

21598 Underwater Adventure

Adapted by John Le and tested by Peter Durieux.

Dive into gaming action with this Underwater Adventure (21598), a LEGO® Minecraft® building set gift for boys, girls and kids ages 8 years old and up. Players join Steve, the Deep Sea Diver, a drowned, dolphin, tropical fish, guardian and elder guardian as they explore and battle among coral, an ocean monument and an ocean ruin with buried treasure. Fans of the popular video game can recreate Minecraft ocean adventures, helping Steve use his map and boat to embark on an exciting journey. On the way, they battle hostile guardians who try to obstruct Steve's plans by launching missiles. There's endless imaginative play inspired by the toy's accessories, such as Steve's sword, axe and spyglass, the drowned's trident and buried treasure chest containing gold and an emerald.

UNDERWATER TOY BUILDING SET – Make a splash with this ocean-themed LEGO® Minecraft® Underwater Adventure (21598) playset for fans of the popular video game.

7 LEGO® MINECRAFT® FIGURES – Dive in and discover coral, an ocean monument and a ruin with buried treasure with Steve, the Deep Sea Diver, a drowned, dolphin, fish, guardian and an elder guardian.

PRETEND PLAY TOY – Steve explores the ocean using a map and a boat as a friendly dolphin guides him on his adventure, until missile-launching guardians start an underwater battle.

AUTHENTIC ACCESSORIES – Bring the adventure to life with realistic details like Steve's sword, axe and spyglass, the drowned's trident and a treasure chest containing gold and emeralds.

DIMENSIONS – This 310-piece building set measures over 2.5 in. (7 cm) high, 8 in. (20 cm) wide and 3.5 in. (9 cm) deep.

The front of the box shows an underwater area filled with coral, a monument, ruins, and buried treasure! Steve is piloting his boat on the water trying to find the buried treasure! He has to be careful though because there are sea guardians and a drowned protecting it!

The back of the box shows Steve asking a dolphin to help him acquire the treasure! There is also a deep sea diver in the water fighting off a drowned!

The top of the box shows a real size image of Steve in his purple armor!

The build is 310 pieces in total and is for ages 8+.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/21598>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Steve, Boat, and Guardian

Group 1 – Page 5.

Group 2 – Steps 1-9.

Group 3 – Steps 1-14.

Group 4 – Step 15.

Bag 2 - Deep Sea Diver, Dolphin, and Coral Reef

Group 5 – Page 20.

Group 6 – Steps 1-13.

Group 7 – Steps 1-7.

Group 8 – Steps 8-12 and 2 sand green 2x2 bricks from Step 13.

Group 9 – Rest of Step 13 and Steps 14-16.

Bag 3 - Drowned, Coral, and Coral Reef

Group 10 – Page 37.

Group 11 – Steps 1-4.

Group 12 – Step 17 and 1 yellow 2x2 tile with a stud from Step 19.

Group 13 – 1 yellow 2x4 brick and 2 pink 2x2 bricks from Step 18 and 2 pink 2x2 tiles with a stud from Step 19.

Group 14 – 1 yellow 2x4 brick and 1 blue 2x2 brick from Step 18 and rest of Step 19.

Group 15 – Steps 20-21.

Group 16 – Step 22.

Group 17 – Steps 23-30.

Group 18 – Steps 31-34.

Group 19 – Steps 35-37.

Bag 4 - Elder Guardian

Group 20 – Steps 1-14.

Group 21 – Steps 15-30.

Group 22 – Steps 31-42.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 – Steve

Sub-build 1.1. Locate 1 magenta pair of legs, 1 light blue torso printed with light brown hands and a v-neck, 1 magenta chestplate, 1 light brown square head printed with brown hairs, eyes, and a mouth, and 1 magenta helmet. Assemble your minifigure then put him in front of you.

