

75687 Elphaba's Retreat

Adapted by John Le and tested by Saqib Shaikh.

Reveal a world of role-play magic with Elphaba's Retreat (75687) creative toy for kids aged 7 plus. Girls, boys and Wicked fans recreate a special movie moment as they build Elphaba's toy forest hideout in LEGO® bricks.

This building toy for kids is packed with details to spark imaginative play. Wicked movie fans will recognize the poppy Fiyero gives to Elphaba pressed inside Glinda's book. As they set up tea and cups and settle in around the fireplace, storing the Grimmerie away safely in the desk.

LEGO® Wicked set for girls, boys and movie fans – Young builders recreate atmospheric movie moments with the LEGO Wicked Elphaba's Retreat role-play toy for kids aged 7 plus.

Forest toy with recognizable movie details – This playset comes with a buildable hideout, 2 minidolls, 2 forest animal figures and lots of toy accessories from the movie for hours of imaginative play.

Kids' adventure toy rich in role-play possibilities – Kids relive the scene where Elphaba and Fiyero's connection grows, make plans against The Wizard or play with the 2 rabbit figures.

Detailed display piece – This fantasy toy is decorated with flower and foliage elements making it eye-catching kids' room decor for girls, boys and Wicked fans.

Dimensions – This 228-piece LEGO® Wicked creative toy measures over 3.5 in. (9 cm) high, 7.5 in. (19 cm) wide and 5 in. (13 cm) deep.

The front of the box shows Elphaba's hideout equipped with a tea area, fireplace, and a magic spell book! It is hidden in the forest with trees and leaves!

The back of the box shows Elphaba sharing a cup of tea with Fiyero outside the forest hideout.

The top of the box shows a real size image of a bunny figure.

The build is 228 pieces in total and is for ages 7+.

Welcome to text-based instructions from Bricks for the Blind. Before you start building, here are some terms we'll be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/75687>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 2 bags, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Elphaba, Bunny, Grimmerie, and Hideout

Group 1 - Pages 5-6.

Group 2 - Steps 1-14.

Group 3 - 1 yellow green 8x8 plate with a round side and 1 pink 1x1 round flower plate from Step 15.

Group 4 - Rest of Step 15, Step 16, and 1 dark green 2x2 triangle tile from Step 17.

Group 5 - Rest of Step 17 and Steps 18-20.

Group 6 - 1 yellow green 8x8 plate with a round side and 1 pink 1x1 round flower plate from Step 21.

Group 7 - Rest of Step 21, and Steps 22-23.

Group 8 - Steps 24-25.

Group 9 - Steps 26-29.

Group 10 - Steps 30-39.

Bag 2 - Fiyerio, Bunny, and Hideout

Group 11 - Page 36.

Group 12 - Steps 40-42.

Group 13 - Steps 43-56.

Group 14 - Steps 57-70.

Group 15 - Steps 71-74.

Group 16 - Steps 75-88.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Elphaba, Bunny, and Grimmerie

Sub-build 1.1. Locate 1 black pair of legs, 1 green torso printed with a black jacket, 1 green head printed with eyes, lips, eyelashes, 1 black hair, and 1 tan hair brush. Assemble your minifigure, then attach the hairbrush to her hand!

Sub-build 1.2. Let's make a part! Place a brown 2x2 triangle tile with a sticker in front of you so the corner faces the back right. Now place a gold 1x1 round plate underneath the back right corner. Now attach the anti-stud of the ppp to your minifigure's hand!

Sub-build 1.3. Skip this step if you have already placed your sticker! Ask a helper to place sticker 3 on the brown 2x2 triangle tile. This sticker has gold swirls on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Sub-build 1.4. Place a white bunny with tan spots on her eyes next to your minifigure. Now put them away while we make the Grimmerie!

Sub-build 2.1. Let's make a part! Vertically place a brown 1x2 book cover with a handle and 2 studs in front of you so the handle is on the right. Now vertically place a white 1x2 tile with a sticker on top.

Sub-build 2.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 8 on the white 1x2 tile. This sticker has a red rose on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Sub-build 2.3. Vertically attach a brown top 1x2 book cover with 2 stickers to the left side, then close the book.

