

43281 Elsa's Ice Castle & Snow Ride Adventure

Adapted by John Le and tested by Peter Durieux.

Treat young kids ages 4 years old and up to this LEGO® I Disney Frozen Elsa's Ice Castle & Snow Ride Adventure (43281) building toy. Spark play with 7 LEGO I Disney Frozen characters: Elsa, Anna, Olaf, Bruni and 3 Snowgies, plus a 2-level castle with throne room, balcony, 2 beds and a kitchen. There's a separate track with a staircase, 3 sleigh carts that any of the included characters can ride in.

CASTLE BUILDING TOY – Treat young kids ages 4 and up to this building set with 7 Disney's Frozen characters that's designed for limitless pretend play for girls and boys

CASTLE WITH TRACK AND SLEIGH – This Elsa's Ice Castle & Snow Ride Adventure (43281) toy building set has 7 LEGO® I Disney Frozen characters, a 2-level castle, track with 3 sleigh carts, stairs and more

DISNEY'S FROZEN ACCESSORIES – The building toy includes a snow globe, lantern, 2 ice cream cones, a chest with a crown and scepter, and more for creative storytelling and play

CHARACTERS AND FUNCTIONS – With LEGO® I Disney characters Elsa, Anna, Olaf, Bruni and 3 Snowgies; the chest opens, and the sleigh carts slide on the track and have room for any of the characters

DIMENSIONS – This 216-piece LEGO® I Disney building set includes a 2-level ice castle with a circular sleigh track that measures over 8 in. (21 cm) high, 11 in. (28 cm) wide and 10.5 in. (27 cm) deep

The front of the box shows an ice castle with a train track going around it!

The back of the box shows all the accessories that the set comes with! It comes with Olaf, Elsa, Anna, Bruni, 3 snowmen, a lantern, barrel, crown, tools, train tracks, sleigh carts, and a castle!

The top of the box shows a real size image of Elsa.

The build is 216 pieces in total and is for ages 4+.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.

- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have

a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/43281>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 4 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Anna, Snowmen, Lantern, and Railroad

Group 1 - Pages 6-11.

Group 2 - Pages 12-21.

Group 3 - Pages 22-35.

Group 4 - Pages 36-49.

Group 5 - Pages 50-60.

Bag 2 - Olaf and Sleigh Carts

Group 6 - Pages 4-7.

Group 7 - Pages 8-31.

Bag 3 - Bruni and Ice Castle

Group 8 - Pages 4-7.

Group 9 - Pages 8-31.

Group 10 - Pages 32-51.

Group 11 - Pages 52-53.

Group 12 - Pages 54-71.

Bag 4 - Elsa and Ice Castle

Group 13 - Pages 4-9.

Group 14 - Pages 10-29.

Group 15 - Pages 30-41.

Group 16 - Pages 42-47.

Group 17 - Pages 48-60.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Anna, Snowmen, and Lantern

Sub-build 1. Locate 1 blue dress with black shoes, 1 torso printed with a light blue shirt and a dark grey vest, 1 light tan head printed with light blue eyes, lips, and a nose, 1 light brown hair printed with a light purple headband, 1 tan ice cream cone, and 1 nougat 1x1 swirl. Assemble your minifigure, place the swirl on top of the cone, then attach it to her hand! Now put her away while we make the snowmen!

Sub-build 2. Let's make 3 identical parts! Place a white 1x1 dome brick in front of you. Then place a white 1x1 sphere printed with 2 black eyes and a light blue mouth on top so the print faces the front. Now you should have 3 identical snowmen! Put them away while we make the lantern!

Sub-build 3. Let's make a part! Place a transparent yellow 1x1 round brick in front of you. Then place a gold lantern on top. Now put everything away while we make the railroad!

Group 2 - Railroad

12-13. Place a white 10x10 plate with a round side in front of you so the round side faces the front. Then place a transparent 2x2 brick on the back left corner. Then repeat symmetrically to the right.

14-15. Vertically place 2 white 2x4 tiles, 1 to the right of the other, on the back 4 rows so together they are centered horizontally.

