

11044 Creative Build-and-Play Box

Set adapted by Alex Charbonneau and tested by Natalie Charbonneau.

The LEGO® Classic Creative Build-and-Play Box (11044) kids' building set has 750 colorful bricks, plus lots of special elements, so boys and girls aged 5 and up can enjoy fast building fun and endless creative construction of their own.

With 750 brightly colored bricks, 3 16x16 building plates, eye pieces, wheels, windows and other special elements, this play-packed set puts building fun right into kids' hands. A simple guide kick-starts the creativity by showing kids how they can build lots of cool models, including a house, a dog with a bone, a fire truck with moving ladder, a piano keyboard, telephone, typewriter, grape, clouds with a rainbow, and a roller skate.

750-piece building set:

- Creative Build-and-Play Box gives kids a huge selection of colorful bricks and pieces and lots of ideas for quick-to-build models suitable for boys and girls aged 5 and up.

Fun accessories for creative building:

- Includes 3 16x16 building plates, eye pieces, wheels, windows and other special elements to inspire endless creative fun.

Instant creativity, endless play:

- Buildable toys include a dog with a bone, a fire truck with moving ladder, a piano keyboard, house, telephone, typewriter, clouds with a rainbow and a roller skate.

Many ways to play:

- Kids can bring imaginative ideas of their own to life and combine and customize models for even more play possibilities.

Gift for ages 5 and up:

- This endlessly versatile toy is a colorful and creative treat designed to inspire kids' imaginations for years to come.

3D building instructions:

- Kids can download the LEGO® Builder app for an immersive building experience, with digital tools to zoom in and rotate models in 3D, save sets and track progress.

Bricks that build skills:

- LEGO® Classic toys are filled with ideas and inspiration and allow parents to share building fun and developmental milestones with their kids.

750-piece set:

- The fire truck toy measures over 4.5 in. (11 cm) long, the buildable house measures over 3 in. (8 cm) high and the clouds model measures over 3.5 in. (9 cm) wide.

The box is bright yellow with the LEGO logo in the top left corner. This logo is a red square with white balloon letters spelling the word LEGO. The front of the box shows a giant pile of legos on the bottom half in a gradient from left to right showing black, blue, white, blue, green, yellow, red, purple and brown. Above these bricks are a number of cars that can be built from the set. They are, from left to right, a red fire truck, a blue house with purple roof, a yellow roller skate, and a white cloud with a rainbow and googly eyes!

The top of the box shows a life-sized image of a red 2x4 brick. It also shows some more builds you can create with this set, including a red typewriter, a blue keyboard, a purple monster, and a green telephone.

The left side of the box shows some of the builds combined with the included baseplates! There is a cat sitting on a blue piano, a toucan sitting next to a tree, and a sailboat sailing past a building.

The back of the box shows more vehicles! These include: a brown cat on a cat tree, a yellow banana with a face, a cloud, a piano with multi-colored keys, a blue sailboat, a toucan with a colorful beak next to a green, a green steam locomotive and a purple and white whale! There are also images of the three included baseplates, which are green, blue and white.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of the piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each kit, PDF versions are always online at LEGO.com: (<https://www.lego.com/en-us/service/building-instructions/11044>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

This LEGO set comes with seven bags labeled 1-7, a sticker sheet, and two instruction booklets. Sort the pieces into groups as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split across two groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

This build is 750 pieces, and 142 building steps.

Booklet 1

Bag 1 (5 groups of bricks)

Build 1: House

Group 1 contains the pieces for steps 1-6 of the house

Group 2 contains the pieces for steps 7-10.

Group 3 contains the pieces for steps 11-13.

Build 2: Corgi and Bone

Group 4 contains the pieces for steps 1-5 of the corgi.

Group 5 contains the pieces for steps 6-19.

Bag 2 (7 groups of bricks)

Build 3: Musical Keyboard

Group 6 contains the pieces for steps 1-5 of the musical keyboard.

Group 7 contains the pieces for step 6.

Build 4: Telephone

Group 8 contains the pieces for steps 1-12 of the telephone.

Build 5: Firetruck

Group 9 contains the pieces for steps 1-8 of the firetruck.

Group 10 contains the pieces for steps 9-19, not including the transparent light blue 1x1 tiles from step 11.

Group 11 contains the transparent light blue 1x1 tiles from step 11.

Group 12 contains the pieces for steps 20-23.

