31175 Unicorn Castle

Set adapted by Alex Charbonneau and tested by Natalie Charbonneau.

Play out adventures in a magical fantasy world with this LEGO® Creator 3in1 Unicorn Castle (31175) toy set. The castle with 4 towers and 2 turrets features a bird house with 1 bird, a rainbow staircase, a fountain, a diamond room, a telescope and a golden carrot. It also comes with 1 unicorn and 2 Pegasus characters: a yellow Pegasus toy, a pink Pegasus toy and a white unicorn toy for kids to dream up amazing stories.

Girls and boys have 3 different LEGO animal playset building options with the same bricks: a castle playset; a unicorn ship model with a rainbow sail; or a playground with a forest cabin, garden and picnic table.

LEGO Creator 3in1 sets inspire kids' imaginations with 3 different models to assemble in every box. They will be excited to build, rebuild and build again. 3in1 sets (sold separately) offer a range of models that appeal to kids' biggest passions, including superfast vehicles, amazing animals and detailed houses. Models cannot be built simultaneously. Set contains 390 pieces.

3 unicorn toy building options in 1 box:
- LEGO® Creator Unicorn Castle set lets girls and boys aged 8 and up build and rebuild 3 different unicorn model sets using the same bricks.

Endless play possibilities:
- Kids can role-play fantasy adventures with 3 different unicorn toys (models cannot be built simultaneously): a unicorn castle, a unicorn ship and a unicorn playground.

1 unicorn and 2 Pegasus figures:
- Each playset comes with 3 beautiful unicorn characters: a yellow Pegasus, a pink Pegasus and a white unicorn for kids to dream up fun-filled stories.

Packed with features:
- The unicorn castle with 4 towers and 2 turrets includes a bird house with 1 bird, a rainbow staircase, a fountain, a diamond room, a telescope and a golden carrot.

Birthday gift for girls and boys:
- 3in1 toy provides a fun build-and-play experience for little builders and can be given as a birthday gift to kids who love fantasy playtime.

A fun way to build:
- The LEGO® Builder app guides kids on an intuitive creative adventure as they save sets, track progress and zoom in and rotate models in 3D while they build.

LEGO® Creator toys:
- Every 3in1 set (sold separately) lets kids build 3 different models inspired by some of their biggest passions, including animals, vehicles and houses.

Measurements:
- This 390-piece LEGO® set features a buildable Unicorn Castle toy playset measuring over 9 in. (23 cm) high, 7.5 in. (19 cm) wide and 4 in. (11 cm) deep.

The box is yellow with the red and white LEGO logo in the top left corner. The front of the box shows a castle, high up in the clouds! The clouds in the background are pastel shades of purple and pink, with a blue sky behind them. The castle has white clouds around the base, with multi-colored steps leading inside where a golden carrot is visible! The castle has multiple towers in different colors; purple, green, yellow and pink. A white unicorn with a purple mane is walking in the castle, while a yellow pegasus and a pink pegasus fly overhead. There are two small inset images, showing the alternate builds for the set, which are a ship and a playground with trees and a playhouse.

The top of the box shows a life-sized image of the unicorn figure, as well as a small image of each of the three builds.

The back of the box shows an alternate view of each of the builds. The top image shows the playground, with the unicorn and the yellow pegasus standing in front of the playhouse while the pink unicorn flies overhead. The bottom left picture shows the castle, with the white unicorn standing in the doorway while the two pegasuses fly over. The bottom right picture shows the ship, with the unicorn standing at the wheel, the pink pegasus stands at the bow, keeping a lookout, while the yellow pegasus flies overhead!

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of the piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each kit, PDF versions are always online at LEGO.com: (**https://www.lego.com/en-us/service/building-instructions/31175)** As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

This set has 3 builds:

Go to Build 1: Unicorn Castle
Go to Build 2: Unicorn Ship
Go to Build 3: Unicorn Playground

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

This LEGO set comes with six bags labeled 1-6, a sticker sheet, and an instruction booklet. Sort the pieces into groups as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split across two groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Build 1: Unicorn Castle

The Unicorn Castle build is 390 pieces, and 133 building steps.

Bag 1 (10 groups of bricks)
Pink Unicorn: This group contains the pieces to build the white unicorn with a pink mane.

Main Build: Unicorn Castle

Group 1 contains the pieces for steps 1-3 of the castle.
Group 2 contains the pieces for steps 4-6.
Group 3 contains the pieces for steps 7-21.
Group 4 contains the pieces for steps 22-28, not including the pale yellow 1x1 plate from step 27.
Group 5 contains the pale yellow 1x1 plate from step 27.
Group 6 contains the pieces for steps 29-38.
Group 7 contains the pieces for steps 39-42.
Group 8 contains the pieces for steps 43-52, not including the pale yellow 1x1 plate from step 27.
Group 9 contains the pale yellow 1x1 plate from step 45.
Group 10 contains the pieces for steps 53-58.

Bag 2 (6 groups of bricks)
Pink Pegasus: This group contains the pieces to build the pink pegasus.

Main Build (Continued)
Group 11 contains the pieces for steps 59-68, not including the light blue pieces from steps 60, 62, and 65, or the tan pieces from steps 62.
Group 12 contains the light blue pieces from steps 60, 62, and 65.
Group 13 contains the tan pieces from steps 62.
Group 14 contains the pieces for steps 69-77.
Group 15 contains the pieces for steps 78-80.

Bag 3 (8 groups of bricks)
Yellow Pegasus: This group contains the pieces to build the yellow pegasus.

Main Build (Continued)
Group 16 contains the pieces for steps 81-89.
Group 17 contains the pieces for steps 90-92.

Group 18 contains the pieces for steps 93-99.
Group 19 contains the pieces for steps 100-105.
Group 20 contains the pieces for steps 106-116.
Group 21 contains the pieces for steps 117-127.
Group 22 contains the pieces for steps 128-133, not including the white 2x2 round plate from step 131.
Group 23 contains the white 2x2 round plate from step 131

Building Instructions:

Bag 1.

Sub-Build: White Unicorn with pink mane

Assemble a white unicorn by pushing the short bar on a gold unicorn horn into the small hole that is on the unicorn's head in front of its ears. This unicorn is white, with a pink mane and tail.

Main Build: Unicorn Castle

Group 1

Step 1.1

Let's start building the unicorn castle! We'll start by building some rounded steps that lead to the entrance of the castle! Place a white 6x6 round plate in front of you.

Step 1.2

Find a pale green 3x3 rounded corner tile. This tile is cut out so it looks like a macaroni noodle, I'll call it a "3x3 macaroni tile" from now on. Place this, with the flat sides on the back and left, on the front right quadrant of the previous piece. The rounded side should be even with the rounded part of the 6x6 round plate. Repeat symmetrically on the left side. These are the bottom step.

Step 2

Place a tan 2x2 round plate, centered horizontally, on the 6x6 round plate behind the previous two pieces. There should be three free rows behind this piece.

Step 3

Place a white 1x6 plate, horizontally and centered horizontally, behind the previous piece.

Group 2.

Step 4.1

Place the back right stud of a pale yellow 3x3 macaroni tile, with the flat sides on the back and left, on the rightmost stud of the previous piece. Repeat symmetrically on the left side. These are the middle step.

Step 4.2
Place a bright pink 2x2 round plate, centered horizontally, behind the previous two pieces. There should be two free rows behind and below this piece.

Step 5

Place a white 2x6 plate, horizontally and centered horizontally, behind the previous piece.

Step 6

Place a white 1x6 plate, horizontally, on the front row of the previous piece.

Group 3.

Step 7

Place the back right stud of a pink 3x3 macaroni tile, with the flat sides on the back and left, on the rightmost stud of the previous piece. Repeat symmetrically on the left side. These are the top step!

Step 8.1

Now we'll make a cloud that will float next to the steps. Set the steps aside for now. Place a white 2x3 plate, horizontally, in front of you.

Step 8.2
Place a white 1x3 slope brick, horizontally with the slope on the right, on the back row of the previous piece.

Step 9

Place a white 1x1 plate in front of the left stud of the previous piece.

Step 10

Place the back stud of a white 1x1 plate with a 1x1 curved slope on one side, vertically with the curved slope at the front, on the previous piece.

Step 11

Place the front stud of a white 1x2 inverted curved slope tile, vertically with the taller stud at the front, under the front stud of the previous piece.

Step 12

Place a white 2x3 plate, vertically, under the cloud assembly and to the right of the previous piece so the front sides are even. The back side will be even with the back of the cloud.

Step 13.1

Place a white 1x2 inverted curved slope tile, vertically with the taller stud at the back, behind the first 1x2 inverted curved slope tile from step 11. It will extend one stud to the back.

Step 13.2

Stack two white 1x1 plates and place the stack on the back stud of the previous piece.

Step 14.1

Place the back stud of a white 1x1 plate with a 1x1 curved slope on one side, with the curved slope at the back, on the stack from the previous step.

Step 14.2

Place a white 1x1 curved slope tile, with the tall side at the back, in front of the previous piece.

Step 15

Place a white 1x1 half cylinder, with the flat sides at the left and right, behind the previous piece.

Step 16

Place a yellow 1x2 plate, horizontally, on the front row of the cloud assembly.

Step 17.1

Place the back two studs of a tan 1x10 plate, vertically, on the rightmost column of the cloud assembly.

Step 17.2

Place a light blue 1x2 plate with rounded ends, vertically, to the left of the previous piece so the back sides are even.

Step 18

Place the left column of a white 2x2 plate on the previous piece.

Step 19

Place the step assembly, with the lowest step at the front, in front of you. Rotate the cloud assembly so the 1x10 plate is at the back and the collection of curved slopes is on the left. Place the back row of the cloud assembly on the back row of the steps so the right side overhangs by two studs.

Step 20

Place a white 4x4 round plate behind the top step of the combined assembly. The back row will extend by one row, and there will be three free studs to the right of the second row from the back of the 4x4 round plate.

Step 21

Place a white 2x2 triple curved slope, with the studs at the front, under the rightmost two studs of the assembly. The back row of this assembly will extend to the back.

Group 4.

Step 22

Now we'll make a larger cloud. Set the steps aside. Place a white 2x3 curved slope brick, vertically with the slope at the back, in front of you.

Step 23.1

Place the right stud of a white 1x2 inverted curved slope tile, horizontally with the higher stud on the left, under the left stud of the front row of the previous piece. Repeat symmetrically on the right side.

Step 23.2

Place a white 1x1 plate on the left stud of the left piece from the previous step. Repeat symmetrically on the right side.

Step 24

Place the left stud of a white 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the left, on the left piece from the previous step. Repeat symmetrically on the right side.

Step 25.1

Place a white 1x1 tile on the left piece from the previous step.

Step 25.2

Place a white 1x1 half cylinder, with the flat sides at the front and back, to the right of the previous piece.

Step 26.1

Rotate the cloud 180 degrees so the 2x3 curved slope from step 22 is at the front. Place a white 2x4 plate, horizontally and centered horizontally, under the front two rows of the cloud.

Step 26.2

Place the right column of a white 1x2 plate with a 1x2 inverted curved slope on one side, with the curved slope on the left, on the left column of the previous piece. Repeat symmetrically on the right side.

Group 5 contains the pale yellow 1x1 plate for the next step.

Step 27.1

Place a pale yellow 1x1 plate from group 5 on the back right stud on the left piece from the previous step.

Step 27.3

Place the left column of a white 3x3 L-shaped plate, with the corner at the front left so there is a column on the left and a row at the front, on the second column from the right on the cloud assembly. The front row should overhang.

