

40871 Gift Box Celebration

Adapted by John Le and tested by Peter Durieux.

This exciting set lets kids create a colorful LEGO present that's packed with cool details. While building the model, discover lots of fun accessories, including a cake, balloon animal, ice cream, garlands, balloons, fireworks and more. For added fun, there are "happy birthday" stickers that kids can place on a banner that moves up and down – ideal for when everyone sings "happy birthday". The set makes a great birthday gift for boys, girls and LEGO fans and becomes a vibrant piece of birthday decor once it's built. Display it as a table centerpiece, use it as a birthday photo prop and create a family tradition by bringing it out every year. Set contains 224 pieces.

PARTY DECORATION BUILDING SET – This LEGO® Gift Box Celebration (40871) birthday toy for kids offers a rewarding creative challenge and makes a colorful display piece.

LEGO® PRESENT – The model looks just like a birthday present and is topped with lots of fun accessories to delight kids, including a cake, balloon animal, ice cream, garlands, fireworks and more.

CELEBRATION BANNER – Gather around and sing "happy birthday" while moving the birthday banner with stickers up and down.

HAPPY BIRTHDAY DECOR – Once it's complete, display the model as a party decoration or table centerpiece or use it as a photo prop.

DIMENSIONS – The 224-piece set measures over 6 in. (16 cm) high, 6 in. (16 cm) wide and 2.5 in. (7 cm) deep.

The front of the box shows a green gift box with a blue ribbon, a gold star, and a banner that says happy birthday! It also has fireworks and lights in the back!

The back of the box shows you can crank a handle on the side to make the happy birthday banner go up and down!

The top of the box shows a real size image of a gold star!

The build is 224 pieces in total and is for ages 7+.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.

- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have

a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/40871>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1 to 3, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Gift Box

Group 1 - Steps 1-7.

Group 2 - Steps 8-9.

Group 3 - Steps 10-13.

Group 4 - Step 14, 1 tan 2x3 plate, 1 red 1x2 brick with a pinhole, and 1 lime green 1x2 plate from Step 15.

Group 5 - Rest of Step 15 and Steps 16-17.

Group 6 - Steps 18-26.

Group 7 - Steps 27-30.

Bag 2 - Gift Box

Group 8 - Steps 31-37.

Group 9 - Steps 38-39 and 2 green 1x1 tiles with a round side from Step 40.

Group 10 - 2 pink 1x1 tiles with a round side from Step 40.

Group 11 - 2 orange 1x1 tiles with a round side from Step 40.

Group 12 - 2 blue 1x1 tiles with a round side from Step 40.

Group 13 - 1 yellow 1x1 tile with a round side from Step 40 and Steps 41-49.

Group 14 - Steps 50-52 and 3 transparent pink 1x1 cone bricks from Step 53.

Group 15 - Rest of Step 53.

Bag 3 - Gift Box

Group 16 - Steps 54-62.

Group 17 - Steps 63-73.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Gift Box

1. Place a lime green 8x8 plate in front of you. Then horizontally place a lime green 1x2 brick on the back row so it is centered horizontally.
2. Place a lime green 1x1 slope tile to the left of the ppp so it slopes to the front. Then repeat symmetrically to the right.
3. Place a lime green 2x2 corner brick on the back left corner so it looks like the braille letter f. Then repeat symmetrically to the right.
4. Vertically place a lime green 1x4 brick on the leftmost column so it is centered vertically. Then repeat symmetrically to the right.
5. Place a lime green 2x2 corner brick on the front left corner so it looks like the braille letter h. Then repeat symmetrically to the right. Now horizontally place a lime green 1x4 brick on the front row so it is centered horizontally.
6. Horizontally place a lime green 1x2 brick on the back left corner. Then repeat symmetrically to the right. Now horizontally place another 1 in between the 2 ppp so it is centered horizontally. Then vertically place a lime green 1x6 brick on the rightmost column so it is centered vertically.
7. Horizontally place a light blue 1x2 plate on the back left corner. Then horizontally place another 1 to the right of the ppp so there is a 1 column gap in between them. Then place a light blue 2x2 corner plate on the back right corner so there is no overhang and it looks like the braille letter d.

