

## **40863 Easter Egg Basket**

Adapted by John Le and tested by Peter Durieux.

Celebrate the spring season with this LEGO® Easter Egg Basket (40863), a fun Easter activity for kids ages 7 and up. Craft-loving girls and boys will enjoy building this Easter basket toy, which makes for a bright and colorful piece of seasonal decoration for the home. This Easter decor LEGO set comes with 3 pastel Easter eggs toys, a cute chick and 2 spring flowers, making it a great Easter gift and seasonal treat for girls and boys who love play and display sets. They can remove the Easter accessories from the basket using them to play out fun Easter stories before replacing them and displaying the basket around the home.

**EASTER EGG BASKET TOY** – Treat kids ages 7 plus who love making seasonal decorations to this decorative LEGO® Easter Egg Basket (40863) that builds into an eye-catching Easter decor piece for the home.

**SPRING BUILDING SET WITH EASTER FEATURES** – This craft kit includes a chick toy, 3 eggs in pastel shades and 2 spring flowers, making it a fun Easter decorating kit for girls and boys.

**PLAY AND DISPLAY** – Kids enjoy a creative and fun seasonal decor project with this LEGO® Easter basket building kit, which brings some spring color when put out on display.

**FEATURES TO SPARK STORYTELLING** – The chick and LEGO® Easter eggs toys can be removed from the basket making this an ideal toy for girls and boys to imagine fun springtime stories.

**DIMENSIONS** – This 216-piece LEGO® Easter set measures over 3 in. (10 cm) high, 5 in. (14 cm) wide and 2 in. (6 cm) deep.

The front of the box shows a chick and 3 eggs in an egg basket!

The back of the box shows the chick and 2 eggs together in the basket! There is another egg outside it!

The top of the box shows a real size image of a light orange 2x2 round tile.

The build is 216 pieces in total and is for ages 7+.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: [bricksfortheblind.org/help-with-screen-readers](https://bricksfortheblind.org/help-with-screen-readers). Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

**Axles** - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

**Pins** - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

**Technic brick** - a brick which contains one or more holes which accept technic pins.

**Lift-arms** - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

**Gears** - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/40863>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1 to 3, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Egg Basket

Group 1 - Steps 1-18.

Group 2 - Steps 19-23.

Bag 2 - Chick

Group 3 - Steps 24-27 and 1 white 1x2x2 brick with 2x2 side studs from Step 28.

Group 4 - Rest of Step 28, Step 29, and 3 light grey 1x2x2 bricks with 2x2 side studs from Steps 30-31.

Group 5 - Rest of Steps 30-31 and Steps 32-33.

Group 6 - Step 34.

Group 7 - Steps 35-41.

Group 8 - Steps 42-48.

Group 9 - Steps 49-55.

Group 10 - Steps 56-61.

Building Instructions (Bag 3, Book 1):

Bag 3 - Eggs

Group 11 - Step 62.

Group 12 - Step 63 and 1 yellow 1x2x2 brick with side studs on 3 sides from Step 64.

Group 13 - Rest of Step 64, Steps 65-66, and 2 pink 2x2 round tiles from Step 67.

Group 14 - Rest of Step 67 and Steps 68-70.

Group 15 - Step 71.

Group 16 - Step 72 and 1 light grey 1x2x2 brick with side studs on 3 sides from Step 73.

Group 17 - Rest of Step 73, Steps 74-75, and 2 green 2x2 round tiles from Step 76.

Group 18 - Rest of Step 76 and Steps 77-79.

Group 19 - Step 80.

Group 20 - Step 81 and 1 yellow 1x2x2 brick with side studs on 3 sides from Step 82.

Group 21 - Rest of Step 82, Steps 83-84, and 2 light orange 2x2 round tiles from Step 85.

Group 22 - Rest of Step 85 and Steps 86-88.

Let's get to building!

Building Instructions (Bag 1, Book 1):

## Group 1 - Egg Basket

### Step 1

Place a brown 6x6 quarter circle plate in front of you so the curve faces the back left. Then horizontally place a tan 1x4 log brick on the back row so it overhangs 2 columns to the right.

### Step 2

Place a dark brown 6x6 quarter-circle plate underneath the 2 rightmost columns so 5 rows are exposed to the front and the curved edge faces the back right.

### Step 3

Vertically place 1 tan 1x4 log brick on the leftmost column of the front row of the main build so it overhangs 2 rows to the front. Then repeat symmetrically to the right.