Sub-build 1.2. Let's make a part! Place a transparent 1x1 plate in front of you. Then place a gold 1x1 telescope bar on top. This is a spyglass! Now attach it to his hand so the anti-stud faces up. Then attach a silver axe to his other hand! Now place a tan 2x2 tile printed with a green and blue map next to him! Now put him away while we make his boat!

Group 2 – Boat

1. Vertically place a light brown 2x4 plate in front of you.
2. Horizontally place a light brown 1x4 plate on the front row so it is centered horizontally. Then repeat symmetrically to the back.
3. Vertically place a brown 1x2 plate with 2 upright side studs underneath the front left corner so 1 row is exposed to the back and the side studs face the left. Then repeat symmetrically to the back.
4. Repeat the previous step symmetrically to the right.
5. Horizontally place a light brown 1x4 tile upright on the right-facing side studs. Then repeat symmetrically to the left.
6. Horizontally place a light brown 1x4 tile on the front row. Then repeat symmetrically to the back.
7. Horizontally place 2 brown 1x2 plates with a rail, 1 to the right of the other, underneath the 2nd row from the front so together they are centered horizontally and the rails face the front. Then repeat symmetrically to the back.

8. Place 2 light blue 2x2 inverted round tiles with a rounded bottom, 1 to the right of the other, underneath the 4 ppp so together they are centered horizontally and vertically.

9. Place 2 brown paddles inside the boat, then put it away while we make a guardian!

Group 3 – Guardian

1. Place a green 2x2 plate in front of you.

2. Vertically place a light grey 1x2 plate with 2x2 upright side studs on the left column so the side studs face the left. Then repeat symmetrically to the right.

3. Place a light blue 2x2 brick on top.

4. Horizontally place a black 1x2 plate with 2x2 side studs hanging down on the front row so the side studs face the front. Then repeat symmetrically to the back.

5. Place a green 2x2 plate on top.

6. Horizontally place a green 1x2 plate with a bar on the front row so the bar faces the front. Now attach an orange clip with a bar holder to the front-facing bar so it is centered horizontally and the bar hole faces up. Then repeat both parts symmetrically to the back.

7. Place a sand green 2x2 tile with a stud on top so it is centered.

8. Place a sand green 1x1 clip on top of the ppp so the clip hands face the left and right. Now lay your part on its left-facing side so the clip faces the left and the clip hands face up and down.

9.1. Let's make a part! Horizontally place a sand green 1x2 plate in front of you. Then horizontally place a light grey 1x2 plate with 2 handles on top of the ppp so the handles face the left and right. Now horizontally place a sand green 1x2 plate on top of the ppp.

9.2. Vertically attach a light grey 1x2 plate with a clip to the left-facing handle so the studs face up. Now vertically place an orange 2x4 trapezoid plate on top of the ppp so it is centered vertically and the long side overhangs 1 column to the left.

9.3. Horizontally attach the right-facing handle of your part to the left-facing clip.

10. Vertically place a green 1x2 plate with a bar upright on the front column of right-facing anti-studs so the bar faces the front. Then repeat symmetrically to the back.

11. Place a sand green 2x2 inverted tile printed with a white and red eye upright on the right-facing anti-studs.

12. Attach an orange clip with a bar holder to the front-facing bar that is in the front right corner so it is centered vertically and the bar hole faces the right. Then repeat both parts symmetrically to the back.

13.1. Let's make 4 identical parts! Place a sand green 2x2 tile with a stud in front of you. Then vertically place a green 1x2 plate with a bar underneath the left column so the bar faces the left. Now attach an orange clip with a bar holder to the left-facing bar so it is centered vertically and the bar hole faces up. Then repeat both parts symmetrically to the right.

13.2. Now you should have 4 identical parts! Lay your main build on its back-facing side so the tail is on the left and the anti-studs of it face the front. Now place 1 part upright on the front-facing side studs so the bar holders are on the left and right. Then repeat symmetrically to the back.

