

## **42623 Beach Water Scooter**

Adapted by John Le and tested by Natalie Charbonneau.

This lifeguard LEGO set comes with 2 water scooter toy accessories so kids can role-play the story. Leo is on lifeguard duty and uses binoculars to keep watch over the ocean. It's the perfect viewpoint for spotting dolphins too. Later he joins his friend Candi and the friends race on their water scooters. Kids will love the little details, like the cheeky crab who likes to raid the cooler for ice pops!

Lifeguard toy building set with 2 mini-dolls and a dolphin character – Encourage imaginative play with this LEGO® Friends Beach Water Scooter toy for kids, which comes with accessories for role play.

Includes 2 water scooter toys – This lifeguard toy set comes with LEGO® Friends characters Leo and Candi, plus 2 water scooters so kids can create lots of Heartlake City beach stories for their friends.

Bring the story to life – This building toy for kids comes with accessories, including sunscreen, binoculars, a seashell, a starfish, a life vest, and a life ring, plus a crab who loves to steal ice pops.

Measurements – 84-piece set with a lifeguard tower measuring over 4.5 in. (11 cm) high, 2.5 in. (6 cm) wide and 3.5 in. (9 cm) deep.

The front of the box shows the lifeguard tower in the back. In the front, Candi and Leo are racing their scooters to beat the dolphin!

The back of the box shows Leo sitting the lifeguard tower waving at Candi who is trying to protect her popsicles from the crab that's trying to eat them!

The top of the box shows a 1 to 1 scale of the Leo minifigure!

The build is 84 pieces in total and is for ages 5+.

Bag 1 includes the pieces for the minifigures, scooters, life guard tower, and dolphin.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: [bricksfortheblind.org/help-with-screen-readers](https://bricksfortheblind.org/help-with-screen-readers). Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.

- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/42623>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

#### Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 1 bag labeled 1, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Minifigures, Beach Scooters, Life Guard Tower, and Dolphin

Group 1 - Pages 5-6.

Group 2 - Page 7.

Group 3 - Pages 8-16.

Group 4 - Pages 17-26.

Group 5 - Pages 27-36.

Group 6 - Pages 37-46.

Group 7 - Pages 47-50.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Leo

Steps 5 to 6

Locate 1 light brown pair of legs printed with long yellow shorts and light blue shoes, 1 light brown torso printed with a white and red shirt with a whistle around his neck, 1 orange lifevest, 1 light brown head printed with light brown eyes, and a smile on his face, and 1 brown hair. Assemble your minifigure and make sure the lifevest is in the front!

Group 2 - Candi

Step 7

Locate 1 tan pair of legs printed with light blue shorts and light green shoes, 1 tan torso printed with a light blue top, 1 orange lifevest, 1 tan head printed with grey eyes and a smile on her face, 1 light brown hair, 1 transparent light blue 1x1 round brick, 1 white round 1x1 tile with a bar, and 1 light grey dolphin. Assemble your minifigure then put the tile with a bar on top of the brick to make a drink. Put the drink in her hand then put the dolphin by her side!

Group 3 - Jetski 1

Step 8

Locate 1 teal 2x3 plate and place it horizontally in front of you.

Step 9

Locate 1 red 1x2 plate and vertically place it on the leftmost column of the plate.

Step 10

Locate 1 red 4x6 jetski base with a curved bottom. Horizontally place it underneath the 2x3 plate so the 1x2 plate sits in the gap of the jetski base on the 2nd column from the left. The front or short end of the jetski should face the right.

#### Step 11

Locate 1 white 2x2 plate with extended angled sides. Horizontally place it on the 2 rightmost columns so the angled sides are on the left and follow the curve of the jetski base.

#### Step 12

Locate 1 teal 1x2 plate with a bar. Vertically place it on the left column of the 2x2 plate with angled sides so the bar faces the left.

#### Step 13

Locate 1 teal 2x2 sloped curved tile. Place it on the 2 rightmost columns so it slopes to the right.

#### Step 14

Locate 1 light grey 2x2 tile with angled sloped curved sides. Place it in the center of the leftmost column of the build so it is centered vertically and the angled sides face and overhang to the left.

