71441 Adventures with Interactive LEGO Peach

Set adapted by Arturo and tested by Radar.

Join an iconic Super Mario™ character for a picnic and fly on a cloud to rescue the Yellow Toad with the Adventures with Interactive LEGO® Peach™ princess toy playset for kids (71441). A top Nintendo® gift for girls, boys and gamers aged 6 and up,the set features an interactive LEGO Peach figure, plus Lakitu, a Yellow Toad and a Lava Bubble. Travel from the Start Pipe to the Goal Pole triggering digital reactions from LEGO Peach and collecting coins along the way. Have a picnic, read a letter saying that the Yellow Toad has been captured, topple Lakitu from the cloud, and fly, flip and loop the loop on the cloud on the way to rescue the Yellow Toad. The buildable cloud toy also has a fishing pole for Lakitu to lift the Yellow Toad's picnic seat.

The packaging captures the atmosphere of a colorful LEGO Super Mario rescue adventure. The front of the box shows Interactive LEGO Peach jumping through a bright Mushroom Kingdom course, surrounded by the Start Pipe, Goal Pole, Lakitu on his white cloud, the Yellow Toad, the Lava Bubble, and several blue, green, and red terrain builds. The background has a blue sky, white clouds, green hills, trees, and Princess Peach's castle. On the top left corner, we have the classic LEGO logo, followed by the Super Mario logo. The front also displays the age rating, set number, name, and 208-piece count. The left of the box continues the same colorful Super Mario artwork and branding. The back of the box shows another view of the course and its play features. Namely, it shows Interactive LEGO Peach starting at the green pipe, having a picnic with the Yellow Toad, knocking Lakitu from his cloud, flying on the cloud to collect digital coins, defeating the Lava Bubble, rescuing the Yellow Toad, and reaching the Goal Pole. It also shows Lakitu's fishing pole lifting the Yellow Toad's picnic seat and that the course sections can be rearranged. On the top left corner, we have the LEGO logo. To its right, we have the character lineup: Lava Bubble, Yellow Toad, Lakitu, and Interactive Peach. The right side of the box has a warning in several different languages that states that the set contains small parts and a small ball, and it is therefore not recommended for children younger than 3 years old. The top of the box has the LEGO and Super Mario logos, the set name in several languages, and an image of Interactive LEGO Peach at a 1:1 scale. The bottom of the box contains the barcode, set number, recycling information, battery information, and Nintendo, Super Mario, and LEGO copyright and trademark details.

Welcome to Text-Based Building Instructions from Bricks for the Blind. Here is some helpful information on how to best use screen readers and browsers: bricksfortheblind.org/help-with-screen-readers. Before you start building, here are some terms we will be using:

In Front of/Front: towards you.
Behind/Back: away from you.
Up: towards the ceiling.
Down: towards the floor.
Stud: the bump on a LEGO brick. Example: A 2x1 brick has two studs on it.
Vertically: with the longest side going from front to back
Horizontally: with the longest side going from left to right.
Upright: pointing up towards the ceiling.
Standing upright: The piece is perpendicular to the ground, like a wall.
Lying flat: The piece is parallel to the ground, like a piece of toast which fell off the table.
That one/ppp: previously placed piece.
Plate: piece with studs.
Tile: smooth piece without studs (unless otherwise specified)
A jumper plate is a 1x2 plate with a single stud on top, or a 1x3 plate with only two studs on top.

“Anti-stud” is a term for the portion of a LEGO piece which accepts studs, like the bottom of a plate or brick.

Symmetrically: a mirror image. Example: If you place a 2x1 brick with technic connector on the front wall at the right, connector to the front, and then place another such piece symmetrically on the back wall, at the right, the technic connector of the second piece should point to the back, since it will be placed symmetrically.

Centered-vertically: even amount of space in front of and behind piece

Centered-horizontally: even amount of space left and right of the piece.

Row: studs lined up horizontally (left to right/side to side).

Column: studs lined up upright or vertically (top to bottom/back to front).

For builders with low vision, or a sighted building partner who may want to follow along with the printed visual instructions that come with each kit, PDF versions are always online at LEGO.com: (https://www.lego.com/en-us/service/building-instructions/71441) As low vision users may benefit from viewing the instructions on a personal device where they can zoom in on content and use assistive technologies to enhance the visuals.

