

## **43278 Mini Arendelle Castle & Elsa's Ice Palace**

Adapted by John Le and tested by Natalie Charbonneau.

Endless creative play awaits kids and Disney's Frozen 2 fans aged 5 years old and up in this LEGO® I Disney Frozen Mini Arendelle Castle & Elsa's Ice Palace (43278) toy building set. Featuring 2 castles, the buildable micro-world playset may be small, but it has a big world inside. Each castle has opening front doors, bedrooms and stables for the characters, and balconies. Plus, there are loads of play starters. The toy construction set also includes 9 LEGO I Disney Frozen characters: Elsa, Anna, Kristoff, Honeymaren, Olaf, The Nokk, Bruni, a baby reindeer and a Snowgie.

Disney Frozen toy buildable models for kids – Treat girls and boys aged 5 and up to a Mini Arendelle Castle & Elsa's Ice Palace building toy that's made for creative play or fun fantasy display.

LEGO® I Disney Frozen building set – The buildable micro-world toy includes 2 castles, Elsa, Anna, Kristoff and Honey Maren LEGO I Disney microdoll characters, plus 5 more LEGO I Disney characters.

Disney Frozen buildable playset functions – Unlock the buildable models using their respective keys, then open the castles to find more play and story-telling options inside.

LEGO® micro-world for kids – Play out fun new stories or favorite scenes with beloved Disney's Frozen 2 characters or place the buildable castle toys on display with everything safely tucked inside.

Frozen 2 gift-giving idea for 5-year-olds and up – This LEGO® I Disney building toy for girls and boys, with 9 characters and 2 castle building toys, is a fun gift-giving idea for trend-setting kids.

Mini palace measurements – When closed, Elsa's ice palace in this 306-piece LEGO® I Disney Frozen castle toy building set measures over 6in. (15 cm) high, 3 in. (8 cm) wide and 3 in. (8 cm) deep.

The front of the box shows the mini Arendelle castle and Elsa's palace in the background! In the front, there are all the characters enjoying the snow! They have an ice horse, a reindeer, a sled, and much more!

The back of the box shows that both of the buildings can open up revealing the interior!

The top of the box shows a real size image of an Elsa micro doll minifigure!

The build is 306 pieces in total and is for ages 5+.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.

- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

**Axles** - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

**Pins** - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

**Technic brick** - a brick which contains one or more holes which accept technic pins.

**Lift-arms** - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/43278>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 4 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Anna and Castle

Group 1 - Page 4.

Group 2 - Steps 1-3.

Group 3 - Steps 4-16.

Group 4 - Steps 17-28.

Group 5 - Steps 29-34.

Group 6 - Steps 35-44.

Bag 2 - Kristoff, Reindeer, Axolotl, Sled, and Stable

Group 7 - Pages 2-3.

Group 8 - Steps 1-6.

Group 9 - Steps 1-2.

Group 10 - Steps 3-5.

Group 11 - Steps 6-19.

Group 12 - Steps 20-21 and 1 dark tan 2x2 round tile with a stud from Step 22.

Group 13 - Rest of Step 22 and Steps 23-32.

Bag 3 - Elsa and Palace

Group 14 - Page 2.

Group 15 - Steps 1-12.

Group 16 - Steps 13-25.

Group 17 - Steps 26-42.

Bag 4 - Ice Horse, Olaf, Honeymaren, and Stable

Group 18 - Pages 2-3.

Group 19 - Steps 1-8.

Group 20 - Steps 9-28.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Anna

Sub-build 1. Locate 1 light tan body printed with a black and purple dress, 1 light tan head printed with light blue eyes and pink lips, and 1 light brown hair. Assemble Anna, then put her away while we make the next part!

Group 2 - Castle

1. Vertically place a white 2x6 plate in front of you.
2. Horizontally place a nougat 4x8 plate with a round side and a 2x2 gap on top of the back 4 rows of the ppp so the round side faces the front. Make sure the back row aligns with the back row of the ppp.
3. Horizontally place 2 magenta 2x4 plates, 1 to the right of the other, on the back 2 rows.

