

21275 The TNT Jungle House

Adapted by John Le and tested by Jolene Nemeth.

Give Minecraft® players and fans an explosive treat with this fun and creative toy. The TNT Jungle House (21275) is a versatile gamer gift for kids aged 8 and up with a passion for adventure toys, video game decor and Minecraft action and adventures.

The buildable house is set in the Minecraft jungle biome and looks like a large-scale version of the game's iconic TNT element. A switch on the side lets kids trigger an exploding TNT function, which collapses the entire house. When the dust settles, kids can rebuild the house so it's ready for their next adventure. Steve, Creeper™ and zombie minifigures inspire imaginative play and battle action. Authentic LEGO Minecraft accessories include a boat, fishing rod, fish, parrot and jungle foliage.

LEGO® Minecraft® toy house – Put explosive Minecraft action into kids' hands with The TNT Jungle House video game collectible merch for girls and boys aged 8 and up.

Minecraft® gaming collectibles – The toy features Steve, Creeper™ and zombie minifigures, plus accessories, including a fish, fishing rod and a parrot, to inspire imaginative play for kids.

Creative building toy – Minecraft® players can join Steve, a popular character from the video game, to battle hostile mobs and build a TNT-shaped house with an explosion function.

Explosive LEGO® Minecraft® adventure toy – Kids can flick a switch to trigger an explosion feature that collapses the house's ceiling and walls.

287-piece set – The completed toy house measures over 3.5 in. (10 cm) high, 9 in. (24 cm) wide and 6.5 in. (17 cm) deep.

The front of the box shows the TNT house built next to a sandy and grassy area with water! To the left, there is a zombie and creeper coming from the desert! Steve is in the front fishing, but he has his sword right behind him in a barrel! To the right, there is a boat he can use to get away if he needs to!

The back of the box shows Steve running away from the TNT house as it is exploding!

The top of the box shows a real size image of Steve.

The build is 287 pieces in total and is for ages 8+.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.

- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/21275>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1 to 3, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Steve and TNT Jungle House

Group 1 - Page 5.

Group 2 - Steps 1-15.

Bag 2 - Creeper and TNT Jungle House

Group 3 - Step 16.

Group 4 - Steps 17-25.

Group 5 - Steps 26-31.

Group 6 - Steps 32-41.

Bag 3 - Zombie, TNT, Boat, Bird, Candles, Torches, Bed, Swamp, and Beach.

Group 7 - Page 46.

Group 8 - Steps 42-43.

Group 9 - Steps 44-45 and 1 transparent orange 1x1 plate from Step 46.

Group 10 - Rest of Step 46 and Step 47.

Group 11 - Steps 48-52 and 2 green 1x1 round flower plates from Step 53.

Group 12 - Rest of Step 53 and 3 brown 2x2 bricks from Step 54.

Group 13 - Rest of Step 54 and Steps 55-56.

Group 14 - 1 dark tan 1x1 plate from Step 57.

Group 15 - Rest of Step 57 and Steps 58-66.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Steve

Sub-build 1. Locate 1 purple pair of legs, 1 teal torso printed with a v neck, 1 light brown square head printed with brown hair, eyes, and a mouth, 1 teal sword, 1 brown whip, and 1 orange fish. Assemble your minifigure then attach the sword and whip to his hands. Now attach the fish to the end of the whip! Though LEGO often uses this piece as a whip, in this set, it's used as Steve's fishing rod. Now put him away while we make the TNT house!

Group 2 - TNT Jungle House

Step 1

Vertically place a tan 6x10 plate in front of you. Now vertically place another 1 to the left of the ppp so it is centered vertically.

Step 2

Horizontally place a light grey 2x4 plate on the front 2 rows so it is centered horizontally.

Step 3

Horizontally place a white 2x6 plate on the 2nd and 3rd rows from the back so it is centered horizontally. Now vertically place a dark grey 1x8 plate on the back 8 rows to the left of the ppp. Then repeat symmetrically to the right. Now horizontally place a light grey 1x6 plate in between the front row of the 2 ppp.

