

## **75384 The Crimson Firehawk**

Adapted by John Le and tested by Jolene Nemeth.

Introduce preschoolers aged 4+ to building and playing in the LEGO® Star Wars™ universe with this starter set featuring The Crimson Firehawk starship from Star Wars: Young Jedi Adventures. It has a Starter Brick base to give young builders a confident start, and there's space for all 3 included Star Wars characters (Nash Durango and Nubs LEGO minifigures, plus an RJ-83 LEGO droid figure) in the cockpit. The set also includes a Star Wars buildable speeder bike toy that fits inside the starship vehicle, plus a small marketplace build for creative play.

The Crimson Firehawk starship and speeder bike buildable toys – Young kids can quickly build Star Wars™ vehicles and play out stories as Star Wars: Young Jedi Adventures heroes with this starter set.

3 LEGO® Star Wars™ characters – A Nash Durango LEGO minifigure with a wrench element, a Nubs LEGO minifigure with a lightsaber, plus an RJ-83 LEGO droid figure that can be attached to Nash's back.

Simple to build – The Crimson Firehawk features a Starter Brick base for easy building and a cockpit with space for all 3 characters, and the speeder bike fits in the rear of the starship.

Compact set for play on the go – The buildable Star Wars™ Crimson Firehawk starship measures over 2 in. (6 cm) high, 7 in. (18 cm) long, and 7.5 in. (19 cm) wide.

The front of the box shows a Nubs on a hoverbike riding past a fruit stand and a chest with tools. In the back, Nash Durango is flying the Crimson Firehawk with an RJ-83 Droid by his side!

The back of the box shows all the accessories that the set comes with. It comes with Nubs, Nash Durango, an RJ-83 Droid, a lightsaber, wrench, hammer, an apple, cheese, 2 fish, a food stand, chest, grill, table, hoverbike, and the Crimson Firehawk.

The top of the box shows a full-sized image of Nubs.

The build is 136 pieces in total and is for ages 4+.

Bag 1 includes the pieces for Nubs, a hoverbike, a chest, and a table.

Bag 2 includes the pieces for the food stand and a grill.

Bag 3 includes the pieces for Nash Durango and the Crimson Firehawk.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: [bricksfortheblind.org/help-with-screen-readers](https://bricksfortheblind.org/help-with-screen-readers). Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.

- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/75384>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

#### Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 3 bags labeled 1,2 and 3, 3 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

The steps in this set correspond to page numbers.

Bag 1 - Nubs, Hoverbike, Chest

Group 1 - Pages 6-7.

Group 2 - Pages 8-11.

Group 3 - Pages 12-22.

Bag 2 - Food Stand and Grill

Group 4 - Pages 4-9.

Group 5 - Pages 10-35.

Group 6 - 3 blue 1x3 sloped curved bricks from Pages 36-39.

Group 7 - 3 light blue 1x3 sloped curved bricks from Pages 36-39 and Pages 40-47.

Bag 3 - Nash Durango and Crimson Firehawk

Group 8 - Pages 4-5.

Group 9 - Pages 6-39.

Group 10 - Pages 40-74.

Let's get to building!

Building Instructions (Bag 1, Book 1):

Group 1 - Nubs

Step 6

Locate 1 short light blue pair of legs, 1 light blue torso printed with a light yellow and brown sleeveless shirt, 1 brown cape, and 1 light blue head printed with hair, large ears, blue eyes, and a pink nose.

Assemble your minifigure and put him in front of you. Make sure the cape is on the back of the minifigure.

It does not matter what side you put it on since it is brown on either side!

Step 7

Locate 1 transparent light blue bar and 1 light grey lightsaber handle. Insert the bar into the side of the handle that has a smooth curve around it. Now put your lightsaber into your minifigure's hand and put him aside while we build a chest!

Group 2 - Chest

Steps 8 to 9

Locate 1 dark grey 2x4 chest bottom, 1 dark grey 2x4 chest top, and 1 black hammer. Horizontally place the chest bottom in front of you so the side with a lower edge is facing the back. Horizontally attach the chest top to the clips on the back edge of the chest. Then insert the hammer and close it!

Steps 10 to 11

Place a dark grey 2x2 brick with a groove on each side on top of the chest on the left side so it doesn't overhang. Then place a 2x2 tile with a stud on top of the previous brick. Now put it aside while we build the hoverbike.