#### Step 15

Locate 2 white 1x2 slope grill tiles. Horizontally place them in the front left and back left corners of the build so they slope to the right.

#### Step 16

Locate 1 black mechanical arm and 1 black handlebar. Attach the mechanical arm to the bar on the right side so it goes to the right and overhangs over the sloped curved tile. Then attach the handlebar to the arm so the back of the handlebar faces the left.

#### Group 4 - Jetski 2

#### Step 17

Locate 1 yellow 2x3 plate and place it horizontally in front of you.

#### Step 18

Locate 1 red 1x2 plate and vertically place it on the leftmost column of the plate.

#### Step 19

Locate 1 red 4x6 jetski base with a curved bottom. Horizontally place it underneath the 2x3 plate so the 1x2 plate sits in the gap of the jetski base on the 2nd column from the left. The front or short end of the jetski should face the right.

#### Step 20

Locate 1 white 2x2 plate with extended angled sides. Horizontally place it on the 2 rightmost columns so the angled sides are on the left and follow the curve of the jetski base.

#### Step 21

Locate 1 yellow 1x2 plate with a bar. Vertically place it on the left column of the 2x2 plate with angled sides so the bar faces the left.

#### Step 22

Locate 1 yellow 2x2 sloped curved tile. Place it on the 2 rightmost columns so it slopes to the right.

#### Step 23

Locate 1 light grey 2x2 tile with angled sloped curved sides. Place it in the middle of the leftmost column of the build so the angled sides face the left.

#### Step 24

Locate 2 white 1x2 slope grill tiles. Horizontally place them in the front left and back left corners of the build so they slope to the right.

#### Step 25

Locate 1 black mechanical arm and 1 black handlebar. Attach the mechanical arm to the bar on the right side so it goes to the right and overhangs over the sloped curved tile. Then attach the handlebar to the arm so the back of the handlebar faces the left.

#### Step 26

Put your minifigures on the jetskis so they can ride with the dolphin! Now put them aside while we build a flag and the lifeguard tower!

#### Group 5 - Flag and Lifeguard Tower

#### Step 27.1

Locate 1 teal 4x4 round plate and place it in front of you.

#### Step 27.2

Locate 1 yellow 2x2 dome brick. Place it in the center of the plate.

#### Step 27.3

Locate 1 white bar and 1 red flag. Attach the flag to the end of the bar then insert the bar into the dome brick. Now put this aside while we build the lifeguard tower!

#### Step 28

Locate 1 tan 8x8 plate with a rounded side and 1 white 1x1 poop. This isn't a poop, it is actually a seashell! Place the plate in front of you so the rounded side faces the left. Now place the seashell on the back stud of the leftmost column.

#### Step 29

Locate 2 teal slanted supports on a 2x4 tile. Horizontally place 1 in front of the other, to the right of the seashell so they are centered vertically and slant to the right. There should be 3 free columns to the right.

#### Step 30

Locate 1 yellow 2x2 box. Place it in front of the right 2 columns of the supports you previously placed.

#### Step 31

Locate 1 teal 1x4 tile with 2 studs and 1 transparent blue popsicle. Put the popsicle in the yellow box then vertically place the tile to the right of the supports.

#### Step 32

Locate 2 orange 1x1 round plates and 1 orange 1x2 plate with a horizontal bar. Place the 1x1 plates in the back left and front left corners of the supports. Then vertically place the 1x2 plate in between them so the bar overhangs to the left.

#### Step 33

Locate 1 orange 1x2 plate with 2x2 side studs. Vertically place it to the right of the 1x2 plate with a bar so the side studs face the right.

#### Step 34

Locate 2 tall light green 1x1 bricks. Place them to the right of the front and back rows of the vertical 1x4 tile with 2 studs.

#### Step 35

Locate 1 white 2x6 plate with a rounded side. Vertically place it to the right of the tall bricks so it overhangs to the right and the rounded side is on the left and is centered.

#### Group 6 - Lifeguard Tower

#### Step 36

Locate 1 light blue 4x8 plate with a rounded side. Vertically place it underneath the overhang on the right so it is centered and the round side is on the right.