Group 3 - Castle

4. Horizontally place a light brown 2x4 plate on the front 2 rows so it is centered horizontally and overhangs 1 column to the left and right.
5. Horizontally place a white 2x3 plate with a round side and pinhole underneath the leftmost column of the front 2 rows so the round side is exposed 2 columns to the left. Then repeat symmetrically to the right.
6. Place a mint blue 2x2 round tile with a stud on the front right corner so the round side aligns with the round side with the ppp. Then repeat symmetrically to the left.
7. Place a tan 2x2 round tile on the front 2 rows so it is centered horizontally. Now vertically place a nougat 1x2 rounded tile to the left of the ppp. Then place a brown 1x1 round tile with an upright bar to the left of the ppp so it sits on the 2x2 round tile with a stud. Now repeat both parts symmetrically to the right.

8. Let's make a part! Horizontally place a light nougat 2x8x4 rounded window frame with side studs in front of you so the side studs face the front.

9. Horizontally place a teal 1x2 plate on top so it is centered horizontally.

10. Place a teal 1x1 round plate upright on the top left front-facing side stud. Then place another 1 upright on the bottom left front-facing side stud. Now repeat both parts symmetrically to the right.

11. Place 2 gold 1x1 tiles with a clip, 1 above the other, upright on the 2 leftmost front-facing side studs so the clip hands face left and right. Now vertically place a gold 1x2 ingot tile upright on the 2 rightmost front-facing side studs.

12. Horizontally place your part behind the tiles that are on the front 2 rows so it is centered horizontally and the round side faces the front.

13. Place a teal 2x2 flower on the top-facing bar that is on the front left corner so the anti-stud faces up. Now place a green ice cream cone on top so the bar faces up. Now repeat both parts symmetrically to the right.

14. Rotate your build 180 degrees. Now vertically place a light brown 1x2 brick with a side stud on the front left corner so the side stud faces the right. Then place a light purple 1x1 round tile upright on the right-facing side stud of the ppp.

15. Vertically place a light nougat 1x2 masonry brick on the front left corner so the brick grooves face the left.

16. Vertically place a magenta 1x2x2 window frame on the front left corner so the ridged side faces the left. Now attach a gold lattice pane to the left-facing side of the ppp.

#### Group 4 - Castle

17. Place 2 dark tan 2x2 round tiles with a stud, 1 to the right of the other, on the front 2 rows so they are centered horizontally. Now vertically place a purple 1x2 jumper plate to the right of the 2 ppp.

18.1. Let's make a part! Horizontally place a light orange 2x4 plate in front of you. Now vertically place a white 1x2 half cylinder brick on the leftmost column. Then vertically place a light purple 1x2 tile to the right of the ppp. Now place a purple 2x2 tile to the right of the ppp.

18.2. This is a bed! Horizontally place it on the front 2 rows on top of the 2 2x2 round tiles with a stud so it is centered horizontally and the half cylinder brick is on the left.

19. Place a light blue hair brush on the 1x2 jumper plate that is to the right of the previous part so the bristles face the left.

20. Vertically place a light nougat 1x2 masonry brick on the front right corner so the brick grooves face the right.

21. Place a nougat 1x1x3 brick on the 2nd row from the front of the rightmost column.

22. Place a tan 1x1x3 brick with 2 clips on the front right corner so the clips face the right.
23. Horizontally place a mint blue 4x8 plate with a round side and a 2x2 gap on the front 4 rows so it is centered horizontally and the round side faces the back.
24. Rotate your build 180 degrees. Now place the bottom row of a light blue 1x2 curved tile upright on the top left front-facing side stud so the curve faces the top left. Then repeat symmetrically to the right.
- 25.1. Let's make a part! Place a nougat 2x2 round inverted tile in front of you. Then vertically place a brown 1x2 plate with a horizontal bar on the long side on the left column so the bar faces the left. Now vertically place a brown 1x2 plate with an upright bar on the long side on the right column so the bar faces the right. Now vertically place a nougat 2x4 rounded tile on top so it is centered vertically.
- 25.2. Vertically attach the bar of the 1x2 plate with the horizontal bar to the 2 front-facing clips so the round tile faces the front.
26. Vertically place a teal 1x2 plate on the back right corner.
27. Horizontally place a teal 2x6 plate on the back 2 rows so it is centered horizontally.
28. Vertically place a teal 1x2 plate on the back left corner.

