with 1x1 side stud hanging down on the front row of the ppp so the side stud faces the front. Repeat symmetrically to the back.

70. Place a black 2x2 turntable base on the 4th and 5th columns from the right so it is vertically centered. It should sit to the left of the 1x2 short panel. Then place a gray 2x2 inverted round tile with downward facing bar on top so it can spin freely.

71. Vertically place a gray 2x4 tile on the 10th and 11th columns from the right so it is centered vertically. Then place 2 gray 2x2 tiles with 2 studs, one in front of the other, to the left of the ppp so they are centered vertically, and their studs are on the right.

72. Horizontally place a purple 1x2 brick on the front row on the 3rd and 4th columns from the right. Horizontally place a purple 1x12 brick to the left of the ppp.

73. Stack 2 purple 1x2 plates, then place the part horizontally to the left of the ppp. Repeat symmetrically to the back.

74. Horizontally place a purple 1x2 plate on the front row on the 1st and 2nd columns from the left. Repeat symmetrically to the back. Place a black 1x1 plate with upright double sided studs to the right of the ppp on the back row with the upright double sided studs overhanging to the back. Repeat symmetrically to the front.

Group 16:

75. Place a transparent orange 1x1 tile with rounded side upright on the left facing stud of the ppp so the round side faces the back.

76. Let's make a part! Place a purple 1x2 plate vertically in front of you. Then place a purple 1x1x1 2/3 brick with side studs on the back row so the studs face the back. Repeat symmetrically to the front. Then vertically place your part on the rightmost column of the build so the studs face the front and back. This column has only 2 studs.

77. Vertically place a tan 1x2 log brick on the second column from the right so it is centered vertically. Then vertically place a 1x2 purple brick in front of the ppp. Repeat symmetrically to the back.

78.1 Vertically place a tan 1x4 brick with sticker on the second column from the left so it is centered vertically.

78.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 3 on the tan 1x4 brick on the left facing side. This sticker has an orange background with the words in purple The Daily Prophet. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

79. Let's make a part! Place a transparent 2x2 brick in front of you. Vertically place a purple 1x2 plate on the right column. Then vertically place a purple 1x2 tile on the ppp. Place the part keeping the same position on the 3rd and 4th rows from the front on the 1st and 2nd columns from the right.

80. Place a 1x1 tan brick on the 2nd row from the front and 2nd column from the right. Repeat symmetrically to the back.

81. Vertically place a black 1x4x3 window frame on the 9th column from the right, with the ridges facing to the left. It should sit to the right of a 2x4 tile. Then vertically place a black 1x4 brick on the ppp.

82.1 Let's make a part! Let's build the second bed! Horizontally place a white 2x6 plate in front of you. Vertically place a black 1x2x1 wall panel with center divider on the rightmost column, with the long wall facing to the right.

82.2 Horizontally place a coral 1x4 tile to the left of the front row of the ppp. Repeat symmetrically to the back. Then vertically place a pink 1x2 plate on the leftmost column.

82.3 Vertically place a pink 1x2 tile on top of the ppp. This is a pillow. Rotate the bed 180 degrees so the pillow is on the right. Attach the 2 rightmost columns of anti studs to the turntable plate which is on the 4th and 5th columns from the right. Now the bed can move.

Group 17:

83. Horizontally place a purple 1x4 brick on the 2nd through 5th columns from the right. Repeat symmetrically to the front. Place a purple 1x2 brick horizontally to the left of the ppp. Repeat symmetrically to the back.

84. Horizontally place a purple 1x12 brick to the left of the ppp. Repeat symmetrically to the front.

85.1 Vertically place a black 1x4 brick with sticker on the leftmost column so it is centered vertically.

85.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 8 on the black 1x4 brick on the left facing side. This sticker has a black background with the words Knight Bus in white. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

85.3 Stack 2 purple 1x4 plates then place the stacked part on the ppp.

86. Place a purple 1x1 sloped tile on the left front facing side stud so that it slopes to the left. Repeat symmetrically to the back.

87.1 Let's make 14 identical parts! Place a purple 1x3x2 window frame in front of you so the ridges face the front. Horizontally attach a transparent 2x3 window glass pane to the ridges so it snaps in place. Now you should have 14 identical parts.

87.2 Vertically place 1 window on the front 3 rows of the leftmost column so the glass is on the left. Repeat symmetrically to the back.

87.3 Horizontally place 6 windows, one to the right of the other, on the back row so the glass panes face the back. Repeat symmetrically to the front.

88.1 Vertically place a black 1x6 tile on the 2nd column from the right. Place a black 1x4 tile with 2 studs horizontally on the front row on the 2nd through 5th columns from the right to the left of the ppp. Repeat symmetrically to the back.