Sorting the pieces:

To begin a successful build, it helps to sort the pieces into groups, bags or small containers. Have a friend or family member do this in advance following the instructions below. You will see that the pieces should be sorted according to the building steps in the kit. Doing this in advance makes locating the pieces for each step easier. See below on how to sort the pieces to correspond to the steps in this set. Number the containers using letters A-Z, numbers or meaningful names. The parts will be sorted into one or a small number of steps in the instructions. Example: Steps 1-3 means collect all the parts used in steps 1, 2 and 3, and put them in one container.

This LEGO set comes with 3 numbered bags and 1 instruction booklet. Sort the pieces into groups as described below. Note that where there are multiple colors of the same brick in a step, the colors will be split across two groups to make telling the difference easier for the builder! LEGO includes a few spare parts in case you lose something. Set these into their own group away from the rest, in case you need them later.

This build is 208 pieces and 91 building steps. The set has NO stickers!

Book 1, bag 1 (10 groups of bricks)

Interactive Peach, Lakitu, Lakitu’s cloud, Lakitu’s terrain, Start Pipe, Goal flag pole
Group 1: pages 4-16
Group 2: steps 1-7
Group 3: steps 8-10
Group 4: steps 1-10
Group 5: steps 11-17
Group 6: steps 1-7
Group 7: steps 8-10.1
Group 8: steps 10.2-11
Group 9: steps 1-4
Group 10: steps 1-3

Book 1, bag 2 (8 groups of bricks)

Yellow Toad, Lava Bubble, Lava terrain
Group 11: steps 1-8
Group 12: steps 1-4
Group 13: steps 5-8
Group 14: steps 1-9
Group 15: steps 10-14
Group 16: steps 15.1-17
Group 17: steps 18.1-18.5
Group 18: steps 19-24

Book 1, bag 3 (3 groups of bricks)

Yellow Toad's couch, Yellow Toad's terrain
Group 19: steps 1-7.5
Group 20: steps 1-4.1
Group 21: steps 4.2-5

Building Instructions:

Book 1, bag 1.

Group 1 – Interactive Peach

Page 4

Ask a sighted adult to help you install 2 AAA batteries into Interactive Peach’s body.

Page 5

Hold Interactive Peach’s body so that her buttons face to the back. Then, insert it into Interactive Peach’s bright pink dress, so that the side with the largest gap faces to the front. Locate 2 dark azure 1x1 round tiles. Attach the first one to the left-facing side stud, which is Peach’s right ear. Take the second one and repeat symmetrically on the right. Then, place 1 pearl gold 2x2 crown on top of Peach’s head.

Pages 6-16

You can turn on Interactive Peach by pressing the ON button located on the bottom of her back. Interactive Peach will react to movement. She will also react when placing her on top of certain colors or interactive tiles. Interactive Peach will turn off automatically after leaving her in her place after a few minutes.

You can update Interactive Peach in the LEGO Super Mario app, which you can download from the following link [https://www.lego.com/qr/lsm-connected] to your preferred smart device. You can connect Interactive Peach with the smart device by pushing the Bluetooth button located on the top of her back.

Group 2 – Lakitu

Step 1

Place 1 yellow 2x2 round plate with feet underneath in front of you, so that the feet’s wider side face to the front.

Step 2

Locate 2 bright light yellow 1x2 half circle jumper plates. Place the first one vertically on the leftmost column of the ppp, so that its curved edge faces to the left. Take the second one and repeat symmetrically on the right.

Step 3

Place 1 bright light yellow 1x2 plate with 2x2 upright side studs horizontally on top of the 2 ppps, so that its side studs face to the front.

Step 4

Place 2 bright light yellow 1x1 bricks with pinhole on top of the ppp, so that their pinholes face to the left and right.

Step 5

Insert 1 yellow arm and hand with pin into each of the 2 side-facing holes, so that the hands face to the front.

Step 6

Place 1 bright light yellow 1x2 plate with 2x2 side studs hanging down horizontally on top of the build, so that its side studs face to the back.

Step 7

Attach 1 bright light yellow 2x2 round tile with 3 tan lines to the front-facing side studs. Ask a sighted friend to make sure that the ppp is oriented correctly.

Group 3 – Lakitu (continued)

Step 8

Attach 1 white 2x2 round plate with axle hole to the back-facing side studs. Then, attach 1 green 2x2 round tile with the code for “LAKITU” to the ppp.

Step 9.1

Place 1 yellow 1x2 plate with 2x2 upright side studs horizontally on top of the build, so that its side studs face to the front. Then, attach 1 yellow 2x2 plate upright to the front-facing side studs of the ppp.