#### Group 5 - Castle

29. Horizontally place a mint blue 1x2 jumper plate on the back row so it is centered horizontally. Then place a white 2x2 plate in front of the ppp. Now horizontally place a mint blue 1x2 jumper plate in front of the ppp.
30. Vertically place a light nougat 1x2 plate on the back 2 rows on the 3rd column from the left. Then repeat symmetrically to the right.
31. Place a transparent 1x1 mug of hot chocolate on the back row on the 1x2 jumper plate so the handle faces the left. Now place a white 1x1 swirl on top. This is whipped cream!
32. Horizontally place a white 1x2x2 rounded window frame on the 2nd row from the back so it is centered horizontally. Now attach a gold lattice pane to the front of the ppp.
33. Vertically place a tan 1x2x2 brick on the back 2 rows to the left of the ppp. Then repeat symmetrically to the right.
34. Place a white 2xx2 slope brick on the back left corner so it slopes to the front. Then repeat symmetrically to the right.

#### Group 6 - Castle

35. Horizontally place a mint blue 1x2 jumper plate on the back left corner. Then repeat symmetrically to the right.

36. Place a teal 1x1 round plate with 3 leaves on the leftmost column, in front of the 2x2x2 slope brick so the leaves face the front left. Then place a magenta 1x1 round flower plate on top of the ppp. Now repeat both parts symmetrically to the right.

37. Horizontally place 2 light nougat 1x4 arch bricks, 1 in front of the other, on the back 2 rows so they are centered horizontally. Now place a tan 1x1 brick on the 1x2 jumper plate that is on the back left corner. Then repeat symmetrically to the right.

38. Horizontally place a tan 1x2x2 panel with a window on the back row so it is centered horizontally and the wall faces the back. Then horizontally place another 1 in front of the ppp so the wall faces the front.

39. Vertically place a white 1x2 tri-slope tile to the right of the 2 ppp so it slopes to the right. Then place a white 1x1 pyramid tile on the back right corner on top of the 1x1 brick. Now repeat both parts symmetrically to the left.

40. Place a white 2x2 plate on the back 2 rows so it is centered horizontally.

41. Horizontally place a mint blue 1x2 jumper plate on the back row so it is centered horizontally.

42. Place a dark tan 1x1 round plate on the ppp. Now horizontally place a white 1x2 tri-slope tile in front of the ppp so it is centered horizontally and slopes to the front.

43. Place a dark red 2L bar with a stop on the back row on top of the 1x1 round plate so it is centered horizontally.

44. Place a dark pink flag on top of the ppp so the flag faces the right. Now put your build away while we make the next part!

Building Instructions (Bag 2, Book 2):

Group 7 - Kristoff, Reindeer, and Axolotl

Sub-build 2. Locate 1 sand blue and dark blue body printed with a dark blue and red vest and black boots, 1 light tan head printed with light brown eyes, nose, and lips, and 1 tan hair. Assemble Kristoff, then put him in front of you.

Sub-build 3. Horizontally place a dark tan reindeer in front of you so the head faces the right. Now place a dark tan 1x1 half cylinder brick on top so it slopes to the front and back.

Sub-build 4. Place a light purple axolotl in front of you so the head faces the front. Now place a transparent pink flame on top so it faces the back. This is a wing! Now put everything away while we make the next part!

Group 8 - Sled

1. Horizontally place a light brown 2x4 plate in front of you.

2. Horizontally place a nougat 1x2 plate with 2 clips on the long side on the back left corner so the clips face the back. Then repeat symmetrically to the front.

3. Vertically place a dark orange 1x2 plate on the 2nd column from the right.
4. Vertically place a magenta 1x2 sloped curved brick on the leftmost column so it slopes to the right. Then place a transparent purple 2x2 tile with a stud to the right of the ppp.
5. Vertically place a magenta 1x2 sloped curved brick on the rightmost column so it slopes to the right.
6. Horizontally attach a white hockey stick to the 2 front-facing clips so it is centered horizontally to the build, and the angled part is on the right and sticks up. Then repeat symmetrically to the back. Now put everything away while we make the stable!

#### Group 9 - Stable

1. Vertically place a light brown 2x4 plate in front of you.
2. Horizontally place a nougat 4x8 plate with a round side and a 2x2 gap on top so it is centered horizontally and vertically and the round side faces the front.

#### Group 10 - Stable

3. Horizontally place 2 magenta 2x4 plates, 1 to the right of the other, on the back 2 rows.
4. Let's make a part! Horizontally place a light nougat 2x8x4 rounded window frame with side studs in front of you so the side studs face the front.
5. Horizontally place a teal 1x2 plate on top so it is centered horizontally.