88.2 Place a black 1x2 grille tile horizontally to the left of the ppp. Repeat symmetrically to the front.

88.3 Vertically place a black 1x6 tile on the 9th column from the right to the left of the ppps.

89.1 Horizontally place a black 1x2 grille tile on the front row to the left of the ppp. Repeat symmetrically to the back.

89.2 Horizontally place a black 1x3 tile to the left of the ppp on the back row on the 7th, 8th, and 9th columns from the left. Repeat symmetrically to the front.

89.3 Horizontally place a black 1x6 tile on the front row to the left of the ppp covering the 6 left columns. Repeat symmetrically to the back.

89.4 place a black 1x4 tile with 2 studs on the leftmost column, so it is centered vertically.

90.1 Let's make 2 identical parts! Stack 2 purple 1x6 plates. Position the part vertically.

90.2 Vertically place 3 purple 1x2 curved slope bricks on the previous part so that they slope to the right. You should now have 2 parts in total!

90.3 Vertically and upright attach the first part to the vertical side studs on the front right corner of the build so that the slopes slope horizontally to the right. The middle 2 anti studs attach to the side studs. Attach the 2nd part symmetrically to the back.

91.1 Horizontally and upright place the right 2 columns of the bottom row of a black 2x3 tile with sticker on the 2 front facing side studs on the right end of the build.

91.2 Skip this step if you have already placed your sticker! Ask a helper to place sticker 6 on the black 2x3 tile. This sticker has a black background with the words All Destinations (nothing underwater) in white. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

91.3 Horizontally and upright place the bottom row of a black 2x3 tile with sticker on the 2 right back facing side studs on the right end of the build so it is horizontally centered.

91.4 Skip this step if you have already placed your sticker! Ask a helper to place sticker 6 on the black 2x3 tile. This sticker has a black background with the words All Destinations (nothing underwater) in white. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

92. Bring back your main build and orient it so it is horizontal, and the lights face the left. Horizontally place the second deck on top so it is centered.

Building Instructions (Bag 4, Book 1):

Group 18 – sleeping witch

Sub build 6. Locate a short black pair of legs, a torso with a printed green jacket with golden buttons and 2 pockets, a tan head with 2 printed faces, an awake face and a sleeping face and a black hat with light brown hair. Assemble the sleeping witch minifigure, ask a sighted helper to help you position the sleeping face to the front. Set the minifigure aside for now while we start building the 3rd deck of the Knight bus.

Group 19:

93. Let's make a part! Vertically place a purple 1x2 brick in front of you.

94. Place the right column of a purple 2x2 corner plate on the back row of the ppp 'so it looks like a braille letter H. It should overhang 1 column to the left.

95. Vertically place the back 2 rows of a tan 1x4 brick under the left overhanging column so 2 rows are exposed to the front.

96. Place a purple 2x2 corner plate on the front 2 rows so it looks like the braille letter F.

97. Place a purple 2x2 corner plate on top of the ppp so it looks like a braille letter F. Repeat symmetrically to the back.

98. Place a purple 1x1x1 2/3 brick with side studs on the front row of the right column so the side studs face the front. Repeat symmetrically to the back.
99. Vertically place a tan 1x4 plate on the left column.
100. Vertically place a purple 1x6 plate underneath the left column so it is centered vertically.
101. Horizontally place the right column of a purple 1x4 brick on the back row of the ppp so that it overhangs by 3 columns to the left.
102. Place the right back corner of a purple 6x6 plate underneath the 3 overhanging columns of the ppp.
103. Vertically place a gray 1x2 short panel on the 3rd column from the right so it is centered vertically, and the wall faces the right. Then place a black 2x2 turntable plate to the left of the ppp so it is centered vertically. Place a gray 2x2 inverted round tile with downward facing bar to the center of the ppp so it spins freely.
104. Horizontally place a purple 1x4 brick on the 4 right columns of the front row. Then place a purple 1x1 brick to the left of the ppp.
- 105.1. Place a purple 1x1 brick on the front row on the rightmost column of the front row. Repeat symmetrically to the back.
- 105.2 Horizontally place a purple 1x2 brick to the left of the ppp. Repeat symmetrically to the front.
106. Vertically place a tan 1x2 log brick vertically centered on the 2nd column from the right. Place the right column of a purple 2x2 corner brick behind the ppp so it looks like a braille letter D.