Step 28

Place a white 1x1 plate on the second stud from the left on the back row of studs on the cloud. Repeat symmetrically on the right side.

Group 6.

Step 29.1

Place a light blue 1x2 plate with rounded ends, horizontally, centered horizontally on the back row of studs on the cloud. This is between the previous two pieces.

Step 29.2

Place a white 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the left to the left of the previous piece. Repeat symmetrically on the right side.

Step 30

Place a white 1x1 half cylinder, with the flat sides at the front and back, in front of the left stud of the left piece from the previous step.

Step 31

Place a white 1x2 brick, horizontally and centered horizontally, on the back row of studs on the cloud.

Step 32

Place the right stud of a white 1x2x2 tall curved slope tile, horizontally with the tall side on the right, on the left stud of the previous piece. Place another symmetrically to the right of the first.

Step 33

Place a clear 2x2 round plate with a rounded bottom under the left two columns of anti-stud under the cloud. Place another to the right of the first.

Step 34

Place the steps assembly, horizontally with the steps at the back and the small cloud on the right, in front of you. Place the front row of three studs of the large cloud on the left three studs on the front row of the steps assembly. There should now be a large cloud to the left of the steps and a small cloud to the right of them.

Step 35.1

Find the 4x4 round plate that's in front of the semi-circular steps. Place a white 1x2 half circle tile, horizontally with the flat side at the front, on the back row of the 4x4 round plate.

Step 35.2
Place a light blue 1x2 plate with rounded ends, vertically, on the rightmost column of studs on the combined assembly. Place another, vertically, on the leftmost column of two studs. There should be eight columns of studs between these two pieces.

Step 36

Place the back two rows of a white 8x8 plate between the previous two pieces. This should be in front of the 1x2 half circle tile from step 34.

Step 37.1

Now we'll make some supports for the previous piece. Place a white 2x2 round plate in front of you.

Step 37.2
Place a white 2x2 dome bottom under the previous piece.

Step 37.3
Place a light blue 1x2 plate with rounded ends, vertically, on the right column of the support.

Step 37.4
Repeat steps 37.1-37.3 two times.

Step 37.5
Place the back row of one support, with the 1x2 plate with rounded ends horizontally at the front, centered horizontally under the front row of the 8x8 plate.

Step 37.6
Place the right column of another support, with the 1x2 plate with rounded ends vertically on the left, under the front two studs of the leftmost column of the 8x8 plate. Repeat symmetrically on the right side.

Step 38.1

Next we'll make a small waterfall. Place a white 2x3 plate, horizontally, in front of you.

Step 38.2
Place a transparent blue 2x2 brick on the right two columns of the previous piece.

Step 38.3
Place a white 1x1 half cylinder, with the flat sides at the front and back, to the left of the front row of the previous piece. Place another, with the flat sides at the left and right, behind the first.

Step 38.4
Place the right column of the waterfall assembly under the fourth and fifth studs from the front on the left column of the 8x8 plate. There should be one free row between this assembly and the front left support.

Group 7.

Step 39.1

Place the left stud of a transparent blue 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the left, on each of the two free studs of the waterfall assembly. The right stud will attach to the leftmost column of the 8x8 plate.

Step 39.2

Place the front stud of a white 2x2 rounded corner plate, with the rounded corner at the front right so the studs form a braille letter I, in front of the right stud of the front piece from the previous step. Place another symmetrically behind the first.

Step 40.1

Place a pale blue 2x2 macaroni tile, with the flat sides on the left and back, on the front piece from the previous step. Place another symmetrically behind the first.

Step 40.2

Place a transparent blue 1x1 quarter circle tile, with the flat sides on the left and back, behind the left stud of the front piece from the previous step. Place another symmetrically behind the first.

Step 41.1

Find the 1x2 half circle tile that's in front of the three half circle steps. Place a white 1x2 half circle tile, horizontally with the flat side at the front, in front of it. This is centered horizontally on the 8x8 plate.

Step 41.2

Place a white 2x4 tile with two studs, vertically, in front of the previous piece.

Step 41.3

Place the back row of a pale blue 2x2 round tile with a single stud, centered horizontally, on the front row of the 8x8 plate. The front row will attach to the middle support.

Step 41.4

Place a light blue 1x2 plate with rounded ends, vertically and centered vertically, on the rightmost column of the 8x8 plate.

Step 42.1

Place the left column of a white 2x2 round plate under the previous piece. This will attach to the rightmost column of the 8x8 plate.

Step 42.2

Place a white 2x2 dome bottom under the previous piece.

Group 8.

Step 43.1

Now we'll make a cloud bridge! Set the rest of the castle aside. Place a white 4x4 L-shaped plate, with the corner at the back right, in front of you.

Step 43.2

Place the right column of a white 1x2 plate with a 1x2 inverted curved slope on one side, with the curved slope on the left, on the leftmost column of the previous piece. Repeat symmetrically on the right side. There will be two columns of studs between these two pieces.

Step 44

Place a white 2x2 plate between the previous two pieces.

Group 9 contains the pale yellow piece from the next step.

Step 45.1

Place a white 1x1 plate on the back row to the right of the previous piece.

Step 45.2

Place the pale yellow 1x1 plate from group 9 on the previous piece.

Step 46.1

Now we'll make a small cloud assembly. Place a white 2x3 brick, vertically, in front of you.

Step 46.2

Place the right stud of a white 1x2 inverted curved slope tile, horizontally with the higher stud on the left, under the left stud of the front row of the previous piece. Repeat symmetrically on the right side.

Step 46.3

Place a white 1x1 plate on the left stud of the left piece from the previous step. Repeat symmetrically on the right side.

Step 46.4

Place the left stud of a white 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the left, on the left piece from the previous step. Repeat symmetrically on the right side.

Step 46.5

Place a white 1x1 tile on the left piece from the previous step.

Step 46.6

Place a white 1x1 half cylinder, with the flat sides at the front and back, to the right of the previous piece.

Step 46.7

Rotate the cloud assembly 180 degrees so the two free rows of the 2x3 brick are at the front. Place these two rows, centered horizontally, on the back two rows of the cloud bridge assembly. These will be to the left of the stack of 1x1 plates from steps 46.1 and 46.2.

Step 47.1

Place a white 2x2 brick on the front two rows of the bridge assembly.

Step 47.2
Place a white 1x2 brick, vertically, on the second column from the left of the bridge assembly.

Step 48.1

Place the leftmost column of a white 2x3 plate, horizontally, on the previous piece.

Step 48.2
Place a white 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the right, to the right of the back row of the previous piece. The right edge will be even with the right edge of the cloud.

Step 48.3
Place a white 1x1 half cylinder, with the flat sides on the front and back, in front of the right stud of the previous piece.

Step 49.1

Place a white 1x2 brick, horizontally, on the back row of the 2x3 plate from step 48.1 so the left sides are even.

Step 49.2
Place a white 1x1 curved slope tile, with the tall side on the left, to the right of the back row of the 2x3 plate from step 48.1.

Step 50.1

Now we'll make the bridge itself. Place a white 2x4 tile with two studs, horizontally, in front of you.

Step 50.2
Place a white 1x6 arch brick, horizontally and centered horizontally, under the front row of the previous piece. Place another behind the first.

Step 50.3
Place the right column of the bridge on the leftmost two studs on the rest of the bridge assembly. There should be a white 1x2 brick to the right of the back row of the bridge we just placed, and three free studs to the right of the front row.

Step 51

Place the right stud of a white 1x2x2 tall curved slope tile, horizontally with the tall side on the right, on the left stud of the 1x2 brick that's to the right of the bridge. Place another symmetrically to the right of the first.

Step 52

Place a white 1x3 plate, horizontally, in front of the previous two pieces and to the right of the 2x4 tile with two studs that's on the bridge.

Group 10.

Step 53

There will be a tower on the end of the bridge. Stack two light purple 2x2 round bricks and place the stack on the front two rows of the bridge assembly. These two rows are only two studs long.

Step 54

Place a clear 2x2 round plate with a rounded bottom, under the front two rows of the bridge assembly. Then place another behind the first. Place a third to the left of the second. These should take up all the anti-studs that are under the right side of the bridge assembly.

Step 55

Now we'll place the bridge assembly on the main assembly. Place the main assembly, with the stairs at the back, in front of you. Find the second support from the front, that extends to the right of the 8x8 plate on the main assembly. Place the leftmost column of the bridge assembly on the right column of this support.

Step 56

Place a white 2x4 curved slope tile, horizontally with the tallest side on the right, to the left of the 2x4 tile with two studs on the bridge.

Step 57.1

Now we'll make the rest of the tower that goes at the end of the bridge. Set the rest of the castle aside for now. Place a light purple 2x2 round brick in front of you.

Step 57.2

Place a transparent red 1x1 round plate on each of the studs on the back row of the previous piece.

Step 57.3

Place a light purple 1x2x2 window frame, horizontally with the flat side at the back, on the previous two pieces.

Step 57.4

Place a bright pink 2x2 round plate in front of the previous piece.

Step 57.5

Place a light purple 1x2x2 window frame, horizontally with the flat side at the front, on the back row of the previous piece.

Step 57.6

Place a gold 1x2 half circle tile with a single stud, horizontally with the flat side at the back, in front of the previous piece.

Step 57.7

Place a pale yellow bird on the previous piece.

Step 57.8
Now we'll add the roof to the tower! Place a purple 3x3 dome top, centered vertically and horizontally, on the two 1x2x2 window frames.

Step 57.9
Place a purple 2x2x2 cone, centered vertically and horizontally, on the previous piece.

Step 57.10
Place the rest of the castle, horizontally with the steps at the front, in front of you. The bridge will be on the left, with the stack of two 2x2 round bricks at the back. Place the rest of the tower, with the bird at the front, on the stack of 2x2 round bricks.

Step 58.1

Find the 2x2 round tile with a single stud that's on the back two rows of the assembly, behind the steps. Push the short bar of a golden carrot into the hollow stud of this piece.

Step 58.2
Push the bar of a light green short bar with two leaves, with the leaves on top, into the hole on top of the previous piece.

Bag 2.

Sub-Build: Pink Pegasus

Let's assemble a pink pegasus! This is a winged horse. Place a pink horse, with the head on the left, in front of you. Place a bright pink pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Main Build: Unicorn Castle (continued)

Group 11.

Step 59.1

Now we'll continue building the castle. The castle should be horizontally in front of you, with the first tower on the left. Place a transparent purple 1x1 cone on the roof of the tower.

Step 59.2
Push the short bar of a gold unicorn horn into the hollow stud of the previous piece.

Group 12 contains the light blue pieces from the next few steps.

Step 60.1

Now we'll start adding some pillars to the castle. Place a light blue 2x2 round brick from group 12 on the back two rows of the castle so the right sides are even. The right column will be on the back right support. Repeat symmetrically on the left side.

Step 60.2

Place a pale blue 2x2 round brick on each of the previous two pieces.

Step 61

Place a pale blue 1x2 half circle brick, vertically with the flat side on the right, on the left column of the right piece from the previous step. Repeat symmetrically on the left pillar.

Group 13 contains the tan pieces from the next step.

Step 62.1

Place a pale blue 1x2 plate, vertically, to the right of the right piece from the previous step. Repeat symmetrically on the left pillar.

Step 62.2

Place the two tan 1x1 plates with a horizontal clip on one side from group 13, with the clip on the right, on the right piece from the previous step. Repeat symmetrically with two white 1x1 plates with clips on one side on the left pillar.