#### Group 11 - Stable

6. Vertically place a dark orange 1x2 plate upright on the top left front-facing side studs. Then repeat symmetrically to the right.
7. Vertically place a gold 1x2 ingot tile upright on the bottom right front-facing side studs. Now place 2 gold 1x1 tiles with a clip, 1 above the other, upright on the bottom left front-facing side studs so the clip hands face left and right.
8. Horizontally place your part on the front 2 rows of the build so it is centered horizontally and the round side faces the front.
9. Rotate your build 180 degrees. Now vertically place a nougat 1x2 brick with a pinhole on the front right corner. Then insert an orange 2L pin with an axle hole to the right-facing hole so the pin faces the left and the axle hole faces the right.
10. Vertically place a light nougat 1x2 masonry brick on the front right corner so the brick grooves face the right.
11. Vertically place a magenta 1x2x2 window frame on the front right corner so the ridged side faces the right. Now attach a gold lattice pane to the right-facing side of the ppp.

12. Place a mint blue 2x2 round tile with a stud on the front 2 rows so it is centered horizontally. Then horizontally place a light purple 1x2 tile behind the ppp.

13. Vertically place a light nougat 1x2 masonry brick on the front left corner. Then vertically place a purple 1x2 jumper plate to the right of the ppp.

14. Place an orange carrot on top of the ppp. Then place a green stem with 3 tips on top of the ppp.

15. Place a nougat 1x1x3 brick on the leftmost column on the 2nd row from the front.

16. Place a tan 1x1x3 brick with 2 clips on the front left corner so the clips face the left.

17. Horizontally place a mint blue 4x8 plate with a round side and a 2x2 gap on the front 4 rows so it is centered horizontally and the round side faces the back.

18. Attach the back pinhole of a dark tan 4L axle connector with 2 2L liftarms to the left-facing pin that is on the rightmost column so the other pinhole is in the front and on the bottom.

19. Rotate your build 180 degrees. Now place the bottom row of a mint blue 1x2 curved tile upright on the top left front-facing side stud so the curve faces the top left. Then repeat symmetrically to the right. Now place a gold 1x1 round flower plate upright on each of the 2 front-facing side studs.

20.1. Let's make a part! Place a nougat 2x2 inverted tile in front of you. Then vertically place a brown 1x2 plate with a horizontal bar on the long side on the left column so the bar faces the left. Now vertically place a brown 1x2 plate with an upright bar on the long side on the right column so the bar faces the right. Now vertically place a nougat 2x2 tile with a round side on top so the round side faces the back.

20.2. Vertically attach the bar of the 1x2 plate with the horizontal bar to the 2 front-facing clips so the tile faces the front.

21. Horizontally place a teal 2x6 plate on the back 2 rows so it is centered horizontally. Now vertically place a light blue 1x2 plate with a clip on the long side on the back left corner so the clip faces the left. Then repeat symmetrically to the right.

22.1. Place a dark tan 2x2 round tile with a stud on the back 2 rows so it is centered horizontally.

### Group 13 - Stable

22.2. Place a mint blue 2x2 round tile with a stud on the back 2 rows to the left of the ppp. Then repeat symmetrically to the right.

23. Place a brown 2x2 flower on the back 2 rows so it is centered horizontally. Then vertically place a teal 1x2 slope tile on the back left corner so it slopes to the right. Then repeat symmetrically to the right.

24. Horizontally place a teal 1x2 plate with 2 side studs sticking up on the front row so it is centered horizontally and the side studs face the front. Then horizontally place a teal 1x2 plate behind the ppp. Now place a transparent orange flame on top of the 2x2 flower that is centered horizontally on the back 2 rows so it faces the right.

25. Place a tan 1x2 curved brick on the front left corner so the round side faces the front left. Then repeat symmetrically to the right. Now place a mint blue 2x2 round tile with a stud on the front 2 rows so it is centered horizontally.

26. Horizontally place a tan 1x4 sloped curved tile upright on the 2 front-facing side studs so it is centered horizontally.

27. Place a magenta 1x1 round plate with 3 leaves on the leftmost column on top of the 1x2 curved brick so the leaves face the front left. Now place a white 1x1 pyramid tile to the front right of the ppp so it sits on the curved brick too. Now repeat both parts symmetrically to the right.

