42672 Creative Beach and Travel Suitcase

Adapted by John Le and tested by Hannah Kinsey.

This 2-in-1 buildable toy takes kids on a journey of creativity as they build and rebuild different beach scenes. The LEGO® Friends Creative Beach and Travel Suitcase toy set (42672) for kids makes a great gift for girls and boys aged 5 years old and up. Kids build the 3 models, then rebuild them to create an alternative scene, or use the pieces to create their own imaginative creations.

This pretend-play set has everything kids need to build a seaplane toy with spinning propeller, a relaxation area with a surfboard, and a beach café hangout with sandcastles, seating and ice cream accessories. The models rebuild into a speedboat toy, an outside seating area and a pizza shop with a pizza oven. The building toy comes with 2 minidolls and dog and dolphin figures for role play.

After building and rebuilding the models, all the pieces can be packed away in the suitcase, ready for the next adventure. The building kit comes with a sticker sheet so kids can have fun customizing the suitcase.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

- In Front of/Front: towards you.
- Behind/Back: away from you.
- Up: towards the ceiling.
- Down: towards the floor.
- Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
- Vertically: with the longest side going from front to back
- Horizontally: with the longest side going from left to right.
- Upright: pointing up towards the ceiling.
- Standing upright: The piece is perpendicular to the ground, like a wall.
- Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
- That one/ppp: previously placed piece.
- Plate: piece with studs.
- Tile: smooth piece without studs (unless otherwise specified)
- A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.
- “Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.
- Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.
- Centered-vertically: even amount of space in front of and behind piece
- Centered-horizontally: even amount of space left and right of piece.
- Row: studs lined up horizontally (left to right/side to side).
- Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner may want to follow along with the printed visual instructions that come with each kit, or PDF versions are always online at LEGO.com for each set: (https://www.lego.com/en-us/service/buildinginstructions/42672) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

This set has 2 builds:

Go to Build 1: Seaplane, Relaxation Area and Bar
Go to Build 2: Jetski, Seating Area and Beach Cafe

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags, or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers, or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1,2 and 3, and put them in one container.

This LEGO set comes with 5 bags labeled 1 to 5, 3 sets of instructions, and some loose pieces. Sort the pieces into groups or piles as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split into 2 groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

Assemble your minifigure, make sure the life vest faces the front, then attach the passport to her hand! Now put her away while we make a seaplane!

Group 2 - Seaplane

Step 1
Horizontally place a light blue 2x4 plate in front of you.

Step 2

Horizontally place a light blue 4x6 angled plate with inverted sloped sides on the 2 leftmost columns so it is centered vertically and the short side overhangs 4 columns to the left. Then repeat symmetrically to the right.

Step 3

Starting from the right, skip the 2 rightmost columns then horizontally place a white 2x6 plate so it is centered vertically.

Step 4

Place a white 2x2 brick on the 3rd and 4th columns from the left so it is centered vertically.

Step 5

Vertically place a light orange 1x2 panel with a long wall and middle wall on the 5th column from the left so it is centered vertically and the middle wall faces the right. Then vertically place another 1 on the 5th column from the right so it is centered vertically and the middle wall faces the right. Now place a light orange 2x2 tile with a stud to the right of each of the 2 ppp so they are centered vertically.

Step 6.1

Horizontally place a lime green 2x2 plate with 1x4 extended angled sides on the 2 rightmost columns so it is centered vertically and the studs are on the right.

Group 3 - Seaplane

Step 6.2

Vertically place a light grey 2x2 plate with 1x3 extended angled sides on the 2 leftmost columns so it is centered vertically and the studs are on the left.

Step 7

Place a light purple 1x1 plate on the front row in front of the right 1x2 panel with a long wall and middle wall. Then repeat symmetrically to the back.

Step 8

Vertically place a light grey 1x2 brick with a pin on the long side on the leftmost column so it is centered vertically and the pin faces the left. Now horizontally place 2 yellow 1x2 bricks with 2 side studs, 1 in front of the other, to the right of the ppp so they are centered vertically and the studs face outwards to the front and back.

Step 9

Attach a black rotor with 3 blades to the left-facing pin.

Step 10.1

Let’s make 2 identical parts! Place a light purple 1x1 plate in front of you. Then horizontally place a lime green 1x3 sloped curved brick on top so it slopes and overhangs 2 columns to the left.

Step 10.2

Now you should have 2 identical parts! Horizontally place 1 part upright on the 2 front-facing side studs so it slopes and overhangs 1 column to the left. Then repeat symmetrically to the back.

Step 11

Place a white 2x2 tile with a round side on the 2 leftmost columns so it is centered vertically and the round side faces the left.

Step 12.1