Step 62.3

Place a pale blue 1x2 plate, vertically, on each of the pairs of pieces from the previous step.

Step 63.1

Place a pale blue 1x2 brick, horizontally, on the front row of each of the two pillars.

Step 63.2

Place a pale blue 1x1 round brick behind the right stud of the left piece from the previous step. Repeat symmetrically on the right pillar.

Now we'll make some more pillars!

Step 64.1

Place a light blue 2x2 round brick from group 12 on the front two rows of the castle, on the leftmost studs. This piece goes behind the middle cloud that's to the left of the steps. Repeat symmetrically on the right side.

Step 64.2

Make two stacks of three pale blue 2x2 round bricks and place one stack on each of the pieces from the previous step.

Step 65.1

Place a light blue 1x1 brick from group 12 to the left of the back row of the front right pillar. Repeat symmetrically on the left side.

Step 65.2
Place a pale blue 1x1 round brick on each of the previous two pieces.

Step 65.3
Place a pale blue 1x1 brick on each of the previous two pieces

Step 65.4
Place a pale blue 1x1 round brick on each of the previous two pieces.

Step 66.1

Place a pale blue 1x2 half circle brick, horizontally with the flat side at the back, on the front row of each of the front two pillars.

Step 66.2
Place a pale blue 1x1 brick behind the left stud of the right piece from the previous step. Repeat symmetrically on the front left pillar.

Step 67.1

Now we'll add some arches! Place a pale blue 1x6x2 arch brick, horizontally, between the previous two pieces.

Step 67.2
Place a pale blue 1x1 brick to the left of the previous piece. Repeat symmetrically on the right side.

Step 67.3
Place the front stud of a pale blue 1x6x2 arch brick, vertically, to the left of the left piece from the previous step. Repeat symmetrically on the right side.

Step 68.1

Place the leftmost stud of a pale blue 1x4 plate, horizontally, on the frontmost stud of the left arch brick from the previous step. Repeat symmetrically on the right side. There will be two studs between these two pieces.

Step 68.2
Place a pale blue 1x3 plate, horizontally, on the left piece from the previous step so the left sides are even. Repeat symmetrically on the right 1x4 plate.

Step 68.3
Place a pale blue 1x2 plate, horizontally, on the previous piece so the left sides are even. Repeat symmetrically on the right 1x3 plate.

Group 14.

Step 69.1

Now we'll make some decorations over the center arch! Place a pale blue 1x2 brick with a hole, horizontally, in front of you.

Step 69.2

Push a red 1L pin with a stud on one side, with the stud at the front, into the front side of the hole from the previous step.

Step 69.3

Place a gold 1x1 heart shaped tile, with the point of the heart at the bottom, on the stud of the previous piece.

Step 69.4

Place this assembly, centered horizontally, on the middle arch. It should go on the two studs between the two 1x4 plates from step 68.1.

Step 69.5

Place a gold 1x1 plate with a triangle hanging down from one side, with the triangle at the front, to the left of the assembly we just placed. Repeat symmetrically on the right side.

Step 70.1

Assemble a window by attaching a gold 1x2x2 lattice into a pale blue 1x2x2 window frame with an arched window. With the flat side of the window at the back, place the lattice in from the front with the small pins at the top and bottom. Push a lattice in from the front until it clicks. Repeat.

Step 70.2

Place one window, horizontally with the flat side of the frame at the front, on the front row of each of the front two pillars. These rows are rounded and extend to the front of the castle.

Step 71.1

Place the front row of a light blue 2x2 plate on each of the two windows we just placed.

Step 71.2

Place a pale blue 1x3 curved slope tile, horizontally with the tall side on the right, to the right of the back row of the left piece from the previous step. Place another symmetrically to the right of the first.

Step 72

Place a white 1x1 plate behind the leftmost column of the left 2x2 plate from step 71.1. Repeat symmetrically on the right side. These pieces will be lower than the 2x2 plates.

Step 73.1

Now we'll start building the roof of the castle. Rotate the castle 180 degrees so the tower is on the right. Place a pale blue 2x10 plate, horizontally in front of you.

Step 73.2

Place a pale blue 1x3 plate, horizontally, on the front row of the previous piece so the left sides are even. Repeat symmetrically on the right side.

Step 73.3
Place a light blue 1x2 plate with rounded ends, horizontally, behind the left piece from the previous step so the right sides are even. Repeat symmetrically on the right side.

Step 73.4
Place the back stud of a white 1x2 jumper plate, vertically, on the right stud of the left piece from the previous step. Place another to the left of the first. Repeat these two pieces symmetrically on the right side. You'll place a total of four pieces in this step.

Step 73.5
Place a pale blue 1x3 curved slope tile, vertically with the tall side at the front, to the left of the leftmost piece from the previous step so the front sides are even. The back stud will overhang. Repeat symmetrically on the right side.

Step 73.6
Now we'll place this assembly on the castle! Place it, horizontally with the overhanging parts at the back, on the walls of the castle in front of the arch that's at the back. The overhanging studs should attach to the 1x1 plates from step 72 and there will be two studs on the arch in front of it.

Step 74

Find the left and right arch bricks on the castle. These are under the roof we just placed. Place a pale blue 1x8x2 arch brick, horizontally, between the front two studs of these arches. Place another in front of the first.

Step 75

Place a pale blue 1x2x3 tall inverted slope, vertically with the slope at the front, to the left of the front piece from the previous step. Repeat symmetrically on the right side.

Step 76

Place a white 2x3 inverted slope brick, vertically with the slope at the front, centered horizontally on the front 1x8x2 arch from step 74. Place another symmetrically behind the first.

Step 77.1

Now we'll start making the bases for some more towers. These will expand out from the corners, like an upside down cone. Place a peach 2x4x3 half cone, vertically with the flat side on the left, in front of you.

Step 77.2
Place a gold 1x1 round tile with a short bar on top on each of the two studs on the previous piece.

Step 77.3
Find the two clips that extend from the front left corner of the castle. Rotate the cone assembly so the short bars are on the bottom, and so the flat side is at the right. Push the bars of the previous two pieces into the two clips we just found.

Group 15.

Step 78.1

Now we'll do the same thing on the right corner of the castle! Place a pale green 2x4x3 half cone, vertically with the flat side on the left, in front of you.

Step 78.2

Place a pale green 1x1 round tile with a short bar on top on each of the two studs on the previous piece.

Step 78.3

Find the two clips that extend from the front right corner of the castle. Rotate the cone assembly so the short bars are on the bottom, and so the flat side is at the left. Push the bars of the previous two pieces into the two clips we just found. This corner should be symmetrical to the right one.

Step 79.1

Now we'll make a sloped section of roof. Set the castle aside for now. Place a blue 2x6 plate, horizontally, in front of you.

Step 79.2

Now we'll add some tiles to make the roof look like it has fancy shingles! Place the right stud of a light blue 1x2 half circle tile, horizontally with the flat side at the back, on the back left corner of the previous piece. Place three more to the right of the first. The left and right ends will overhang.

Step 79.3

Place a blue 1x1 plate under each of the two overhanging studs.

Step 79.4

Place a sand blue 1x1 quarter circle tile, with the flat sides at the back and right, on the front left corner of the 2x6 plate. Place another symmetrically to the right of the first so they make a half circle. Repeat these two pieces two more times to the right until all the studs of the 2x6 plate are covered. You'll place a total of six pieces in this step.

Step 79.5

Place a blue 2x2 hinge plate, with the hinge at the back, under the angled roof assembly so the left sides are even. The front left stud will be exposed. Repeat symmetrically on the right side.

Step 79.6

Clip a blue 1x2 hinge brick, horizontally with the flat side at the back, onto the hinge of each of the previous two pieces.

Step 79.7

Place the castle, horizontally with the tower on the right, in front of you. Rotate the roof assembly 180 degrees so it's horizontal with the two slope bricks at the front. Find the four 1x2 jumper plates that are on the top of the castle, in front of the arch at the back. Place the two hinge bricks on the roof assembly on these studs. Hinge the top of the roof away down and from you so it slopes down towards the back.

Step 80.1

Now we'll add some roofs above the windows on the back corners of the castle. Find the 2x2 plates that are on the back corners on top of the castle. Place a blue 3x3 dome top, centered vertically and horizontally, on each of these two plates.

Step 80.2

Place a light blue 2x2x2 cone, centered vertically and horizontally, on each of the previous two pieces.

Step 80.3
Place a transparent blue 1x1 round plate with a hollow stud on each of the previous two pieces.

Step 80.4
Push the short bar of a gold unicorn horn into the hollow stud of each of the previous two pieces.

Bag 3.

Sub-Build: Yellow Pegasus

Let’s assemble a yellow pegasus! This is a winged horse. Place a yellow horse, with the head on the left, in front of you. Place a gold pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Main Build: Unicorn Castle (continued)

Group 16.

Step 81.1

Now we’re going to build another tower for the castle. Set the castle aside if you haven’t already. Place a tan 2x6 plate with two rounded corners, horizontally with the row of six studs at the front, in front of you.

Step 81.2
Place the back row of a white 2x2 triple curved slope brick, with the studs on the right, on the right two studs of the front row of the previous piece.

Step 82

Place the back row of a tan 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, under the previous piece so the right sides are even. The left side should be even with the first 2x6 plate with rounded corners.

Step 83

Place a pink 2x2 round tile with a single stud, centered vertically, on the second and third columns from the left on the tower assembly.

Step 84

Place a peach 2x2 macaroni brick, with the flat sides at the back and right, on the front left corner of the assembly. Place three more so they form a circle around the 2x2 round tile.

Step 85

Place a tan 4x4 round plate on the previous four pieces.

Step 86.1

This tower has a telescope in it. We'll start making the base now! Place a pink 2x2 round tile with a single stud, centered vertically and horizontally, on the previous piece.

Step 86.2

Place a gold 1x1 short cone on the previous piece.

Step 87

Place a peach 2x2 macaroni brick, with the flat sides at the back and right, on the front left corner of the assembly. Working clockwise, place two more so they form three quarters of a circle around the telescope base. The front right corner of the circle should be open.

Step 88.1

Place a pink 2x2 macaroni tile on the back left piece from the previous step.

Step 88.2

Place a gold 1x1 tile with a clip, with the fingers of the clip at the back left and front right, on the cone from step 86.2. The telescope will mount to this clip, and will extend over the 2x2 macaroni tile.

Step 89.1

Now we'll build the telescope! Place a gold 1x1 short cone in front of you.

Step 89.2

Place a gold minifigure telescope on the previous piece.

Step 89.3

Place a gold 1x1 plate with one rounded end and a short bar on the other side, with the bar on the left, on the previous piece.

Step 89.4

Place a gold 1x1 round tile with a short bar on top on the previous piece. This will be the eyepiece of the telescope!

Step 89.5

Rotate the telescope assembly so the short bar of the 1x1 plate with a bar is at the bottom, and so the cone is on the left. Clip the bar into the clip on the tower.

Step 89.6

We just need to put a lens in the other end of the telescope! Push the short bar of a transparent gem into the wide end of the cone of the telescope. Now, make sure the telescope is over the 2x2 macaroni tile and not over any of the studs or we won't be able to finish the tower!

Group 17.

Step 90.1

Next, we'll build some pillars to make the tower taller! Make four stacks of three 1x1 round bricks.

Step 90.2

Find the two 2x2 macaroni bricks which have free studs on the left side of the tower. Place a stack of round bricks on each of the four free studs.

Step 91.1

Place a peach 2x2 macaroni brick, with the flat sides at the back and right, on the front left pair of pillars. Place another, with the flat sides at the front and left, on the back right pair of pillars.