Step 4

Vertically place a light grey 1x6 plate on the back left corner so 2 rows overhang to the back. Then place the left column of a light grey 2x2 corner plate in front of the ppp so it looks like the braille letter h. Now horizontally place the leftmost column of a tan 2x16 plate underneath the back 2 rows of overhang.

Step 5

Vertically place a light grey 1x6 plate on the back 6 rows on the 5th column from the right. Now place the right column of a light grey 2x2 corner plate in front of the ppp so it looks like the braille letter j.

Step 6

Vertically place a red 1x4 tile with 2 studs on the back 4 rows on the 2nd column from the left. Then vertically place another 1 on the back 4 rows on the 6th column from the right. Now horizontally place a red 1x2 tile on the 3rd row from the back on the 6th and 7th columns from the left.

Step 7.1

Let's make a part! Vertically place a red 3L double axle connector with a pinhole in front of you so the pinhole faces up. Now insert a yellow 5L axle into the front right-facing axle hole.

Step 7.2

Insert a red 2L axle into the back left-facing axle hole.

Step 7.3

Vertically attach a red 3L double axle connector with a pinhole to the left-facing axle so it is aligned with the previous 3L double axle connector with a pinhole and the pinhole faces up. Then insert a yellow 5L axle into the front left-facing axle hole.

Step 7.4

Let's make 2 identical parts! Horizontally place a red 2x3 plate in front of you. Now vertically place a red 1x2 brick with a pinhole on the leftmost column. Then repeat symmetrically to the right.

Step 7.5

Now you should have 2 identical parts! Horizontally attach the pinholes of 1 part to the left-facing axle. Then repeat symmetrically to the right.

Step 7.6

Vertically attach the thicker side of a black 4L thin lift arm with a thick part to the left-facing axle so the thick part is on the left and the liftarm overhangs to the front. Then repeat symmetrically to the right.

Step 7.7

Horizontally place your part on the back 2 rows starting on the 3rd column from the left.

Step 8

Place a lime green 1x1 round plate on the 3rd row from the back, on the 3rd column from the left. Then place another 1 on the 3rd row from the back, on the 7th column from the right.

Step 9

Place a dark grey 2x2 brick on the 4th and 5th rows from the back so it is centered horizontally. Now vertically place a white 1x2 log brick to the left of the ppp so there is a 2 column gap in between them. Then repeat symmetrically to the right.

Step 10

Vertically place a light grey 1x8 brick on the back left corner. Now vertically place another 1 on the back 8 rows of the 5th column from the right.

Step 11

Place a light grey 2x2 corner brick on the 2nd and 3rd columns from the left on the 4th and 5th rows from the front so it looks like the braille letter d. Then repeat symmetrically to the right.

Step 12

Horizontally place a light grey 2x4 brick on the 2nd and 3rd rows from the front so it is centered horizontally. Now horizontally place a light grey 1x2 masonry brick to the left of the back row of the ppp so the brick grooves face the front. Then repeat symmetrically to the right.

Step 13

Horizontally place a light grey 1x4 tile on the front row so it is centered horizontally. Then horizontally place another 1 behind the ppp.

Step 14

Vertically place a red 1x6 tile on the back left corner. Now place the left column of a red 2x2 tile with 2 studs in front of the ppp so the studs are in the front. Then vertically place a red 1x8 tile on the back 8 rows on the 5th column from the right. Now place the right column of a red 2x2 tile with 2 studs in front of the ppp so the studs are in the front.

Step 15

Horizontally place a red 4x8 plate on the back 4 rows so it is centered horizontally between the 1x6 tiles. Then horizontally place another 1 in front of the ppp.

Building Instructions (Bag 2, Book 1):

Group 3 - Creeper

Step 16

Let's make a part! Let's make a creeper! Vertically place a creeper body in front of you so the side studs face left and right. Now vertically place a green 1x2 tile upright on the left-facing side studs. Then repeat symmetrically to the right. Then place a green square head printed with eyes and a mouth on top so the print faces the front. Now put it away while we continue the build!