16-17. Horizontally place a white 2x8 rail road track on the back 2 rows so it is centered horizontally. This piece has 2 studs on each end and diagonal and vertical rails in between.

18-19. Horizontally place a magenta 2x4 brick on the 5th and 6th rows from the front so it is centered horizontally.

20-21. Horizontally place a white 1x4 plate on the back row of the ppp.

Group 3 - Railroad

22-23. Horizontally place a magenta 1x4 plate on top of the ppp. Then horizontally place another 1 on the 4th row from the front so it is centered horizontally.

24-25. Place 2 transparent blue 2x2 tiles with a stud, 1 to the right of the other, in front of the ppp so together they are centered horizontally.

26-27. Horizontally place 3 white 1x4 tiles, 1 behind the other, behind the ppp so they are centered horizontally. This is a staircase!

28-29. Vertically place a light blue 1x3x2 inverted half arch brick to the left of the 3 ppp so it slopes to the front. Then repeat symmetrically to the right.

30-31. Place a transparent blue 1x1 cone brick on top of each of the 2 ppp.

32-33. Place a nougat 2x2 round brick on 2 leftmost columns so it sits to the left of the front 2 rows of the inverted half arch brick. Then repeat symmetrically to the right.

34-35. Place a light blue 2x2 round brick with flower petals on top of each of the 2 ppp.

Group 4 - Railroad

36-37. Place a white 2x2 round brick with flower petals on top of each of the 2 ppp.

38-39. Place a white 2x2x2 cone brick on top of each of the 2 ppp.

40-43. Horizontally place a white curved rail road to the left of the 2x8 railroad plate so it overhangs to the left, and curves to the back left. Then place a light blue 2x2 tile on top of the rightmost column of the ppp and 2x8 railroad plate. Then repeat both parts symmetrically to the right.

44-45. Let's make 2 identical parts! Place a transparent 2x2 brick in front of you. Then place a light blue 2x2 plate on top.

46-47. Now you should have 2 identical parts! Rotate your main build 180 degrees so the curved railroads face the front. Then place 1 part on the front left corner, underneath the front row of the curved railroad so 1 row is exposed to the front. Then repeat symmetrically to the right.

48-49. Place a white curved railroad on the front left corner, in front of the curved railroad so it overhangs to the front and curves to the right.

50-51. Place a light blue 2x2 tile on the 2 leftmost columns, on top of the 2x2 studs of the curved railroads.

52-53. Let's make a part! Horizontally place a white 2x10 plate in front of you. Then place a transparent 2x2 brick on the 2 leftmost columns. Then repeat symmetrically to the right. Now horizontally place a white 2x8 railroad plate on top of your part so it is centered horizontally.

54-55. Horizontally place the leftmost column of your part underneath the rightmost column of the curved railroad that is in the front left corner.

56-57. Place the rightmost column of a white curved railroad plate on the rightmost column of your previous part so it overhangs to the right and curves to the back.

58-60. Place a light blue 2x2 tile on the 2 rightmost columns so it sits on the 2 curved railroads. Now place 2 more on the front 2 rows so they sit on the railroads. Now put everything away while we make the next part!

Building Instructions (Bag 2, Book 2):

Group 6 - Olaf

Sub-build 4.1. Place a white olaf body printed with brown arms and black buttons in front of you so the print faces the front and the arms face left and right. Now place a white Olaf head on the top-facing neck bar so the bar hole faces the front. Now attach a yellow unicorn horn to the front-facing bar hole. Then place a brown stem with 3 tips on top of his head.

Sub-build 4.2. Let's make a part! Place a magenta swirl on top of a tan ice cream cone. Now attach it to his left hand so the swirl faces the front.

Sub-build 5. Let's make some ice and a barrel! Place a white 2x2 barrel in front of you. Then place a dark grey pickaxe inside. Now horizontally place a transparent aqua 1x2 brick in front of you. Then place a transparent aqua crystal on the right column. Then place 2 more transparent aqua 1x2 bricks in front of you. These are ice blocks! Now put everything away while we make the next part!