### Step 4

Place the back left corner of a dark brown 6x6 quarter-circle plate underneath the front left corner so 4 rows are exposed to the front, 5 columns are exposed to the right, and the curved edge faces the front left. Then repeat symmetrically to the right.

### Step 5

Place 1 lime green 2x2 round plate on top so it is centered vertically and horizontally.

Step 6

Place a tan 4x4 plate with a 2x2 gap on top so it is centered vertically and horizontally.

Step 7

Horizontally place a tan 1x4 log brick on the front row so it is centered horizontally.

Step 8

Place a tan 1x6 curved brick on the back left corner so the curve faces the back left. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the front.

Step 9

Horizontally place a tan 1x4 log brick on the back row so it is centered horizontally. Then repeat symmetrically to the front. Then vertically place 1 on the leftmost column so it is centered vertically. Then repeat symmetrically to the right.

Step 10

Place a tan 1x6 curved brick on the back left corner so the curve faces the back left. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the front.

Step 11

Horizontally place a brown 1x6 plate on the back row so it is centered horizontally.

Step 12

Vertically place a brown 1x4 rounded plate on the leftmost column so it is centered vertically. Then place a tan 1x1 plate with a clip in front of the ppp so the clip faces the left. Now repeat symmetrically to the back. Now repeat everything symmetrically to the right.

Step 13

Place a brown 1x1 round plate on the front left corner. Then repeat symmetrically to the back. Now repeat everything symmetrically to the right.

Step 14

Horizontally place 3 tan 1x2 plates with 2x2 side studs hanging down, 1 to the right of the other, on the front row so together they are centered horizontally and the side studs face the front.

#### Step 15

Place a tan 1x7 curved plate on the back left corner so the curve faces the back left. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the front.

#### Step 16

Horizontally place a tan 1x2 plate on the back row so it is centered horizontally. Then repeat symmetrically to the front. Now vertically place 1 on the leftmost column so it is centered vertically. Then repeat symmetrically to the right.

#### Step 17

Horizontally place a tan 1x4 tile with 2 studs on the back row so it is centered horizontally.

#### Step 18

Place a tan 2x2 round plate upright on the 2 leftmost columns of front-facing side studs. Then repeat symmetrically to the right. Now horizontally place a tan 1x2 plate upright on the top row of front-facing side studs so it is centered horizontally.

### Group 2 - Egg Basket

#### Step 19

Place a light blue 1x2 curved tile upright on the front-facing side studs, below the left column of the ppp so it overhangs 1 row to the bottom and the curve faces the bottom right. Then repeat symmetrically to the right.

#### Step 20

Place a light blue 2x2 round tile upright on the front-facing side studs so it is centered horizontally. Then vertically place a light blue 1x2 plate upright on the leftmost column of front-facing side studs. Then repeat symmetrically to the right.

#### Step 21

Place a light blue 2x2 sloped curved tile upright on the 2 leftmost columns of front-facing side studs so it slopes to the right. Then repeat symmetrically to the right.

#### Step 22.1

Let's make 2 identical parts! Horizontally place a brown 1x4 rounded plate in front of you. Then place a tan 1x3 curved plate underneath the 2 leftmost columns so 2 rows are exposed to the front and the curve faces the back left. Then repeat symmetrically to the right.

#### Step 22.2

Place a brown 1x1 round plate with a handle on the front left corner so the handle faces the front. Then repeat symmetrically to the right.

#### Step 22.3

Place a tan 1x3 curved plate on the 3 leftmost columns so the curve faces the back left. Then repeat symmetrically to the right.

#### Step 22.4

Now you should have 2 identical parts! These are the handles of the basket! Vertically attach the handles of 1 part to the 2 left-facing clips so the studs face up. Then repeat symmetrically to the right.

#### Step 23.1

Let's make 2 identical parts! Place a lime green 1x1 round plate with 3 leaves in front of you so the leaves face the left. Now place a white 1x1 flower on top. Then place a yellow 1x1 round plate on top of the ppp.

#### Step 23.2

Now you should have 2 identical parts! Place 1 part on the front left corner so the leaves face the front left. Then repeat symmetrically to the right.

Building Instructions (Bag 2, Book 1):

#### Group 3 - Chick

#### Step 24

Let's make a chick! Place a tan 3x3 plate in front of you.