Sub-build 2.4. Skip this step if you have already placed your sticker! Ask a helper to place sticker 7 on the brown top book cover. This sticker has pink illegible cursive letters on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Sub-build 2.5. Skip this step if you have already placed your sticker! Ask a helper to place sticker 6 on the brown top book cover. This sticker has a scroll with an illegible title, and a guy holding up a rose. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

Sub-build 2.6. Now put your book away while we make the hideout!

Group 2 - Hideout

1. Vertically place a yellow green 3x8 right wedge plate in front of you so the cutoff corner faces the front left. Now horizontally place a tan 1x4 tile on the back row so 1 column overhangs to the right.

2. Vertically place the back row of a yellow green 4x8 plate with a round side underneath the overhang of the ppp so it is centered vertically to the 3x8 wedge plate and the round side faces the right. Then horizontally place a brown 1x4 hinge plate on the 2 leftmost columns of the 2nd row from the back so the round hinge part faces the front, and 2 columns overhang to the left.

3. Horizontally place a nougat 1x4 plate to the right of the ppp. Then place a dark green 1x2 rounded tile in front of the 2 leftmost columns of the ppp. Now place a nougat 1x1 round brick to the right of the ppp.

4. Vertically place a yellow green 3x8 left wedge plate underneath the 2 leftmost columns of overhang so the cutoff corner faces the front right and 1 row is exposed to the back, and 1 column is exposed to the left. Now horizontally place a brown 1x2x2 panel with a window on the 2nd and 3rd columns from the left of the back row so the wall faces the back. Now orient the 3x8 left wedge plate so it is diagonal and the front of the plate touches the front row.

5. Horizontally place a brown 1x4 hinge plate on the 3 studs of the front row so the round hinge part faces the front, and 1 column overhangs to the front left.

6. Place a nougat 1x1 brick with an axle hole on the 2nd row from the back of the 2nd column from the right so the axle hole faces the right. Now attach a brown pin connector with an axle to the right-facing axle hole of the ppp so the pin hole faces up.

7. Place a nougat 2x2 round brick on the 2 rightmost columns in front of the ppp.

8. Place the front row of a dark blue 2x2 curved corner plate on the back row of the ppp so the curved corner faces the front left.

9. Place a dark blue 3x3 curved plate to the front left of the ppp so the curve faces the front left and it overhangs 2 studs in the front left. Make sure the rightmost column of your plate is aligned with the rightmost column of the ppp.

10. Rotate your build 45 degrees clockwise so the leftmost column is vertical. Now place a brown 2x2 plate with a cutoff corner on the back left corner so 1 column overhangs to the left and the cutoff corner faces the back left. Now place a brown 1x1 quarter circle tile on the leftmost column of the 2nd row from the front so the curve faces the back left.

11. Vertically place the front row of a brown 1x3 plate to the right of the ppp. Now place the left column of a brown 2x2 plate with a cutoff corner behind the ppp so the cutoff corner faces the back right. Now horizontally place a brown 1x2 plate to the left of the back row of the ppp so 1 column overhangs to the left.

12. Horizontally place a dark brown 1x2 angled sloped curved tile on the 2 leftmost columns of the 4th row from the back so it slopes to the left and the angled part faces the front left. Now vertically place the back row of another 1 to the right of the ppp so it slopes to the front and the angled part faces the front right.

13. Horizontally place a dark brown 1x2 tile on the 2nd and 3rd columns from the left of the 3rd row from the back. Now place a brown 1x1 quarter circle tile in front of the right column of the ppp so there is a 1 row gap in between them and the curve faces the back left. Now horizontally place the left column of a

dark brown 1x2 angled sloped curved tile in front of the ppp so it slopes to the right and the angled part faces the back right. Now place a dark brown 1x2 curved tile in front of the left column of the ppp so the curve faces the front right.

14. Rotate your build 45 degrees counterclockwise so the 4 rightmost columns are horizontal and vertical. Now horizontally place a dark brown 1x2 angled sloped curved tile on the rightmost column of the front row so it slopes and overhangs to the right and the angled part faces the back right. Place a brown 1x1 round plate to the left of the ppp. Now place a yellow green 1x1 round plate with 3 leaves on top of the ppp so the leaves face the front. Then place a light purple 1x1 round flower plate on top of the ppp.

