

60456 Police Boat Chase

Adapted by John Le and tested by Jolene Nemeth.

Budding everyday heroes will love this LEGO® City Police Boat Chase (60456) playset. Perfect for builders aged 6 and up, this set features a toy police boat with twin outboard engines and an onboard holding cell, plus a crook's power dinghy. Kids can float both boats on water and dive into exciting police-chase adventures with 2 police officers, a crook, a snappy shark and a stolen ruby!

Your City, No Limits! LEGO City playsets offer action-packed build-and-play adventures for limitless creative fun. Add this LEGO police set to others (sold separately) from the LEGO City range for even bigger adventures! Set contains 264 pieces.

Police boat chase playset for everyday heroes – Kids can dive into an ocean of action-packed crook-catching adventures with the LEGO® City Police Boat Chase set for ages 6 and up.

What's in the box? – Everything kids need to build a toy police boat and crook's power dinghy, plus 2 police officer minifigures, a crook minifigure and a shark figure.

Features and functions – Kids can seat 2 officer minifigures in the police boat's cockpit, lock the crook in its cell and float both the crook's getaway dinghy and police boat for exciting water play.

Minifigure accessories – This kids' building set comes with fun LEGO® accessories, including a toy ruby, handcuffs, flashlight, chain and life buoy.

Dimensions – The police patrol boat in this 264-piece building set measures over 4.5 in. (11 cm) high, 12 in. (31 cm) long and 3 in. (8 cm) wide.

The front of the box shows a police boat chasing after a prisoner on a dinghy! The prisoner better hope the police catch him before the shark behind him does!

The back of the box shows the robber in handcuffs on the police boat. The police boat is towing his dinghy while the shark is following closely behind them!

The top of the box shows a real size image of the prisoner.

The build is 264 pieces in total and is for ages 6+.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back

- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

A note on LEGO Technic™ part names. These parts are somewhat different from regular LEGO bricks. Here are some definitions in case the builder or helper is not familiar with LEGO Technic™.

Axles - An axle is a connector which has an X shaped cross-section. Because their cross section is not round, anything connected to an axle using an axle-hole will rotate with that axle. Axles are longer than they are wide, and the length of an axle corresponds with how many bricks long it is. Aka a 3L axle is three bricks long. Axles come in a variety of lengths, with a 2L axle being the shortest available. They may be combined with pins, or have circular stops on them. A stop prevents the axle from sliding through an axle-hole at a specific point on the axle.

Pins - A pin is a connector which has a circular cross section and a flanged notch out of one or both ends. This flanged notch allows them to click into bricks with a pin-hole. Pins come with and without friction ridges, which are small bumps on the pin which prevent them from rotating freely. For standard pins, black is a high friction pin, and gray is a low friction pin. A standard length pin is two brick lengths long, with a stop in the middle. This prevents a brick from being pushed from one side of the pin to the other. A 1L pin is one brick long and still retains the stop, however it also includes a hollow stud at the other end. A 3L pin is three bricks long, and only contains a stop at one side, allowing two bricks to be pushed onto the other side of the pin. Pins may also have one side which is an axle.

Technic brick - a brick which contains one or more holes which accept technic pins.

Lift-arms - A lift-arm is a basic structural element, similar to a brick or a plate, but usually without any studs. It is a beam with rounded ends and with holes in it, with the same spacing as the studs on a LEGO brick. lift-arms come in a variety of lengths, including a 1x1 lift-arm which looks like a cylinder. Thick lift-arms are as wide as a LEGO brick, and thin lift-arms are half as wide as a LEGO brick, but not the same thickness as a LEGO plate! The holes in a lift-arm arm may accept axles or pins. They also come in a variety of shapes, including tees, ells and triangles.

Gears - A gear is a functional element. They are typically discs with teeth on the outside, there are also worm gears which look like a spiraling cylinder! Gears connected by axles transmit or even transform rotational motion!

Axle and Pin Connectors - These elements are typically smaller than lift-arms and are used to connect some combination of pins or axles. They might have pins or axles, as well as axle or pin-holes. They have a lot of different angle combinations! The simplest just connects two axles or pins together in a straight line.