Group 3 - Hoverbike

Steps 12 to 13

Horizontally place a dark grey 2x6 plate in front of you. Then vertically place a blue 2x2 plate with angled curved sides on the 2 rightmost columns of the plate so the angled sides of the plate face the left.

#### Steps 14 to 15

Place a blue 2x2 slope brick on top of the previous 2x2 plate so it slopes to the left. Then horizontally place 2 tan 1x2 rail plates to the left so the rails face front and back.

#### Steps 16 to 17

Place 2 blue 1x1 bricks with a bar to the left of the previously placed plates so the bars face front and back. Then vertically place 1 blue 1x2 brick with side studs to the left so the side studs face the left.

#### Steps 18 to 19

Insert 2 black bars with an anti-stud upright on the left-facing side studs. Make sure to connect the bars to the studs and not the antistuds! Then horizontally place a blue 2x3 tile with an angled side on top of the 2 leftmost columns of the build so the angled part overhangs to the left.

#### Steps 20 to 21

Attach 1 blue triangle tile with a clip to the leftmost side of the front black bar with an anti stud so the triangle faces the front. Then repeat symmetrically for the back.

#### Step 22

Now put your minifigure on the hoverbike so he can ride it!

#### Building Instructions (Bag 2, Book 2):

#### Group 4 - Robot and Grill

##### Steps 4 to 5

Locate 1 transparent 1x1 round brick printed with an orange robot body with 2 arms and 1 white 1x1 dome printed with dark blue eyes and orange squares. Place the dome on top of the round brick to make the robot! Make sure the eyes are right above the body! Ask a sighted person to make sure it is oriented correctly!

##### Steps 6 to 7

Horizontally place a dark grey 2x3 brick in front of you. Vertically place 3 transparent orange 1x2 plates on top of the previous brick next to each other. Then vertically place a 1x1 plate with a 1x1 clip on the rightmost column so the clip faces the front.

##### Steps 8 to 9

Horizontally place 2 black 1x2 grill tiles on the 2 left columns of the grill. Then horizontally attach the tail of a light blue fish to the clip so the head of the fish faces the left. Now put this aside while we build the food stand!

#### Group 5 - Food Stand

##### Steps 10 to 11

Place a light brown 8x8 plate with 3 gaps and a 1x4 overhang in front of you so the overhang faces the right.

#### Steps 12 to 13

Vertically place a tan 2x4 tile with 2 studs on the left 1x4 gap so it overhangs 1 column to the left.

#### Steps 14 to 15

Vertically place a tan 2x6 plate with a rounded side underneath the left and right overhang so the rounded side faces outwards.

#### Steps 16 to 17

Place 1 brown 2x2 round barrel on the back 2 rows of the right 1x4 overhang of the 8x8 plate so the barrel does not overhang. Then place a short light brown 2x2 box in front of it.

#### Steps 18 to 19

Horizontally place a light grey 2x4 brick to the left of the 2x2 box so the back row of the 2x4 brick aligns with the front row of the 2x2 box. Then horizontally place 1 light grey 1x2 brick with horizontal and vertical grooves to the left of the front row of the 2x4 brick so the horizontal grooves face the front. Then horizontally place another one behind it so the vertical grooves face the back.

#### Steps 20 to 21

Horizontally place a dark grey 2x8 tile on top of the bricks placed in the previous step so there is no overhang.

#### Steps 22 to 23

Vertically place 2 tan 1x2x3 bricks behind the leftmost and rightmost columns of the 2x8 tile.

#### Steps 24 to 25

Place 1 dark grey pot on the front stud of the 2x4 tile that is to the left of the 2x8 tile. Then place 1 tall dark grey 2x2 box behind it.

#### Steps 26 to 27

Place 1 light blue fish inside the previous box you placed.

#### Steps 28 to 29

Place 1 light green plant with 3 leaves on top of a dark grey 1x1 round brick. Then place the round brick inside of the pot you placed in steps 24-25.

#### Steps 30 to 31

Horizontally place 2 tan 1x6 arch bricks on top of the 1x2x3 bricks that are behind the leftmost and rightmost columns of the 2x8 tile.