Booklet 2

Bag 3 (4 groups of bricks)

Build 6: Typewriter

Group 13 contains the pieces for steps 1-10 of the typewriter, not including the lime green 1x4 plate from step 7.

Group 14 contains the lime green 1x4 plate from step 7.

Group 15 contains the pieces for steps 11-17.

Build 7: Purple Monster

Group 16 contains the pieces for steps 1-10 of the purple monster.

Bag 4 (7 groups of bricks)

Build 8: Clouds & Rainbow

Group 17 contains the pieces for steps 1-10 of the clouds and rainbow.

Group 18 contains the red pieces for steps 11-12.

Group 19 contains the yellow pieces for steps 11-12.

Group 20 contains the light blue pieces for steps 11-12.

Group 21 contains the pieces for steps 13-18.

Build 9: Roller Skate

Group 22 contains the pieces for steps 1-12 of the roller skate.

Group 23 contains the pieces for steps 13-24.

Building Instructions:

Booklet 1.

Bag 1.

Build 1: House

Group 1.

1. Let's start building a house! Place a white 4x8 plate, horizontally, in front of you.
2. Place a light blue 2x4 brick, horizontally, on the back two rows of the previous piece so the right sides are even. Place another to the left of the first.
3. Place a light blue 2x2 brick, centered horizontally, on the back two rows of the house. It will go on the previous two pieces. Stack another on top of the first.
- 4.1. Assemble a window by attaching a white 1x2x2 lattice panel into a white 1x2x2 window frame. Find the lip in the frame and rotate the frame so that the window is horizontal with the lip at the front. Push the lattice panel into the frame from the front until it clicks.
- 4.2. Repeat the previous step.
- 4.3. Place one window, horizontally with the lattice at the front, to the left of the stack of 2x2 bricks so there is one free row behind it. Repeat symmetrically on the right side with the other window.
5. Place the front stud of a light blue 1x2 brick, vertically, to the left of the left window. Place another on top of the first. Repeat these two pieces symmetrically on the right side. You'll place a total of four pieces in this step.
6. Place a white 2x8 plate, horizontally, on the back two rows of the house. This will go on the wall we just created.

Group 2.

- 7.1. Now we'll start adding the roof! Place a purple 2x4 brick, horizontally and centered horizontally, on the previous piece.
- 7.2. Place a purple 2x2 slope brick, with the slope on the left, to the left of the previous piece. Repeat symmetrically on the right side.
- 8.1. Place a purple 2x2 brick, centered horizontally, on the roof.
- 8.2. Place a purple 2x2 slope brick, with the slope on the left, to the left of the previous piece. Repeat symmetrically on the right side.

9. Place a purple 2x2 slope brick, with the slope on the left, on the left two columns on top of the roof. The left column will go on the left piece from the previous step. Place another symmetrically to the right of the first.

10. Let's add a chimney! Place a red 1x1 round brick on the front stud of the right piece from the previous step. Place another on top of the first.

Group 3.

11.1. Finally, let's add a fence! Place a white 1x1 round brick on the front right corner of the house. This piece goes on the 4x8 plate.

11.2. Place a lime green 1x1 half cylinder, with the flat sides at the front and back, to the left of the previous piece.

11.3. Place a white 1x1 round brick to the left of the previous piece.

11.4. Place a lime green 1x1 half cylinder, with the flat sides at the front and back, to the left of the previous piece.

12.1. Now we'll add a fence to the left half of the house! Place a white 1x1 round brick on the front left corner of the house. This piece goes on the 4x8 plate.

12.2. Place a lime green 1x1 half cylinder, with the flat sides at the front and back, to the right of the previous piece.

12.3. Place a white 1x1 round brick to the right of the previous piece.

12.4. Place a lime green 1x1 half cylinder, with the flat sides at the front and back, to the right of the previous piece. There should be another half cylinder to the right of this piece.

13. Place a white 1x8 plate, horizontally, on the four 1x1 round bricks that are on the front row of the house. Now the house is complete!

Build 2: Corgi and Bone

Group 4.

1. Let's build a cute corgi dog! We'll start with the body. Place a light brown 2x6 plate, horizontally, in front of you.

2.1. Place a light brown 1x2 brick with a stud on one long side, vertically with the side stud on the left, on the leftmost column of the previous piece.

2.2. Now we'll add the corgi's short tail! Place a white 1x1 swirly cone on the side stud on the left side of the previous piece.