#### Step 25

Vertically place 3 light yellow 1x2 rounded plates, 1 to the right of the other, on the back 2 rows.

#### Step 26

Place a yellow 1x1 round plate on the front row so it is centered horizontally.

#### Step 27

Place a light brown 2x2 corner tile on the front left corner so it looks like the braille letter d and overhangs 1 row to the front and 1 column to the left. Then repeat symmetrically to the right. These are the feet of the chick!

#### Step 28.1

Vertically place a white 1x2x2 brick with 2x2 side studs on the back left corner so the side studs face the left.

#### Group 4 - Chick

#### Step 28.2

Horizontally place a light grey 1x2x2 brick with 2x2 side studs on the back right corner so the side studs face the back.

#### Step 29

Place a tan 1x1x3 brick in front of the left column of the ppp. Now place a pink 1x1 round plate on top of the ppp.

#### Step 30.1

Horizontally place the right column of a light grey 1x2x2 brick with 2x2 side studs in front of the ppp so the side studs face the front.

Now you will have 2 extra light grey 1x2x2 bricks with 2x2 side studs. Save them for later!

#### Group 5 - Chick

#### Step 30.2

Vertically place the front row of a white 1x2x2 brick with 2x2 side studs to the right of the ppp so the side studs face the right.

#### Step 31

Horizontally place a light grey 1x2x2 brick with 2x2 side studs from group 4 on the back left corner so the side studs face the back. Now vertically place a white 1x2x2 brick with 2x2 side studs on the leftmost column, in front of the ppp so the side studs face the left. Then vertically place a white 1x2x2 brick with 2x2 side studs on the back right corner so the side studs face the right. Now horizontally place the right column of a light grey 1x2x2 brick with 2x2 side studs from group 4 in front of the ppp so the side studs face the front.

#### Step 32

Place a yellow 3x3 plate on top so it is centered.

#### Step 33

Place a pink 1x1 round plate on the back row so it is centered horizontally. Then horizontally place a white 1x3 plate in front of the ppp so it is centered horizontally. Now place a pink 1x1 round plate in front of the ppp so it is centered horizontally.

#### Group 6 - Chick

#### Step 34

Place a light yellow 1x1 slope tile on the back left corner so it slopes to the back. Then repeat symmetrically to the right. Now repeat both parts symmetrically to the front. Then place a yellow 1x1 round plate on top so it is centered vertically and horizontally.

#### Group 7 - Chick

#### Step 35

Place a yellow 1x1 slope tile on the back row so it slopes to the back. Then repeat symmetrically to the front.

#### Step 36

Place a yellow 1x1 slope tile on the leftmost column so it slopes to the left. Then repeat symmetrically to the right. Then place another 1 in between the 2 ppp so it slopes to the right.

#### Step 37

Let's make a part! Let's make the face! Place a yellow 3x3 plate in front of you. Then vertically place a yellow 1x2 sloped curved tile on the back row so it is centered horizontally and slopes and overhangs to the back.

#### Step 38

Place a white 1x1 round tile printed with a black eye on the back left corner. Then repeat symmetrically to the right.

#### Step 39

Vertically place a light yellow 1x2 rounded plate on the front 2 rows so it is centered horizontally. Then place a pink 1x1 round plate on the 2nd row from the front of the leftmost column. Then repeat symmetrically to the right.

#### Step 40

Place an orange 1x1 double slope tile on the 2nd row from the front so it is centered horizontally and slopes to the front and back.

#### Step 41

Vertically place a yellow 1x2 sloped curved tile on the front left corner so it slopes and overhangs 1 row to the front. Then repeat symmetrically to the right.

#### Group 8 - Chick

#### Step 42

Vertically place a yellow 1x2 sloped curved tile on the front row so it is centered horizontally and slopes and overhangs to the front. Then place an orange 1x1 round plate underneath the front row of the ppp.

#### Step 43

Vertically place your part upright on the front-facing side studs so it is centered horizontally and the 3 1x2 sloped curved tiles are on the bottom.

#### Step 44

Let's make a part! Let's make the side of the chick! Place a yellow 3x3 plate in front of you. Then vertically place a yellow 1x3 sloped curved brick on the back row so it is centered horizontally and slopes and overhangs 2 rows to the back.

#### Step 45

Vertically place a yellow 1x2 sloped curved tile on the back left corner so it slopes and overhangs to the back. Then repeat symmetrically to the right.