#### Step 37

Locate 1 yellow 1x1 star, 2 transparent 1x1 slope tiles, and 2 transparent light blue 1x2 sloped curved tiles. Place the star on the 4x8 round plate on the front stud of the 2nd column from the right. Then skip 2 studs behind it and place a 1x1 slope tile so it slopes to the right. Then horizontally place a 1x2 sloped curved tile on the 2nd stud from the front on the 3rd column from the right so it sits on the white 2x6 plate and slopes to the right. Then place a 1x1 tile behind it so it slopes to the right. Then skip 1 stud behind it, and horizontally place another 1x2 sloped curved tile so it sits on the white 2x6 plate and slopes to the right. These are waves from the ocean!

#### Step 38

Locate 1 orange 1x2 plate with a horizontal bar and 1 light grey 1x2 plate with a vertical bar. Horizontally place the 1x2 plate with a horizontal bar on top of the front right corner of the support and tall 1x1 brick so the bar faces the front. Then horizontally place the 1x2 plate with a vertical bar on the back right corner of the support and 1x1 tall brick so the bar faces the back.

#### Step 39

Rotate your build 90 degrees clockwise so the waves are in the front! Locate 1 teal 2x2 brick and 1 white 2x2 round tile printed with a red and white rescue ring buoy. Place the tile on top of the 2x2 brick. Then place it upright on the front-facing side studs in between the 2 tall 1x1 bricks.

#### Step 40

Locate 2 light purple 2x4 plates. Vertically place them on top of the 2 1x2 plates with bars so the back corners of the plates are on top of the round 1x1 plates. They should overhang in the front.

#### Step 41

Locate 1 light green 1x1 round brick. Place it on the back left corner of the left 2x4 plate.

#### Step 42

Locate 1 white 1x2 brick, 1 white 2x2 tile, and 1 white 1x2 panel with a long wall and middle wall. Horizontally place the 1x2 brick to the right of the round brick. Then place the 2x2 tile in front of it. Then horizontally place the panel in front so the long wall faces the front.

#### Step 43

Locate 2 light green 1x1 round bricks. Place them in the front right corner and back right corner of the right 2x4 plate.

#### Step 44

Locate 1 white 1x2 sloped curved brick, 1 teal 1x4 tile with 2 studs, and 1 teal 1x1 tile. Place the teal tile on top of the round brick in the back left corner. Then horizontally place the 1x2 brick to the right so it slopes to the front. Then vertically place the 1x4 tile to the right so there is no overhang.

#### Step 45

Locate 1 white 1x1 brick printed with a yellow and orange sun, 1 light blue 1x1 round tile, and 1 yellow pair of binoculars. Place the tile on top of the brick to make a bottle of sunblock! Then place it on the back stud of the 1x4 tile so the print faces the front. Ask a sighted person to make sure it is oriented correctly! Then place the binoculars in the front stud of the 1x4 tile so the larger circles face the front.

#### Step 46

Locate 1 light grey ladder with 7 rungs and 2 clips. Rotate your build 90 degrees counterclockwise so the bar faces the front. Now vertically attach the clips of the ladder to the horizontal bar and push it so it is all the way down.

### Group 7 - Lifeguard Tower

#### Step 47

Let's make an umbrella now! Locate 1 large pink dish with 4 studs and 1 teal 2x2 round plate. Place the dish on top of the plate so it is centered.

#### Steps 48 to 49

Locate 1 yellow long bar with a short and long end and 1 bar holder with a clip. Insert the long end of the bar into the barholder. Then insert the dish into the short end of the bar. Now clip your umbrella build to the bar that is on the left-facing side of the build.

#### Step 50

Rotate your build so the ladder is facing the back! Locate 1 red crab and 1 transparent light blue popsicle. Put the popsicle in the crab's left hand. Place the crab on the right stud of the front row of the build. Orient your crab diagonally so it is facing the front left!

Thank you so much for building this set!

Visit [bricksfortheblind.org](https://bricksfortheblind.org) for more accessible instructions and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at: <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 5 LEGO Friends Theme kits:

42624 Cozy Cabins

42630 Heartlake City Water Park

42622 Adventure Camp Archery Range

42618 Heartlake City Café

42631 Adventure Camp Tree House