#### Steps 32 to 33

Horizontally place a brown 2x6 plate on top of the arch bricks.

#### Steps 34 to 35

Place 1 dark grey 1x1 round brick on the back left corner of the previous 2x6 plate.

## Group 6 - Food Stand

### Steps 36 to 37

Vertically place 1 blue 1x3 sloped curved brick in front of the previous 1x1 round brick so it slopes and overhangs 2 rows to the front. Then vertically place 2 more to the right so there is a stud gap in between them all.

## Group 7 - Food Stand

### Steps 38 to 39

Vertically place 3 light blue 1x3 sloped curved bricks in between the 1x3 sloped curved bricks you placed in the previous step. Make sure they align with the previous bricks.

### Steps 40 to 41

Place 1 transparent yellow 1x1 round plate on the 1x1 round brick that is behind the sloped curved bricks. Then horizontally place a blue 1x6 tile on top of the sloped curved bricks so there is no overhang.

### Steps 42 to 43

Place 1 light grey 2x2 dish on top of the previous round plate.

### Steps 44 to 45

Place 1 light grey 2x2 dish on top of the previous dish.

### Steps 46 to 47

Place 1 red apple in the 2x2 round barrel that is on the right side. Then place 1 yellow 1x1 slope tile in the short 2x2 box in front of the barrel. This is cheese! Now put this aside while we build the rest!

## Building Instructions (Bag 3, Book 3):

## Group 8 - Nash Durango

### Steps 4 to 5

Locate 1 short olive green pair of legs, 1 torso printed with a dark brown jacket over a light blue shirt, 1 dark grey L-shaped piece with a hole and a side stud, 1 light tan head printed with small black eyes and a cute smile, 1 light orange hair, and 1 silver wrench. Assemble your minifigure and make sure the side stud is on her back, then put the wrench in her hand.

## Group 9 - Crimson Firehawk

### Steps 6 to 7

Place 1 light grey 12x12 base with angled sides in front of you so the short side faces the left and the angled sides are in the front and back.

#### Steps 8 to 9

Place 2 black 1x2 plates with 1x2 hinge, 1 in front of the other, to the left of the 4x8 lower stud area of the base so the hinges face the left.

#### Steps 10 to 11

Vertically place 1 red 2x4 slope brick to the right of the previous pieces so it sits on the 2 leftmost columns of the lower 4x8 area and slopes to the right.

#### Steps 12 to 13

Place 1 yellow 2x2 sloped curved tile in the center of the 2 black plates with hinges and 2x4 slope brick so it slopes to the right.

#### Steps 14 to 15

Horizontally place 2 red 1x4x3 panels on the 4 rightmost columns so they sit in front of and behind the lower 4x8 area. Make sure the walls of the panels face outwards.

#### Steps 16 to 17

Horizontally place a white 1x2 brick in front of the 2 rightmost columns of the front 1x4 panel. Then vertically place a red 1x2 brick with 2 side studs to the left so the side studs face the left.

#### Steps 18 to 19

Repeat the previous step symmetrically to the back.

#### Steps 20 to 21

Rotate the build 90 degrees counterclockwise so the short end faces the front. Now place 4 transparent light blue 1x1 cone bricks upright on the 4 front-facing side studs of the 2 red 1x2 bricks.

#### Steps 22 to 23

Vertically place 2 red 1x4x3 panels, 1 in front of each of the previous 1x4x3 panels so the walls face outwards.

#### Steps 24 to 25

Horizontally connect the hinges of 1 dark grey 3x4 plate with hinge connectors to the front hinges of the black 1x2 plates with 1x2 hinge so the studs face the front.

#### Steps 26 to 27

Rotate the 3x4 plate all the way to the front.

#### Steps 28 to 29

Vertically place 2 black 1x4x3 inverted slope bricks in front of the red 1x4x3 panels so the slopes face the front.

#### Steps 30 to 31

Rotate your build 90 degrees counterclockwise so the short end of the build faces the right. Now find 2 red 4x6 plates with angled sides and 4x4 studs. Vertically place them on top of the 1x4x3 panels so they cover all the studs.

#### Steps 32 to 33

Vertically place 1 dark grey 2x6 plate to the right of the previous plates so it sits on the 2 leftmost columns of the 1x4x3 inverted slope bricks.