Step 91.2

Now we'll build the top of the tower. Place a dark purple 4x4 round plate in front of you.

Step 91.3

Place a bright pink 4x4x2 cone on the previous piece.

Step 91.4

Place a bright pink 2x2x2 cone on the previous piece.

Step 91.5

Place a transparent pink 1x1 cone on the previous piece.

Step 91.6

Push the short bar of a gold unicorn horn into the hollow stud of the previous piece.

Step 91.7

Place the top of the tower on the two 2x2 macaroni bricks that are on top of the rest of the tower.

Step 92

Now we'll add this tower to the castle! Place the castle in front of you so it's horizontal with the small purple tower on the right. The arch with the two windows should be at the back. Find the upside down 4x4 half cone that's on the front left corner of the castle. Place the tower assembly, horizontally with the tower on the left, on the front left corner of the castle so the round end of the tower matches with the top of the inverted half cone.

Group 18.

Step 93.1

Now we'll build another tower! Set the castle aside for now. Place a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the front, in front of you.

Step 93.2

Place the back row of a white 2x2 triple curved slope brick, with the studs on the left, on the left two studs of the front row of the previous piece.

Step 94

Place the back row of a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, under the previous piece so the left sides are even. The right side should be even with the first 2x6 plate with rounded corners.

Step 95

Place a pale green 2x2 macaroni brick, with the flat sides at the back and left, on the front right corner of the assembly. Working counterclockwise, place two more macaroni bricks so they form three quarters of a circle, with the front left corner of the circle open.

Step 96

Place a light green 2x2 macaroni tile on the back right piece from the previous step.

Step 97.1

Next, we'll build some pillars to make the tower taller! Make four stacks of three pale green 1x1 round bricks.

Step 97.2

Find the two 2x2 macaroni bricks which have free studs on the right side of the tower. Place a stack of round bricks on each of the four free studs.

Step 98.1

Place a pale green 2x2 macaroni brick, with the flat sides at the back and left, on the front right pair of pillars. Place another, with the flat sides at the front and right, on the back left pair of pillars.

Step 98.2

Now we'll build the top of the tower. Place a green 4x4 round plate in front of you.

Step 98.3

Place a light green 4x4x2 cone on the previous piece.

Step 98.4

Place a light green 2x2x2 cone on the previous piece.

Step 98.5

Place a transparent green 1x1 cone on the previous piece.

Step 98.6

Push the short bar of a gold unicorn horn into the hollow stud of the previous piece.

Step 98.7

Place the top of the tower on the two 2x2 macaroni bricks that are on top of the rest of the tower.

Step 99

Now we'll add this tower to the castle! Place the castle in front of you so it's horizontal with the small purple tower on the right. The arch with the two windows should be at the back and the telescope tower should be at the front left. Find the two 2x3 inverted slope bricks which are to the right of the telescope tower. Place the green tower, horizontally with the tower on the right, to the right of these two bricks. The rounded right end of the tower should match with the inverted 4x4 half-cone on the front right of the castle.

Group 19.

Step 100.1

Now we'll build a big tower that goes between the last two towers! Set the castle aside for now. Place a yellow 2x6 plate with two rounded corners, horizontally with the row of six studs at the front, in front of you.

Step 100.2

Place the back stud of a yellow 1x2 jumper plate, vertically, on the front right corner of the previous piece so the front stud overhangs.

Step 101

Place the back right corner of a yellow 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, under the front stud of the previous piece.

Step 102.1

Place a yellow 1x2 tile, vertically and centered vertically, to the left of the 1x2 jumper plate from step 100.2.

Step 102.2

Place a yellow 1x2 jumper plate, vertically, to the left of the previous piece.

Step 102.3

Place a pale yellow 1x1 slope tile, with the tall side at the left, in front of the previous piece. Repeat symmetrically on the back side.

Step 103

Place a pale yellow 1x2 brick, vertically, on the leftmost column of the tower assembly. Place another to the right of the first.

Step 104.1

Place a yellow 1x2 jumper plate, vertically, on the right piece from the previous step.

Step 104.2

Push the short bar of a transparent pink gem into the hollow stud of the previous piece.

Step 105.1

Place a yellow 1x1 brick with a recessed stud on one side, with the side stud on the left, on the front stud of the leftmost 1x2 brick from step 103. Place another behind the first.

Step 105.2

Place a pale yellow 1x2 slope tile, vertically with the tall side on top, on the side studs of the previous two pieces.

Group 20.

Step 106.1

Now we'll build one of the walls of the tower. Set the tower assembly aside for now. Place a pale yellow 1x2 plate, horizontally, in front of you.

Step 106.2

Place a pale yellow 1x1 plate on the left stud of the previous piece.

Step 107

Place a yellow 1x1 plate with a stud hanging down from one side, with the side stud on the left, on the previous piece.

Step 108.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the left, on the previous piece.

Step 108.2

Place a pale yellow 1x1 brick to the right of the previous piece.

Step 109.1

Place the right stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 109.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 110.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the left, on the left stud of the previous piece.

Step 110.2

Place a pale yellow 1x1 plate to the right of the previous piece.

Step 111.1

Place the right stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 111.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 112.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the left, on the left stud of the previous piece.

Step 112.2

Place a pale yellow 1x1 plate to the right of the previous piece.

Step 113.1

Place the right stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 113.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 114

There should now be seven studs on the left side of the wall. Place a transparent yellow 1x1 round plate on the top side stud on the left side of the wall.

Step 115.1

Place a pale yellow 1x1 quarter circle tile, with the flat sides at the top and back, on the previous piece.

Step 115.2

Place a pale yellow 1x2 slope tile, upright with the tall side at the back, on the side studs below the previous piece. Place two more below the first so they cover all of the side studs on the wall.

Step 116

Set the rest of the tower assembly, horizontally with the taller side on the left, in front of you. Place the wall, with the slope tiles on the left, on the left two studs on the front row of the tower assembly. There should be a 1x1 slope tile to the right of the wall.

Group 21.

Step 117.1

Now we'll build the other wall! Set the tower assembly aside for now. Place a pale yellow 1x2 plate, horizontally, in front of you.

Step 117.2

Place a pale yellow 1x1 plate on the right stud of the previous piece.

Step 118

Place a yellow 1x1 plate with a stud hanging down from one side, with the side stud on the right, on the previous piece.

Step 119.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the right, on the previous piece.

Step 119.2

Place a pale yellow 1x1 brick to the left of the previous piece.

Step 120.1

Place the left stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 120.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 121.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the right, on the right stud of the previous piece.

Step 121.2

Place a pale yellow 1x1 plate to the left of the previous piece.

Step 122.1

Place the left stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 122.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 123.1

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the right, on the right stud of the previous piece.

Step 123.2

Place a pale yellow 1x1 plate to the left of the previous piece.

Step 124.1

Place the left stud of a pale yellow 1x2 brick, horizontally, on the previous piece.

Step 124.2

Place a pale yellow 1x2 plate, horizontally, on the previous piece.

Step 125

There should now be seven studs on the right side of the wall. Place a transparent yellow 1x1 round plate on the top side stud on the right side of the wall.

Step 126.1

Place a pale yellow 1x1 quarter circle tile, with the flat sides at the top and back, on the previous piece.

Step 126.2

Place a pale yellow 1x2 slope tile, upright with the tall side at the back, on the side studs below the previous piece. Place two more below the first so they cover all of the side studs on the wall.

Step 127

Set the rest of the tower assembly, horizontally with the first wall at the front, in front of you. Rotate the second wall assembly 180 degrees so the slope tiles are on the left. Place this wall on the left two studs on the back row of the tower. It will be symmetrical to the first wall, and there should be a 1x1 slope tile to the right of the wall.

Group 22.

Step 128.1

Place a pale yellow 1x4 arch brick, vertically, on the right studs of the walls so it connects them.

Step 128.2

Place a pale yellow 1x4 plate, vertically, on the previous piece.

Step 129.1

Assemble a square window by attaching a gold 1x2x2 lattice into a tan 1x2x2 window frame. Find the lip in the window frame and rotate the frame so the lip is at the front, then push a lattice in from the front until it clicks.

Step 129.2

Place this window, vertically with the lattice on the left, centered vertically on the leftmost column between the two walls.

Step 129.3

Assemble an arched window by attaching a gold 1x2x3 lattice into a tan 1x2x3 arched window frame. Find the lip in the window frame and rotate the frame so the lip is at the front, then push a lattice in from the front until it clicks.

Step 129.4

Place this window, vertically with the lattice on the left, on the square window.

Step 130.1

Now we'll make an arch assembly to go over the window. Place a pale yellow 2x4 plate, vertically, in front of you.

Step 130.2

Place a pale yellow 1x4 arch brick, vertically, under the left column of the previous piece. Place another to the right of the first.

Step 130.3

Place the assembly we just made on top of the tower, to the left of the 1x4 arch brick that's already there. The left column should go over the arched window.

Group 23 contains the white 2x2 round plate from the next step.

Step 131.1

Now we'll start making the roof of the big tower! Place an orange 8x8 round plate in front of you.

Step 131.2

Place a white 2x2 round plate from group 23, centered vertically and horizontally, on the previous piece.

Step 131.3

Place a dark orange 8x8 dish, centered vertically and horizontally, on top of the roof assembly.

Step 131.4

Place an orange 2x2 round plate, centered vertically, under the rightmost two columns of the roof.

Step 131.5

Place the roof, centered vertically with the previous piece on the right, on top of the walls of the big tower so the roof overhangs two columns to the right, and one to the left.

Step 132

Now we'll place the big tower on the castle! Place the castle, horizontally with the small purple tower on the right, in front of you. Find the two 2x3 inverted slope bricks which are between the telescope tower and the green tower. Rotate the big tower so the windows are at the back. Place it, centered horizontally, on the two 2x3 inverted slope bricks so the fronts are even.

Step 133.1

Now we'll build the top of the tower! Place an orange 4x4x2 cone, centered vertically and horizontally, on the roof of the big tower.

Step 133.2

Place an orange 2x2x2 cone on the previous piece.

Step 133.3

Place a transparent yellow 1x1 cone on the previous piece.

Step 133.4

Find a gold flower petal piece. This looks like a dish with pointed corners that stick up. Place this on the previous piece.

Step 133.5
Push the short bar of a gold crown into the hollow stud of the previous piece.

This completes the Unicorn Castle main build! Now we can take it apart and build either the Unicorn Ship or the Unicorn Playground!

Build 2: Unicorn Ship

The Unicorn Ship build is 216 pieces, and 76 building steps.

Sub-Builds: Unicorn & Pegasi

Pink Unicorn: This group contains the pieces to build the white unicorn with a pink mane.
Pink Pegasus: This group contains the pieces to build the pink pegasus.
Yellow Pegasus: This group contains the pieces to build the yellow pegasus.

Main Build: Unicorn Ship

Group 1 contains the pieces for steps 1-4 of the ship.
Group 2 contains the pieces for steps 5-11.
Group 3 contains the pieces for steps 12-16.
Group 4 contains the pieces for steps 17-20.
Group 5 contains the pieces for steps 21-29.
Group 6 contains the pieces for steps 30-39.
Group 7 contains the pieces for steps 40-47, not including the transparent red 1x1 cone from step 41.
Group 8 contains the transparent red 1x1 cone from step 41.
Group 9 contains the pieces for steps 48-53, not including the pale yellow 1x2 plate from step 51.
Group 10 contains the pale yellow 1x2 plate from step 51.
Group 11 contains the pieces for steps 54-64.
Group 12 contains the pieces for steps 65-68, not including the two transparent yellow 1x1 round plates from step 68.
Group 13 contains the two transparent yellow 1x1 round plates from step 68.
Group 14 contains the pieces for steps 69-71.
Group 15 contains the pieces for steps 72-76.