3.1. Place a light brown 2x4 brick, horizontally, on the 2x6 plate and to the right of the 1x2 brick with a side stud.

3.2. Place a white 1x2 brick with two studs on one long side, vertically with the side studs on the right, to the right of the previous piece.

4. Flip the corgi over so it's upside down and horizontal with the tail on the right. Place a white 1x2 plate with three small triangles on one side, vertically with the anti-studs on the right and the triangles on top, on the side studs on the left side of the corgi. This is the shaggy fur around the corgi's neck!

5. Now we'll add some short little corgi legs! Place a light brown 1x1 round plate, upside down, on each of the four corners of the 2x6 plate (which is now on top). The body is complete now.

Group 5.

6. Next, we'll make the corgi's head. Set the body aside. Place a white 2x4 double inverted curved slope, horizontally, in front of you.

7.1. Place a light brown 1x2 plate, vertically, on the rightmost column of the previous piece. Place another symmetrically on the left side.

7.2. Place a light brown 1x2 plate, horizontally, on the back row between the previous two pieces.

8. Place a white 1x2 plate with a row of four studs hanging down from one side, horizontally with the side studs at the front, centered horizontally in front of the previous piece.

9. Place a light brown 1x4 brick, horizontally, on the back row of the head.

10. Place a light brown 1x2 brick with a stud on one long side, horizontally with the side stud at the front, in front of the left two studs of the previous piece. Place another to the right of the first.

11. Place a white 1x2 jumper plate, horizontally and centered horizontally, on the row of four side studs on the front side of the head. We'll add the nose here!

12. But first let's add some cheeks! Place a white 1x1 tile with a rounded end, with the rounded end on the left, to the left of the previous piece. Repeat symmetrically on the right side.

13.1. Now it's time for the nose! Place a black 1x1 round plate on the 1x2 jumper plate from step 11.

13.2. Place a white 1x1 round tile with an eye pattern each of the 1x2 bricks with a side stud that are on the front side of the face, above the cheeks.

14. To finish the head, we need to add some ears! Place a white 1x1 corner curved slope, with the flat sides at the front and left, on the back left corner of the head. Repeat symmetrically on the right side.

15. Now we'll add the head to the body! Place the body, horizontally with the tail on the left and the feet at the bottom, in front of you. Rotate the head so it's vertical with the nose on the right. Place the head, centered vertically, on the right two columns on the body.

16.1. Finally, we'll make the bone! Set the corgi aside for now. Place a white 1x1 brick with studs on two opposite sides, with the side studs on the left and right, in front of you.

16.2. Place a white 1x1 half cylinder, with the flat sides on the top and bottom, on the left side stud of the previous piece. Repeat symmetrically on the right side.

17. Place a white 1x1 round brick on the bone.

18.1. Place a white 1x1 brick with studs on two opposite sides, with the side studs on the left and right, on the previous piece.

18.2. Place a white 1x1 half cylinder, with the flat sides on the top and bottom, on the left side studs of the previous piece. Repeat symmetrically on the right side.

19. Now you can give the bone to the corgi!

Bag 2.

Build 3: Musical Keyboard

Group 6.

- 1.1. Next up is a musical keyboard! Place a light blue 4x10 plate, horizontally, in front of you.
- 1.2. Place a light blue 1x4 brick, vertically, on the rightmost column of the previous piece.
2. Place a light blue 2x4 brick, horizontally, to the left of the previous piece so the back sides are even. Place another to the left of the first.
3. Now we'll add the white keys. Place a white 2x2 tile with two studs, with the studs on the left, on the front two rows of the 4x10 plate and to the left of a 1x4 brick. Place three more to the left of the first. There should be one free column to the left of the leftmost one.
4. Place a black 1x2 tile, vertically, on the pair of studs on each of the four pieces from the previous step.
5. Place a light blue 1x4 brick, vertically, on the leftmost column of the keyboard.

Group 7.

- 6.1. Now we'll add the control buttons for the keyboard. Place a purple 1x2 tile, horizontally, on the back row of the keyboard so the right sides are even.
- 6.2. Place a yellow 1x1 round tile to the left of the previous piece. Place another to the left of the first. This completes the musical keyboard!

Build 4: Rotary Telephone

Group 8.