Bushes/Bushings - LEGO Technic™ uses bushes largely as spacers, but they also can reduce friction between rotating parts, or can form useful elements such as handles. Bushes are typically light gray, generally cylindrical, and have an axle-hole running through the middle. They have a flange at the front and back to make them easier to pull on and off.

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/60456>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1 to 3, 2 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Bag 1 - Prisoner, Shark, Diamond, and Dinghy

Group 1 - Pages 5-6.

Group 2 - Page 7.

Group 3 - Steps 1-11.

Group 4 - Steps 12-13 and 1 white 2L curved axle connector from Step 14.

Group 5 - Rest of Step 14 and Steps 15-18.

Bag 2 - Police Officers and Police Boat

Group 6 - Left Minifigure on Page 3.

Group 7 - Right Minifigure on Page 3.

Group 8 - Steps 1-16.

Group 9 - Steps 17-22.

Group 10 - Steps 23-35.

Group 11 - Steps 36-45.

Bag 3 - Police Boat

Group 12 - 1 transparent green 1x1 round plate from Step 46.

Group 13 - Rest of Step 46 and Steps 47-55.

Group 14 - Steps 56-67.

Group 15 - Steps 68-72.

Group 16 - Steps 73-78.

Group 17 - Steps 79-82.

Group 18 - Steps 83-87.

Group 19 - Steps 88-93 and 1 transparent green 1x1 round plate from Step 94.

Group 20 - Rest of Step 94 and Steps 95-106.

Group 21 - Steps 107-111 and 1 transparent blue 1x2 tile from Step 112.

Group 22 - Rest of Step 112 and Step 113.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Prisoner and Shark

Sub-build 1. Locate 1 orange pair of legs, 1 orange torso printed with a jumpsuit and black and white inner shirt, 1 yellow head printed with eyes, lips, a light grey beard, and 1 light grey hair. Assemble your minifigure then put him aside while we make a shark!

Sub-build 2. Horizontally place a light grey shark body in front of you so the tail faces the left, and the top fin slopes to the right. Then vertically attach a light grey shark head printed with 2 eyes to the right side so the tip faces the right and the flat part of the shark nose faces up. Now put it away while we make the diamond!

Group 2 - Diamond

Sub-build 3. Place a dark green 2x2 round plate in front of you. Then place a gold 1x1 round plate with a hollow stud on top so it is centered. It should be placed in between the 4 studs. Now place a transparent pink diamond on top of the ppp. Then place a transparent 2x2x2 dome on top of the ppp.

Group 3 - Dinghy

Step 1

Horizontally place a sand green dinghy in front of you so the tip faces the right.

Step 2

Vertically place a light grey 1x2 plate with 2x2 side studs hanging down on the leftmost column so it is centered vertically and the side studs face the left.

Step 3

Vertically place a black 1x4 double sloped curved tile on the leftmost column so it is centered vertically.

Step 4

Horizontally place a dark grey 1x2 rounded plate upright on the bottom row of left-facing side studs. Then horizontally place a dark orange 1x2 plate with a bar on the long side upright above the ppp so the bar faces up.

Step 5

Place a light grey 2x2 sloped curved brick with 2 studs upright on the left-facing 2x2 side studs so it slopes up. Then horizontally place a dark grey 1x2 rounded plate upright on the ppp.

Step 6

Horizontally place a black 1x3 tile on the front row of the 3 leftmost columns of studs. Then repeat symmetrically to the back.

Step 7

Vertically place a black 2x4 trapezoid plate to the right of the 2 ppp so it is centered vertically and the short side faces the right.

Step 8

Vertically place a dark grey 1x2 tile with an upright horizontal bar on the leftmost column so it is centered vertically and slopes to the right.

Step 9

Vertically place a black 1x2 steering wheel to the right of the ppp so it is centered vertically, there is a 2 column gap in between them, and the wheel faces the left. Then vertically place a dark orange 1x2 slope tile to the right of the ppp so it slopes to the right.