Building Instructions:

Sub-Build: White Unicorn with pink mane

Assemble a white unicorn by pushing the short bar on a gold unicorn horn into the small hole that is on the unicorn’s head in front of its ears. This unicorn is white, with a pink mane and tail.

Sub-Build: Pink Pegasus

Let’s assemble a pink pegasus! This is a winged horse. Place a pink horse, with the head on the left, in front of you. Place a bright pink pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Sub-Build: Yellow Pegasus

Let’s assemble a yellow pegasus! This is a winged horse. Place a yellow horse, with the head on the left, in front of you. Place a gold pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Main Build: Unicorn Ship

Group 1

Step 1

Let’s start building the ship! Place a white 6x6 round plate, upside down, in front of you.

Step 2

Place a pale yellow 2x4 plate, upside down and horizontally, centered vertically on the previous piece so the right sides are even.

Step 3

Place a white 8x8 plate, upside down, centered vertically to the left of the previous piece.

Step 4.1

Keeping the round plate on the right, flip the ship so it’s right side up. Place a light blue 1x2 plate with rounded ends, horizontally, on the second row from the front on the 8x8 plate and to the left of the 6x6 round plate, There should be five free studs to the left of this piece. Repeat symmetrically on the back side.

Step 4.2

Place a light blue 1x2 plate with rounded ends, vertically and centered vertically, to the left of the 6x6 round plate.

Group 2.

Step 5.1

Place the left column of a white 2x2 plate on the previous piece.

Step 5.2
Place an orange 6x6 round plate, centered vertically, to the right of the previous piece.

Step 6

Place a blue 2x6 plate, horizontally, centered vertically on the previous piece so the left columns attach to the 2x2 plate from step 5.1. There should be two free columns to the right of this piece.

Step 7.1

Place a white 2x2 brick to the left of the previous piece.

Step 7.2
Place a white 2x3 brick, horizontally, to the left of the previous piece.

Step 8

Place a pale blue 2x10 plate, horizontally, on the previous piece so the right end is even with the right end of the 2x6 plate from step 6. There should be one free column of studs to the left of this piece.

Step 9.1

Place a pale yellow 1x1 brick on the rightmost stud on the front row of the 8x8 plate. Repeat symmetrically on the back side.

Step 9.2
Find the 1x2 plate with rounded ends that is one row behind the front piece from the previous piece and offset to the left. Place a pale blue 1x1 round brick on the right stud of this piece. Repeat symmetrically on the back side.

Step 10

Place a pale yellow 1x2 brick, horizontally, on the front row of the ship and to the left of the front 1x1 brick from step 9.1. Place another to the left of the first. Repeat these two pieces on the back side. You'll place a total of four pieces in this step.

Step 11.1

Find the 2x10 plate that's on the middle two rows of the ship. There should be two free columns to the right of it. Place a yellow 1x2 tile, vertically, on the rightmost column of the 2x10 plate.

Step 11.2
Place a yellow 1x2 jumper plate, vertically, to the left of the previous piece.

Step 11.3
Place a pale yellow 1x2 plate, vertically, to the left of the previous piece.

Step 11.4
Place a yellow 1x2 jumper plate, vertically, to the left of the previous piece.

Step 11.5

Place a pale yellow 1x2 plate, vertically, to the left of the previous piece.

Step 11.6
Place a pale yellow 1x2 slope tile, vertically with the tall side on the left, to the left of the previous piece.

Group 3.

Step 12.1

Rotate the ship 180 degrees so the two 6x6 round plates are on the left and the 8x8 plate is on the right. Find the front row of the top 6x6 round plate. This row only has two studs. Place a pale blue 1x1 brick on the left stud of the front row. Repeat symmetrically on the back side.

Step 12.2
Place a pale blue 1x2 brick, horizontally, to the right of each of the previous two pieces.

Step 13

Find the row of bricks that's on the front row of the 8x8 plate. This row has five studs and there are three free studs to the right of it. Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the left, on the leftmost brick. Repeat symmetrically on the back side.

Step 14

Place the front stud of a white 2x2 rounded corner plate, with the rounded corner at the back left so the studs form a braille letter I, on the front piece from the previous step. The back stud should attach to a 1x1 round brick. Repeat symmetrically on the back side.

Step 15.1

Place a white 1x1 plate on the front stud of the front piece from the previous step. Repeat symmetrically on the back side.

Step 15.2
Place a pale blue 1x3 plate, horizontally, centered horizontally behind the front piece from the previous step. Its right stud will attach to the right stud of a 2x2 plate with rounded corners. Repeat symmetrically on the back side

Step 16.1

Place a pale yellow 1x1 quarter circle tile, with the flat sides on the front and left, on the right stud of the front piece from the previous step. Repeat symmetrically on the back side.

Step 16.2
Place a pale yellow 1x2 plate, horizontally, to the left of each of the previous two pieces.

Group 4.

Step 17

Place a pale yellow 1x1 plate on the left stud of each of the previous two pieces.

Step 18.1

Find the 1x1 plate with two studs sticking up from one side which is on the front row of the ship. This piece is on a row of bricks. Place the left stud of a white 1x2x2 curved slope tile, horizontally with the tall side on the left, on this piece. Repeat symmetrically on the back side.

Step 18.2

Place a pale blue 1x3 plate, horizontally, to the right of each of the previous two pieces.

Step 19

Place a pale yellow 1x2 slope tile, upright with the tall side at the back, on the two side studs of the front 1x1 plate with two side studs we found in step 18.1. Repeat symmetrically on the back side.

Step 20.1

Assemble a window by attaching a gold 1x2x2 lattice into a pale blue 1x2x2 window frame with an arched window. Find the lip in the window frame and rotate the frame so the lip is at the front, then push a lattice in from the front until it clicks. Repeat.

Step 20.2

Place one window, horizontally with the flat side at the front, on the front studs on the second and third columns from the left on the ship. Repeat symmetrically on the back side with the other window. These pieces will attach to bricks.

Group 5.

Step 21.1

Place a white 1x1 plate on the left stud of each of the previous two pieces.

Step 21.2

Place a white 1x2x2 curved slope tile, horizontally with the tall side on the left, to the right of each of the previous two pieces.

Step 22.1

Now we'll build the wall to the captain's cabin! Set the rest of the ship aside for now. Place a yellow 2x6 plate with two rounded corners, vertically with the column of six studs on the right, in front of you.

Step 22.2

Place a pale yellow 1x4 plate, vertically and centered vertically, on the right column of the previous piece.

Step 23.1

Place a yellow 1x2 jumper plate, vertically and centered vertically, to the left of the previous piece.

Step 23.2
Push the short bar on a transparent pink gem into the hollow stud of the previous piece.

Step 24.1

Assemble an arched window by attaching a gold 1x2x3 lattice into a tan 1x2x3 arched window frame. Find the lip in the window frame and rotate the frame so the lip is at the front, then push a lattice in from the front until it clicks.

Step 24.2
Place the arched window, vertically with the lattice on the left, centered vertically on the right column.

Step 25

Stack two pale blue 1x1 bricks and place the stack in front of the window. Repeat symmetrically on the back side.

Step 26

Place a pale yellow 1x4 arch brick, vertically, on the previous two stacks pieces so it goes over the arched window.

Step 27

Place the right stud of a pale blue 1x2x3 inverted slope brick, horizontally with the slope on the left, in front of the previous piece. Repeat symmetrically on the back side.

Step 28

Let’s add the wall to the rest of the ship! Place the rest of the ship, horizontally with the 6x6 round plates on the left, in front of you. Place the window assembly, vertically with the rounded corners on the left, on the left two columns of the ship.

Step 29

Place a pale blue 1x2 plate, horizontally, on the front studs on the second and third columns from the left. This will attach the cabin wall to the rest of the ship. Repeat symmetrically on the back side.

Group 6.

Step 30.1

Now we’ll build the roof to the cabin! Set the rest of the ship aside for now. Place a tan 2x6 plate with two rounded corners, vertically with the column of six studs on the right, in front of you.

Step 30.2
Place a pale yellow 1x2 plate, vertically and centered vertically, on the right column of the previous piece.

Step 31

Place a pale blue 1x2 brick with hole, vertically, to the left of the previous piece.

Step 32.1

Place a tan 1x1 plate with a horizontal clip on one side, horizontally with the clip on the left, in front of the previous piece. Repeat symmetrically on the back side.

Step 32.2

Place a pale yellow 1x1 plate on each of the previous two pieces.

Step 33

Place the front stud of a transparent blue 1x1 plate with a 1x1 curved slope on one side, vertically with the curved slope at the front, on the front piece from the previous step. Place another symmetrically behind the first.

Step 34

Push a red 1L pin with a stud on one side, with the stud on the left, into the hole of the 1x2 brick with a hole from step 31.

Step 35

Place a gold 1x1 heart shaped tile, with the point at the bottom, on the stud of the previous piece.

Step 36.1

Now we'll place a crown on the roof. Place a gold 1x2 half circle tile with a single stud, vertically with the flat side on the right, centered vertically on the left wall of the assembly.

Step 36.2

Find a gold flower petal piece. This looks like a dish with pointed corners that stick up. Place this on the previous piece.

Step 37

Push the short bar of a gold crown into the hollow stud of the previous piece.

Step 38

Now we'll add the roof to the cabin! Set the rest of the ship, horizontally with the cabin on the left, in front of you. The cabin is the tall side of the ship. Place the front right corner of the cabin roof, with the roof vertically with the column of six studs on the right, on the leftmost stud on the front wall of the cabin. The left column with the clips should overhang.

Step 39.1

Rotate the ship 180 degrees so the cabin is on the right. Find the crown that's on the rightmost column of the ship. Place a pale yellow 1x2 slope tile, vertically with the tall side on the right, centered vertically to the left of the crown. Place another to the left of the first.

Step 39.2

Place a pale yellow 1x2 slope tile, horizontally with the tall side at the front, in front of the previous two pieces. Repeat symmetrically on the back side.

Group 7.

Step 40.1

Place a gold 1x1 plate with a triangle hanging down from one side, with the triangle at the front, in front of the front piece from the previous step so the right sides are even. Repeat symmetrically on the back side.

Step 40.2

Place the rightmost stud of a pale blue 1x3 curved slope tile, horizontally with the tall side on the right, on each of the two pieces from the previous step.

Group 8 contains the transparent red 1x1 cone from the next step.

Step 41.1

Now we'll make a couple of lanterns! These hang off the cabin so the unicorns can find the ship in the dark! Place a gold short cone in front of you.

Step 41.2

Place the transparent red 1x1 cone from group 8 on the previous piece.

Step 41.3

Place a gold 1x1 round tile with a short bar on top on the previous piece.

Step 41.4

Repeat steps 41.1-41.3 with a transparent purple 1x1 cone from group 6.

Step 41.5

Clip the bar on top of the first lantern into the back clip on the right side of the ship. Clip the purple lantern into the other clip. The lanterns should hang down.

Step 42.1

Place a yellow 1x1 brick with a recessed stud on one side, with the side stud on the left, on the leftmost stud on the front row of the ship. Repeat symmetrically on the back side.

Step 42.2

Place a pale yellow 1x2 brick, horizontally, to the right of each of the previous two pieces.