28. Place a light blue 1x1 round flower plate on the front left corner on top of the 1x1 round plate with 3 leaves. Then repeat symmetrically to the right.

29.1. Let's make a part! Place a dark tan 1x1 round plate in front of you. Then place a white 1x1 swirl on top. Now insert a brown 2L bar with a stop into the anti-stud of it.

29.2. Now place it on top of the 2x2 round tile with a stud that is centered horizontally on the front 2 rows.

30. Attach a teal key to the left-facing clip so the diamond shaped part faces the back.

31. Vertically attach the front bar of 2 gold 1x2 rounded bricks with a gap to the bottom 2 right-facing clips.

32. Bring back your previous build and orient it so the round side faces the front. Now attach the left-facing clips of your previous build to the bars of the right-facing 1x2 rounded bricks of the current build. Now you can close it to hide the interior! Now put it away while we make the next part!

Building Instructions (Bag 3, Book 3):

#### Group 14 - Elsa

Sub-build 5. Locate 1 light tan body printed with a light blue dress with black drapes, 1 light tan head printed with light blue eyes and pink lips, 1 light blonde hair, and 1 transparent aqua flame. Assemble your minifigure then attach the flame to her hand. This is a snowflake! Now put her away while we make the next part!

#### Group 15 - Palace

1. Vertically place a white 2x6 plate in front of you.

2. Horizontally place a mint blue 4x8 plate with a round side and a 2x2 gap on top of the back 4 rows of the ppp so the round side faces the front. Make sure the back row aligns with the back row of the ppp.

3. Horizontally place 2 light blue 2x4 plates, 1 to the right of the other, on the back 2 rows.

4. Horizontally place a light blue 2x4 plate on the front 2 rows so it is centered horizontally and overhangs to the left and right.

5. Horizontally place a white 2x3 plate with a round side and pinhole underneath the leftmost column of the front 2 rows so the round side is exposed 2 columns to the left. Then repeat symmetrically to the right.
6. Place a light purple 2x2 round tile with a stud on the front right corner so the round side aligns with the round side with the ppp. Then repeat symmetrically to the left.
7. Horizontally place a white 2x4 rounded tile on the front 2 rows so it is centered horizontally.
8. Let's make a part! Horizontally place a transparent aqua 2x8x4 rounded window frame with side studs in front of you so the side studs face the front.
9. Horizontally place a magenta 1x2 plate on top so it is centered horizontally.
10. Place a teal 1x1 round plate upright on the top left front-facing side stud. Then place another 1 upright on the bottom left front-facing side stud. Now repeat both parts symmetrically to the right.
11. Place 2 teal 1x1 tiles with a clip, 1 above the other, upright on the 2 leftmost front-facing side studs so the clip hands face left and right. Now vertically place a gold 1x2 ingot tile upright on the 2 rightmost front-facing side studs.
12. Horizontally place your part behind the tiles that are on the front 2 rows so it is centered horizontally and the round side faces the front.

#### Group 16 - Palace

13. Rotate your build 180 degrees. Now vertically place a mint blue 1x2 brick with a side stud on the front right corner so the side stud faces the left. Then place a transparent purple 1x1 round tile upright on the left-facing side stud.
14. Vertically place a transparent aqua 1x2x3 panel on the front right corner so the wall faces the right.
15. Place 2 aqua 2x2 round tiles with a stud, 1 to the right of the other, on the front 2 rows so they are centered horizontally. Now vertically place a mint blue 1x2 jumper plate to the left of the 2 ppp.
- 16.1. Let's make a part! Horizontally place a magenta 2x4 plate in front of you. Then vertically place a white 1x2 half cylinder brick on the rightmost column. Now vertically place a light purple 1x2 tile to the left of the ppp. Then place a mint blue 2x2 tile to the left of the ppp.
- 16.2. Horizontally place your part on the front 2 rows, on top of the 2 2x2 round tiles with a stud so it is centered horizontally and the half cylinder brick is on the right. This is a bed!
17. Place a pink hairbrush to the left of the ppp so it sits on the 1x2 jumper plate and the bristles face the right.
18. Vertically place a teal 1x2 log brick on the front left corner.
19. Place a light blue 1x1x3 brick on the leftmost column on the 2nd row from the front.