Step 10

Insert the bar of a black 1x1 round plate with a horizontal bar into the rightmost stud so it is centered vertically and the stud faces the right. Then place a transparent 1x1 round tile upright on the right-facing side stud of the ppp.

Step 11

Let's make a part! Place a red 2L curved axle connector in front of you so the holes face the front and the right. Then insert a black 2L axle into the front-facing axle hole.

Group 4 - Dinghy

Step 12

Attach a white 2L curved axle connector to the front-facing axle so the other axle hole faces the right.

Step 13

Insert a black 2L axle into each of the 2 right-facing axle holes.

Step 14.1

Let's make a part! Place a white 2L curved axle connector in front of you so the holes face the front and the left.

Group 5 - Dinghy

Step 14.2

Insert a black 2L axle into the front-facing axle hole of the ppp. Then attach a red 2L curved axle connector to the front-facing axle so the other axle hole faces the left. Now vertically attach the 2 left-facing holes of your part to the 2 right-facing axles of your previous part! This is a floatation device!

Steps 15 to 16

Thread a dark grey chain through the hole of your part then place 1 end of the chain on top of the other!

Step 17

Orient your part so the ends of the chain are on the right. Now insert a light grey claw into the anti-stud of the ppp so the claw hands face left and right.

Step 18

Attach the claw of your part to the leftmost top-facing bar of the main build so it is centered vertically and the float overhangs to the left. Now put everything away while we make the next part!

Building Instructions (Bag 2, Book 2):

Group 6 - Police Officer

Sub-build 4.1. Locate 1 dark blue pair of legs, 1 light blue torso printed with a dark grey belt, a badge, and a pocket, 1 orange life vest, 1 yellow head printed with eyes, lips, and transparent orange glasses, and 1 brown hair. Assemble your minifigure then put her in front of you.

Sub-build 4.2. Let's make a part! Place a white helmet in front of you so the opening faces the front. Now attach a transparent visor to it! You can switch this with her hair if you like! Now put them away while we make another minifigure!

Group 7 - Police Officer

Sub-build 5.1. Locate 1 dark blue pair of legs, 1 neon yellow torso printed with a vest and a dark blue badge, 1 orange life vest, 1 yellow head printed with eyes, lips, and a brown mustache, and 1 black hair. Assemble your minifigure then put him in front of you.

Sub-build 5.2. Let's make a part! Place a white helmet in front of you so the opening faces the front. Now attach a transparent visor to it! You can switch this with his hair if you like! Now put them away while we make the police boat!

Group 8 - Police Boat

Step 1

Horizontally place a dark blue and light grey 10x34 boat in front of you so the tip faces the left.

Step 2

Horizontally place a tan 2x4 tile on the 8th - 11th columns from the left so it is centered vertically.

Step 3

Horizontally place a light grey 1x2x3 brick on the 10th and 11th columns from the left of the front row. Then repeat symmetrically to the back.

Step 4

Place a short light grey 1x1 brick on the left column of the ppp. Then place a dark blue 1x1 round tile to the right of the ppp. Now repeat both parts symmetrically to the front.

Step 5

Let's make a part! Let's make the helm! Place a dark grey 6x6 plate in front of you.

Step 6

Vertically place a tan 1x6 brick underneath the leftmost column. Then repeat symmetrically to the right.

Step 7

Vertically place a tan 1x6 brick on the leftmost column.

Step 8

Horizontally place a silver 1x2 grill tile on the front row on the 2nd and 3rd columns from the left. Then repeat symmetrically to the back. Now vertically place a light grey 1x2 brick with a round side on the 2nd column from the left so it is centered vertically and the round side faces the right.

Step 9

Vertically place 2 nougat 1x3 jumper plates, 1 to the right of the other, on the front 3 rows of the 2nd and 3rd columns from the right. Then repeat symmetrically to the back.

Step 10

Place a light grey 2x2 round brick with a pinhole on the 2 leftmost columns so it is centered vertically and the pinhole faces the right. Then insert a white 1L pin with a stud into the right-facing pinhole of the ppp so the stud faces the right. Now place a black steering wheel upright on the right-facing side stud.