Group 4 - TNT Jungle House

Step 17

Let's make 2 identical parts! Horizontally place a red 2x8 plate in front of you. Then horizontally place a white 2x8 brick on top.

Step 18.1

Let's make 4 identical parts! Place a red 2x2 plate in front of you. Then place 2 white 1x1 bricks, 1 to the right of the other, on the back row. Then horizontally place a white 1x2 brick printed with "TNT" on the front row so the print faces the front.

Step 18.2

Now you should have 4 identical parts! Stack 2 parts on the 2 leftmost columns of your previous part so the prints face the front. Then repeat symmetrically to the right.

Step 19

Place a red 2x2 plate on the 2 leftmost columns. Then repeat symmetrically to the right.

Step 20

Horizontally place a transparent 1x4x3 panel on the back row so it is centered horizontally and the wall faces the front.

Step 21

Horizontally place a white 2x8 brick on top.

Step 22

Horizontally place a red 2x8 plate on top.

Step 23

Horizontally place a red 2x3 plate on the 3 leftmost columns. Then repeat symmetrically to the right. Now horizontally place a red 1x2 plate on the front row so it is centered horizontally. Then place a black 2x2 tile with 2 studs behind the ppp so the studs are in the front and it overhangs 1 row to the back.

Step 24

Horizontally place 2 red 2x4 tiles with 2 studs, 1 to the right of the other, on top.

Step 25

Now you should have 2 identical parts! Bring back your main build and orient it so it is horizontal and the 1x4 tiles are in the front. Now vertically place 1 part on the back left corner so the 1x2 overhang faces the right. Then repeat symmetrically to the right, making sure to ignore the 2x4 studs that stick out in the back right corner.

Group 5 - TNT Jungle House

Step 26

Let's make a part! Horizontally place a red 2x8 plate in front of you. Then place a red 2x2 plate on the 2 leftmost columns.

Step 27

Horizontally place a red 1x4 tile with 2 studs on the front row so it is centered horizontally.

Step 28

Place a white 2x2 brick on the 2 leftmost columns.

Step 29.1

Let's make 2 identical parts! Place a red 2x2 plate in front of you. Then place 2 white 1x1 bricks, 1 in front of the other, on the left column. Now vertically place a white 1x2 brick with a bar on the short side on the right column so the bar faces the front.

Step 29.2

Now you should have 2 identical parts! Stack them on the 2 leftmost columns of your previous part so the bars face the front.

Step 30.1

Let's make 5 identical parts! Place a red 2x2 plate in front of you. Then place a white 2x2 brick on top.

Step 30.2

Now you should have 5 identical parts! Place 1 on the 2 leftmost columns. Then stack the rest on the 2 rightmost columns.

Step 31.1

Let's make another part! Horizontally place a red 2x8 plate in front of you. Horizontally place a red 2x3 plate on the 3 rightmost columns. Then repeat symmetrically to the left. Now horizontally place a red 1x2 plate on the front row so it is centered horizontally. Then place a black 2x2 tile with 2 studs behind the ppp so the studs are on the left and 1 row overhangs to the back. Now horizontally place 2 red 2x4 tiles with 2 studs, 1 to the right of the other, on the front 2 rows.

Step 31.2

Horizontally place your part on top of your previous part so it is centered horizontally and the 1x2 overhang faces the back.

Group 6 - TNT Jungle House

Step 32

Let's make a part! Horizontally place a tan 1x4 brick in front of you. Then horizontally place a tan 1x4 plate on top.

Step 33

Horizontally place a white 1x2 plate on top so it is centered horizontally. Then place a tan 1x1 plate to the left of the ppp.

Step 34.1

Let's make 2 identical parts! Horizontally place a white 1x2 log brick in front of you. Then horizontally place a white 1x2 plate on top.

Step 34.2

Now you should have 2 identical parts! Horizontally stack them on top of your previous part so they are centered horizontally.

Step 35

Place a tan 1x1 brick with a bar on the rightmost column so the bar faces the front. Now stack 2 tan 1x1 bricks on top of the ppp.