14.1. Place 1 part on the top-facing studs so it is centered and the bar holders are in the front and back. Then repeat symmetrically to the bottom.

14.2. Orient the front bottom-facing bar holder so it slopes down and to the front. Then repeat symmetrically to the back. Now repeat both parts symmetrically to the top.

14.3. Orient the right front-facing bar holder so it is diagonal and faces the front right corner. Then repeat symmetrically to the left. Now repeat both parts symmetrically to the back.

14.4. Orient the bottom right-facing bar holder so it slopes down to the right. Then repeat symmetrically to the top. Now repeat both parts symmetrically to the left.

Group 4 – Guardian

15.1. Let's make a part! Place a transparent aqua 2x2 tile with a stud in front of you. Then place a transparent 1x1 round tile with an upright bar on top of the ppp. Now place the bottom-facing 2x2 tile with a stud of your guardian on top of it so the tail overhangs to the left. Now put it away while we make the next part!

Building Instructions (Bag 2, Book 1):

Group 5 – Deep Sea Diver

Sub-build 2. Locate 1 dark blue pair of legs, 1 yellow torso printed with a light blue and dark blue chestplate, 1 yellow square head printed with a sand blue scuba mask, and 1 aqua sword. Assemble your minifigure then attach the sword to their hand! Now put your deep sea diver away while we make a dolphin!

Group 6 – Dolphin

1. Horizontally place a light grey 2x3 plate in front of you. Then vertically place a dark grey 1x2 plate with a ball on the leftmost column so the ball faces the left.

2. Vertically place a dark grey 1x2 plate to the right of the ppp. Now horizontally place a dark grey 1x2 plate with a ball on the front right corner so 1 column overhangs to the right and the ball faces the front. Then repeat symmetrically to the back.

3. Vertically place a light grey 1x2 plate with 2 upright side studs underneath the rightmost column so the side studs face the right.

4. Horizontally place a dark grey 2x4 plate on top so it is centered.
5. Horizontally place a light grey 1x4 plate on the front row. Then repeat symmetrically to the back.
6. Vertically place a light grey 1x2 tile on the leftmost column. Then place a light grey 2x2 tile with a stud to the right of the ppp.
7. Place a light grey 1x1 plate with a side stud hanging down on the front right corner so the side stud faces the right. Then repeat symmetrically to the back.
8. Place a light grey 1x1 slope tile on the 2x2 tile with a stud so it slopes to the right.
9. Vertically place a light grey 1x2 brick printed with a white and black eye upright on the front column of right-facing side studs so the print faces the front. Then repeat symmetrically to the back.
10. Horizontally place a light grey 1x2 tile upright on the top row of right-facing side studs. Then horizontally place a light grey 1x2 jumper plate upright below the ppp.
11. Place a light grey 1x1 brick upright on the right-facing side stud. Then place a light grey 1x1 tile upright on the ppp.
12. Horizontally attach the socket of a light grey 1x2 plate with a socket to the left-facing ball so the studs face up. Then vertically place a light grey 2x3 tile on the leftmost stud so it is centered vertically and overhangs 1 column to the left. Then horizontally place a dark grey 1x2 sloped curved tile on top of the ppp so it slopes to the right.
- 13.1. Let's make 2 identical parts! Horizontally place a light grey 1x2 plate with a socket in front of you so the socket faces the left. Then horizontally place a light grey 1x2 tile on top of the ppp.
- 13.2. Now you should have 2 identical parts! Attach the socket of 1 part to the front-facing ball so it points to the front left corner. Then repeat symmetrically to the back. Now put your dolphin away while we make the coral reef!