Group 2 - Gift Box

8. Horizontally place a light blue 1x2 brick on the back left corner. Then repeat symmetrically to the right. Now horizontally place another 1 in between the 2 ppp so it is centered horizontally.
9. Let's make a part! Let's make the crank! Horizontally place a tan 2x3 plate in front of you. Then vertically place a light blue 1x2 plate on the rightmost column.

Group 3 - Gift Box

10. Vertically place a lime green 1x2 plate on the rightmost column. Then vertically place a light blue 1x2 brick on top of the ppp.

11. Vertically place a red 1x2 brick with a pinhole on top of the ppp. Then attach a white 3L pin axle into the left-facing pinhole of the ppp so the 2L axle faces the left.

12. Vertically attach the top axle hole of 2 dark grey rounded lift arms with 4 axle holes to the left-facing axle so the flatter sides face down. Make sure the axle goes all the way through.

13. Attach a black 2L ridged axle connector to the left-facing axle. Then attach a yellow 5L axle to the left-facing axle hole of the ppp.

Group 4 - Gift Box

14. Vertically attach the bottom axle hole of 2 white rounded lift arms with 4 axle holes to the left-facing axle so the flatter sides face up. Make sure the axle goes all the way through.

15.1. Let's make another part! Horizontally place a tan 2x3 plate in front of you. Then vertically place a lime green 1x2 plate on the leftmost column.

You will have an extra red 1x2 brick with a pinhole. Save it for later!

Group 5 - Gift Box

15.2. Vertically place a light blue 1x2 plate on top of the ppp. Then place a lime green 2x2 brick on top of the ppp so it overhangs 1 column to the left. Now vertically place a light blue 1x2 brick with a pinhole on the leftmost column. Then vertically place a red 1x2 brick with a pinhole from group 4 to the right of the ppp.

15.3. Horizontally attach the right-facing pinhole of your part to the left-facing axle of your previous part so the axle goes all the way through and sticks out the left-facing side.

16. Place a red 2x2 tile on the 3rd and 4th columns from the right so it sits underneath the ridged axle connector.

17. Vertically attach the bottom axle hole of a red 3L thin liftarm with a pin and 2 axle holes to the left-facing axle so the pin is on top and faces the left. Now attach a red 2L pin connector to the left-facing pin of the ppp. This is the crank!

Group 6 - Gift Box

18. Vertically place a light blue 1x2 plate on the leftmost column of studs. Then vertically place a black 1x2 grill tile to the right of the ppp. Now vertically place a black 1x2 grill tile on the rightmost column.

19. Bring back your main build and place it in front of you. Then horizontally place your part on the 7 leftmost columns of the 2nd and 3rd rows from the back so the crank faces the left.

20. Stack 4 blue 2x2 round bricks on the 4th and 5th rows from the front so they are centered horizontally.

21. Horizontally place 2 lime green 1x4 bricks, 1 to the right of the other, on the front row so there is no overhang. Then vertically place another 1 on the leftmost column, behind the 2 ppp.

22. Horizontally place a light blue 1x2 plate on the front left corner. Then vertically place a light blue 1x4 plate on the leftmost column, behind the ppp. Now place a light blue 2x2 corner plate on the front right corner so it looks like the braille letter j. Then vertically place a light blue 1x4 plate on the rightmost column, behind the ppp.

23. Horizontally place a light blue 1x2 brick on the front right corner. Then repeat symmetrically to the left. Then vertically place a light blue 1x4 brick on the leftmost column, behind the ppp. Now vertically place a light blue 1x6 brick on the rightmost column so it is centered vertically.

24. Horizontally place 2 white 1x2x2 bricks with 2x2 side studs, 1 to the right of the other, on the front row so together they are centered horizontally and the side studs face the front.

25. Place a light blue 2x2 corner plate on the back left corner so it looks like the braille letter f. Then repeat symmetrically to the right. Now horizontally place a light blue 1x2 plate on the back row so it is centered horizontally.

26. Place a light blue 2x2 corner plate on the front left corner so it looks like the braille letter h. Then vertically place a light blue 1x4 plate on the leftmost column, behind the ppp. Now repeat both parts symmetrically to the right.