#### Step 46

Place an orange 1x1 round plate on the 2nd row from the front so it is centered horizontally. Then place 2 light yellow 1x1 slope tiles, 1 in front of the other, on the rightmost column so they both slope to the back.

#### Step 47

Place a light yellow 1x1 slope tile on top of the 2nd column from the right of the 2nd row from the front so it slopes to the back. Then place a light yellow 2x2 curved corner plate on the front left corner so the curve faces the front left and there is no overhang.

#### Step 48

Vertically place your part upright on the left-facing side studs so the 1x3 sloped curved brick is on top.

#### Group 9 - Chick

#### Step 49

Let's make a part! Let's make another side of the chick! Place a yellow 3x3 plate in front of you. Then vertically place a yellow 1x3 sloped curved brick on the back row so it is centered horizontally and slopes and overhangs 2 rows to the back.

#### Step 50

Vertically place a yellow 1x2 sloped curved tile on the back left corner so it slopes and overhangs to the back. Then repeat symmetrically to the right.

#### Step 51

Vertically place a light yellow 1x2 rounded plate on the front 2 rows so it is centered horizontally.

#### Step 52

Place a yellow 1x1 slope tile on the 2nd row from the front of the leftmost column so it slopes to the back. Then repeat symmetrically to the right.

#### Step 53

Place a yellow 1x1 slope tile on the front left corner so it slopes to the left. Then repeat symmetrically to the right.

#### Step 54

Place 2 yellow 1x1 slope tiles, 1 in front of the other, on the front 2 rows so they both slope to the back.

#### Step 55

Vertically place your part on the back-facing side studs so it is centered horizontally and the 1x3 sloped curved brick is on top.

#### Group 10 - Chick

#### Step 56

Let's make a part! Let's make another side of the chick! Place a yellow 3x3 plate in front of you. Then vertically place a yellow 1x3 sloped curved brick on the back row so it is centered horizontally and slopes and overhangs 2 rows to the back.

#### Step 57

Vertically place a yellow 1x2 sloped curved tile on the back left corner so it slopes and overhangs to the back. Then repeat symmetrically to the right.

#### Step 58

Place an orange 1x1 round plate on the 2nd row from the front so it is centered horizontally. Then place 2 light yellow 1x1 slope tiles, 1 in front of the other, on the leftmost column so they both slope to the back.

#### Step 59

Place a light yellow 1x1 slope tile on top of the 2nd column from the right of the 2nd row from the front so it slopes to the back.

#### Step 60

Place a light yellow 2x2 curved corner plate on the front right corner so the curve faces the front right and there is no overhang.

#### Step 61

Vertically place your part upright on the right-facing side studs so the 1x3 sloped curved brick is on top. Now put your chick away while we make the eggs!

Building Instructions (Bag 3, Book 1):

#### Group 11 - Eggs

#### Step 62

Place a white 2x2 plate in front of you. Then vertically place a light grey 1x2x2 brick with side studs on 3 sides on the right column so the 2x2 side studs face the right.

#### Group 12 - Eggs

#### Step 63

Vertically place a yellow 1x2x2 brick with side studs on 3 sides on the left column so the 2x2 side studs face the left.

#### Step 64.1

Horizontally place a yellow 1x2x2 brick with side studs on 3 sides on the front row so the 2x2 side studs face the front.

### Group 13 - Eggs

#### Step 64.2

Horizontally place a white 1x2x2 brick with side studs on 3 sides on the back row so the 2x2 side studs face the back.

#### Step 65

Place a white 2x2 plate upright on the front-facing side studs so it is centered vertically. Then repeat symmetrically to the back. Now place another 1 upright on the left-facing side studs so it is centered vertically. Then repeat symmetrically to the right.

#### Step 66

Horizontally place a magenta 1x2 slope tile upright on the bottom row of front-facing side studs so it slopes down. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the bottom row of left-facing side studs so it slopes down. Then repeat symmetrically to the right.

#### Step 67.1

Place a pink 2x2 round tile upright on the bottom 2 rows of front-facing side studs. Then repeat symmetrically to the back.

### Group 14 - Eggs

#### Step 67.2

Place a light magenta 2x2 round tile upright on the bottom 2 rows of left-facing side studs. Then repeat symmetrically to the right.