Step 42.3

Place the right column of a white 1x2 plate with a 1x2 inverted curved slope on one side, with the curved slope on the left, on the second and third studs from the front on the leftmost column of the ship. Repeat symmetrically on the back side.

Step 43.1

Place a pale yellow 1x2 plate, vertically, on the leftmost column of each of the previous two pieces.

Step 43.2

Find the 1x1 brick with a recessed stud on one side that's on the front left corner of the ship. Place a pale yellow 1x1 slope tile, with the tall side at the back, on the side stud of this piece. Repeat symmetrically on the back side of the ship.

Step 44.1

Place a white 2x2 round plate on the front two rows of the ship so the left side is even with the left side of the ship. The front left stud will go over the front piece from the previous step. Repeat symmetrically on the back side.

Step 44.2

Place a white 1x1 plate on the leftmost column behind the front piece from the previous step. Repeat symmetrically on the back side.

Step 44.3

Place the left column of a light blue 2x2 plate between the previous two pieces. The left column of this piece won't attach to anything.

Step 45.1

Now we'll extend the ship to the left using a small assembly. Place a pale yellow 1x2 plate, vertically, in front of you.

Step 45.2

Place a white 2x3 inverted slope brick, horizontally with the slope on the left, on the previous piece.

Step 45.3

Place a yellow 2x6 plate with two rounded corners, vertically with the column of six studs on the right, centered vertically on the left two columns of the previous piece.

Step 45.4

Place the right column of the assembly we just made, centered vertically, under the leftmost column of the ship. This will attach to the bottom of the light blue 2x2 plate from step 44.3.

Step 46.1

Place the left column of a white 2x2 round plate on the front two studs on the second column from the left of the ship. This will attach the assembly we just made to the rest of the ship. Repeat symmetrically on the back side.

Step 46.2

Place a pale blue 1x4 plate, horizontally, behind the front piece from the previous step so the left sides are even. Place another behind the first.

Step 46.3
Place a transparent blue 1x1 round plate on the leftmost stud on the front row of the ship. This piece goes on a 2x2 round plate. Repeat symmetrically on the back side.

Step 47.1

Place a pale blue 1x3 curved slope tile, horizontally with the tall side on the left, to the right of each of the previous two pieces.

Step 47.2
Place the front row of a pale blue 2x2 macaroni tile, with the flat sides on the right and back, to the left of the front piece from the previous step. Repeat symmetrically on the back side. There should be four studs between the left columns of the previous two pieces.

Group 9.

Step 48.1

Place a pale blue 1x2 plate, vertically, behind the left column of the front piece from the previous step. Place another behind the first.

Step 48.2
Place a white 2x3 inverted slope brick, horizontally with the slope on the left, centered vertically on the leftmost column of the ship so it overhangs two columns to the left.

Step 49.1

Place the leftmost column of a white 2x4 curved slope tile, horizontally with the tallest side on the left, on the rightmost column of the previous piece.

Step 49.2
Place a transparent blue 1x1 quarter circle tile, with the flat sides on the right and back, in front of the second column from the left on the previous piece. This piece will be behind the left column of a 2x2 macaroni tile. Repeat symmetrically on the back side.

Step 50

Place a white 2x4 tile with two studs, horizontally, to the left of the 2x4 curved slope tile from step 49.1. It will overhang two columns to the left of the ship.

Group 10 contains the pale yellow 1x2 plate from the next step.

Step 51.1

Now we will start building the mast of the ship! Place a pale blue 2x2 round brick in front of you.

Step 51.2
Place the pale yellow 1x2 plate from group 10, vertically, on the right column of the previous piece.

Step 51.3
Place a yellow 1x1 plate with a stud hanging down from one side, with the side stud on the right, on each of the two studs on the previous piece.

Step 51.4
Place a pale blue 1x2 plate, vertically, on the previous two pieces.

Step 51.5
Place a pale blue 1x2 half circle brick, vertically with the flat side on the right, to the left of the previous piece.

Step 51.6
Place the bottom row of a bright pink 2x2 round tile with a single stud, upright with the stud on the right, on the two side studs on the right side of the mast assembly. This is the wheel that steers the ship!

Step 51.7
Now we'll place the assembly we just made. Find the center two rows on the ship. There is a pale yellow 1x2 slope tile that is on these rows near the middle of the ship. Place the mast assembly, with the wheel on the right, to the left of the 1x2 slope tile we just found.

Step 52.1

Next up we'll continue building the mast! Set the rest of the ship aside for now. Place a pale blue 2x2 round brick in front of you.

Step 52.2
Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the right, on the front right stud of the previous piece. Place another behind the first.

Step 53

Place a pale blue 1x2 half circle brick, vertically with the flat side on the left, on the previous two pieces.

Group 11.

Step 54.1

Place a pale blue 1x2 plate, vertically, on the previous piece.

Step 54.2
Place a pale blue 1x2 half circle brick, vertically with the flat side on the right, to the left of the previous piece. It will be lower than the previous piece. Place another on top of the first.

Step 55

Place a yellow 1x1 plate with two studs sticking up from one side, with the side studs on the right, to the right of the previous piece so the front sides are even. Place another behind the first.

Step 56

Stack three pale blue 2x2 round bricks and place the stack on the mast.

Step 57.1

Now we'll make the top of the mast. Place a purple 4x4 round plate in front of you.

Step 57.2

Place a light blue 2x2 plate, centered vertically and horizontally, on the previous piece.

Step 57.3

Place a light blue 1x2 half circle tile, horizontally with the flat side at the back, in front of the previous piece. Repeat symmetrically on the back side.

Step 57.4

Place a light blue 1x2 half circle tile, vertically with the flat side on the right, to the left of the 2x2 plate from step 57.2. Repeat symmetrically on the right side.

Step 57.5

Place a light blue 2x2x2 cone, centered vertically and horizontally, on the top of the mast assembly.

Step 57.6

Place the top assembly, centered vertically and horizontally, on the rest of the mast.

Step 58.1

Now we'll make the sails. Set the mast assembly aside for now. Place a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the front, in front of you.

Step 58.2

Place a white 1x6 plate, horizontally and centered horizontally, on the back row of the previous piece.

Step 59

Place a white 2x4 plate, vertically and centered horizontally, in front of the previous piece. It will overhang three rows to the front.

Step 60

Place a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, centered horizontally under the previous piece and in front of another 2x6 plate with rounded corners.

Step 61

Place a white 2x3 plate, horizontally, to the left of the front two rows of the 2x4 plate from step 59. Place another behind the first. Repeat these two pieces symmetrically on the right side. You'll place a total of four pieces in this step.

Step 62

Place a white 4x4 round plate, centered horizontally, on the sail assembly so the front sides are even.

Step 63.1

Place the back row of a white 2x6 plate, horizontally, under the front row of the sail so the left sides are even.

Step 63.2

Place a white 2x2 plate to the right of the previous piece.

Step 64

Place the back stud of a white 1x1 plate with a 1x1 curved slope on one side, vertically with the curved slope at the front, on the second stud from the left of the front row of the sail. Place five more to the right of the first. There will be one free stud to the left of the left piece from this step, and one free stud to the right of the right piece.

Group 12.

Step 65

Place a white 1x2 half circle tile, vertically with the flat side on the right, to the left of the left piece from the previous step. Repeat symmetrically on the rightmost column of the sail.

Step 66.1

The sail will have a rainbow on it! We'll start adding the stripes of the rainbow now. Place the left two columns of a pink 3x3 macaroni tile, with the flat sides at the left and back, in front of the right two columns of the 4x4 round plate on top of the sail. The front row will be behind a row of curved slopes. Place another symmetrically to the left of the first.

Step 66.2

Place a pale yellow 1x1 plate behind the rightmost column of the right piece from the previous step. Repeat symmetrically on the left side.

Step 67

Place a white 1x2 jumper plate, vertically, to the right of the right piece from the previous step so the back sides are even. Place another in front of the first. Repeat these two pieces symmetrically on the left side. You'll place a total of four pieces in this step.

Group 13 contains two transparent yellow 1x1 round plates from the next step.

Step 68.1

Place a transparent yellow 1x1 round plate from group 13 on each of the back two jumper plates from the previous step.

Step 68.2
Place a transparent red 1x1 round plate on each of the front two jumper plates from step 67.

Step 68.3
Place a white 2x2 round plate, centered vertically and horizontally, on the 4x4 round plate on the sail. There should be two free rows behind this piece.

Group 14.

Step 69.1

Place the left column of a pale yellow 3x3 macaroni tile, with the flat sides at the left and back, in front of the right column of the previous piece. The front row will be behind the first pair of macaroni tiles on the sail. Place another symmetrically to the left of the first.

Step 69.2
Place the left column of a white 2x2 triple curved slope, with the row of studs at the front, behind the right column of the right piece from the previous step. The right side should be even with the right side of the sail. Repeat symmetrically on the left side.

Step 70.1

Find the 2x2 round plate that’s centered on the sail. Place a pale yellow 1x1 plate behind each of the two rows of this piece.

Step 70.2
Place a white 1x1 curved slope, with the tall side at the front, behind each of the previous two pieces.

Step 71

Place the back stud of a white 1x1 plate with a 1x1 curved slope on one side, vertically with the curved slope at the back, to the right of the right piece from the previous step. Repeat symmetrically on the left side.

Group 15.

Step 72.1

Place the front left stud of a light green 3x3 macaroni tile, with the flat sides on the left and back, on the front right stud of the 2x2 round plate on the sail. Place another symmetrically to the left of the first.

Step 72.2
Place a white 1x1 tile on each of the two center studs on the back row of the sail.

Step 73.1

Now we'll work on the other side of the sail. Flip the sail over so the studs are on the bottom and the row with six curved slopes is at the back. The row of four curved slopes should be at the front. Place a white 1x2 inverted curved slope tile, upside down and vertically with the highest stud at the back, on the rightmost column of the sail so the front sides are even. Repeat symmetrically on the left side.

Step 73.2

Place a white 1x1 plate, upside down, behind each of the previous two pieces. Place another behind each of the first two. You'll place a total of four pieces in this step.

Step 74

Now we'll add the sail to the mast! Place the mast assembly, with the side studs at the bottom and the cone at the back, centered horizontally on the sail. The front two rows of side studs on the bottom of the sail should go on the third and four rows of anti-studs from the front of the sail and there should be one free row of anti-studs behind the back row of side studs on the mast.

Step 75

Now we'll place the mast on the ship. Place the ship, horizontally with the cabin on the right, in front of you. Rotate the mast and sail assembly so it's upright with the sail on the left and 2x2x2 cone on top. Place the bottom 2x2 round brick on the sail assembly on the base of the mast that's already on the ship.

Step 76.1

All that's left now is to finish the top of the mast! Place a gold telescope on top of the 2x2x2 cone on top of the mast.

Step 76.2

Place a pale yellow bird, with the beak on the left, on the previous piece. Great job! Now the ship is complete.

Build 3: Unicorn Playground

The Unicorn Playground build is 180 pieces, and 54 building steps.

Sub-Builds: Unicorn & Pegasi

Pink Unicorn: This group contains the pieces to build the white unicorn with a pink mane.
Pink Pegasus: This group contains the pieces to build the pink pegasus.
Yellow Pegasus: This group contains the pieces to build the yellow pegasus.

Main Build: Unicorn Playground

Group 1 contains the pieces for steps 1-4 of the playground
Group 2 contains the pieces for steps 5-8.
Group 3 contains the pieces for steps 9-17, not including the pale blue 1x2 plate from step 12.
Group 4 contains the pale blue 1x2 plate from step 12.