Group 7 - Sleigh Carts

8-9. Horizontally place a teal 4x5 cart base upside down in front of you. Then vertically attach a dark grey bar with 2 wheels to the top-facing gap that is on the 2nd column from the left. Make sure to push it in so it clicks. Then repeat symmetrically to the right.

10-11. Flip your cart over so it is horizontal and the 2 curved bars face the left. Now horizontally place a nougat 2x4 plate on the 4 leftmost columns so it is centered vertically.

12-13. Vertically place a gold 1x4 lattice panel on the leftmost column so the wall faces the left. Then vertically place a white 1x4 plate to the right of the ppp. Now vertically place a white 1x4 tile to the right of the ppp. Then vertically place 2 white 2x2 tiles with a stud, 1 in front of the other, to the right of the ppp.

14-15. Now put your part away while we make 2 identical parts! Horizontally place a teal 4x5 cart base upside down in front of you so the 2 curved bars face the right.

16-17. Vertically attach a dark grey bar with 2 wheels to the top-facing gap that is on the 2nd column from the left. Make sure to push it in so it clicks. Then repeat symmetrically to the right.

18-19. Flip your part over so it is upright, horizontal, and the 2 curved bars face the left. Now horizontally place a nougat 2x4 plate on the 4 leftmost columns so it is centered vertically.

20-21. Vertically place a gold 1x4 lattice panel on the leftmost column so the wall faces the left. Then place a gold 2x2 tile with a stud to the right of the ppp so it is centered vertically.

22-23. Horizontally place a magenta 1x4 tile with 2 studs on the front right corner. Then repeat symmetrically to the back.

24-25. Vertically place a white 1x2 panel with a middle wall on the 2nd column from the right so it is centered vertically and the middle wall faces the left.

26-27. Vertically place a light purple 1x2 plate on the rightmost column so it is centered vertically.

28-29. Vertically place 2 magenta 1x2 sloped curved bricks, 1 in front of the other, on the rightmost column so they slope to the right.

30-31. Now you should have 2 identical parts! Horizontally place 1 in front of you so the 2 curved bars face the left. Then attach the 2 curved bars of your other part to the right-facing single bar. Now bring back the first cart you made and attach the single bar of it to the 2 left-facing curved bars. Now put everything away while we make the next part!

Building Instructions (Bag 3, Book 3):

Group 8 - Bruni

Sub-build 6. Place a light purple lizard in front of you. Then place a transparent light purple flame on top of it. Now put Bruni away while we make a snowglobe.

Sub-build 7. Place a transparent aqua 2x2 round brick in front of you. Then place a light purple 2x2 round tile with a stud on top. Now place a teal 1x1 half dome brick on top. Then place a transparent head printed with a teal castle and snowflakes on top. Now put it away while we make the castle!

Group 9 - Ice Castle

8-9. Horizontally place a light blue 8x16 plate with 1x4 gaps on the sides in front of you.

10-11. Horizontally place a magenta 1x4 plate on the front row on the 3rd to 6th columns from the left so it sits in the 1x4 gap. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the back.

12-13. Vertically place a light purple 2x4 plate on the leftmost column so it is centered vertically and 1 column overhangs to the left. Then repeat symmetrically to the right.

14-15. Horizontally place a light blue 2x4 brick on the back left corner so there is no overhang. Then repeat symmetrically to the right.

16-17. Vertically place a light blue 4x8 plate with a round side underneath the leftmost column so it is centered vertically, 3 columns are exposed to the left, and the round side faces the left. Then repeat symmetrically to the right.

18-21. Horizontally place a light blue 2x8x6 door frame on the back 2 rows so it is centered horizontally and the frame is in the back. Now attach a transparent aqua glass pane printed with snowflakes and a window upright on the front-facing side of the ppp so the print faces the front.

22-23. Vertically place a white 1x6 arch brick in front of the left column of the light blue 2x4 brick which is located at the back right. Then vertically place another 1 to the left of the ppp so there is a 2 column gap in between them.

24-25. Horizontally place a white 2x4 sloped curved tile on the back 2 rows of the 2 ppp so it slopes to the front.