#### Step 68

Horizontally place a magenta 1x2 slope tile upright on the top row of front-facing side studs so it slopes up. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the top row of left-facing side studs so it slopes up. Then repeat symmetrically to the right.

#### Step 69

Place a light blue 2x2 round tile with a stud on top.

#### Step 70

Place a white 3x3 dish on top so it is centered. Now put your egg away while we make another!

#### Group 15 - Eggs

#### Step 71

Place a white 2x2 plate in front of you. Horizontally place a yellow 1x2x2 brick with side studs on 3 sides on the back row so the 2x2 side studs face the front.

#### Group 16 - Eggs

#### Step 72

Horizontally place a white 1x2x2 brick with side studs on 3 sides on the front row so the 2x2 side studs face the front.

#### Step 73.1

Vertically place a light grey 1x2x2 brick with side studs on 3 sides on the left column so the 2x2 side studs face the left.

#### Group 17 - Eggs

#### Step 73.2

Vertically place a yellow 1x2x2 brick with side studs on 3 sides on the right column so the 2x2 side studs face the right.

#### Step 74

Place a white 2x2 plate upright on the front-facing side studs so it is centered vertically. Then repeat symmetrically to the back. Now place another 1 upright on the left-facing side studs so it is centered vertically. Then repeat symmetrically to the right.

#### Step 75

Horizontally place a lime green 1x2 slope tile upright on the bottom row of front-facing side studs so it slopes down. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the bottom row of left-facing side studs so it slopes down. Then repeat symmetrically to the right.

#### Step 76.1

Place a green 2x2 round tile upright on the bottom 2 rows of front-facing side studs. Then repeat symmetrically to the back.

#### Group 18 - Eggs

#### Step 76.2

Place a light green 2x2 round tile upright on the bottom 2 rows of left-facing side studs. Then repeat symmetrically to the right.

#### Step 77

Horizontally place a lime green 1x2 slope tile upright on the top row of front-facing side studs so it slopes up. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the top row of left-facing side studs so it slopes up. Then repeat symmetrically to the right.

#### Step 78

Place a light blue 2x2 round tile with a stud on top.

#### Step 79

Place a white 3x3 dish on top so it is centered. Now put your egg away while we make another!

#### Group 19 - Eggs

#### Step 80

Place a white 2x2 plate in front of you. Horizontally place a yellow 1x2x2 brick with side studs on 3 sides on the back row so the 2x2 side studs face the back.

#### Group 20 - Eggs

#### Step 81

Horizontally place a white 1x2x2 brick with side studs on 3 sides on the front row so the 2x2 side studs face the front.

#### Step 82.1

Vertically place a light grey 1x2x2 brick with side studs on 3 sides on the left column so the 2x2 side studs face the left.

#### Group 21 - Eggs

#### Step 82.2

Vertically place a yellow 1x2x2 brick with side studs on 3 sides on the right column so the 2x2 side studs face the right.

#### Step 83

Place a white 2x2 plate upright on the front-facing side studs so it is centered vertically. Then repeat symmetrically to the back. Now place another 1 upright on the left-facing side studs so it is centered vertically. Then repeat symmetrically to the right.

#### Step 84

Horizontally place an orange 1x2 slope tile upright on the bottom row of front-facing side studs so it slopes down. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the bottom row of left-facing side studs so it slopes down. Then repeat symmetrically to the right.

#### Step 85.1

Place a light orange 2x2 round tile upright on the bottom 2 rows of front-facing side studs. Then repeat symmetrically to the back.

## Group 22 - Eggs

### Step 85.2

Place a yellow 2x2 round tile upright on the bottom 2 rows of left-facing side studs. Then repeat symmetrically to the right.

### Step 86

Horizontally place an orange 1x2 slope tile upright on the top row of front-facing side studs so it slopes up. Then repeat symmetrically to the back. Now horizontally place another 1 upright on the top row of left-facing side studs so it slopes up. Then repeat symmetrically to the right.

### Step 87

Place a light blue 2x2 round tile with a stud on top.

### Step 88

Place a white 3x3 dish on top so it is centered. Now you can place all 3 eggs and your chick inside the basket!

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at [info@bricksfortheblind.org](mailto:info@bricksfortheblind.org) and together we will make it happen!

We hope you enjoyed building your LEGO set! Bricks for the Blind are able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>. Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

Please [sign up](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

At the end of the instruction booklets, there are no ads.