Group 7 – Coral Reef

1. Horizontally place a light grey 2x12 plate in front of you.
2. Vertically place a sand green 1x4 brick on the leftmost column so 2 rows overhang to the front. Then repeat symmetrically to the right.
3. Horizontally place a light grey 4x12 plate underneath the front 2 rows so it is centered horizontally and 2 rows are exposed to the front.
4. Vertically place a sand green 1x4 brick on the back 4 rows of the 2nd column from the left. Then repeat symmetrically to the right.
5. Place a dark grey 2x2 brick on the back 2 rows of the 3rd and 4th columns from the right. Then vertically place a tan 2x4 tile with 2 studs on the back 4 rows of the 3rd and 4th columns from the left.

6. Vertically place a dark green 2x4 plate on the back left corner. Then repeat symmetrically to the right. Now place a light grey 2x2 tile with a stud on the back 2 rows, to the left of the ppp.

7. Place a green 2x2 plant on the back stud of the 2x4 with 2 studs that is on the back 4 rows of the 3rd and 4th columns from the left. Then place a lime green 1x1 round brick on top of the ppp.

Group 8 – Coral Reef

8. Stack 3 sand green 2x2 bricks on the back left corner. Then repeat symmetrically to the right.

9. Place a green 2x2 plant on top of the previous 1x1 round brick. Then place a lime green 1x1 round brick on top of the ppp.

10. Place a green 1x1 plant with 3 stems in front of the ppp so it sits on the front stud of the 2x4 tile with 2 studs.

11. Place a lime green 1x1 round brick on the 2x2 tile with a stud that is on the back 2 rows of the 3rd and 4th columns from the right. Then place a green 2x2 plant on top of the ppp. Now place a lime green 1x1 round brick on top of the ppp.

12. Horizontally place the 2 leftmost columns of a dark green 2x4 plate on the back left corner. Then repeat symmetrically to the right.

13.1. Place a sand green 2x2 brick on the back left corner. Then repeat symmetrically to the right.

Group 9 – Coral Reef

13.2. Place a white 2x2 brick on the back 2 rows of the 3rd and 4th columns from the left. Then repeat symmetrically to the right.

14. Place a sand green 2x2 tile with a stud on the back left corner. Then repeat symmetrically to the right. Now horizontally place a dark green 2x8 plate in between the 2 ppp.

15. Horizontally place 2 sand green 1x4 bricks, 1 to the right of the other, on the back row so together they are centered horizontally. Then horizontally place 2 more, 1 to the right of the other, in front of the 2 ppp.

16. Horizontally place a dark green 2x4 plate on the back 2 rows so it is centered horizontally. Then place a sand green 2x2 tile with a stud to the left of the ppp. Then repeat symmetrically to the right.

Building Instructions (Bag 3, Book 1):

Group 10 – Drowned

Sub-build 3. Locate 1 brown pair of legs, 1 brown torso printed with a ripped shirt, 1 sand green square head printed with eyes, a mouth, and algae on his head, and 1 sand green trident. Assemble your minifigure then attach the trident to his hand! Now put him away while we make a piece of coral!

Group 11 – Coral

1. Let's make a part! Let's make coral! Place a white 1x1 brick with 4 side studs in front of you so the anti-stud faces the left. Now place an orange 1x1 plate upright on the left-facing anti-stud. Then place an orange 1x1 tile upright on the right-facing side stud.

2. Place an orange 1x1 quarter circle tile upright on the front-facing side stud so the curve faces the top right. Then repeat symmetrically to the back.

3. Place a transparent 1x1 round tile with an upright bar in front of you. Then place your part on top so the 1x1 tile faces the right.

4. Place an orange 1x1 slope tile on top so it slopes to the right. Now put your piece of coral away while we continue the build!

Group 12 – Coral Reef

17. Let's make a part! Horizontally place a tan 6x8 plate in front of you. Then place a yellow 2x2 brick on the back left corner. Now place a yellow 2x2 tile with a stud on top of the ppp.

Group 13 – Coral Reef

18. Vertically place a yellow 2x4 brick on the front left corner. Then place 2 pink 2x2 bricks, 1 in front of the other, on the back 4 rows of the 3rd and 4th columns from the left. Now place 2 pink 2x2 tiles with a stud, 1 in front of the other, on top of the 2 ppp.