- 1.1. Now we'll build a telephone! This is an old style one with a rotary dial. Place a lime green 4x4 plate in front of you.
- 1.2. Place a lime green 2x4 brick, horizontally, on the back two rows of the previous piece.
2. Place a lime green 2x2 slope brick, with the slope at the front, in front of the previous piece so the left sides are even. Place another to the right of the first.
3. Place a lime green 1x4 brick, horizontally, on the back row of the phone.
4. Place a lime green 2x2 slope brick, with the slope at the front, in front of the previous piece so the left sides are even. Place another to the right of the first.
- 5.1. Place a white 1x2 plate, vertically, on the leftmost column of the phone. Repeat symmetrically on the right side.
- 5.2. Place a white 1x2 plate, horizontally, on the back row between the previous two pieces.
6. Place a white 1x2 plate with a bar on one long side, horizontally with the bar at the front, in front of the previous piece.
7. Place a lime green 2x2 tile with a single stud on the left two columns of the phone. Place another to the right of the first.

8.1. Now we'll make the rotary dial! Place a light blue 1x2 plate with a vertical clip on one side, vertically with the clip at the back, in front of you.

8.2. Place the right column of a white 2x2 round plate on the previous piece. The left column will overhang.

8.3. Place a light blue 1x2 plate with a vertical clip on one side, vertically with the clip at the back, under the left overhanging column of the previous piece.

8.4. Clip the two clips on the back side of the dial onto the bar on the front side of the phone. Rotate the dial down so it rests on the slope bricks.

9.1. Now we'll build the handset for the phone! Set the rest of the phone aside for now. Place a lime green 2x6 plate, horizontally, in front of you.

9.2. Place a lime green 1x2 curved slope, vertically with the flat side on the left, on the rightmost column of the handset.

10.1. Place a lime green 2x4 brick, horizontally, to the left of the previous piece.

10.2. Place a lime green 1x2 curved slope, vertically with the flat side on the right, to the left of the previous piece.

11. Place a lime green 1x2 brick, vertically, under the leftmost column of the headset. Repeat symmetrically on the right side.

12. Place the rest of the phone, with the dial at the front, in front of you. Place the handset on the back two rows of the rest of the body. The 1x2 bricks will hang down on either side of the phone and the handset will attach to the two 2x2 tiles with single studs. Now the telephone is complete!

Build 5: Firetruck

Group 9.

1.1. Next, we'll build a firetruck! Place a white 4x8 plate, horizontally, in front of you.

1.2. Place a red 1x4 tile, horizontally, on the back row of the previous piece so the left sides are even.

2.1. Place a red 1x2 tile, vertically, on the leftmost column of the firetruck and in front of the previous piece.

2.2. Place a black 2x2 tile with a pin sticking up to the right of the previous piece.

2.3. Place a red 1x2 tile, vertically, to the right of the previous piece.

3. Place a red 1x4 tile, horizontally, on the front row of the truck so the left sides are even.

4. Place a red 1x4 brick, vertically, to the right of the previous piece so the front sides are even. There will be three free columns to the right of this piece.

5. Place a red 1x2 brick, horizontally, on the front row to the right of the previous piece. Repeat symmetrically on the back side.

6.1. Place a red 1x1 brick with a stud on one side, with the side stud on the right, to the right of each of the previous two pieces.

6.2. Place a transparent clear 1x1 round plate on the side stud of each of the previous two pieces. These are the truck's headlights!

7. Place a white 1x2 brick with vertical grooves on one side and horizontal grooves on the other, vertically with the horizontal grooves on the right, centered vertically on the rightmost column of the truck. This piece will go between two 1x1 bricks with studs on one side.

8. Place a red 1x4 brick, vertically, on the leftmost column of studs. This piece will go on another 1x4 brick.

Group 10.

9. Place a clear 1x2 brick, vertically, on the front two studs on the rightmost column of the truck. Place another behind the first. This is the truck's windshield!

10. Place the rightmost column of a red 2x4 plate, horizontally, on each of the previous two pieces. The leftmost columns of these pieces will attach to a 1x4 brick. They form the roof of the truck.

Group 11 contains the transparent light blue 1x1 tiles from the next step.

11.1. Place a transparent light blue 1x1 tile from group 11 on the second stud from the right on the front row of the roof of the truck. Repeat symmetrically on the back side.

11.2. Place a transparent red 1x1 tile behind the front piece from the previous step. Place another behind the first.

12.1.1. Now we'll make the rotating tank that the hose is mounted onto. Set the truck aside for now. Place a red 4x4 round brick in front of you.