20. Place a white 1x1x3 brick with 2 clips on the front left corner so the clips face the left.
21. Horizontally place an aqua 4x8 plate with a round side and a 2x2 gap on the front 4 rows so it is centered horizontally and the round side faces the back.
22. Rotate your build 180 degrees. Now place the bottom row of a light blue 2x2 corner tile with a cutoff corner upright on the top left front-facing side stud so the cutoff corner faces the top left. Then repeat symmetrically to the right.
- 23.1. Let's make a part! Place a mint blue 2x2 round inverted tile in front of you. Then vertically place a white 1x2 plate with a horizontal bar on the long side on the left column so the bar faces the left. Now vertically place a white 1x2 plate with an upright bar on the right column so the bar faces the right.
- 23.2. Place a blue 2x2 plate on the front row so 1 row overhangs to the front. Then vertically place a blue 2x3 pentagonal tile behind the ppp so the angled side overhangs to the back. Now place a white 1x1 round plate on top of the upright bar so the stud faces up.
- 23.3. Attach the horizontal bar of your part to the 2 front-facing clips so the tiles face the front and the angled side faces up.
24. Place a transparent aqua crystal on the front left corner on top of the 2x2 round tile with a stud. Then repeat symmetrically to the right.
25. Vertically place a light purple 1x2 tile on the back right corner.

#### Group 17 - Palace

26. Horizontally place a white 2x6 plate on the back 2 rows so it is centered horizontally.
27. Vertically place a light purple 1x2 tile on the back left corner.
28. Horizontally place 2 white 1x2 plates with a stud and a clip, 1 to the right of the other, on the 3rd and 4th rows from the back so they are centered horizontally and the clips are in the front.
29. Horizontally place a mint blue 1x2 jumper plate on the back row so it is centered horizontally. Then place an aqua 2x2 sloped curved tile in front of the ppp so it slopes to the back.
30. Place a transparent head on the 1x2 jumper plate that is centered horizontally on the back row. Then place a transparent 1x1 hexagon tile on top of the ppp.
31. Horizontally place an aqua 1x2x2 slope brick on the back row to the left of the ppp so it slopes to the left. Then repeat symmetrically to the right.
32. Vertically place an aqua 1x2x2 slope brick on the 2nd and 3rd rows from the back, on the 3rd column from the left so it slopes to the front. Then repeat symmetrically to the right.
33. Vertically place a white 1x1 plate with a 1x1 slope tile on the back 2 rows on the 3rd column from the left so it slopes to the back. Then repeat symmetrically to the right.

34. Place a light purple 2x2 round tile with a stud on the 2 leftmost columns on the 2nd and 3rd rows from the back. Then repeat symmetrically to the right.
35. Place a white 1x1 round plate on each of the 2 ppp.
36. Place a transparent aqua arrow head on top of each of the 2 ppp so they are horizontal.
37. Horizontally place a white 1x4x2 arch brick on the 2nd row from the back so it is centered horizontally.
38. Horizontally place 2 aqua 1x2x2 slope bricks, 1 to the right of the other, on top of the ppp so they slope outwards to the left and right.
39. Horizontally place a mint blue 1x2 jumper plate on top of the 2 ppp.
40. Vertically attach the bar of a transparent aqua 4x6 diamond-shaped windshield to the 2 top-facing clips that are on the 3rd row from the front so it faces up and the sloped side faces the front.
41. Place a transparent purple 1x1 cone brick on the 2nd row from the back, on top of the 1x2 jumper plate so it is centered horizontally.
42. Horizontally place a transparent aqua snowflake on top of the ppp. Now put it away while we make the next part!

Building Instructions (Bag 4, Book 4):

#### Group 18 - Ice Horse, Olaf, and Honeymaren

Sub-build 6. Horizontally place a transparent aqua horse in front of you so the head faces the right. Now place a light blue 1x1 half cylinder brick on top so it slopes to the front and back.

Sub-build 7. Let's make Olaf! Place a white head printed with 3 black dots and 2 brown arms in front of you. Then place a white Olaf head on top so the hole faces the front. Now attach an orange unicorn horn to the front-facing bar hole. Then place a brown twig on top.

Sub-build 8. Let's make Honeymaren! Locate 1 tan body printed with a tan dress with black drapes, 1 tan head printed with pink eyes, eyelashes, and dark pink lips, and 1 dark brown hair. Assemble your minifigure then put her in front of you. Now put everything away while we make the next part!