Step 11

Vertically place a tan 1x2 log brick on the front left corner. Then repeat symmetrically to the back.

Step 12

Vertically place a nougat 1x6 plate on the leftmost column.

Step 13

Vertically place a light grey 1x2 tile with an upright horizontal bar on the front 1x3 jumper plate that is on the 3rd column from the right so it slopes to the left. Then repeat symmetrically to the back.

Step 14

Place your part on the 12th to 17th columns from the left so it is centered vertically and the steering wheel faces the right.

Step 15

Horizontally place a dark grey 1x4 tile on the 2nd - 5th columns from the left of the front row. Then repeat symmetrically to the back.

Step 16

Vertically place a dark grey 1x8 plate to the right of the 2 ppp so it is centered vertically.

Step 17

Horizontally place a dark grey 1x4 plate on the front row to the right of the ppp. Then repeat symmetrically to the back.

Step 18

Vertically place a light grey 1x2 plate with 2 side studs hanging down on the column to the left of the 2 ppp so it is centered vertically and the side studs face the right. Then vertically place a light grey 1x2 plate with a clip on the long side in front of the ppp so the clip faces the left and the clip hands face up and down. Then repeat symmetrically to the back.

Step 19

Horizontally place a dark blue 1x2 rounded plate upright on the 2 right-facing side studs from the previous step. Then place 2 light grey 1x1 round tiles printed with compasses, 1 in front of the other, upright on the ppp.

Step 20

Place a yellow 1x1 quarter circle tile on the front row in front of the 1x2 plate with a clip that is on the 12th column from the left so the curve faces the front left. Then horizontally place a yellow 1x3 plate to the right of the ppp. Now repeat both parts symmetrically to the back.

Step 21

Vertically place a black 1x2 plate with a stud and an upright clip to the right of the ppp so the clip is in the back and sits on the edge of the boat. Then repeat symmetrically to the front.

Step 22

Vertically place a white 1x4 tile with 2 studs on the 12th column from the left so it is centered vertically. Then place the left column of a white 2x2 corner tile with a cutoff corner in front of the ppp so the cutoff corner faces the front left. Then repeat symmetrically to the back.

Group 10 - Police Boat

Step 23

Horizontally place a white 1x3 plate to the right of the front row of the ppp. Then repeat symmetrically to the back.

Step 24

Horizontally place a black 2x4 brick on the back 2 rows to the right of the 1x1 round tile that is to the right of the ppp. Then repeat symmetrically to the front. Now place a red 2x3 sloped curved brick in between the 3 leftmost columns of the 2 ppp so it is centered vertically and slopes to the right.

Step 25

Place a black 2x2 double slope brick to the right of the ppp so it is centered vertically and slopes to the left and right.

Step 26

Let's make a part! Let's continue making the helm! Vertically place a dark grey 4x8 plate in front of you.

Step 27

Horizontally place a sand blue 2x4 plate on the front 2 rows. Then repeat symmetrically to the back.

Step 28

Horizontally place a light grey 2x3 brick on the front left corner. Then vertically place a light grey 1x2 brick with a clip on the long side on the front right corner so the clip faces the right and the clip hands face front and back. Then repeat both parts symmetrically to the back.

Step 29

Horizontally place a sand blue 2x4 plate on the front 2 rows. Then repeat symmetrically to the back.

Step 30

Horizontally place a dark grey 1x4 tile on the front row. Then horizontally place a dark blue 1x4 plate behind the ppp. Now repeat both parts symmetrically to the back.

Step 31

Attach a black walkie talkie to the back right-facing clip so the antenna faces up. Then attach a light grey pair of handcuffs to the front right-facing clip.

Step 32

Vertically place your part on top of the 2 2x4 bricks that are on the 18th - 21th columns from the left so the handcuffs and walkie talkie face the right.

Step 33

Rotate your build 180 degrees. Horizontally place a sand blue 2x4 plate on the 4th - 7th columns from the right so it is centered vertically. Then vertically place a yellow 1x2 tile in front of the leftmost column of the ppp. Then repeat symmetrically to the back.