Step 36

Place a tan 1x1 plate with a clip on the leftmost column so the clip faces the left. Then place a tan 1x1 brick on top. Now place another tan 1x1 plate with a clip on top so the clip faces the left. Then place a tan 1x1 brick on top.

Step 37

Horizontally place a tan 1x4 plate on top.

Step 38

Horizontally place a tan 1x4 tile on top.

Step 39

This is a door! Horizontally attach the clips of your part to the 2 front-facing bars of the previous part so the other bar faces the front.

Step 40

Bring back your main build and place it in front of you so the 1x4 tile is on the front row. Then horizontally place your part on the 3rd and 4th rows from the front so it is centered horizontally and the door opens to the front.

Step 41.1

Let's make a part! Vertically place a red 4x8 plate in front of you. Then place a light grey 4x4 plate on top so 2 columns overhang to the right and it is centered vertically. Now vertically place a red 4x8 plate underneath the 2 rightmost columns so it is centered vertically.

Step 41.2

Vertically place a light grey 1x4 tile on the 3rd column from the left so it is centered vertically. Then repeat symmetrically to the right.

Step 41.3

Place a light grey 2x2 tile with a stud on top so it is centered. Then horizontally place a light grey 1x2 tile in front of the ppp. Then repeat symmetrically to the back.

Step 41.4

Place a light grey 2x2 crate on top so it is centered. Then place a light grey 1x1 pyramid tile inside the ppp. This is gunpowder! Now place a light grey 2x2 tile with a stud on top of the crate.

Step 41.5

Place your part on the back 8 rows to the right of the 2x4 tiles with 2 studs that are on the 2 leftmost columns. Now if you press on the axle connectors that stick out the back-facing sides it breaks off the side walls.

Building Instructions (Bag 3, Book 1):

Group 7 - Zombie

Sub-build 2. Locate 1 purple pair of legs, 1 light blue torso, and 1 green square head printed with eyes and a nose. Assemble your minifigure then put him away while we make the next part!

Group 8 - TNT and Boat

Step 42

Let's make a part! Let's make TNT! Place a black 2x2 round plate in front of you. Then place a red 2x2 plate on top. Now horizontally place a white 1x2 brick printed with "TNT" on the front row so the print faces the front. Then repeat symmetrically to the back. Now place a red 2x2 tile with a stud on top. Now put your TNT away while we make a boat!

Step 43.1

Let's make a part! Let's make a boat! Vertically place a brown 2x4 plate in front of you. Then horizontally place a brown 1x4 plate on the front row so it is centered horizontally. Then repeat symmetrically to the back.

Step 43.2

Vertically place a brown 1x2 plate with 2 side studs sticking up underneath the front left corner so 1 row is exposed to the back and the side studs face the left. Then repeat symmetrically to the back. Then repeat both parts symmetrically to the right.

Step 43.3

Horizontally place a brown 1x4 tile on the front row. Then repeat symmetrically to the back. Now horizontally place 1 upright on the left-facing side studs. Then repeat symmetrically to the right.

Step 43.4

Flip your part over so the upright tiles face left and right. Now horizontally place a dark tan 1x2 plate with a rail on the long side on the 2 leftmost columns on the 2nd row from the front so the rail faces the front. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the back.

Step 43.5

Place 2 transparent blue 2x2 round inverted tiles with a rounded bottom, 1 to the right of the other, on top of the 4 ppp. Now flip it over so it is right side up and place 2 brown paddles next to it! Now put everything away while we make the next part!

Group 9 - Bird and Candle

Step 44.1

Let's make a part! Let's make a bird! Place a tan 1x1 round plate in front of you. Then place a light orange 1x1 plate with a clip on top so the clip faces the right. Now attach a light blue 1x1 tile to the right-facing clip so the tile faces up.

Step 44.2

Place a yellow 1x1 brick with 2 side studs on top so the side studs face the front and back.

Step 44.3

Place a light blue 1x2 tile upright on the front-facing side stud so it is diagonal, and faces the top left, and bottom right. Then repeat symmetrically to the back. Then place a light blue bird head on top so the beak faces the left! Now put your bird away while we make a candle!