#### Group 19 - Stable

1. Vertically place a light blue 2x4 plate in front of you.
2. Horizontally place an aqua 4x8 plate with a round side and a 2x2 gap on top so it is centered horizontally and vertically and the round side faces the front.
3. Horizontally place 2 light blue 2x4 plates, 1 to the right of the other, on the back 2 rows.
4. Let's make a part! Horizontally place a transparent aqua 2x8x4 rounded window frame with side studs in front of you so the side studs face the front.

5. Horizontally place a magenta 1x2 plate on top so it is centered horizontally.
6. Vertically place a mint blue 1x3 plate upright on the top left front-facing side studs. Then repeat symmetrically to the right.
7. Vertically place a white 1x2 sloped curved tile upright on the bottom left front-facing side studs so it slopes down. Then place a transparent 1x1 hexagon tile upright above the ppp. Now repeat both parts symmetrically to the right.
8. Horizontally place your part on the front 2 rows so it is centered horizontally and the round side faces the front.

#### Group 20 - Stable

9. Rotate your build 180 degrees. Now vertically place a light blue 1x2 brick with a pinhole on the front left corner. Now insert the pin side of a light grey 2L pin with an axle connector into the left-facing hole so the pin faces the right.
10. Vertically place a transparent aqua 1x2x3 panel on the front left corner so the wall faces the left.
11. Place a light purple 2x2 round tile with a stud on the front 2 rows so it is centered horizontally. Then horizontally place a light purple 1x2 tile behind the ppp.
12. Vertically place a teal 1x2 log brick on the front right corner. Then vertically place a mint blue 1x2 jumper plate to the left of the ppp.
13. Place a tan 1x1 ice cream cone on top of the ppp. Then place a light purple 1x1 swirl on top.
14. Place a light blue 1x1x3 brick on the rightmost column on the 2nd row from the front.
15. Place a white 1x1x3 brick with 2 clips on the front right corner so the clips face the right.
16. Horizontally place an aqua 4x8 plate with a round side and 2x2 gap on top so it is centered horizontally and the round side faces the back.
17. Attach the pinhole of a white 4L axle connector with 2 2L liftarms to the right-facing pin that is on the leftmost column so the other pinhole is in the front and on the bottom.
18. Horizontally place a white 2x6 plate on the front 2 rows so it is centered horizontally. Now vertically place a light blue 1x2 plate with a clip on the front left corner so the clip faces the left. Then repeat symmetrically to the right.
19. Horizontally place 2 transparent aqua 1x2 tiles, 1 to the right of the other, on the front row so they are centered horizontally. Horizontally place a white 1x2 tri-slope tile on the front left corner so it slopes to the front. Then repeat symmetrically to the right.
20. Attach a teal key to the left-facing clip so the diamond part is in the front and vertical.

21. Rotate your build 180 degrees so the round side faces the front. Now horizontally place a light blue 1x4 tile with 2 studs on the 3rd row from the front so it is centered horizontally. Then horizontally place an aqua 1x2x2 slope brick to the left so it slopes to the right. Then repeat symmetrically to the right.

22. Horizontally place a white 1x2 plate with 2 side studs sticking up on the front row so it is centered horizontally and the side studs face the front. Now horizontally place a mint blue 1x2 jumper plate behind the ppp.

23. Place a white 1x2 curved brick on the front left corner so the curve faces the front left. Then repeat symmetrically to the right. Now horizontally place a mint blue 1x4 sloped curved tile upright on the front-facing side studs so it is centered horizontally.

24. Place the bottom row of a white 2x2 corner tile with a cutoff corner upright on the top left front-facing side stud so the cutoff corner faces the top left. Then repeat symmetrically to the right.

25. Place a transparent purple 1x1 cone brick on the leftmost column on the 2nd row from the back. Then repeat symmetrically to the right.

26. Place a transparent aqua arrow head on top of each of the 2 ppp so they are horizontal.

27. Vertically attach the front bar of 2 light blue 1x2 rounded bricks with a gap to the bottom 2 left-facing clips.

28. Bring back your previous build and orient it so the round side faces the front. Now attach the right-facing clips of your previous build to the bars of the left-facing 1x2 rounded bricks of the current build. Now you can close it to hide the interior!

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at [info@bricksfortheblind.org](mailto:info@bricksfortheblind.org) and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 3 LEGO Disney Champions Theme kits:

43256 Anna's Sleigh Adventure

43264 Toy Story Celebration Train & RC Car

43274 Minnie's Pet Hotel