Group 14 – Coral Reef

19. Vertically place a yellow 2x4 tile with 2 studs on the back left corner. Then place a blue 2x2 brick on the back 2 rows of the 3rd and 4th columns from the right. Then place a blue 2x2 tile with a stud on top of the ppp.

Group 15 – Coral Reef

20. Vertically place a yellow 2x4 brick on the back left corner. Then place a yellow 2x2 tile with a stud in front of the ppp.

21. Place a yellow 2x2 tile with a stud on the back left corner. Then place a blue 1x1 round flower plate on the leftmost column, in front of the ppp. Now place another 1 to the front right of the ppp.

Group 16 – Coral Reef

22.1. Let's make a part! Place a pink 2x2 plate in front of you. Then place a pink 1x1 plate on the front left corner. Then place another 1 on the back right corner.

22.2. Place a dark pink short 1x1 brick on the back left corner. Then place another 1 on the front right corner.

22.3. Place a pink 1x1 plate on the front right corner. Then place another 1 on the back left corner.

22.4. Place a dark pink short 1x1 brick on the front left corner. Then place another 1 on the back right corner. Now place a pink 2x2 tile with a stud on top.

22.5. Place your part on the back 2 rows of the 3rd and 4th columns from the left.

Group 17 – Coral Reef

23. Place a yellow 2x2 brick on the back left corner on top of the 2x2 tile with a stud. Then place a yellow 2x2 tile with a stud on top of the ppp.

24. Place a sand green short 1x1 brick on top of the ppp. Then place a white 1x1 round flower plate on top of the ppp. Now place a short sand green 1x1 brick on the 2x2 tile with a stud that is on the back 2 rows of the 3rd and 4th columns from the right. Then place a white 1x1 round flower plate on top of the ppp.

25. Vertically place a tan 2x4 tile with 2 studs on the back right corner so 2 rows overhang to the back.

26. Bring back your main build and place it in front of you so it is horizontal and the arch is in the back. Now horizontally place the back right overhang of your part on the front left corner.

27. Let's make another part! Horizontally place a tan 4x8 plate in front of you.

28. Vertically place a tan 2x4 brick on the back left corner so 2 rows overhang to the back. Then place a tan 2x2 tile with a stud underneath the back 2 rows of the ppp. Now repeat both parts symmetrically to the right.

29. Horizontally place a tan 1x4 brick on the 3rd row from the front so it is centered horizontally.

30. Horizontally place a tan 4x8 plate on the back 4 rows so it is centered horizontally.

Group 18 – Coral Reef

31. Place a tan 2x2 tile with a stud on the front right corner. Then horizontally place a tan 2x4 tile with 2 studs on the front left corner so 2 columns overhang to the left.

32. Place a light brown 2x2 box to the right of the ppp so the rounded top parts are on the left. Now place 2 gold 1x1 round plates and 2 green 1x1 round plates inside the ppp. This is gold and emeralds! Then attach a light brown 2x2 tile with a stud and 2 little hinge connectors to the ppp so it opens up and to the left.

33. Place a tan 2x2 tile with a stud behind the ppp. Then place a tan 2x2 brick on the back left corner. Now vertically place a tan 2x4 brick on the back right corner.

34. Vertically place a tan 2x4 brick on top of the previous 2x2 tile with a stud and 2x2 tile with a stud and 2 small hinge connectors. Now vertically place a tan 2x4 tile with 2 studs on top of the ppp.

Group 19 – Coral Reef

35. Place a light brown 2x2 brick on the back left corner. Then place a light brown 2x2 tile with a stud on top of the ppp. Now repeat both parts symmetrically to the right.

36. Place a green 1x1 plant with 3 stems on the front right corner, on top of the 2x2 tile with a stud.

37. Horizontally place the front left overhang of your part on the front right corner of the main build. Now put your build away while we make the elder guardian!