Group 3 - Hideout

15.1. Rotate your build 45 degrees clockwise so the leftmost column is vertical. Now place a yellow green 8x8 plate with a round side underneath the back 2 rows of the leftmost column of overhang so 1 row is exposed to the front and the round side faces the back. Now place a pink 1x1 round flower plate on the front right corner of the ppp.

Group 4 - Hideout

15.2. Place a light pink 1x1 round flower plate on the 5th row from the front of the leftmost column. Then repeat symmetrically to the right of the 8x8 plate with a round side.

16. Place a yellow green 8x8 plate with a round side in front of the previous 8x8 plate with a round side so it sits underneath a 1x1 overhang and the round side faces the front.

You will have an extra dark green 2x2 triangle tile. Save it for later!

Group 5 - Hideout

17. Vertically place a gold 1x2 jumper plate with a round side on the 4th column from the left so it is centered vertically and the round side faces the left. Then place a dark green 2x2 triangle tile from group 4 to the right of the ppp so the right angle faces the front left. Now place a dark blue 2x2 triangle tile to the back right of the ppp so the right angle faces the back right. Together the 2 triangle tiles should form a 2x2 tile. Now vertically place a gold 1x2 jumper plate with a round side to the right of the ppp so the round side faces the right.

18.1. Vertically place a brown 1x2 plate on the 2nd and 3rd rows from the front of the 7th column from the left. Now place a brown 1x1 quarter circle tile behind the ppp so the curve faces the back left. Then place another 1 to the right of the back row of the previous 1x2 plate so the curve faces the front left.

18.2. Horizontally place a brown 1x2 angled sloped curved tile behind the right 1x2 jumper plate with a round side and a 1x1 round flower plate so it slopes to the left and the angled part faces the front left.

19.1. Place a dark green 1x2 rounded tile with a sticker on the right 1x2 jumper plate with a round side so it faces the back left and front right.

19.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 2 on the dark green 1x2 rounded tile. This sticker has gold scales on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

20. Place a dark brown 1x1 quarter circle tile on the 2nd row from the front of the 6th column from the left so the curve faces the back left. Now vertically place the back row of a dark brown 1x2 angled sloped curved tile so it slopes to the front and the angled part faces the front right. Now place a brown 1x2 curved tile behind the ppp so the curve faces the back left.

Group 6 - Hideout

21.1. Let's make a part! Place a yellow green 8x8 plate with a round side in front of you so the round side faces the left. Now place a pink 1x1 round flower plate on the back row of the leftmost column.

Group 7 - Hideout

21.2. Place a light purple 1x1 round flower plate in front of the ppp.

22. Place a dark green 1x1 round tile on the front row of the 2nd column from the left. Then repeat symmetrically to the back. Now place a light purple 1x1 round flower plate on the back row of the 5th column from the right.

23. Horizontally place a tan 2x6 plate with a round side on the back 2 rows so 2 columns overhang to the right and the round side faces the back.

Group 8 - Hideout

24. Place a tan 3x3 quarter circle plate in front of the 3 leftmost columns of the ppp so the curve faces the front left. Now place a pink 1x1 round flower plate in front of the leftmost column of the ppp.

25. Place the 2 rightmost columns of your part on the 2 leftmost columns of the main build so it sits in front of the 1x1 round flower plate.

Group 9 - Hideout

26.1. Place a tan 3x3 quarter circle plate in front of the 3 rightmost columns of the 2x6 plate with a round side that you attached to the main build so the curve faces the front right. Now place a light purple 1x1 round flower plate to the right of the front row of the 2x6 plate with a round side that is behind the ppp.

26.2. Place a brown 1x1 quarter circle tile on the leftmost column of the 4th row from the front so the curve faces the front left. Then horizontally place the right column of a brown 1x2 plate behind the ppp.

27. Horizontally place a brown 1x2 angled sloped curved tile on the left column of the ppp so it slopes to the left and the angled part faces the front left. Then horizontally place another 1 to the right of the ppp so it slopes to the right and the angled part faces the back right. Now horizontally place a dark green 1x2 rounded tile behind the 2 ppp so there is a 1 row gap in between them and is centered horizontally to the 2 ppp. Now horizontally place the right column of another 1 behind the left column of the ppp.