12.1.2. Place a white 4x4 round plate on the previous piece.

12.2. Place a red 4x4 round brick on the previous piece.

12.3. Place a white 1x2 plate with a clip on one stud, horizontally with the clip on the right, on the right two studs on the second row from the front on the previous piece. Place another behind the first.

12.4. Place the right column of a white 2x2 curved slope tile, with the tall side on the right, on the previous two pieces. The left column will attach to the top 4x4 round brick.

12.5. Now we'll attach the tank to the truck. Place the truck, horizontally with the headlights on the right, in front of you. Push the center hole at the bottom of the tank onto the pin that sticks up on the left half of the truck. The tank should spin freely.

13.1. Now we'll build the hose. Set the truck aside for now. Place a white 2x6 plate, horizontally, in front of you.

13.2. Place a white 1x2 plate with a bar on one long side, vertically with the bar on the left, on the leftmost column of the previous piece.

14. Place the left column of a white 2x2 curved slope tile, with the tall side on the left, on the previous piece.

15. Place a white 1x2 plate, horizontally, on the front row to the right of the previous piece.

16. Place a white 1x1 plate with a vertical clip on one side, vertically with the clip at the back, behind each of the two studs of the previous piece.

17. Place a white 1x2 grille tile, vertically, on the rightmost column of the hose. Place another to the left of the first.

18.1.1. Now we'll make a flexible hose! Place a black flexible hose, horizontally, in front of you.

18.1.2. Place a white 1x1 round plate with a hollow stud, on the right anti-stud of the previous piece.

18.2. Push the bar of a transparent blue flame into the hollow anti-stud of the previous piece.

18.3. Clip the flexible hose into the two clips on the back side of the hose assembly so the left side of the hose is even with the rest of the assembly.

19. Place the rest of the truck, with the tank on the left, in front of you. Rotate the tank so the two clips are on the right side. Clip the bar on the left side of the hose into the two clips on the tank.

Group 12.

20.1. Now we'll build the chassis and wheels of the truck! Set the rest of the truck aside for now. Place a red 2x8 brick, horizontally, in front of you.

20.2. Place a black 2x2 plate with pegs on two opposite ends, vertically with the pegs at the front and back, under the left two columns of the previous piece.

21. Place a black 2x2 plate with pegs on two opposite ends, vertically with the pegs at the front and back, under the right two columns of the chassis. Place another to the left of the first.

22.1. Let's assemble some wheels! Push six white wheel hubs into six black rubber tires.

22.2. Push the hole on one wheel onto each of the six pegs on the chassis.

23. Place the chassis, horizontally with the side with two sets of wheels on the right, in front of you. Place the rest of the truck, horizontally with the tank on the left, on the chassis. Now we're done with the firetruck!

Booklet 2.

Bag 3.

Build 6: Typewriter

Group 13.

1. The next build is an old-fashion typewriter! Place a red 6x6 plate in front of you.

2. Place a red 2x2 brick on the back two rows of the previous piece so the right sides are even. Place two more to the left of the first so the back two rows of the 6x6 plate are covered.

3. Place a red 2x4 brick, horizontally and centered horizontally, on the three pieces from the previous step.

4.1. Place a red 1x2 brick with a hole, vertically with the hole facing left and right, to the left of the previous piece. Repeat symmetrically on the right side.

4.2. Push the pin side of a tan 2L axle/pin combo, with the axle on the left, from the left into the hole in the left piece from the previous step. Repeat symmetrically on the right side.

5. Place a red 1x4x2 curved slope brick, vertically with the slope at the front, on the rightmost column in front of the stack of bricks. There will be one free stud in front of this piece.

6. Place a black 1x4 brick, horizontally, to the left of the previous piece and in front of the stack of bricks. There will be three free rows in front of this piece.

Group 14 contains the lime green 1x4 plate from the next step.

7.1. Place a lime green 1x4 plate from group 14, horizontally, in front of the previous piece.

7.2. Place a black 1x4 plate, horizontally, on the previous piece.

8. Place a black 1x4 plate, horizontally, in front of the previous piece.

9. Now we'll add some keys to the typewriter! Behind the previous piece is a stack of two 1x4 plates, which has a 1x4 brick behind it. This is the third row from the back. Place a white 1x1 round tile on each of the four studs on the 1x4 brick we just found. You'll place a total of four pieces in this step.