Group 7 - Gift Box

27. Vertically place a lime green 1x8 plate on the leftmost column so it is centered vertically. Then place a lime green 1x1 round plate on the back row to the right of the ppp. Now repeat both parts symmetrically to the right. Then horizontally place 2 lime green 1x3 plates, 1 to the right of the other, on the front row so together they are centered horizontally. Now horizontally place a lime green 1x2 plate on the back row so it is centered horizontally.

28. Horizontally place a light blue 1x2 brick on the 4th row from the front so it is centered horizontally and sits on the front row of a 2x2 round brick. Then vertically place 2 green 1x4 arch bricks, 1 to the right of the other, behind the ppp.

29. Place a lime green 2x2 corner brick on the back left corner so it looks like the braille letter f. Then vertically place a lime green 1x6 brick on the leftmost column, in front of the ppp. Now repeat both parts symmetrically to the right. Then horizontally place a lime green 1x6 brick on the front row so it is centered horizontally.

30. Place 2 lime green 4x4 plates, 1 to the right of the other, on the front 4 rows so together they are centered horizontally.

Building Instructions (Bag 2, Book 1):

31. Horizontally place 2 lime green 1x4 bricks, 1 to the right of the other, on the back row so together they are centered horizontally.

32.1 Let's make a part! Let's make the ribbon for the box! Horizontally place a light blue 2x8 plate in front of you. Then horizontally place a light blue 1x2 angled sloped curved tile on the front left corner so it slopes and overhangs to the left, and the cutoff corner faces the top left. Then repeat symmetrically to the back. Now repeat both parts symmetrically to the right.

32.2. Vertically place a light blue 1x2 plate on the leftmost column of studs. Then repeat symmetrically to the right. Now place a light blue 2x2 round tile in between the 2 ppp so it is centered horizontally.

32.3. Place a light blue 2x2 sloped curved tile to the left of the ppp so it slopes to the right. Then repeat symmetrically to the right.

32.4. Horizontally place your part upright on the front-facing side studs of the main build so it is centered horizontally.

33. Let's make a part! Let's make the poles that will hold the lights. Horizontally place a lime green 1x8 plate in front of you.

34. Horizontally place a white 1x2 plate with a hinge and a stud on the rightmost column so the hinge is on the right. Then repeat symmetrically to the left.

35. Horizontally place a lime green 1x3 sloped curved brick on the 3 leftmost columns of studs so it slopes to the right. Then repeat symmetrically to the right.

36.1. Let's make 2 identical parts! Horizontally place a transparent 8L pole with a 1x2 plate and 1x1 round plate in front of you so the 1x2 plate is on the left. Then place a transparent 1x1 round tile with an upright bar on the leftmost column. Now attach a white axle connector with a hinge connector to the right-facing bar so the hinge arms face up and down.

36.2. Now you should have 2 identical parts! Attach the hinge connector of 1 part to the leftmost top-facing hinge of your previous part so it faces the top left and the studs face the front. Then repeat symmetrically to the right.

37. Horizontally place your part on the back row of your main build so it is centered horizontally and the studs of the poles face the front.

Group 9 - Gift Box

38. Let's make the string lights! Horizontally place a white string with 11 bars in front of you.

39. Attach the clips of 9 transparent 1x1 plates with a clip to the middle 9 bars of the ppp so they are in the front and the studs face up.

40.1. Place a green 1x1 tile with a round side on the leftmost 1x1 plate with a clip so the round side faces the front. Then place another 1 on the 4th stud from the right so the round side faces the front.

Group 10 - Gift Box

40.2. Place a pink 1x1 tile with a round side to the right of each of the 2 ppp so the round sides face the front.

Group 11 - Gift Box

40.3. Place an orange 1x1 tile with a round side to the right of each of the 2 ppp so the round sides face the front.

Group 12 - Gift Box

40.4. Place a blue 1x1 tile with a round side to the right of each of the 2 ppp so the round sides face the front.

Group 13 - Gift Box

40.5. Place a yellow 1x1 tile with a round side in between all the ppp so it is centered horizontally and the round side faces the front.