28. Place a nougat 1x1 round brick on the 2nd row from the back of the 4th column from the left so it sits in front of a 1x1 round flower plate. Now horizontally place a nougat 1x2 sloped curved brick on top of the ppp so it slopes to the left.

29. Place a nougat 2x2 round brick on the front 2 rows of the 4th and 5th columns from the left. Now place a purple 1x1 quarter circle tile on the front left corner of the ppp so the curve faces the front left. Then repeat symmetrically to the right. Now place another 1 behind the ppp so the curve faces the back right. Now horizontally place a nougat 1x2 sloped curved brick to the left of the ppp so it slopes to the left.

Group 10 - Hideout

30. Place a brown 1x1 round plate on the front row to the right of the pieces from the last step. Now place a dark green 1x1 round plate with 3 leaves on top of the ppp so the leaves face the right. Now place a pink 1x1 round flower plate on top of the ppp.

31.1. Place a dark brown 2x2 round plate on the 9th and 10th columns from the left so it sits behind the 1x2 rounded tile and there is a 1 row gap in between them. Now place a dark blue 2x2 round tile with a sticker on top of the ppp.

31.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 1 on the dark brown 2x2 round plate. This sticker has gold scales on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

32. Vertically place a nougat 2x4 treasure chest bottom on the 2nd and 3rd columns from the left so it is centered vertically and the lower ridge faces the left. Now vertically attach a nougat 2x4 treasure chest top to the ppp so it opens to the left.

33. Let's make a part! Horizontally place a nougat 1x4 plate in front of you.

34. Place a dark blue 3x3 quarter circle plate on the 2 leftmost columns so 2 rows overhang to the back, 1 column overhangs to the left, and the curve faces the back left. Then repeat symmetrically to the right.

35. Place a tan 2x2 tile with a stud on the front 2 rows so it is centered horizontally.

36.1. Place a tan 2x2 tile with a sticker on top of the ppp so it is diagonal.

36.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 4 on the tan 2x2 tile. This sticker has a map on it. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

37. Vertically place your part on the 2x4 treasure chest top that is on the 2nd and 3rd columns from the left so it is centered vertically on it and the round side faces the left. It should overhang 1 column to the right of the 2x4 treasure chest.

38. Place a magenta 1x1 round brick on the 2nd row from the back of the 2nd column from the left. Then place a gold 1x1 round plate on top of the ppp.

39. Stack 2 white 1x1 round plates on the front row of the 2nd column from the left. Then place a transparent orange candle flame on top of the ppp.

Building Instructions (Bag 2, Book 1):

Group 11 - Fiyero and Bunny

Sub-build 3. Locate 1 dark green pair of legs printed with black boots, 1 dark green and yellow torso printed with a backpack strap, 1 light tan head printed with light blue eyes, nose, and lips, 1 light brown hair, and 1 tan bunny. Assemble your minifigure then put the bunny next to him.

Group 12 - Hideout

40. Place a brown 2x2 round tile with a stud on the 2 leftmost columns of the 2nd and 3rd rows from the back. Then place a nougat 1x2 curved brick on the 2 rightmost columns of the 2nd and 3rd rows from the back so the curve faces the back right.

41. Place 2 white tea cups on the 2 studs of the ppp so the handles face the left. Now place a white teapot on the left column of the back row so the spout faces the front right. Then place a light grey 1x1 round tile with a handle on top of the ppp so it faces the front right and back left.

42.1. Let's make a part! Place a dark brown 2x2 round plate in front of you. Then horizontally place a brown 1x2 plate with a bar on the back row so the bar faces the back. Now horizontally place a brown 1x2 plate on the front row.

42.2. Vertically place 2 nougat 1x2 grill tiles, 1 to the right of the other, on top.

42.3. Vertically attach 2 gold bent bars with a clip on each end to the back-facing bar so the bend to the back and the other clips face up. Now horizontally attach a brown 2L bar with a stop to the 2 top-facing clips.

42.4. This is a chair! Place it on the 2x2 round tile with a stud that is on the 2 leftmost columns of the 2nd and 3rd rows from the back so the back of the chair faces the back left.