10. Now we'll place even more keys! Place a white 1x1 round tile on each of the four studs on the stack of 1x4 plates, and on the 1x4 plate in front of the stack. You'll place a total of eight pieces in this step.

Group 15.

11. Place a red 1x4x2 curved slope brick, vertically with the slope at the front, on the leftmost column in front of the stack of bricks. There will be one free stud in front of this piece.

12.1. Place a red 1x2 tile, horizontally, in front of the previous piece so the left sides are even.

12.2. Place a white 1x2 tile with rounded ends, horizontally, to the right of the previous piece. This is the spacebar for the typewriter.

12.3. Place a red 1x2 tile, horizontally, to the right of the previous piece.

13. Place a red 1x2 grille tile, horizontally, on the back row of the typewriter so the right sides are even. Place another in front of the first.

14. Place a red 1x2 plate with a clip on one stud, vertically with the clip at the front, to the left of the previous two pieces. Place another to the left of the first.

15. Place a red 1x2 grille tile, horizontally, on the back row of the typewriter so the left sides are even. Place another in front of the first.

16. Now we'll add the handles to advance paper through the typewriter. Push the hollow center anti-stud of a black 2x2 ribbed round brick, with the anti-studs on the right, onto the axle on the left side of the typewriter. Repeat symmetrically on the right side.

17.1. Next we'll add a piece of paper. Place a white 1x2 plate with a bar on one long side, horizontally with the clip at the front, in front of you.

17.2. Place the front row of a white 2x4 tile, horizontally and centered horizontally, on the previous piece.

17.3. Clip the bar on the piece of paper, up right and horizontal with the 2x4 tile on top and the bar at the bottom, into the two clips on the top of the typewriter. Angle the paper so it is upright and leaning slightly away from you. This completes the typewriter.

Build 7: Purple Monster

Group 16.

1.1. Now we'll build a purple monster! Place a purple 2x4 plate, horizontally, in front of you.

1.2. Place a purple 2x2 brick, centered horizontally, on the previous piece.

2. Place a purple 1x2 brick with a stud on one long side, vertically with the stud on the left, to the left of the previous piece. Repeat symmetrically on the right side.

3. Place a purple 2x4 brick, horizontally, on top of the monster.

4.1. Place a purple 2x2 brick, centered horizontally, on the previous piece.

4.2. Place a purple 1x2 brick with a stud on one long side, vertically with the stud on the left, to the left of the previous piece. Repeat symmetrically on the right side.

5. Place a purple 1x4 brick, horizontally, on the back row of the monster.

6.1. Place a purple 1x2 brick with a smile print, horizontally with the print at the front, centered horizontally in front of the previous piece. This piece is only printed on one side, so you may want to ask a friend or use an app to get the orientation right.

6.2. Place a purple 1x1 brick with a stud on one side, with the side stud at the front, to the left of the previous piece. Repeat symmetrically on the right side.

7.1. Place a purple 2x2 half cylinder, with the flat side on the front and back, on the left two columns of the monster.

7.2. Place a lime green 2x2 plate to the right of the previous piece.

8.1. Now we'll add some hair to the monster! Maybe this is a stem and the monster is actually a sentient eggplant? Place a light brown 1x1 brick on the front left stud of the previous piece.

8.2. Place the left stud of a light brown 1x2 curved slope tile, horizontally with the taller side on the right, on the previous piece.

9. Now we'll add the limbs to our weird eggplant monster! There are two side studs on both the left and right sides of the monster. Place the center anti-stud of a purple 2x2 half cylinder, with the flat sides at the front and back, on each of these four side studs. The front and back should be even with the front and back of the monster.

10. Find the two side studs on the front side of the head. Place a black 1x1 round tile with an eye pattern on each of these studs. This completes the monster!

Bag 4.

Build 8: Clouds & Rainbow

Group 17.

1.1. The next build is a couple of clouds with a rainbow! Place a white 2x12 plate, horizontally, in front of you.

1.2. Place a white 1x2 curved slope, vertically with the slope on the right, on the rightmost column of the previous piece.

2. Place a white 1x1 brick with a stud on one side, with the side stud at the front, on the front row to the left of the previous piece. Place another to the left of the first.

3. Place a white 1x2 curved slope, vertically with the slope on the left, to the left of the left piece from the previous step so the front sides are even. Place another, vertically with the slope on the right, to the left of the first.

4. Place a white 1x2 brick, horizontally, on the front row to the left of the left piece from the previous step.

5.1. Place a white 1x1 brick with a stud on one side, with the side stud at the front, to the left of the previous piece. Place another to the left of the first.