Building Instructions (Bag 4, Book 1):

Group 20 – Elder Guardian

1. Place a tan 3x3 plate in front of you.

2. Vertically place a dark grey and light grey 1x4 bar shooter brick on top so it is centered horizontally and overhangs 1 row to the back.

3. Place a tan 1x1 brick with 2 side studs on the back row of the leftmost column so the side studs face the left and back. Then repeat symmetrically to the right.

4. Place a black 1x1 brick with a side stud on the 2nd row from the front of the leftmost column so the side stud faces the left. Then repeat symmetrically to the right.

5. Place a tan 1x1 brick with 2 side studs on the front left corner so the side studs face the left and front. Then repeat symmetrically to the right.

6. Stack 2 light blue 1x1 round plates on the 2nd row from the front of the leftmost column. Then repeat symmetrically to the right.

7. Place a white 1x1x2 brick with 2 side studs on the front right corner so the side studs face the front. Then horizontally place a light grey 1x2x2 brick with 2x2 side studs to the left of the ppp so the side studs face the front.

8. Horizontally place a tan 1x3 plate upright on the top row of front-facing side studs. Then place a light blue 1x1 round plate upright below the ppp so it is centered horizontally.

9. Horizontally place a light grey 1x2 plate with a stud and a clip upright to the left of the ppp so the clip overhangs to the left. Then repeat symmetrically to the right.

10. Place a tan 1x1 slope tile upright on the bottom left front-facing side stud so it slopes to the right. Then repeat symmetrically to the right.

11. Horizontally place a tan 2x3 tile printed with a light tan eye upright on the front-facing side studs so it is centered horizontally.

12. Attach the clip of a blue 1x2 plate with a clip to the leftmost front-facing clip so the studs face the right. Then horizontally place a light magenta 1x2 plate upright on the right-facing side studs of the ppp. Then repeat both parts symmetrically to the right.

13. Rotate your build 90 degrees counterclockwise so the ppp overhang to the right. Then place a black 1x1 brick with a side stud on the 2nd column from the left of the front row so it sits on the stack of 1x1 round plates and the side stud faces the front. Then repeat symmetrically to the back.

14. Horizontally place a light grey 1x2 brick with a handle on the 2 leftmost columns so it is centered vertically and the handle faces the left. Then horizontally stack 2 yellow 1x2 rounded plates on top of the ppp. Now place a light blue 1x1 round plate on the right stud of the ppp.

Group 21 – Elder Guardian

15. Place a white 1x1x2 brick with 2 side studs on the front left corner so the side studs face the left. Then repeat symmetrically to the back.

16. Rotate your build 90 degrees counterclockwise so the upright 1x2 tiles face the back. Now horizontally place a tan 1x3 plate upright on the top row of front-facing side studs so it is centered horizontally. Then place a light grey 1x1 plate upright on the bottom left front-facing side stud. Then repeat symmetrically to the right.

17. Horizontally place a light grey 1x2 plate with a stud and clip upright on the rightmost front-facing column of side studs so it is centered vertically and the clip overhangs to the right. Then repeat symmetrically to the left.

18. Place a dark tan 1x1 tile upright on the top row of front-facing side studs so it is centered horizontally. Then vertically place a dark tan 1x3 tile upright to the left of the ppp so there is no overhang. Then repeat symmetrically to the right.

19. Attach the clip of a blue 1x2 plate with a clip to the leftmost front-facing clip so the studs face the right. Then horizontally place a light magenta 1x2 plate upright on the right-facing side studs of the ppp. Then repeat both parts symmetrically to the right.

20. Vertically place a tan 1x3 plate on the leftmost column so it is centered vertically. Then repeat symmetrically to the right.

21. Vertically place a light grey 1x2 plate with a stud and a clip on the front row so it is centered horizontally and the clip overhangs to the front. Then repeat symmetrically to the back.

