Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (https://www.lego.com/en-us/service/buildinginstructions/42615) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 4 bags labeled 1 to 4, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder!

LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Group 3 - Arch

Step 1

Horizontally place a green 2x16 plate in front of you.

Step 2

Place a yellow 1x1 round flower plate in the front left and back right corners.

Step 3

Horizontally place 2 light purple 1x2x3 slope bricks, 1 in front of the other, on the 2nd and 3rd columns from the left so they slope to the left. Then repeat symmetrically to the right.

Group 4 - Arch

Step 4

Place a green 1x1 plate with 3 leaves in the back left corner so the leaves face the back left. Then place another 1 in the front right corner so the leaves face the front right. Now place a pink 1x1 round flower plate on each of them.

Step 5

Horizontally place a green 2x3 tile to the right of the left 1x2x3 slope bricks. Then repeat symmetrically to the right.

Step 6

Place 2 green 2x2 sloped curved tiles, 1 to the right of the other, on the front row in between the 2x3 tiles so they slope and overhang to the front. Then repeat symmetrically to the back.

Step 7.1

Let’s make 2 identical parts! Horizontally place a pink 1x2 plate in front of you. Then horizontally place a light yellow 1x2 brick on top. Now horizontally place another pink 1x2 plate on top. Then horizontally place a white 1x2 plate with a bar on the long side on top so the bar faces the back.