Step 45

Let's make a part! Let's make a candle! Place a nougat 2x2 brick in front of you. Then place a nougat 2x2 tile with a stud on top. Now place a short white 1x1 brick on top. Then place a transparent orange candle flame on top so it is horizontal. Now put your candle away while we make another part!

You will have an extra transparent orange 1x1 plate. Save it for later!

Group 10 - Torch and Bed

Step 46

Let's make a part! Let's make a torch! Place a dark brown 1x1 telescope bar in front of you. Then place a transparent yellow 1x1 plate on top. Now place a transparent orange 1x1 plate from group 9 on top.

Step 47.1

Let's make another part! Let's make a bed! Horizontally place a brown 2x6 plate in front of you. Then place a black 2x2 round plate underneath the 2 leftmost columns. Then repeat symmetrically to the right.

Step 47.2

Place a white 2x2 plate on the 2 rightmost columns. Then place a white 2x2 tile on top of the ppp. Now horizontally stack 2 light blue 2x4 plates on the 4 leftmost columns.

Step 47.3

Now put your bed and torch away while we continue the main build!

Group 11 - TNT Jungle House and Swamp

Step 48

Bring back your main build so it is horizontal and the 1x4 tile is on the front row. Then place a green 2x2 tile with a stud on the back 2 rows on the 2 rightmost columns. Now place a brown 2x2x2 crate on the 2 rightmost columns of the 3rd and 4th rows from the front.

Step 49.1

Let's make a part! Horizontally place a green 4x6 plate in front of you. Then place a brown 4x4 corner plate on the 2 rightmost columns so the back 2 rows overhang 2 columns to the right, and the right angle faces the back left. Then place a brown 2x2 brick on the 2 rightmost columns of the front 2 rows. Then place a green 2x2 tile with a stud on top of the ppp.

Step 49.2

Rotate your part so it is vertical and overhangs to the back. Now vertically place the back 2 rows of your part on the back 2 rows on the 3rd and 4th columns from the right.

Step 50

Let's make a part! Horizontally place a transparent blue 6x8 plate in front of you. Then horizontally place a brown 2x6 brick on the 4 rightmost columns so it is centered vertically and overhangs 2 columns to the right.

Step 51

Horizontally place a brown 2x6 brick on the front right corner.

Step 52

Now place a brown 2x2 plate on the 2 rightmost columns on top of the part that overhangs. Then vertically place 2 green 2x4 plates, 1 to the left of the other, on the front 4 rows, to the left of the ppp.

Step 53.1

Place a green 1x1 round flower plate on the 2nd column from the right of the front row. Then place another 1 on the 3rd row from the back, on the 5th column from the left.

Group 12 - Swamp

Step 53

Place a pink 1x1 round flower plate on top of each of the 2 ppp. Now place a brown 2x2 brick on the 2 rightmost columns. Then place a green 2x2 tile with a stud on top of the ppp.

Step 54.1

Let's make another part! Stack 3 brown 2x2 bricks in front of you.

Group 13 - Swamp

Step 54.2

Horizontally place a tan 1x2x1 2/3 brick with 2x2 side studs on the front row so the side studs face the front. Then repeat symmetrically to the back.

Step 54.3

Vertically place a green 1x2 plate with 2x2 side studs hanging down on the left column so the side studs face the left. Then repeat symmetrically to the right.

Step 54.4

Horizontally place a dark green 2x4 brick upright on the 2x2 front-facing side studs so it is centered horizontally. Then repeat symmetrically to the back.

Step 54.5

Vertically place a dark green 2x4 brick upright on the left-facing side studs so 1 row overhangs to the top. Then repeat symmetrically to the right.

Step 54.6

Vertically place a dark green 2x4 brick on top so it is centered vertically. Now place a green 2x2 brick on top of the ppp so it is centered vertically.

Step 54.7

This is a tree! Place it on the front 2 rows on the 3rd and 4th columns from the left so the upright horizontal bricks face the front and back.

Step 55.1

Let's make a part! Place a green 2x2 corner plate in front of you so it looks like the braille letter h. Now place a dark green 1x1 plate underneath the front right stud.