41. Attach the leftmost bar hole of your part to the front-facing bar that is in the top left corner, on the pole, so the 1x1 tiles with a round side hang down and face the front. Then attach the other end of the string lights to the top right front-facing bar.

42. Let's make another part! Horizontally place a light green 2x8 plate with pinholes in front of you. Then vertically place a lime green 1x2 sloped curved brick on the 4th column from the right so it slopes to the right. Then repeat symmetrically to the left.

43. Place a lime green 2x2 round tile with a pinhole on the 2nd and 3rd columns from the right. Then repeat symmetrically to the left.

44. Horizontally lay your part on its side so the tiles face the front and the anti-studs face the back. Now insert a dark brown 5L bar with a stop into the leftmost back-facing pinhole so the axle goes through the 2x2 round tile with a pinhole and faces the front. Then repeat symmetrically to the right.

45.1. Let's make 2 identical parts! Place a short tan 2x2 ridged brick in front of you. Then place a lime green 2x2 round tile with a pinhole on top. Now you should have 2 identical parts!

45.2. Attach 1 part to the leftmost front-facing axle so the tile side faces the front and only the tip of the axle sticks out the front. Then repeat symmetrically to the right.

46. Attach a pink 2L ridged axle connector to the left front-facing axle. Then repeat symmetrically to the right.

47. Horizontally place your part on the 2nd and 3rd rows from the back of the main build so it is centered horizontally.

48.1. Let's make 2 identical parts! Place a white 2x2 plate with a pinhole in front of you so the pinhole faces the front. Then insert a blue 2L pin axle into the front-facing pinhole so the axle faces the front. Now attach a pink 2L ridged axle connector to the front-facing axle. Then attach a red 2L axle to the front-facing axle hole.

48.2. Insert the front-facing axle of your part into the left 2x2 round tile with a pinhole from your previous part so it is upright and the studs face the front. Then repeat symmetrically to the right.

49.1. Horizontally place a light orange 2x4 rounded tile with a sticker upright on the 2 leftmost columns of front-facing side studs from the previous step so it is centered horizontally on them.

49.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 1 on the light orange 2x4 rounded tile. This sticker says Happy on it and has red and green confetti in the background. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Group 14 - Gift Box

50.1. Horizontally place a light orange 2x4 rounded tile with a sticker upright on the 2 rightmost columns of front-facing side studs, to the right of the ppp so it is centered horizontally on them.

50.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 2 on the light orange 2x4 rounded tile. This sticker says Birthday on it and has red and green confetti in the background. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

50.3. Now you can crank the handle on the left-facing side to make the happy birthday sign go up and down.

51.1. Let's make a part! Horizontally place a lime green 1x8 plate in front of you. Then horizontally place a white 1x2 plate with a stud and hinge on the 2 leftmost columns so the hinge is on the left. Then repeat symmetrically to the right.

51.2. Horizontally place a lime green 1x3 sloped curved brick on the 3 leftmost columns of studs so it slopes to the right. Then repeat symmetrically to the right.

51.3. Attach a white axle connector with a hinge connector to the left top-facing hinge so the axle hole faces the top left. Then repeat symmetrically to the right.

51.4. Horizontally place your part on the 5th row from the front so it is centered horizontally.

52.1. Let's make a part! Place a gold 2x2 dome brick upside down in front of you. Then place a yellow 3L axle on top so it is centered. Now place a gold 2x2x2 cone brick on top of the axle so it is centered and goes all the way down. Then place a gold 1x1 round plate on top of the ppp. Now insert a white 5L bar with a stop into the ppp so the stop is on the bottom.

52.2. Attach the bar of your part into the leftmost axle connector with a hinge connector of the previous part. This is a balloon!

You will have 3 extra transparent pink 1x1 cone bricks. Save them for later!

Group 15 - Gift Box

53.1. Let's make a part! Let's make fireworks! Place a transparent curved bar with a stud and axle in front of you so the stud is on the right and the axle faces the front left. Now place a transparent aqua snowflake on top of the stud so it is centered on it and the 6 bars face outwards.

53.2. Attach 3 transparent pink 1x1 cone bricks from group 14 to the bars of the snowflake so the anti-studs face outwards and there is a free bar in between each of them.

