

77049 Isabelle's House Visit

Adapted by John Le and tested by Natalie Charbonneau.

Girls and boys aged 6+ create their own stories inspired by the Animal Crossing™ video game series with the Isabelle's House Visit (77049) kids' toy. They can build recognizable scenes from their screens, then take the storytelling wherever their imaginations want to go!

Kids take a tour of Fauna's House with Isabelle. The interior, styled in Fauna's colors, is filled with recognizable details, as well as a host of new ones to inspire kids to create fresh stories for the characters.

They can fire the pretend slingshot to pop the present-carrying balloon, check the cell phone tile for messages, post a letter in the mailbox or help the minifigures water the garden and grab an apple from the tree. The workbench holds a DIY recipe card, and there's a surprise hidden in the tree. Kids rearrange the furniture, swap the window frames and even reassemble the baseplates to choose how the house looks.

Creative building toy inspired by the video game series – LEGO® Animal Crossing™ Isabelle's House Visit gives girls and boys aged 6+ hours of hands-on role play.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- "Anti-stud" is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (<https://www.lego.com/en-us/service/buildinginstructions/77049>) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 6 bags labeled 1 to 6, 1 set of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Step 56

Horizontally place an orange 1x4 sloped curved tile in front of the 2 ppp.

Step 57

Place an orange 1x2 tile on the front row on the 4th and 5th columns from the left. Now horizontally place an orange 1x2 tile with a round side behind it so the round side faces the back. Then place a brown 2x2 plate to the right of the 2 ppp.

Step 58

Horizontally place 4 orange 1x2 tiles on the front row, on top of the studs so there is a 2 column gap in between each of them. Now horizontally place an orange 1x2 tile with a round side behind each of 4 ppp so the round side faces the back. Now repeat this process with the leftmost ppp and 2 rightmost ppp so there are no more exposed studs.

Step 59

Let's make another part! Horizontally place a light brown 2x10 plate in front of you. Then horizontally place an orange 1x10 plate on the back row.

Step 60

Step 68.1

Let's make 2 identical parts! Horizontally place a light brown 1x6 tile in front of you. Then horizontally place a light brown 1x2 plate with a bar on the short side underneath the 2 rightmost columns so the bar faces the right. Now horizontally place a light brown 1x3 plate underneath the 1x6 tile, to the left of the ppp.

Step 68.2

Now you should have 2 identical parts! Horizontally attach the bar of 1 part to the leftmost clip so the 1x6 tile is on the right and slopes to the left. Then repeat symmetrically to the right.

Step 69

Bring back your previous part and horizontally place it in front of you so the 2 clips are in the back left. Rotate your current part 180 degrees, then attach the front-facing bar of your part to the 2 clips of your previous part.

Step 70

Flip up the front 4x16 part of your part up so it slopes down to the back.

Step 71

Bring your main build back so it is horizontal and the door faces the front. Now rotate your part 180 degrees, then horizontally place the front row of your part on the 3rd row from the front, so it sits on the tiles and 1x3 plates and is centered horizontally to the door frame. The sloped roof should sit on the slope bricks and slope tiles and the only overhang should be the clips that are on the leftmost and rightmost columns of the front row of your part.