5.2. Place a white 1x2 brick, horizontally, behind the previous two pieces.

6.1. Place a white 2x2 brick to the left of the previous piece so the back sides are even.

6.2. Place a white 1x2 curved slope, vertically with the slope on the left, to the left of the previous piece.

7. Rotate the cloud 180 degrees so it's horizontal with the side studs at the back. There are two sections on the front row of the 2x12 plate that do not have bricks on them. These are on the second and third, and sixth and seventh columns from the left. Place the back row of a white 2x2 brick on each of these sections. The front row of each of the two bricks will overhang.

8. Place a white 1x6 plate, horizontally, under the front, overhanging rows of the previous two pieces.

9. Place a white 1x2 curved slope, vertically with the slope on the left, on the leftmost column of the clouds so the back sides are even. There will be another 1x2 curved slope to the left of this piece.

10.1. Place a white 1x2 curved slope, vertically with the slope on the right, on the rightmost column of the clouds so the back sides are even. There will be another 1x2 curved slope to the right of this piece.

10.2. Place a white 2x4 brick, horizontally, to the left of the previous piece.

Group 18, 19, and 20. Group 18 contains the red pieces from the next two steps, group 19 contains the yellow pieces, and group 20 contains the light blue pieces.

11.1. Now we'll start making the rainbow! Place a light blue 1x1 brick from group 20 to the left of the previous piece so the back sides are even. Skip two columns to the left and place another.

11.2. Place a yellow 1x1 brick from group 19 in front of each of the previous two pieces.

11.3. Place a red 1x1 brick from group 18 in front of each of the previous two pieces.

12.1. Now we'll make the arch of the rainbow. Set the clouds aside for now. Place a light blue 2x3 plate from group 20, vertically, in front of you.

12.2. Place the right stud of a light blue 1x1 plate with a 1x1 curve slope on one side from group 20, horizontally with the slope on the left, on the back left corner of the previous piece. The left stud will overhang. Place another symmetrically to the right of the first.

12.3. Place a yellow 1x1 plate with a 1x1 curve slope on one side from group 19, horizontally with the slope on the left, in front of the left piece from the previous step. Place another symmetrically to the right of the first.

12.4. Place a red 1x1 plate with a 1x1 curve slope on one side from group 18, horizontally with the slope on the left, in front of the left piece from the previous step. Place another symmetrically to the right of the first.

12.5.1. Place a red 1x2 tile from group 18, horizontally, on the previous two pieces.

12.5.2. Place a yellow 1x2 tile from group 19, horizontally, behind the previous piece.

12.5.3. Place a light blue 1x2 tile from group 20, horizontally, behind the previous piece.

12.6. Place the clouds, horizontally with the side studs at the back, in front of you. Place the leftmost column of the arch of the rainbow on the leftmost column of three studs on the rainbow. The right column should also attach to a column of three studs.

Group 21.

13. Place a white 1x2 curved slope, vertically with the slope on the left, to the right of the arch so the back sides are even.

14.1. Place a white 2x2 brick to the right of the previous piece.

14.2. Place a white 1x2 curved slope, vertically with the slope on the right, to the right of the previous piece.

15. Place a white 2x4 double inverted curved slope, horizontally, under the back two rows of the clouds so the left sides are even.

16. Place a white 2x2 inverted curved slope, with the slope on the left, to the right of the previous piece.

17.1. Place a white 2x4 brick, horizontally, to the right of the previous piece.

17.2. Place a white 2x2 inverted curved slope, with the slope on the right, to the right of the previous piece.

18.1. Now we'll add eyes to the clouds! Rotate the clouds 180 degrees so they're horizontal with the side studs at the front. Place the bottom right stud of a white 2x2 round tile with an eye pattern on the leftmost side stud on the front side of the clouds. Place another to the right of the first. The printing on this piece is directional, so you may want to ask a friend or use an app to get the orientation right.

18.2. Place a white 1x1 round tile with a closed eye print on each of the remaining two side studs. The printing on this piece is directional, so you may want to ask a friend or use an app to get the orientation right. This completes the clouds and rainbow! The larger cloud looks somewhat startled with its large, open eyes, while the smaller cloud looks happy and content!

Build 9: Roller Skate

Group 22.