Step 55.2

Place a green 2x2 corner plate underneath the leftmost column so 1 column is exposed to the left and it looks like the braille letter d.

Step 55.3

Place a green 2x2 corner plate on the leftmost column so 1 column overhangs to the left and it looks like the braille letter f. Then place a green 2x2 corner plate underneath the leftmost column so 1 column overhangs to the left and it looks like the braille letter j.

Step 55.4

Place a green 2x2 corner plate on top of the leftmost column so 1 column overhangs to the left and it looks like the braille letter h.

Step 55.5

Place 2 dark green 1x1 plates, 1 in front of the other, underneath the leftmost column. Now horizontally place a dark green 1x2 tile on the front row on the 2nd and 3rd columns from the left. Then horizontally place 1 on the 2 rightmost columns of the back row.

Step 55.6

These are vines! Bring back your previous build with the tree and orient it horizontally and so the 2x2 tile with a stud is on the left. Now rotate your current part 90 degrees clockwise so it is vertical and the horizontal 1x2 part is in the back. Then vertically place the back 2 rows of your part upright on the 2 rightmost columns of front-facing side studs so it hangs down.

Step 56

Bring back your main build and orient it so the door opens to the front. Now horizontally place the 2 leftmost columns of your part on the 3rd and 4th rows from the front of the 2 rightmost columns.

Group 14 - Swamp

There are no instructions in this group. You will have an extra dark tan 1x1 plate. Save it for later!

Group 15 - Swamp and Beach

Step 57.1

Place a lime green 1x1 brick in front of you. Then place a dark tan 1x1 plate from group 14 on top. Now place a lime green 1x1 brick on top.

Step 57.2

Place a lime green 1x1 brick with a side stud on each side on top. Then place a lime green 1x1 plate on top.

Step 57.3

Let's make 4 identical parts! Place a lime green 1x1 plate in front of you. Then vertically place a lime green 1x2 plate on top so 1 row overhangs to the front.

Step 57.4

Now you should have 4 identical parts! Place the back row of 1 part upright on the front-facing side stud so 1 row overhangs to the bottom. Then repeat symmetrically to the back. Now vertically place the back row of 1 part upright on the left-facing side stud so 1 row overhangs to the bottom. Then repeat symmetrically to the right.

Step 57.5

This is sugarcane! Place your part on the 2x2 tile with a stud that is on the 3rd and 4th rows from the front of the 9th and 10th columns from the right.

Step 58

Let's make a part! Let's make the beach! Horizontally place a tan 4x6 plate in front of you. Then vertically place a tan 2x6 brick on the back left corner so 4 rows overhang to the back.

Step 59

Horizontally place a tan 2x4 plate on the front left corner so 2 columns overhang to the left.

Step 60

Vertically place a transparent blue 6x8 plate underneath the 2 leftmost columns so 4 rows are exposed to the front.

Step 61

Horizontally place a tan 2x4 brick on the back 2 rows of the 3rd to 6th columns from the left.

Step 62

Horizontally place the leftmost column of a tan 2x4 tile with 2 studs on the back 2 rows of the 5th column from the left.

Step 63

Place a lime green 1x1 round brick on the 5th column from the left of the 5th row from the front. Then stack 2 more behind the ppp. Now place another 1 to the right of the ppp.

Step 64

Now place the back 4 rows of your part on the front left corner of the main build.

Step 65

Place a tan 2x2 brick on the back 2 rows of the previous part. Now place a tan 2x2 tile with a stud on top of the ppp.

Step 66

Rotate your build 180 degrees. Now place your previous candle part on the back right corner inside the house! It should sit on the 3rd and 4th columns from the right of the 7th and 8th rows from the front. Now vertically place your previous bed part in front of the ppp so the 2x2 tile is in the back.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at: <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 6 LEGO Minecraft Theme kits:

21274 The Warden Encounter

21276 The Creeper

21277 The Pickaxe Mine

21279 The Enderman Tower

21275 The TNT Jungle House

21278 The Pillager Outpost and Ravager