Step 34

Horizontally place a yellow 2x3 wedge plate to the right of the ppp so the angled part faces the back and the short end faces the right. Then repeat symmetrically to the front.

Step 35

Horizontally place a yellow 2x3 wedge plate on the front 2 rows of the 3 rightmost columns so the angled side faces the front and the short end faces the right. Then repeat symmetrically to the back.

Group 11 - Police Boat

Step 36

Place a white 2x2 tile on the 6th and 7th columns from the right so it is centered vertically.

Step 37

Place a white 2x2 plate with 1x4 angled sides to the right of the ppp so it is centered vertically and the angled parts are on the left. The ppp should fit in the 2x2 cutout! Then vertically place a white 1x2 tile with a round side to the right of the ppp so it is centered vertically and the round side faces the right.

Step 38

Place a dark grey 1x1 plate with a clip on the front row of the rightmost column so the clip faces the front and the clip hands face left and right. Then repeat symmetrically to the back.

Step 39

Vertically place a black 1x2 plate with 2 side studs hanging down on the rightmost column so the side studs face the right.

Step 40

Horizontally place 2 black 1x1 tiles with a 1x1 slope tile, 1 in front of the other, on the 2 rightmost columns so they are centered vertically and slope to the left.

Step 41

Place 2 transparent 1x1 round tiles, 1 in front of the other, upright on the 2 right-facing side studs.

Step 42.1

Let's make a part! Let's make a bench! Horizontally place a tan 2x6 plate in front of you. Then place a nougat 2x2 round plate underneath the 2 leftmost columns. Then repeat symmetrically to the right.

Step 42.2

Horizontally place your part on the back 2 rows of the 3rd - 8th columns from the left.

Step 43.1

Let's make a part! Horizontally place a silver 4x8 grate in front of you. Then vertically place a dark blue 1x2 rounded plate upside down on the leftmost column so it is centered vertically. Then repeat symmetrically to the right.

Step 43.2

Flip your part over so it is horizontal. Then place a black 1x1 light cover with a bar on the back stud of the leftmost 1x2 rounded plate. This is a bar with a rounded top. Then repeat symmetrically to the right.

Step 43.3

Orient your part so it is vertical and the light covers are on the left. Then vertically attach the left-facing bar of your part upright to the 2 right-facing clips that are on the 12th column from the right so it sticks up and the light covers face the left.

Step 44

You can flip this to the right to close the interior! This is the jail for the prisoners!

Step 45.1

Rotate your main build 180 degrees so the tip of the boat faces the left.

Step 45.2

Let's make a part! Let's make a bench! Horizontally place a tan 2x6 plate in front of you. Then place a nougat 2x2 round plate underneath the 2 leftmost columns. Then repeat symmetrically to the right.

Step 45.3

Horizontally place your part on the back 2 rows of the 3rd - 8th columns from the right.

Building Instructions (Bag 3, Book 2):

Group 12 - Police Boat

Step 46.1

Rotate your build 180 degrees so the tip of the boat faces the right. Place a transparent green 1x1 round plate on the front row of the leftmost column.

Group 13 - Police Boat

Step 46.2

Place a transparent red 1x1 round plate on the back row of the leftmost column.

Step 47

Vertically place a black 1x2 plate with an upright bar on the leftmost column so it is centered vertically so the bar faces the left. Then vertically place a light grey 1x2 plate with 2 clips on the long side in front of the ppp so the clips face the left. Then repeat symmetrically to the back.

Step 48

Vertically place 2 black 1x4 rounded plates, 1 in front of the other, on the 2nd column from the left.

Step 49.1

Let's make a part! Horizontally place a dark blue 1x2 plate with a stud and a pinhole in front of you so the pinhole is on the right.

Step 49.2

Insert a light grey 1L pin with a stud into the back-facing pinhole so the stud faces the back. Then insert a dark grey claw into the back-facing side stud so the claw hands face up and down.

Step 49.3

Horizontally place your part on the back left corner so the claw faces the back.

Step 50.1

Let's make a part! Horizontally place a dark blue 1x2 plate with a stud and a pinhole in front of you so the pinhole is on the right.