26-27. Horizontally place 2 magenta 2x4 tiles, 1 in front of the other, in front of the ppp.

28-29. Vertically place a white 1x6 arch brick in front of the left column of the light blue 2x4 brick which is located at the back left. Then vertically place another 1 to the right of the ppp so there is a 2 column gap in between them.

30-31. Horizontally place a white 2x4 sloped curved tile on the back 2 rows of the 2 ppp so it slopes to the front.

Group 10 - Ice Castle

32-33. Horizontally place 2 light blue 2x4 tiles, 1 in front of the other, in front of the ppp.

34-35. Horizontally place a white 1x2x5 brick on the 3rd and 4th columns from the left of the back row. There should be 1 free column to the right of the ppp. Then repeat symmetrically to the right.

36-37. Place a transparent aqua 2x2x5 corner panel with a cutoff corner on the back 2 rows, to the left of the ppp so the cutoff corner faces the front left. Then repeat symmetrically to the left.

38-39. Place a transparent aqua 2x2x5 corner panel with a cutoff corner on the back 2 rows to the left of the ppp so the cutoff corner faces the front left. Then repeat symmetrically to the right.

40-41. Place a transparent aqua 2x2x2 slope brick with a cutoff corner on the back 2 rows, on top of the ppp so it slopes to the front right. Then place another 1 to the left of the ppp so it slopes to the front left. Now repeat both parts symmetrically to the left.

42-43. Horizontally place a white 1x2 jumper plate on top of the 2 ppp. Then repeat symmetrically to the right.

44-45. Vertically place a transparent aqua 1x2x5 brick in front of the leftmost column of the 2x8x6 window frame. Then repeat symmetrically to the right.

46-47. Vertically place a transparent aqua 1x2x5 brick in front of each of the 2 ppp.

48-49. Place a transparent aqua 2x2 tile with a stud on the front 2 rows so it is centered horizontally. Then place another 1 behind the ppp.

50-51. Vertically place a light blue 1x4 brick in front of the leftmost column of the 2x8x6 window frame so it sits on the 2 1x2x5 bricks. Then repeat symmetrically to the right.

Group 11 - Ice Castle

52-53. Horizontally place a white 1x8 brick on the back row so it is centered horizontally. Then vertically place a light purple 1x4 brick in front of the leftmost column of the ppp. Then repeat symmetrically to the right.

Group 12 - Ice Castle

54-55. Horizontally place a light purple 1x8 brick in front of the 2 ppp so it is centered horizontally.

56-57. Horizontally place a teal 1x6 tile on the back row so it is centered horizontally. Then vertically place the back row of a teal 1x4 tile with 2 studs to the left of the ppp. Then repeat symmetrically to the right.

58-59. Place the right column of a white 2x2 corner tile in front of the ppp so it looks like the braille letter j. Then repeat symmetrically to the left. Now horizontally place a teal 1x4 tile with 2 studs in between the front row of the 2 ppp.

60-61. Place a transparent purple 1x1 round brick on the 2nd column from the left of the 2nd row from the front. Then place a transparent pink diamond on top of the ppp.

62-63. Place a transparent aqua 2x2 round brick on the 2nd and 3rd columns from the right so it is centered vertically.

64-65. Place a light blue hair brush on top of the ppp so it is centered on it and the bristles face the front.

66-71. Horizontally place a transparent aqua sword on the 1x2 jumper plate that is on the 3rd and 4th columns from the left of the back row. Then repeat symmetrically to the right. Now put your build away while we make the next part!

Building Instructions (Bag 4, Book 4):

Group 13 - Elsa

Sub-build 8. Locate 1 light blue dress printed with snowflakes, 1 light tan torso printed with a light blue shirt printed with snowflakes, 1 light tan head printed with light blue eyes, nose, and pink lips, 1 blonde hair, and 1 transparent aqua curved bar with a swirl. Assemble your minifigure then attach the curved bar to her hand. This is an ice scepter!