Group 13 - Hideout

43.1. Let's make a part! Let's make a fireplace! Stack 2 light grey 2x2 round plates in front of you.

43.2. Place a light grey 1x1 quarter circle tile on the front left corner so the curve faces the back right. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the back. Now place a transparent orange candle flame in the center so it is horizontal.

43.3. Place your part on the 11th and 12th rows from the front so it is centered horizontally. There should be 1 free row in front of this part and a 1x2 jumper plate with a round side and a triangle tile.

44. Rotate your build 45 degrees counterclockwise so the right side is now in columns and rows. Now horizontally place a nougat 1x2x2 inverted half arch brick on the 3 rightmost columns of the 2nd row from the back so it slopes to the left. Then horizontally place another 1 to the left of the ppp so it slopes to the right. Now place a light purple 1x1 round flower plate to the left of the ppp so it sits in front of a 1x2x2 panel with a window.

45-46. Let's make a part! Horizontally place a nougat 1x6x2 arch brick in front of you. Now place a nougat 1x1 brick with an axle hole on the 2nd column from the right so the axle hole faces left and right. Now horizontally place a nougat 1x2 sloped curved brick on the 2 rightmost columns so it slopes to the right.

47. Place a brown 1x1 plate on the leftmost column. Then place another 1 on the 4th column from the left.

48. Horizontally place a nougat 1x4 arch brick on the 4 leftmost columns.

49. Place a brown 1x1 plate with a clip on the 3rd column from the left so the clip faces the front. Then horizontally place a nougat 1x2 sloped curved tile on the 3rd and 4th columns from the left so it slopes to the right.

50. Horizontally place your part on the 2 1x2x2 inverted half arch bricks that are on the 6 rightmost columns of the 2nd row from the back so the clip faces the front.

51. Make sure the 8 rightmost columns of your build is vertical and horizontal. Now place a brown 1x1x2 brick with 2 side studs to the left of the previous part so it sits on top of a 1x1 round flower plate and the side studs face the front right. Then place a brown 1x1x3 brick on top of the ppp.

52. Horizontally place a nougat 1x3x2 inverted half arch brick to the left of the ppp so it slopes to the left.

53. Horizontally place a nougat 1x5x4 half arch brick on top of the ppp so it arches to the left. Now place a nougat 1x1 round brick on the rightmost column of the ppp.

54. Horizontally place the middle stud of a brown 1x3 plate on top of the ppp so it is centered horizontally on it.

55. Place a nougat 1x1 slope tile on the leftmost column of the ppp so it slopes to the right. Then horizontally place a brown 1x4 hinge plate to the right of the ppp so the round hinge part faces the front. Make sure there is no overhang.

56.1. Let's make a part! Horizontally place a brown 1x2 log brick in front of you. Then place a brown 1x1 brick with a clip on the left column so the clip faces the left.

56.2. Place a brown 1x1 brick with a side stud on the right column so the side stud faces the right. Now place a long brown horn upright on the right-facing side stud.

56.3. Horizontally place a brown 1x2 brick with a side stud on top so the side stud faces the front. Now horizontally place a brown 1x2 log brick on top.

56.4. Rotate your part 180 degrees, then horizontally place it behind the 2 leftmost columns of the 1x4 hinge plate from step 55 so the horn faces the left.

Group 14 - Hideout

57.1. Let's make a part! Place a nougat 1x1 brick with an axle hole in front of you so the axle hole faces the front and back. Now insert a dark brown pin connector with an axle to the front-facing axle hole so the pinhole faces up and down.

57.2. Vertically place your part on the 2nd and 3rd rows from the back of the 5th column from the left so the pinhole is in the front. It should sit to the right of the 2x2 tile printed with a map!

58. Vertically place a brown 1x2 log brick on the back 2 rows, to the right of the ppp.

59. Place a brown 1x1x3 brick on the back row of the ppp. Now horizontally place the right column of a nougat 1x2x3 slope brick in front of the ppp so it slopes to the left.

60. Horizontally place a nougat 1x3x2 inverted half arch brick to the right of the ppp so it slopes to the right.

61. Horizontally place a nougat 1x5x4 half arch brick on top of the ppp so it arches to the right. Now place a nougat 1x1 brick with a clip on the 2nd column from the left of the ppp so the clip faces the front.