Group 20:

107. Place a purple 1x1 tile in front of the ppp. Repeat symmetrically to the back.
108. Place a purple 2x2 plate on the 2 rightmost columns so it is centered vertically.
109. Place a tan 1x1 plate with upright side stud on the rightmost column on the second row from the front so the side stud faces the front.
110. Place a black 1x4 rounded plate on the 2nd column from the right so it is centered vertically. Then vertically place a purple 1x2 plate to the right of the ppp. Place a transparent 1x2 curved slope brick on top of the ppp so it slopes to the right.
111. Place a black 1x1 brick with side stud on the 3rd row from the front on the 2nd column from the right, with the side stud facing forward. Place a second black 1x1 brick with side stud behind the ppp with the side stud facing backward. Place a black 1x1 round plate on each of the side studs of the ppps.
112. Place a purple 1x1 brick on the 2nd column from the right on the front row. Repeat symmetrically to the back.
113. Horizontally place a purple 1x12 brick on the back row on the 1st and 2nd columns from the left so that it overhangs by 10 columns to the left.
114. Horizontally place the back row of a purple 6x8 trap door plate to the left of the 6x6 plate under the overhang so the hinges are on the left. 2 columns of the 1x12 brick should still overhang to the left.
115. Vertically attach a gray 4L bar to the hinges of the ppp.
116. Vertically place the back row of a purple 4x6 plate under the left overhang so 2 columns are exposed to the left.

117. Place a purple 2x2 corner brick on the back left corner so it looks like a braille letter F. Then vertically place a gray 2x4 tile on the 2nd and 3rd columns from the left so it is centered vertically. Place 2 gray 2x2 tiles with 2 studs, one in front of the other, to the right of the ppp so together they are centered vertically, and the studs are on the left.

118. Place a purple 2x2 corner brick on the front left corner so it looks like a braille letter H. Then horizontally place a 1x12 brick to the right of the front row of the ppp.

119. Vertically place a black 1x4x3 window frame vertically centered on the 9th column from the right, with the ridges facing left. Vertically place a black 1x4 brick on the ppp. Vertically place a black 1x2 grille tile on the ppp so it is centered vertically.

Group 21:

120.1 Let's make a part! Let's build the third bed! Horizontally place a white 2x6 plate in front of you. Vertically place a black 1x2x1 wall panel with center divider on the rightmost column. the long wall should face to the right.

120.2 Horizontally place a coral 1x4 tile on the front row to the left of the ppp. Then vertically place a pink 1x2 plate on the leftmost column. Repeat symmetrically to the back.

120.3 Vertically place a pink 1x2 tile on the ppp. It is the pillow. Rotate the bed 180 degrees so that the pillow points to the right. Horizontally place your part on the turntable plate to the left of the short panel. This is on the 4th and 5th columns from the right. Make sure the 1x2 tile faces the right.

121.1 Let's make a part! Vertically place a purple 1x2 plate in front of you. Place a purple 1x1x1 2/3 brick with 2 side studs on the front row with the side studs facing to the right. Repeat symmetrically to the back.

121.2 Horizontally and upright attach a tan 2x4 tile with sticker on the side studs of the ppps so it is centered vertically to the build. 1 row should overhang to the front and 1 to the back.

121.3 Skip this step if you have already placed your sticker! Ask a helper to place sticker 2 on the tan 2x4 tile. This sticker has a black background with coral and purple magical hot water bottles. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

121.4 Vertically place your part on the leftmost column so it is centered vertically, and the tile faces the right.

122. Horizontally place a purple 1x4 brick on the front row on the 4th through 7th columns from the right. Repeat symmetrically to the back.

123.1 Horizontally place a purple 1x12 brick to the left of the ppp. Repeat symmetrically to the front.

123.2 Place a purple 1x1 brick on the leftmost column on the second row from the front. Repeat symmetrically to the back.

Group 22:

124.1 Let's make 10 identical parts! Horizontally place a purple 1x3x2 window frame in front of you so the ridges face the front. Attach a transparent 2x3 window glass pane to the ridges. You should hear it snap into place. Now you should have 10 identical parts.

124.2 Horizontally place 5 windows, one to the right of the other, on the front row starting on the 3rd column from the left so the glass panes face the front.

125.1. Horizontally place a black 1x2 grille tile on the front row on the 2nd and 3rd columns from the right. Then place a black 1x4 tile with 2 studs horizontally to the left of the ppp. Repeat both placements symmetrically to the back.

125.2 Place a black 2x2 corner tile on the 8th and 9th columns from the right on the back 2 rows so it looks like a braille letter D. The right column should be behind the vertical 1x2 grill tile.

125.3 Horizontally place a black 1x4 tile with 2 studs to the left of the ppp on the front row. Then place a black 1x3 tile horizontally to the left of the ppp. Repeat both placements symmetrically to the back.

126. Let's make a part! Attach a transparent 2x6x2 glass for windshield inside a purple 2x6x2 windshield frame. Then attach the windshield vertically to the left 2 columns of the build.