Step 50.2

Insert a light grey 1L pin with a stud into the front-facing pinhole so the stud faces the front. Then insert a dark grey claw into the front-facing side stud so the claw hands face up and down.

Step 51

Place a sand blue 2x2 plate on the 2nd and 3rd rows from the front of the 2 leftmost columns. Then repeat symmetrically to the back.

Step 52

Place a dark grey 2x2 plate with 2 side studs on the 2 leftmost columns so it is centered vertically and the side studs face the right. Then horizontally place a black 1x2 jumper plate upright on the right-facing side studs of the ppp.

Step 53

Vertically place a dark blue 1x8 tile on the leftmost column so it is centered vertically.

Step 54

Place a light grey 2x2 sloped curved tile on the front 2 rows of studs of the 2 leftmost columns so it slopes to the right. It should sit on 2 studs and the ppp. Then repeat symmetrically to the back.

Step 55

Attach an orange life ring with a stud upright on the right-facing side stud that is on the leftmost column so it is centered vertically and hangs down. This is to save someone if they go overboard!

Group 14 - Police Boat

Step 56

Let's make 2 identical parts! Place a sand blue 2x2 plate in front of you. Then vertically place a red 1x2 plate with a bar on the long side on the left column so the bar faces the left.

Step 57

Place a black 1x2 plate with a 1x2 brick with a pinhole on the right column so the brick overhangs to the right and the pinhole faces the right.

Step 58

Place a sand blue 2x2 plate on the 2 leftmost columns.

Step 59

Insert a yellow 2L pin into the right-facing pinhole.

Step 60

Attach a light grey cylinder with a ridged side to the right-facing pin so the ridged side faces the right.

Step 61

Horizontally place a light grey 2x4 sloped curved brick with a wing, 2x2 studs, and side studs on 2 sides that hang down on top so the studs are on the left, and 1 column sits on the bar that is to the left. Then place a dark grey 2x2 round tile with a pinhole on top.

Step 62

Horizontally place a black 2x3 inverted slope brick underneath your part so it slopes to the right.

Step 63

You should have 2 identical parts! These are the boat's motors! Rotate 1 part 180 degrees so the bar faces the right. Now horizontally attach the bar of 1 part to the back 2 left-facing clips so the 2x2 round tile with a pinhole is on top and the cylinder with a ridged side faces down and to the left. Then repeat symmetrically to the front.

Step 64

Let's make a part! Horizontally place a light grey 1x2 plate with 2x2 upright side studs in front of you so the side studs face the front.

Step 65

Horizontally place a light grey 1x4 brick on top so 2 columns overhang to the right.

Step 66

Horizontally place a light grey 1x2 plate with 2x2 upright side studs underneath the 2 rightmost columns so the side studs face the front.

Step 67

Horizontally place a sand blue 1x4 plate on top.

Group 15 - Police Boat

Step 68

Horizontally place a dark blue 1x2 plate with 2x2 upright side studs on the 2 leftmost columns so the side studs face the front. Then repeat symmetrically to the right.

Step 69

Lay your part on its back so the side studs face up and the anti-studs face the front. Then place a lime green 2x2 plate on the 2 leftmost columns so it is centered vertically.

Step 70

Place a dark grey 4x4 plate with a 2x2 gap on the 3 leftmost columns so it is centered vertically and 1 column overhangs to the left.

Step 71

Place a yellow 1x1 quarter circle tile on the front right corner so the curve faces the front right. Then vertically place a yellow 2x3 wedge plate behind the ppp so the angled side overhangs to the right and the short end faces the front.

Step 72

Horizontally place a white 1x3 tile on the back left corner. Then horizontally place a white 2x2 triangle tile on the 2 leftmost columns in front of the ppp so the right angle faces the back left.

Group 16 - Police Boat

Step 73

Place a dark blue 2x2 triangle tile to the front right of the ppp so the right angle faces the front right. Now vertically place a dark blue 1x2 plate to the right of the ppp so it is centered vertically.

Step 74

Vertically place a dark blue 2x3 wedge plate on the back 3 rows, to the right of the ppp so the angled side faces the right and the short end faces the front.