Sub-build 9. Let's make a part! Let's make a chest! Horizontally place a purple 2x4 chest bottom in front of you so the lower ridge faces the back. Now place a transparent aqua 1x1 diamond on top of a gold 1x1 telescope bar. Now place it inside the chest. Then place a gold crown inside the chest. Now horizontally place a white 2x4 chest top on top of the chest bottom so it closes to the front. Now put everything away while we make the second floor of the ice castle!

Group 14 - Ice Castle

10-11. Place a teal 8x8 plate with a round side in front of you so the round side faces the front.

12-15. Horizontally place a light blue 1x6x6 rounded door frame on the back row so it is centered horizontally and the round side of the pillars face the front. Now attach a transparent aqua window pane to the front of the ppp.

16-17. Vertically place a light purple 1x4 brick on the back left corner. Then repeat symmetrically to the right.

18-19. Vertically place a transparent aqua 1x2x5 brick on the back left corner. Then repeat symmetrically to the right.

20-21. Place a transparent aqua 2x2 slope brick on the back left corner so it overhangs in the front right corner and slopes to the left. Then repeat symmetrically to the right.

22-23. Horizontally place a light purple 2x6 plate on the back 2 rows so it is centered horizontally.

24-25. Place a transparent aqua 2x2 slope brick on the back 2 rows so it is centered horizontally and slopes to the front.

26-27. Horizontally place a teal 1x2 brick with 2 side studs on top of the ppp so the side studs face the front.

28-29. Place a transparent aqua 2x2x2 corner slope brick on the back 2 rows, to the left of the ppp so it slopes to the front left. Then repeat symmetrically to the right.

Group 15 - Ice Castle

30-31. Horizontally place a white 1x4 plate on the back row so it is centered horizontally.

32-33. Horizontally place a teal 1x2 jumper plate on top of the ppp so it is centered horizontally.

34-35. Place a transparent aqua 1x1 cone brick on top of the ppp.

36-37. Vertically place a white 2x3 pentagonal tile upright on the 2 front-facing side studs so the angled side overhangs 2 rows to the top.

38-39. Let's make a part! Horizontally place a light blue 2x4 brick in front of you. Then vertically place a white 1x2 brick on the leftmost column. Now vertically place a white 1x2 half cylinder brick on top of the ppp. Then place a white 2x2 tile with a stud to the right of the ppp. Now vertically place a white 1x2 panel with a middle wall to the right of the ppp so the middle wall faces the left.

40-41. Vertically place your part on the 4th to 7th rows from the front so it is centered horizontally and the 1x2 half cylinder brick is in the back.

Group 16 - Ice Castle

42-43. Vertically place a light blue 1x2 brick to the left of the previous part so it is centered vertically to it. Then repeat symmetrically to the right.

44-45. Vertically place a white 1x2 half cylinder brick on top of each of the 2 ppp.

46-47. Vertically place 2 white 1x2 jumper plates with a round side, 1 to the right of the other, on the 2nd and 3rd rows from the front so together they are centered horizontally and the round sides face outwards to the left and right.

48-49. Vertically place a light purple 1x2 brick on the 2nd and 3rd rows from the front of the leftmost column. Then repeat symmetrically to the right.

50-51. Place a white 1x5x2 curved fence in front of the ppp so the curve follows the curve of the 8x8 plate with a round side. Then repeat symmetrically to the left.

52-53. Vertically place a light blue 1x3 tile on the leftmost column, on top of the 1x2 brick and ppp. Then repeat symmetrically to the right. Now horizontally place a light blue 1x2 tile with a round side on the front row so it is centered horizontally and the round side faces the front.

54-55. Horizontally place a transparent aqua snowflake on the back row, on top of the 1x1 cone brick so it is centered horizontally.

56-60. Bring back your main ice castle build and horizontally place it in front of you so the window frame is in the front. Then place your current build on top of the front 6 rows so it is centered horizontally and the round side overhangs 2 rows to the back.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind are able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>. Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

Please [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

At the end of the instruction booklets are advertisements for the following 3 LEGO Disney Theme kits:

43303 Mini Jasmine & Rapunzel

43284 Mini Anna & Elsa

43291 Disney Mini Belle & Tiana with Castle