127. Vertically place a black 2x6 tile on the left 2 columns of the build.

Group 23:

128.1 Let's make a part! Let's build the hanging lantern! Stack a transparent 1x1 round brick with open stud on a transparent 1x1 round plate with open stud.

128.2 Place a transparent minifigure head on top of the part.

128.3 Place a transparent 2x2 dome brick on top so it is centered. It will connect to the ppp by the central tube on the bottom surface of the part.

128.4 Place a gray 1x1 tile with upright clip on the ppp. The hands of the clip should face left and right.

128.5 Attach a transparent diamond to the bottom of the sub build. Turn the third deck of the bus upside down so it is horizontal, and the hole is on the left. Attach the clip of the hanging lantern sub build to the vertical 4l bar that is just to the right of the 4th column from the left.

129. Bring back the main bus build and make sure it is horizontal, and the lights face the left. Flip the 3rd deck build right side up, so the windshield is on the left. Horizontally place it on top of the main bus build so it is centered.

130.1 Let's make a part! Horizontally place a purple 1x4 plate in front of you. Place a black 1x1 round plate underneath the rightmost column.

130.2 Horizontally place a purple 1x4 plate to the left of the ppp so 1 column is exposed to the left.

130.3 Horizontally place a purple 1x2 curved slope brick on the right 2 columns so it slopes to the front. Place another to the left of the ppp so it slopes to the front.

130.4 Vertically attach your part upright to the right back facing side studs on the third deck so the stud is on top, and it slopes to the left.

131.1 Let's make a part! Horizontally place a purple 1x4 plate in front of you. Place a black 1x1 round plate underneath the leftmost column.

131.2 Place a purple 1x4 plate to the right of the ppp so 1 column is exposed to the right.

131.3 Horizontally place a purple 1x2 curved slope brick on the left 2 columns so it slopes to the front. Place another horizontally to the right of the ppp so it slopes to the front.

131.4 Place your part vertically and upright on the right front facing side studs on the 3rd deck of the bus so the stud is on top, and it slopes to the right.

132.1 Place a purple 2x2 curved sloped corner brick on the right front facing side stud so the stud is in the lower left corner.

132.2 Repeat symmetrically to the back.

132.3 Place a purple 1x1 tile on the side stud of the ppp. Repeat symmetrically to the front.

Group 24:

133.1 Let's make a part! Let's make the roof for the back of the bus. Vertically place a purple 4x6 plate in front of you. Then place another vertically to the left so the plates are aligned. Horizontally place a purple 2x6 tile on the 2nd and 3rd rows from the front so it is centered horizontally. It should connect the 2 plates. Repeat symmetrically to the back.

133.2 Vertically place 2 purple 1x2 tiles, one in front of the other, on the right most column so together they are centered vertically.

133.3 Repeat the previous step symmetrically to the left. Turn the sub build upside down. Place a black 2x2 inverted round tile with rounded bottom on the antistuds so it is centered vertically and horizontally.

133.4 Turn the sub build right side up and horizontally attach it to the top of the Knight bus on the 2nd through 10th columns from the right so that it covers the Knight bus rear end.

134.1 Let's make a part! Let's build the front end of the roof. Vertically place a purple 4x6 plate in front of you. Place a second to the left so it is aligned with the first plate. Horizontally place a purple 2x6 tile on the 2nd and 3rd rows from the front on the 6 right columns. It should connect the two plates. Repeat symmetrically to the back.

134.2 Vertically place 2 purple 1x2 tiles, one in front of the other, to the left of the 2 ppp so together they are centered vertically.

134.3 Place 2 purple 2x2 curved slope tiles, one in front of the other, on the leftmost column so they slope and overhang 1 column to the left.

134.4 Turn the sub build upside down. Place a black 2x2 round inverted tile with rounded bottom on the anti studs so it is centered vertically and horizontally. Turn the sub build right side up so it slopes to the left. Place it horizontally to the left of the previous roof part.

134.5 Place Ernie Prang behind the steering wheel since he is the driver. Next place Stan Shunpike on the first step of the stairs attach his right hand to the grab rail to the right of the stairs. Place the sleeping witch on her bed which is on the 3rd floor. In front of the knight bus place the 3rd sub build with the lamppost, the bench, Padfoot and Harry Potter with his trunk. Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen! Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation. At the end of the

At the end of the instruction booklets are advertisements for the following 6 LEGO Harry Potter Theme kits:

76435 Hogwarts™ Castle: The Great Hall
76447 Hogwarts™ Castle: Flying Lessons
76426 Hogwarts™ Castle Boathouse
76442 Hogwarts Castle: Charms Class
76441 Hogwarts™ Castle: Dueling Club
76431 Hogwarts™ Castle: Potions Class