1. Finally, let's build a roller skate! Place a light blue 4x4 round plate in front of you.

2. Find a yellow 2x2 rounded corner brick. This brick is cut out so it looks like a macaroni noodle, I'll call pieces with this shape "macaroni" from now on. Place this piece, with the flat sides on the right and front, on the back left corner of the previous piece. Place another symmetrically in front of the first so they form a shape like a letter C opening to the right. There will be two free columns to the right of these pieces.
 3. Place two more yellow 2x2 macaroni bricks on the first two.
 4. Place two more yellow 2x2 macaroni bricks on the second two.
 5. Place a yellow 2x4 brick, vertically, on the right two columns of the 4x4 round plate.
 6. Place a white 1x2 plate with a clip on one stud, horizontally with the clip on the right, on the second row from the front on the previous piece. Place another behind the first.
 7. Place a yellow 1x2x2 tall slope brick, horizontally with the slope on the right, in front of the front piece from the previous step. Repeat symmetrically on the back side.
 - 8.1. Place the right stud of a yellow 1x2 plate with rounded ends, horizontally, on each of the previous two pieces. The left studs of these pieces should attach to macaroni bricks.
 - 8.2. Place a yellow 1x2 plate with rounded ends, vertically and centered vertically, on the leftmost column of the roller skate.
 - 9.1. Now let's add the laces! Place a yellow 2x2 plate in front of you.
 - 9.2. Place a white 1x2 grille tile, horizontally, on the front row of the previous piece. Place another behind the first.
 - 9.3. Place a yellow 1x2 plate with a bar on one long side, horizontally with the bar at the front, under the front row of the 2x2 plate.
 - 9.4. Rotate the laces assembly so it's upright with the bar at the bottom and the grille tiles on the right. Clip the bar onto the two clips on the rest of the roller skate. Hinge the top of the 2x2 plate to the left until the laces match the angle of the two 1x2x2 slope bricks.
 10. Now we'll make the bottom of the roller skate! Set the first portion aside for now. Place a yellow 2x6 plate, horizontally, in front of you.
 11. Place a black 2x2 plate with a peg on two opposite sides, vertically with the pegs at the front and back, under the left two columns of the previous piece. Repeat symmetrically on the right side.
 12. Place the left column of a black 2x2 plate with a peg on one side, with the peg on the right, on the rightmost column of the 2x6 plate.
- Group 23.
13. Place a light blue 2x6 plate, horizontally, to the left of the previous piece. The leftmost column will overhang.
 14. Place a yellow 1x2 plate with rounded ends, vertically, under the leftmost overhanging column of the previous piece.
 15. Place the rest of the roller skate, centered vertically with the rounded end on the left, on the bottom of the skate so the left sides are even. The laces should be on the right

16.1. Now we'll build the toe of the skate. Set the rest of the skate aside for now. Place a light blue 4x4 round plate in front of you.

16.2. Place a yellow 1x2 plate with rounded ends, vertically and centered vertically, on the second column from the right on the previous piece.

17. Place a yellow 2x4 plate, vertically and centered vertically, to the left of the previous piece.

18. Place a light blue 2x3 plate, horizontally and centered vertically, on the previous piece so the left sides are even.

19. Place a yellow 2x2 plate on the left two columns of the previous piece.

20. Place a yellow 1x2 curved slope, horizontally with the slope at the front, in front of the previous piece. Repeat symmetrically on the back side.

21. Place a yellow 2x2 corner curved slope, with the slopes at the front and right, to the right of the front piece from the previous step. Place another symmetrically behind the first.

22. Now we'll add laces to the toe of the skate! Place a white 1x2 grille tile, vertically, on each of the three columns of two studs on the toe.

23. Place the rest of the skate, horizontally with the tall side on the left, in front of you. Place the toe, with the curved slopes at the front, right, and back, on the right four columns of the skate.

24.1. All that's left now is to add some wheels! Push five white wheel hubs into five black rubber tires.

24.2. Push the hole on one wheel onto each of the five pegs on the skate. The wheel on the right side of the skate can be used to slow the skater down!

This completes the Classic Creative Build-and-Play Box.

Thank you so much for building this set!

There is one page of ads before the instructions start. This page contains ads for four Classic sets. The first is set number 11039, Creative Food Friends. The second is set number 11040, Magical Transparent Box. The third is set number 11041, Creative Dinosaurs. The last is for set number 11042, Creative Happy Box.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

We hope you enjoyed building your LEGO set! Bricks for the Blind are able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at: <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.