Group 5 contains the pieces for steps 18-20.
Group 6 contains the pieces for steps 21-25.
Group 7 contains the pieces for steps 26-30.
Group 8 contains the pieces for steps 31-34.
Group 10 contains the pieces for steps 35-43, not including the pale blue 1x2 plates from step 38, the transparent red 1x1 round plates from steps 42 and 43, or the pale green 3x3 macaroni tile from step 43.
Group 11 contains the pale blue 1x2 plates from step 38.
Group 12 contains the transparent red 1x1 round plates from steps 42 and 43.
Group 13 contains the pale green 3x3 macaroni tile from step 43.
Group 14 contains the pieces for steps 44-50, not including the transparent gem from step 49.
Group 15 contains the transparent gem from step 49.
Group 16 contains the pieces for step 51, and the orange and transparent yellow pieces from steps 53 and 54.
Group 17 contains the bright pink and transparent pink pieces from steps 53 and 54.
Group 18 contains the light green and transparent green pieces from steps 53 and 54.

Building Instructions:

Sub-Build: White Unicorn with pink mane

Assemble a white unicorn by pushing the short bar on a gold unicorn horn into the small hole that is on the unicorn's head in front of its ears. This unicorn is white, with a pink mane and tail.

Sub-Build: Pink Pegasus

Let's assemble a pink pegasus! This is a winged horse. Place a pink horse, with the head on the left, in front of you. Place a bright pink pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Sub-Build: Yellow Pegasus

Let's assemble a yellow pegasus! This is a winged horse. Place a yellow horse, with the head on the left, in front of you. Place a gold pair of wings, vertically with the feathers on the right, on the stud on top of the horse.

Main Build: Unicorn Playground

Group 1

Step 1.1

Let's start building the Unicorn Playground! The playground has a small house and a table set among some trees. We'll start building a base to place the playground on. Place a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the front, in front of you.

Step 1.2

Place the back row of a white 2x3 plate, horizontally, under the front row of the previous piece so the right sides are even.

Step 2

Place a white 2x6 plate, horizontally, to the left of the previous piece.

Step 3

Place a green 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, in front of the first 2x6 plate with two rounded corners.

Step 4

Place a light blue 1x2 plate with rounded ends, horizontally, under the left two studs of the front row of the previous piece. Place another to the right of the first.

Group 2.

Step 5.1

Place an orange 6x6 round plate, centered vertically, to the left of the two 2x6 plates with rounded corners.

Step 5.2

Place a tan 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, under the front two rows of the previous piece.

Step 6.1

Keeping the 6x6 round plate on the left, flip the base over so it’s upside down and horizontal. The previous piece should be at the back left. Place a white 2x2 round plate, upside down, in front of the left two columns of the previous piece. It should be even with the left side of the 6x6 plate.

Step 6.2

Place a tan 1x10 plate, upside down and vertically, to the right of the previous piece and in front of the tan 2x6 plate with rounded corners from step 5.2. It will extend six studs in front of the 6x6 plate.

Step 7

Place a white 8x8 plate, upside down, to the right of the previous piece so the front sides are even.

Step 8.1

Flip the base over so the studs are on top and the 6x6 round plate is at the back right corner. Place the left two columns of a pale blue 2x10 plate, horizontally, on the right two columns of the base in front of the 6x6 round plate. The right eight columns will overhang.

Step 8.2
Place the back two rows of a white 2x3 plate, vertically, under the previous piece and to the right of the rest of the base.

Step 8.3
Place a white 1x6 plate, horizontally, to the right of the previous piece so the back sides are even. Place another in front of the first. The right side of these pieces should be even with the right side of the 2x10 plate.

Group 3.

Step 9.1

Place a purple 4x4 round plate in front of the 2x10 plate so the left sides are even.

Step 9.2
Place the left two columns of a white 2x4 plate, horizontally, centered vertically under the right two columns of the previous piece.

Step 9.3
Place a light blue 2x2 plate on the right two columns of the previous piece.

Step 9.4
Place a bright pink 2x2 round plate to the left of the previous piece.

Step 9.5
Place a light blue 1x2 plate with rounded ends, vertically, on the left column of the previous piece.

Step 9.6
Place a transparent blue 1x1 plate with a 1x1 curved slope on one side, horizontally with the curved slope on the right, to the right of the previous piece so the front sides are even. Place another behind the first.

Step 9.7
Place a transparent blue 1x1 quarter circle tile, with the flat sides on the left and back, to the right of the front piece from the previous step. Place another symmetrically behind the first.

Step 9.8
Place the right column of a light blue 2x2 plate on the previous two 1x1 plates with curved slopes from step 9.6 so the left column connects to the 1x2 plate with rounded ends from step 9.5.

Group 4 contains the light blue 1x1 quarter circle tiles from step 10.

Step 10.1

Place the front right stud of a tan 2x6 plate with two rounded corners, vertically with the column of six studs on the right, to the left of the back row of the previous piece. There should be four free studs behind the right column.

Step 10.2

Place a light blue 1x1 quarter circle tile from group 4, with the flat sides at the left and back, to the right of the third row from the front of the previous piece. This will be on a pale blue 2x10 plate. Place another symmetrically behind the first.

Step 11.1

Place a yellow 1x2 jumper plate, horizontally, on the second row from the back of the 2x6 plate with rounded ends from step 10.1.

Step 11.2
Place a yellow 1x2 tile, horizontally, in front of the previous piece.

Step 11.3
Place a yellow 1x2 jumper plate, horizontally, in front of the previous piece.

Step 11.4
Place a pink 2x2 macaroni tile, with the flat sides at the right and back, in front of the previous piece so the left sides are even.

Group 5 contains the pale blue 1x2 plate from the next step.

Step 12.1

Place a white 1x1 plate on the front row of the base so there are five free studs to the left of it. There should be one free stud and one partially covered stud to the right, between this piece and the 8x8 round plate.

Step 12.2
Place a white 1x3 plate, vertically, behind the previous piece.

Step 12.3
Place a pale green 1x1 round tile with a short bar sticking up to the right of the back stud of the previous piece.

Step 12.4
Place the blue 1x2 plate from group 5, vertically, in front of the previous piece.

Step 12.5
Place a pale yellow 1x2 plate, horizontally, to the left of the back stud of the 1x3 plate from step 12.2. There should be three free studs to the left of this piece, and three free rows in front of it.

Step 13.1

Place a pale green 1x1 round tile with a short bar sticking up behind the right stud of the previous piece.

Step 13.2
Place a light blue 1x2 half circle tile, horizontally with the flat side at the back, behind the previous piece so the left sides are even. Place another symmetrically behind the first.

Step 13.3
Place a light blue 1x2 half circle tile, horizontally with the flat side at the back, to the left of the pale yellow 1x2 plate from step 12.5. There should be one free stud to the left of this piece. Place another symmetrically behind the first so they form a circle

Step 13.4
Place a pale blue 2x2 macaroni tile, with the flat sides at the left and front, behind the right stud of the back piece from the previous step so it wraps around it. Place another symmetrically to the left of the first.

Step 14.1

Now we'll build an extension for the base. Set the rest of the base aside for now. Place a green 4x4 round plate, upside down, in front of you.

Step 14.2
Place a light blue 1x2 plate with rounded ends, upside down and horizontally, centered horizontally on the front row of the previous piece. Repeat symmetrically on the back side.

Step 14.3
Place a tan 2x2 round plate, upside down, centered vertically on the left two columns of the 4x4 round plate.

Step 14.4
Place the back two rows of a white 4x4 L-shaped plate, upside down with the corner at the back right, to the right of the previous piece.

Step 14.5
Keeping the 4x4 round plate on the left, flip the extension right side up. Place a white 1x1 plate on the front stud on the second column from the right of the extension.

Step 14.6
Place the left column of a white 3x3 L-shaped plate, with the corner at the back left, behind the previous piece. The right stud should overhang.

Step 14.7
Place the back right stud of a white 2x3 plate, horizontally, on the front left stud of the previous piece. There should be two free columns to the left of this piece, and one stud in front of the left column of this piece.

Step 14.8
Now we'll add the extension to the base! Set the base in front of you, with the 6x6 round plate at the back. There should be two rows that stick out to the right and two 2x6 plates with rounded corners to the left of the 6x6 round plate. Place the overhanging back right stud of the extension on the leftmost stud of the fourth row from the front of the base. It goes in front of a 2x2 macaroni tile. The front side of the extension should be even with the front of the base.

Step 15.1

Now we'll build the walls of the playhouse! Find the 2x3 plate from step 14.7 that's on the extension. Place a pale yellow 1x1 brick behind the 2x3 plate so the right sides are even.

Step 15.2
Place the left stud of a pale yellow 1x2 brick, horizontally, behind the previous piece.

Step 15.3
Place a pale yellow 1x1 brick to the right of the previous piece.

Step 15.4
There should be a pale blue 1x2 half circle tile to the right of the previous piece. Place a pale yellow 1x2 brick, horizontally, to the right of the half circle tile.

Step 15.5
Place the back stud of a pale yellow 1x2 brick, vertically, to the right of the previous piece. Place another in front of the first.

Step 16.1

Find the 2x3 plate from step 14.7 that's on the extension and in front of the 1x1 brick from step 15.1. Stack two pale yellow 1x2 plates and place the stack, vertically, on the rightmost column of the 2x3 plate. Now we've built the base of all the walls of the playhouse. The back wall of the playhouse has a gap of two studs which make up the doorway.

Step 16.2
Place a pale blue 1x2 half circle brick, horizontally with the flat side at the back in front of the back wall, to the left of the doorway. Repeat symmetrically to the right of the doorway.

Step 17.1

Assemble a window by attaching a gold 1x2x2 lattice into a pale blue 1x2x2 window frame with an arched window. With the flat side of the window at the back, place the lattice in from the front with the small pins at the top and bottom. Push a lattice in from the front until it clicks. Repeat.

Step 17.2
Place one window, horizontally with the flat side at the back, on the back wall on each side of the doorway. You'll place both windows in this step.

Group 5.

Step 18.1

Place a pale blue 1x1 brick to the left of the left window from the previous step. Repeat symmetrically on the right side.

Step 18.2
Place a pale blue 1x2 brick, vertically, in front of the left piece from the previous step.

Step 18.3
Place a pale blue 1x1 round brick in front of the previous piece. Place another on the front stud of the right wall of the playhouse.

Step 19.1

Place a pale blue 1x1 round brick on each of the two pieces from the previous step.

Step 19.2
Place a pale blue 1x2 brick, vertically, behind the left piece from the previous step.

Step 19.3
Place a pale blue 1x1 brick behind the previous piece. Repeat symmetrically on the right side of the playhouse.

Step 19.4
Find the left 1x2 half circle brick inside the playhouse. Push the short bar of a gold tall and narrow crown into the right hollow stud of this piece.

Step 20.1

Assemble a square window by attaching a gold 1x2x2 lattice into a tan 1x2x2 window frame. Find the lip in the window frame and rotate the frame so the lip is at the front, then push a lattice in from the front until it clicks.

Step 20.2
Place this window, vertically with the lattice on the left, on the right column of the playhouse behind the stack of 1x1 round bricks.

Group 6.

Step 21.1

Place a pale green 1x1 round brick on the front stud on the leftmost column of the base. This is on a 4x4 round plate.

Step 21.2
Place a transparent yellow 1x1 round plate behind the previous piece.

Step 21.3
Find the 4x4 round plate that's to the right of the playhouse. Only the front half of this piece is visible, and it's even with the front of the playhouse. Place a pale green 1x1 round brick on the second stud from the right on the front row of the 4x4 round plate. There are two free studs to the left of this piece.