62. Place the front row of a nougat 2x2 corner plate to the left of the ppp so it looks like the braille letter h.

63. Horizontally place a brown 1x2 brick with a round side in front of the ppp so the round side faces the front. Now horizontally place a gold 1x2 jumper plate with a round side on top of the ppp so the round side faces the front. Then place a transparent light green 1x1 cone brick on top of the ppp. Now place a transparent green diamond on top of the ppp.

64. Horizontally place a nougat 1x3 rounded plate behind the ppp so it sits on the front row of the 2x2 corner plate and overhangs 1 column to the left. Place a brown 1x1 plate with a clip on the rightmost column of the ppp so the clip faces the back. Then place a nougat 1x1 slope tile behind the middle column of the 1x3 rounded plate so it slopes to the back.

65. Horizontally place the left column of a nougat 1x2 sloped curved brick on top of the 1x1 plate with a clip from the previous step so it slopes to the left.

66.1. Let's make a part! Horizontally place a nougat 1x6 plate in front of you. Then horizontally place a nougat 1x2 plate underneath your part so it is centered horizontally.

66.2. Horizontally place your part to the right of the 1x2 sloped curved brick from the previous step.

67. Horizontally place a nougat 1x4 plate on the 4 leftmost columns of the ppp. Now horizontally place a brown 1x3 plate to the right of the ppp so there is a 1 column gap in between them. Then place a nougat 2x2 corner plate to the right of the ppp so it sits on a 2x2 surface and it looks like the braille letter d. Now diagonally place a nougat 1x2 grill tile to the front right of the ppp so there is no overhang.

68. Place the back 2 rows of a brown 3x3 curved plate on the right column of the nougat 2x2 corner plate from the previous plate so the curve faces the front left. The right side of the curved plate should sit on a 1x2 grill tile. Now place a yellow green 1x1 round plate on the back row of the ppp. Then place a dark brown 1x2 curved tile in front of the ppp so the curve faces the front left.

69.1. Let's make a part! Horizontally place a dark brown 2x6 right wedge plate in front of you so the angled part faces the front and the short end faces the right. Now horizontally place a dark brown 2x6 angled sloped curved brick on top so the angled part faces the front and it slopes to the left.

69.2. Rotate your part so it is vertical and slopes to the back. Now vertically place the bottom 2 rows of the right column of your part upright on the 2 front-facing side studs that are to the left of the hole made by the arches on the right side so it slopes up.

70. Vertically place a dark green 1x2 rounded plate with leaves behind the left column of the previous part so 1 row and the leaves overhang to the front. Now attach a transparent yellow cloud with a handle to the front-facing clip that is to the right of the ppp so the cloud hangs down. Now attach another 1 to the front-facing clip that is on the 8th column from the left so the cloud faces down.

Group 15 - Hideout

71. Place a brown 1x4 curved plate on top of the 1x2 rounded plate with leaves so 1 row overhangs to the front and the curve faces the front right. Now place a dark green 1x1 round plate with 3 leaves on the back row of the ppp so the leaves face the back left. Then place a dark brown 1x2 curved tile in front of the ppp so the curve faces the front right. Now place a dark brown 1x2 angled sloped curved tile to the left of the front row of the ppp so it slopes and overhangs to the left, and the angled part faces the front left.

72. Horizontally place the left column of a brown 1x2 rounded plate on the 1x1 round plate with 3 leaves from the previous step so there is no overhang.

73.1. Let's make a part! Place a transparent 1x1 round brick in front of you. Then place a green stem with 3 tips on top of the ppp. Now place a pink 1x1 round flower plate on 1 of the stems so the stud faces the front.

73.2. Rotate your main build 45 degrees counterclockwise so the right side is in columns and rows. Now place your part on the front row of the rightmost column so the round flower plate faces the front. Then place a transparent purple crystal on the 4th row from the front of the 3rd column from the right so it sits on the 1x4 curved plate.

74.1. Let's make 2 identical parts! Place a gold 1x1 round plate with a clip underneath in front of you so the clip faces down and the clip hands face left and right. Now place a yellow green 1x1 round plate with 3 leaves on top of the ppp so the leaves face the back right. Then place a pink flower on top of the ppp.