#### Steps 34 to 35

Horizontally place 2 white 1x8 tiles on the front row and back row of the 2 red 4x6 plates with angled sides.

#### Steps 36 to 37

Horizontally place 2 dark grey 2x4 plates in between the previous tiles.

#### Steps 38 to 39

Insert 2 yellow 2L pins into the holes on the left-facing side of the build.

#### Group 10 - Crimson Firehawk

#### Steps 40 to 41

Vertically place 1 red 10x20 base with a rounded side and 2 holes on the long side. Insert the holes into the yellow 2L pins so the rounded side faces the left.

#### Steps 42 to 43

Horizontally place 1 red 1x6 sloped curved brick in front of the white 1x2 brick that is in the front so it slopes to the left. Repeat symmetrically to the back.

#### Steps 44 to 45

Horizontally place 1 white 2x10 sloped curved brick on top of the 1x6 sloped curved brick and 1x2 brick so it slopes to the left. Repeat symmetrically to the back.

#### Steps 46 to 49

Let's make a part! Horizontally place 1 red 1x6 brick in front of you. Then horizontally place 1 red 1x6 sloped curved brick on top so it slopes to the left. Repeat again so you end up with 2 identical parts. Now horizontally place 1 part on the row behind the front white 2x10 sloped curved brick so it slopes to the left. Then repeat symmetrically to the back.

#### Steps 50 to 51

Vertically place 1 dark grey 2x3 plate on the rightmost column of the 10x20 base so it sits in front of the 2x10 sloped curved brick. Repeat symmetrically to the back.

#### Steps 52 to 53

Place 1 red 4x4 triangle plate in front of the front 2x3 plate so the right angle is in the back right corner. Repeat symmetrically to the back.

Do steps 54-59 twice to make 2 engines!

#### Steps 54 to 55

Place 1 short black 2x2 brick with ridges in front of you. Then horizontally place 1 dark grey 2x2 brick with 2 pins on top so the pins face the left and right.

#### Steps 56 to 57

Place 1 dark grey 2x2 slope tile on top so it slopes to the front and back. Now insert 2 white wheels into the left and right pins.

#### Steps 58 to 59

Place 1 black 2x2 half-cone brick upright on the left-facing side of the wheel.

#### Steps 60 to 61

Now you should have 2 of these engines! Horizontally place 1 engine on top of the front 2x3 plate and 4x4 triangle plate so the black 2x2 cone brick faces the left. Then repeat symmetrically to the back. It should connect to the 2 rightmost columns of the build. The parts should overhang to the right.

#### Steps 62 to 63

Vertically place 2 dark grey 1x2 plates with 2 side studs on the build's leftmost column, so together they are centered and the side studs face the left.

#### Steps 64 to 65

Place 2 dark grey 1x1 cone bricks upright, 1 on the front left-facing and 1 on the back left-facing side stud.

#### Steps 66 to 67

Vertically place 1 light grey 2x4 brick to the right of the 2 1x2 plates with 2 side studs.

#### Steps 68 to 69

Place 1 white 2x2 slope brick with a screen and buttons to the right of the previous 2x4 brick so it slopes to the right. Then place 1 chair to the right so the back of the chair faces the right.

#### Steps 70 to 71

Horizontally place 1 transparent light blue 6x10 windshield with white and red panels so it is centered on the left side of the build and slopes to the left. It should sit on top of the 2 dark grey 1x2 plates with side studs and red 1x6 sloped curved bricks.

#### Steps 72 to 73

Place 1 transparent light blue 2x2 dome brick on top of the 2x2 studs of the windshield.

Thank you so much for building this set!

Visit [bricksfortheblind.org](http://bricksfortheblind.org) for more accessible instructions and follow us on [Facebook](#) and [Instagram](#) to be the first to know when new instructions are available!

We also love seeing your completed builds, so please tag our [Facebook](#) and [Instagram](#) accounts in any photos of your builds so we can share your accomplishments with our Bricks for the Blind community.

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a \$5 donation at: <https://www.gofundme.com/f/bricks-for-the-blind-gofundme>.

Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.

At the end of the instruction booklets are advertisements for the following 2 LEGO Starwars Theme kits:

75384 The Crimson Firehawk

75372 Clone Trooper™ & Battle Droid™