22. Rotate your build 90 degrees clockwise. Then vertically place a dark tan 1x3 tile on the rightmost column. Now vertically place a tan 2x3 tile to the left of the ppp.

23. Vertically attach a blue 1x2 plate with a clip to the leftmost top-facing clip so it is upright and the studs face the right. Then vertically place a light magenta 1x2 tile upright on the right-facing side studs of the ppp. Now repeat both parts symmetrically to the right.

24. Let's make a part! Horizontally place a dark tan 1x4 plate in front of you.

25. Horizontally place a tan 1x2 plate with a clip on the 2 leftmost columns so the clip faces the left. Then repeat symmetrically to the right.

26. Horizontally place a tan 1x4 tile with 2 studs on top.

27. Place a transparent aqua 1x1 pyramid tile on the leftmost column.

28. Horizontally place a dark tan 1x2 plate underneath the 2 rightmost columns.

29.1. Let's make another part! Place a black 2x2 plate in front of you. Then vertically place a tan 1x2 plate with a bar on the right column so the bar faces the right. Then vertically place a black 2x4 trapezoid plate on the left column so it is centered vertically and the longer side overhangs to the left. Now place a black 2x2 tile on the 2 rightmost columns.

29.2. Attach the bar of your part to the left-facing clip of your previous part so it is upright and the studs face the front.

30. Flip your main build upside down so it is horizontal and the upright 1x1 slope tiles face the right. Now horizontally attach the right-facing clip of your part to the left-facing bar that is underneath the bar shooter brick so it overhangs to the left and the side studs face the front.

Group 22 – Elder Guardian

31. Let's make 2 identical parts! Vertically place a tan 2x3 tile in front of you.

32. Horizontally place a tan 1x3 plate underneath the front row so 1 column is exposed to the right. Then repeat symmetrically to the back.

33. Vertically place a dark tan 1x3 tile on the rightmost column.

34. Horizontally place a light grey 1x2 plate with a stud and a clip underneath the leftmost column so it is centered vertically and the clip is exposed to the left. Then repeat symmetrically to the right.

35. Attach a blue 1x2 plate with a clip to the leftmost top-facing clip so it is upright and the side studs face the right. Then vertically place a light magenta 1x2 tile upright on the right-facing side studs of the ppp. Then repeat both parts symmetrically to the right.

36. Now you should have 2 identical parts! Now vertically place 1 part upright on the front-facing side studs so it is centered on it and the 1x2 tiles are on the top and bottom. Then repeat symmetrically to the back.

37. Vertically place a tan 1x3 plate on top of the top-facing anti-studs of the 3x3 plate so it is centered horizontally and vertically.

38. Place a black 1x1 plate with a clip to the right of the ppp so it is centered vertically and the clip faces the right. Then repeat symmetrically to the left.

39. Horizontally place a tan 1x3 plate on top of the 2 ppp.

40. Horizontally attach a blue 1x2 plate with a handle to the left-facing clip so it slopes up to the left and the studs face down and to the left. Then horizontally place a light magenta 1x2 tile upright on the bottom left facing studs of the ppp. Now repeat both parts symmetrically to the right.

41. Place a transparent 1x1 round brick on top of the leftmost stud of the horizontal 1x3 plate so it is centered vertically. Then place a transparent 2x2 tile with a stud on top of the ppp.

42. Flip your build over so it is right side up and the tail faces the right. Now insert a transparent green 8L bar with a rounded tip into the left-facing hole of the bar shooter brick. Then you can wiggle the tail to shoot it out! You will have an extra 8L bar with a rounded tip. Use this after you shoot the first one!

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>. Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

Please [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

At the end of the instruction booklets are advertisements for the following 6 LEGO Minecraft Theme kits:

21592 Chicken Jockey Desert Attack

21593 First Night Adventure

21594 The Skeleton

21595 The Ender Dragon

21596 Evoker Village Attack

21597 Ghast Station