74.2. Now you should have 2 identical parts! Attach the clip of 1 part to the bar of the rightmost cloud with a bar so the flower faces the front. Then repeat symmetrically to the left cloud with a bar so the flower faces the front right.

Group 16 - Hideout

75. Rotate your part 45 degrees clockwise. Now horizontally place a dark green 1x2 rounded plate with leaves on the back right corner so it sits to the right of the 1x2 curved tile and overhangs to the front right. Now place a dark green 1x1 round plate with 3 leaves on the left column of the ppp so the leaves face the right.

76. Let's make a part! Horizontally place a nougat 1x3 rounded plate in front of you. Then horizontally place a dark green 1x2 rounded plate with leaves on the 2 rightmost columns so the leaves face the right.

77. Place a dark brown 1x1 quarter circle tile on the 2nd column from the left so the curve faces the front right.

78. Vertically place a dark green 1x2 rounded plate with leaves on the rightmost column so 1 row and the leaves overhang to the front.

79. Place a yellow green 1x1 round plate with 3 leaves on the rightmost column so the leaves face the front.

80. Insert a brown stem with 2 tips underneath the rightmost column so it goes all the way in.

81. Rotate your main build 180 degrees. Now rotate your part so it is vertical and the leaves are in the back. Then vertically place the front row of your part on the 6th row from the front so it sits on the arches and in between the 1x4 plate and 1x3 plate, and the leaves overhang to the back.

82. Horizontally place a nougat 1x4 plate on the front row of the ppp so there is a 2 column gap in between the plate and the 1x2 sloped curved brick that is to the right. Now horizontally stack 2 nougat 1x2 plates on the ppp so they are centered horizontally on it. Then horizontally place a nougat 1x3 sloped curved brick to the right of the 2 ppp so it slopes to the right. Then repeat symmetrically to the left.

83. Horizontally place a dark green 1x2 rounded plate with leaves to the right of the 1x2 sloped curved brick that is to the right of all pieces from the previous step so the leaves face the right. Now place a brown horn on the ppp so it curves to the right.

84. Let's make a part! Attach a green stem to an orange carrot. Now attach it to the left-facing clip that is on the 5th row from the front so the carrot faces down.

85.1. Place a tan 2x2 tile with a sticker upright on the front-facing side stud that is to the right of the ppp. so it is centered on it.

85.2. Skip this step if you have already placed your sticker! Ask a helper to place sticker 5 on the tan 2x2 tile. This sticker has a red sign with a witch hat. Make sure the sticker is placed on correctly and is oriented on the build correctly, ask a sighted person to check.

86.1. Let's make a part! Place a transparent yellow 1x1 round brick in front of you. Then place a dark grey lantern on top.

86.2. Hang your part on the right-facing horn that is to the right of the ppp. Now vertically attach a dark brown broom to the front-facing clip that is on the 9th column from the right so the brush faces down.

87. Place a curved dark brown branch on the leftmost column of the 6th row from the front so it sits behind the left column of the previous 2x2 tile with a sticker so it overhangs to the back right. Now place a dark green 1x2 rounded plate with leaves on top of the ppp so the leaves and 1 stud overhang to the back right. Now place a yellow green 1x1 round plate with 3 leaves on the front left stud of the ppp so the leaves face the back right.

88.1. Let's make 2 identical parts! Horizontally place a brown 6L curved pin connector in front of you so the bar hole faces the right. Now attach a brown 5L curved branch with a tip to the right-facing side so the tip faces up. Now attach a black 2L pin to the left-facing pin connector.

88.2. Now you should have 2 identical parts! Rotate your main build 180 degrees. Then place the pin of 1 part on the pin hole that is on the right end of the build so it is upright and the curved branch with a tip curves to the left. Then place the other 1 on the pinhole that is on the 6th column from the left so it is upright and the curved branch with a tip curves to the right.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets?

Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

We hope you enjoyed building your LEGO set! Bricks for the Blind are able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>. Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

Please [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

At the end of the instruction booklets are advertisements for the following 3 LEGO Wicked Theme kits:

75788 Glinda's Wedding Day

75687 Elphaba's Retreat

75689 Kiamo Ko Castle