53.3. Attach 3 transparent yellow 1x1 cone bricks to the 3 bars so they sit in between the 3 ppp and the anti-studs face outwards. Now place a transparent orange 2x2 dish on top of the top-facing stud of the snowflake.

53.4. This is a firework! Attach the axle of your part to the top-facing axle hole that is on the 5th row from the front of the rightmost column so the firework curves to the right and the dish faces the front.

Building Instructions (Bag 3, Book 1):

Group 16 - Gift Box

54.1. Let's make 2 identical parts! Horizontally place a lime green 2x3 plate in front of you. Then horizontally place a yellow 1x2 plate with a stud and a clip on the back right corner so the clip is on the right. Then repeat symmetrically to the front. Now place a yellow 2x2 sloped curved tile on the 2 leftmost columns so it slopes to the left.

54.2. Attach a light orange 2x2 plate with a bar underneath to the 2 top-facing clips so it overhangs 1 column to the left.

54.3. Now you should have 2 identical parts! Horizontally place 1 part on the 2nd and 3rd rows from the front of the 3 leftmost columns so it slopes to the left. Then repeat symmetrically to the right.

55. Let's make a part! Let's make a cake! Place a brown 4x4 round brick with recessed 2x2 studs in front of you. Then place a short tan 2x2 ridged brick on top.

56. Place a white 4x4 round plate with drips on the edges on top so it is centered.

57. Place a pink 1x1 round flower plate on the left column of the front row. Then place another 1 on the right column of the back row. Now place 1 on the back row of the leftmost column. Then place 1 more on the front row of the rightmost column.

58. Place a magenta 1x1 swirl on the right column of the front row. Then place 1 on the left column of the back row. Now place 1 on the front row of the leftmost column. Then place 1 more on the back row of the rightmost column.

59. Place a pink 2x2 round brick on top so it is centered. Then place a white 2x2 round plate with drips on the edges on top of the ppp.

60. Place a brown 2x2 round tile with a stud on top of the ppp.

61. Place a brown claw on top of the ppp so the claw hands face left and right. Now horizontally attach a transparent blue balloon dog to the claw so the head faces the left.

62. Place your part on the 2nd and 3rd rows from the front of the 2nd and 3rd columns from the left so it is centered on the bent side studs and slopes to the left.

Group 17 - Gift Box

63. Let's make a part! Let's make a present! Place an orange 3x3 plate in front of you. Then place a dark grey 1x1 round brick on top so it is centered.

64. Place a yellow 1x1 brick with a side stud on the leftmost column so it is centered vertically and the side stud faces the left. Then repeat symmetrically to the right.

65. Place a yellow 1x1 brick with a side stud on the front row so it is centered horizontally and the side stud faces the front. Then repeat symmetrically to the back.

66. Place an orange 1x1 brick on the front left corner. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the back.

67. Place an orange 3x3 plate on top so it is centered.

68. Vertically place a red 1x2 tile upright on the left-facing side stud so it is centered vertically on it. Then repeat symmetrically to the right. Now vertically place a red 1x2 tile upright on the front-facing side stud so it is centered vertically. Then repeat symmetrically to the back.

69. Horizontally place a red 1x3 plate on top so it is centered vertically. Now place a red 1x1 tile on the front row so it is centered horizontally. Then repeat symmetrically to the back.

70. Place a red 1x1 round tile on top so it is centered. Then place a red 1x1 slope tile to the left of the ppp so it slopes to the right. Then repeat symmetrically to the right.

71. Place your part on the 2nd and 3rd rows from the front of the 2nd and 3rd columns from the right so it is centered on the bent studs and slopes to the right.

72. Horizontally place a transparent 1x2x2 brick with 2x2 side studs on the front row so it is centered horizontally and the side studs face the front. Now place a yellow 2x2 star on the front-facing side studs of the ppp.

73. Place a gold 1x1 star on the front-facing side stud of the ppp. Now place another 1 upright on the front-facing side stud of the dish that is attached to the firework which is overhanging to the right.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>. Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

Please [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

At the end of the instruction booklets, there are no ads.