Step 75

Horizontally place 2 yellow 1x2 tiles, 1 to the right of the other, on the front left corner.

Step 76

Place a black 2x2 round tile with a stud on the back 2 rows so it is centered horizontally and sits on 3 studs. Then place a short black 1x1 rounded brick with a side stud on top of the ppp so the side stud faces the left. Now place a transparent 1x1 round tile upright on the left-facing side stud of the ppp.

Step 77

Lift your part so it is upright, and rotate it 180 degrees so the side studs face the back, and the anti-studs face down. Now horizontally place a white 1x2 ridged brick on top so it is centered horizontally and the horizontal ridges face the front.

Step 78

Horizontally place your part on the back row of studs that is to the right of the left-facing handcuffs that are on the back 2 rows and 12th column from the left so the side studs face the back.

Group 17 - Police Boat

Step 79

Let's make a part! Horizontally place a light grey 1x2 plate with 2x2 upright side studs in front of you so the side studs face the front.

Step 80

Horizontally place a light grey 1x4 brick on top so 2 columns overhang to the right.

Step 81

Horizontally place a light grey 1x2 plate with 2x2 upright side studs underneath the 2 leftmost columns so the side studs face the front.

Step 82

Horizontally place a sand blue 1x4 plate on top.

Group 18 - Police Boat

Step 83

Horizontally place a dark blue 1x2 plate with 2x2 upright side studs on the 2 leftmost columns so the side studs face the front. Then repeat symmetrically to the right.

Step 84

Lay your part on its back so the side studs face up, and the anti-studs face the right. Now place a lime green 2x2 plate on the back 2 rows so it is centered horizontally.

Step 85

Place a dark grey 4x4 plate with a 2x2 gap on the back 3 rows so it is centered horizontally and overhangs 1 row to the back.

Step 86

Place a yellow 1x1 quarter circle tile on the front right corner so it curves to the front right. Then horizontally place a yellow 2x3 wedge plate on the front left corner so the angled side faces the front and the short end faces the right.

Step 87

Vertically place a white 1x3 tile on the back left corner. Then place a white 2x2 triangle tile on the back 2 rows, to the right of the ppp so the right angle faces the back left.

Group 19 - Police Boat

Step 88

Place a dark blue 2x2 triangle tile to the front right of the ppp so the right angle faces the front right. Then horizontally place a dark blue 1x2 plate in front of the ppp.

Step 89

Horizontally place a dark blue 2x3 wedge plate on the 3 leftmost columns, in front of the ppp so the angled side faces the front and the short end faces the right.

Step 90

Vertically place 2 yellow 1x2 tiles, 1 in front of the other, on the back right corner.

Step 91

Place a black 2x2 round tile with a stud on the 2 leftmost columns so it sits on 3 studs and is centered vertically. Then place a short black 1x1 rounded brick with a side stud on top of the ppp so the side stud faces the back. Then place a transparent 1x1 round tile upright on the back-facing side stud of the ppp.

Step 92

Lift your part so it is upright, and rotate it so the side studs face the back, and the anti-studs face down. Now horizontally place a white 1x2 ridged brick on top so it is centered horizontally and the horizontal ridges face the front.

Step 93

Horizontally place your part on the front row of studs that is to the right of the left-facing walkie talkie that are on the front 2 rows and 12th column from the left so the side studs face the front.

You will have an extra transparent green 1x1 round plate. Save it for later!

Group 20 - Police Boat

Step 94

Vertically place a black 1x6 plate to the left of the 1x2 ridged bricks of your 2 previous parts so it is centered vertically. Now place a transparent green 1x1 round plate from group 19 on the back row of the ppp. Then vertically place a black 1x4 half cylinder brick in front of the ppp. Now place a transparent red 1x1 round plate in front of the ppp.

Step 95

Place a short light grey 1x1 brick to the right of the 1x2 ridged brick that is to the right of the ppp. Then repeat symmetrically to the back.

Step 96

Horizontally place the rightmost column of a light grey 1x4 double sloped curved tile on top of the ppp so there is no overhang. Then repeat symmetrically to the front.