Group 7 contains the light purple 2x2x2 cone from the next step.

Step 22.1

Place the center anti-stud of a light purple 2x2x2 cone from group 7, centered, on the previous piece.

Step 22.2
Place a transparent purple 1x1 cone on the previous piece.

Step 22.3
Place the center anti-stud of a light blue 2x2x2 cone, centered, on the 1x1 round brick that's on the leftmost column of the base.

Step 23

Now we'll make the trunk of a tree. Make a stack of seven pale blue 2x2 round bricks. Place this stack to the left of the left wall of the playhouse so the front side is even with the front of the playhouse.

Step 24.1

Now we'll start building an arched roof for the playhouse. Set the rest of the playground aside for now. Place a pale blue 1x8x3 arch brick, horizontally, in front of you.

Step 24.2

Place the back stud of a pale blue 1x2 plate, vertically, under the left stud of the previous piece. Repeat symmetrically on the right side.

Step 25

Place a pale blue 1x8x3 arch brick, horizontally, on the front studs of the previous two pieces.

Group 8.

Step 26.1

Place a pale yellow 1x2 slope tile, horizontally with the tall side at the front, on the back row of the arch so the left sides are even. Repeat symmetrically on the right side. Repeat these two pieces symmetrically on the front side. You'll place a total of four pieces in this step.

Step 26.2

Place a pale yellow 1x2 slope tile, horizontally with the tall side at the front, to the left of the back right piece from the previous step. Place another symmetrically in front of the first.

Step 26.3

Place the back stud of a pale yellow 1x2 plate, vertically, to the left of the previous two pieces. Place another on the first.

Step 27

Place a pale yellow 1x1 slope tile, with the tall side at the front, to the left of the previous piece so the back sides are even. Place another, symmetrically, in front of the first.

Step 28

Place a transparent yellow 1x1 round plate on the front stud of the stack of two 1x2 plates on the arch.

Step 29

Now we'll place the arch on the playhouse. Set the playground in front of you, horizontally with the playhouse at the back. Place the arched roof, horizontally, on the back two rows of the playhouse. It should be to the left of the tree trunk.

Step 30.1

Place a pale yellow 1x4 arch brick, horizontally, centered horizontally on the front wall of the playhouse. The arch should go over the doorway.

Step 30.2
Place a pale yellow 1x2 brick, horizontally, to the left of the previous piece. Repeat symmetrically on the right side.

Step 30.3
Place a pale blue 1x1 brick behind the left stud of the left piece from the previous step. Repeat symmetrically on the right side.

Group 9.

Step 31.1

Place a pale blue 1x2 plate, horizontally, centered horizontally on the front wall of the playhouse so it is right over the doorway.

Step 31.2
Place a gold 1x1 plate with a triangle hanging down from one side with the triangle at the front, to the left of the previous piece. Repeat symmetrically on the right side.

Step 31.3
Place a white 2x2 plate to the left of the left piece from the previous step so the front sides are even. Repeat symmetrically on the right side. These should be even with the front corners of the playhouse.

Step 32.1

Now we'll make a couple of hinges for the roof! Place a blue 1x2 arch brick base, horizontally with the flat side at the back, in front of you.

Step 32.2
Clip a blue 2x2 hinge plate, with the hinge at the back, into the previous piece.

Step 32.3
Repeat steps 32.1-32.2.

Step 32.4
Place one hinge brick, with the hinge brick at the back, on the back row of each of the two 2x2 plates from step 31.3. The hinge plates should be free to hinge down to the front. Hinge them down as far as they will go.

Step 33.1

We'll come back to the roof in a bit. Place a pale yellow 1x2 brick, vertically, on the second and third studs from the back on the column to the left of the playhouse. This is right below the window on the left side of the playhouse.

Step 33.2

Place a light purple 1x2x2 window frame, vertically with the flat side on the right, on the previous piece.

Step 33.3
Place a pale yellow 1x2 slope tile, vertically with the tall side on the right, on the previous piece.

Step 34

Find the 1x1 round plate that's on top of the arched roof of the playhouse. Place a pale yellow bird, with the tail on the left, on this piece.

Group 10.

Step 35.1

Now we'll build the sloped roof of the playhouse. Set the playground aside for now. Place a blue 2x6 plate, horizontally, in front of you.

Step 35.2
Place the front row of a yellow 2x6 plate with rounded corners, with the row of six studs at the front, on the back row of the previous piece so the right two columns overhang.

Step 36

Place a pale yellow 2x4 plate, horizontally, in front of the previous piece so the right sides are even.

Step 37.1

Place a yellow 2x6 plate with two rounded corners, horizontally with the row of six studs at the back, to the left of the previous piece.

Step 37.2
Place a pale yellow 1x2 plate, vertically, behind the third column from the left of the previous piece. The front stud will attach to the back left corner of the blue 2x6 plate from 36.1. Place another to the right of the first.

Group 11 contains the pale blue 1x2 plates from the next step.

Step 38.1

Keeping the roof horizontal, with the previous pieces on the left side, flip the roof upside down. Place a pale blue 1x2 plate from group 11, upside down and vertically, to the left of the 2x6 plate from step 35.1. Repeat symmetrically on the right side.

Step 39

Place the right stud of a pale blue 1x4 plate, upside down and horizontally, in front of the right piece from the previous step. Skip one stud to the left and place another.

Step 40

Keeping the roof horizontal, flip the roof over so it's rightside up, with the previous two pieces at the back. Place the back stud of a pale yellow 1x2 plate, vertically, on the leftmost stud on the back row of the roof. There should be one stud in front of this piece. Place another to the right of the first.

Step 41.1

Place a pink 3x3 macaroni tile, with the flat sides on the right and back, on the right three columns of the roof so the back sides are even.

Step 41.2

Place a yellow 1x2 jumper plate, vertically, to the left of the previous piece so the back sides are even.

Group 12 contains two transparent red 1x1 round plates from steps 42 and 43.

Step 42.1

Place a transparent red 1x1 round plate from group 12 in front of the previous piece.

Step 42.2

Place a transparent blue 1x1 round plate on the front right corner of the roof.

Step 42.3

Place a pale yellow 1x1 quarter circle tile, with the flat sides at the front and left, to the left of the previous piece.

Step 42.4

Place a pale yellow 1x1 plate to the left of the previous piece.

Step 42.5

Place a pale yellow 1x4 plate, horizontally, to the left of the previous piece.

Step 42.6

Place a pale yellow 1x1 plate to the left of the previous piece.

Step 42.7

Place a pale yellow 1x1 quarter circle tile, with the flat sides at the back and right, to the left of the previous piece.

Group 13 contains the pale green 3x3 macaroni tile from the next step.

Step 43.1

Place a pink 3x3 macaroni tile, with the flat sides at the back and right, on the left three columns of the roof so the back sides are even.

Step 43.2

Place a transparent red 1x1 round plate from group 12 on the front stud on the leftmost column of the roof.

Step 43.3

Place a transparent blue 1x1 round plate on the back stud of the third column from the left.

Step 43.4
Place the back stud of the pale green 3x3 macaroni tile from group 13, with the flat sides at the back and right, to the right of the previous piece.

Group 14.

Step 44.1

Place a gold 1x1 heart shaped tile, with the point at the front, on the third stud from the left on the front row of the roof.

Step 44.2
Place a gold 1x1 plate with a short bar on one side and one rounded end, with the short bar at the back, on the jumper plate that's on the fourth column from the right on the roof.

Step 45.1

Clip a gold 1x1 tile with a clip on top, with the anti stud facing up and to the back, onto the bar of the previous piece.

Step 45.2
Place a gold short cone into the anti-stud of the previous piece. This is the chimney of the playhouse!

Step 46

Now we'll place the roof on the playhouse! Set the playground in front of you so it's horizontal with the playhouse at the back. Find the two hinge plates that are at the top of the playhouse. Rotate the roof so it's upright and horizontal, with the 1x1 heart tile at the bottom. Place the second and third rows of the roof on the two hinge plates. The left and right columns of the roof should overhang the sides of the house.

Step 47

Next, we'll make a small picnic table for the horses! Find the 6x6 round plate that's near the front of the base. Place a pale yellow 1x4 arch brick, horizontally, centered horizontally on the third row from the front of this 6x6 round plate. There should be one free stud to the left of it. Place another the behind the first. These form a table!

Step 48.1

Find a gold flower petal piece. This looks like a dish with pointed corners that stick up. Place this on the front left corner of the table.

Step 48.2
Place a gold 1x1 round tile with a short bar sticking up on the front right corner of the table.

Step 48.3
Place a gold 1x2 half circle tile with a single stud, vertically with the flat side on the right, to the left of the previous piece so the front sides are even.

Group 15 contains the transparent pink gem from the next step.

Step 49.1

Push the short bar of the transparent pink gem from group 15 into the hollow stud of the gold flower petal piece on the left side of the table.

Step 49.2
Push the short bar of a gold carrot into the hollow stud of the 1x2 tile with a single stud.

Step 49.3
Push the bar of a light green short bar with two leaves, with the leaves on top, into the hole on top of the previous piece.

Step 49.4
Push the hollow stud of a gold 1x1 short cone, with the stud at the bottom, onto the bar of the 1x1 round tile with a bar on the front right corner of the table. This makes a fancy goblet!

Step 49.5
Push the short bar of a clear gem into the top of the previous piece.

Step 50

Now we'll make another tree trunk! Make a stack of four light blue 2x2 round bricks. Find the 2x2 plate that’s on the second and third rows from the back and to the left of the playhouse. There are some curved slopes to the left of it, and a short tree behind it and to the right. Place the tree trunk on this 2x2 plate.

Group 16. This group also contains the orange and transparent yellow pieces from steps 53 and 54.

Step 51

Now we’ll make another tree trunk. Make a stack of three light purple 2x2 round bricks and place them on the leftmost two columns of the playground.

Group 17 contains the bright pink and transparent pink pieces from steps 53 and 54 and group 18 contains the light green and transparent green ones.

Step 52.1

Place an orange 4x4x2 cone from group 16, centered, on the tree trunk we just made.

Step 52.2
Place a bright pink 4x4x2 cone from group 17, centered, on the tree trunk that’s to the left of the playhouse.

Step 52.3
Place a light green 4x4x2 cone from group 18, centered, on the tree trunk that’s to the right of the playhouse.

Step 53.1
Place an orange 2x2x2 cone from group 16 on the leftmost tall tree.

Step 53.2
Place a bright pink 2x2x2 cone from group 17 on the middle tall tree.

Step 53.3
Place a light green 2x2x2 cone from group 18 on the rightmost tall tree.

Step 53.1

Place a transparent yellow 1x1 cone from group 16 on the leftmost tall tree.

Step 53.2
Place a transparent pink 1x1 cone from group 17 on the middle tall tree.

Step 53.3
Place a transparent green 1x1 cone from group 18 on the rightmost tall tree.

This completes the Unicorn Playground!

Thank you so much for building this set!

There is one page of ads after the instructions end. This page shows ads for three LEGO Creator 3 in 1 sets. The first is for set number 31162, the Cute Bunny. The second is for set number 31163, the Playful Cat. The last is for set number 31164, Space Robot.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let's feature your build on our Builders page. It's easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

Please signup for our newsletter and follow us on Facebook and Instagram to be the first to know when new instructions are available!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a $5 donation at: https://www.gofundme.com/f/bricks-for-the-blind-gofundme.
Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.