Step 97

Let's make 2 identical parts! Horizontally place a black 32L bar in front of you. Then attach a black bar holder with a handle to the right end so the handle is vertical.

Step 98

Now you should have 2 identical parts! Attach the handle of 1 part to the front-facing clip on the rightmost column, then bend the bar in the shape of the front curve of the boat so it attaches the middle clip and leftmost clip that are on the front row. Then repeat symmetrically to the back.

Step 99

Vertically place a transparent 5x8x2 windshield to the left of the 4x8 grate that is on the 8th column from the right so it is centered vertically and slopes to the right.

Step 100

Let's make a part! Vertically place a black 4x8 plate with a round side in front of you so the round side faces the left. Then vertically place a dark grey 1x2 tile with a round side on the leftmost column so it is centered vertically and the round side faces the left.

Step 101

Horizontally place a dark grey 2x6 plate on the 3 rightmost columns so it is centered vertically and overhangs 3 columns to the right.

Step 102

Vertically place a black 4x8 plate underneath the 3 rightmost columns so it is centered vertically and 1 column is exposed to the right.

Step 103

Flip your part upside down so the round side faces the right. Now place a transparent yellow 2x2 inverted round tile with a rounded bottom on the 2 rightmost columns so it is centered vertically.

Step 104

Place 2 dark grey 4x4 plates with a 2x2 gap, 1 to the right of the other, to the left of the ppp so together they are centered vertically and the leftmost plate overhangs 2 columns to the left.

Step 105

Flip your part over so it is right side up and the round side faces the left. Now vertically place a black 4x8 plate with a round side on the 2 rightmost columns so it is centered vertically and the round side overhangs 2 columns to the right.

Step 106

Horizontally place an orange 2x3 tile on the 3rd - 5th columns from the right so it is centered vertically.

Group 21 - Police Boat

Step 107

Horizontally place a white 2x4 wedge plate on the 3 leftmost columns of the 2nd and 3rd rows from the front so the angled side faces the front and the short end faces the left. Then place a white 2x2 corner plate to the right of the ppp so it looks like the braille letter f. Now repeat both parts symmetrically to the back.

Step 108

Vertically place a red 1x2 slope tile on the 2nd column of studs from the left so it is centered vertically and slopes to the left. Now horizontally place 2 red 2x3 plates, 1 in front of the other, to the right of the ppp so together they are centered vertically.

Step 109

Horizontally place a white 2x5 angled sloped brick on the 4 leftmost columns of the 2nd and 3rd rows from the front so the angled side faces the front, and the short end overhangs 1 column to the left. Then repeat symmetrically to the back.

Step 110

Place a white 2x2 tile with a 1x3 boat mast on the 3rd and 4th columns from the left, to the right of the 1x2 slope tile so it is centered vertically, the boat mast is vertical and slopes to the right.

Step 111

Place a white 6x6 rounded car hood on the 2nd to 7th columns from the right so it is centered vertically and the round side faces the right.

You will have an extra transparent blue 1x2 tile. Save it for later!

Group 22 - Police Boat

Step 112.1

Let's make a part! Vertically place a black 1x6 plate in front of you. Vertically place a transparent red 1x2 tile on the back 2 rows. Then place a dark blue 2x2 sloped curved tile printed with a dark grey shield and star in front of the ppp so it slopes and overhangs to the right. Now vertically place a transparent red 1x2 tile from group 21 in front of the ppp.

Step 112.2

Vertically place your part on the 7th column from the right so it sits on the 2 studs of the car hood and it is centered vertically and slopes to the right.

Step 113

This is the roof of the boat! Horizontally place it on top of the windshield so it is centered vertically and the rightmost column of your part sits on the 4 vertical studs of the windshield!

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our [Builders page](#). It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please [signup](#) for our newsletter and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at: <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 6 LEGO City Theme kits:

60456 Police Boat Chase

60457 Custom Police Car Garage

60455 Police Motorcycle Chase

60467 Heavy-Duty Recovery Tow Truck with Crane

60465 Emergency Air Ambulance Airplane

60466 Yellow Bulldozer