9.2 Attach 1 yellow 2x2 tile with large white eyes with black outline and open mouth with red tongue upright to the ppp. Ask a sighted friend to make sure that the ppp is oriented correctly.

9.3 Place 1 yellow 1x2 brick horizontally on top of the build.

9.4 Place 1 yellow 1x2 jumper plate horizontally on top of the ppp.

9.5 Attach 1 black stem with 3 short stems vertically upright to the ppp.

Step 10

Interactive Peach can jump on Lakitu’s back to interact with him!

Group 4 – Lakitu’s cloud

Step 1

Let’s build Lakitu’s cloud. Place 1 white 2x6 plate with rounded corners horizontally in front of you, so that its curved side faces to the back. Then, place 1 white 1x4 rounded plate horizontally on the back row of the ppp.

Step 2

Place 1 white 2x6 plate horizontally in front of the build. Note that at this point it will not be attached to anything. Then, place 1 white 1x4 rounded plate vertically on the rightmost column of the ppp, so that it attaches it to the rest of the build and it overhangs to the front by 1 row.

Step 3

Rotate 1 white 2x6 plate with rounded corners horizontally, so that its curved side faces to the front. Place its back right corner under the overhang of the ppp.

Step 4

Place the front row of 1 white 4x4 plate on top of the back row of the ppp, so that it is centered horizontally.

Step 5

Place 1 white 1x2 rounded plate with open studs vertically to the left of the 2 front rows of the ppp. Then, place 1 white 1x2 plate with stud and upright clip vertically behind the ppp, so that its clip is to the front.

Step 6

Rotate 1 white 2x6 plate with rounded corners horizontally, so that its curved side faces to the back. Place its front left corner on top of the stud of the ppp.

Step 7

Place 1 white 1x1 round plate with open stud in front of the rightmost column of the ppp. Then, locate 2 white 1x2 rounded plates with open studs. Place the first one vertically in front of the ppp. Take the second one and repeat symmetrically on the left.

Step 8

Find 2 white 1x1 round plates with open studs. Place the first one on the leftmost column of the front row. Take the second one and repeat symmetrically on the right.

Step 9

Grab 2 white 1x4 rounded plates. Rotate the first one vertically. Place its front row on top of the ppp. Take the second one and repeat symmetrically on the left.

Step 10

Place 1 white 2x2 tile with the code for “CLOUD” between the 2 back rows of the 2 ppps.

Group 5 – Lakitu’s cloud (continued)

Step 11

Place 1 white 1x2 plate with 2x2 upright side studs horizontally on the front row, so that it is centered horizontally and its side studs face to the front.

Step 12

Place the front row of 1 white 2x2 round plate with axle hole on top of the ppp.

Step 13.1

Place 1 white 2x6 plate with rounded corners horizontally on top of the 2 front rows, so that its curved edge faces to the front.

13.2 Stack 2 white 1x2 rounded plates with open studs and place them horizontally on top of the front row of the ppp, so that they are centered horizontally.

13.3 Locate 2 white 1x2 curved slope tiles with recessed stud. Rotate the first one horizontally, so that it slopes to the left. Place its rightmost column on top of the leftmost column of the 2 ppps. Then, take the second one and repeat symmetrically on the right.

13.4 Find 2 white 1x1 half cylinder tiles. Place the first one on top of the ppp, so that it slopes to the left and right. Take the second one and repeat symmetrically on the left.

13.5 Grab 2 white 1x1 half cylinder tiles. Place the first one on the leftmost column of the 2nd row from the front, so that it slopes to the left and to the right. Take the second one and repeat symmetrically on the right.

Step 14

Attach the 2 top rows of 1 white 3x3 round tile with black eyes and dark bluish gray smile to the front-facing side studs. Ask a sighted friend to make sure that the ppp is oriented correctly.

Step 15

Attach 1 white 4x4 round plate with 2x2 open center under the cloud build, so that it is centered horizontally and vertically.

Step 16.1

Attach the handle of 1 black bar holder with handle to the clip located on the 3rd row from the back of the leftmost column. Angle it forward as much as possible. Then, insert 1 black 3L bar into the ppp. Next, slide 1 black bar holder with handle onto the ppp, so that its bar handle is horizontal.

16.2 Attach the clip of 1 black bar holder with clip to the ppp. Then, insert 1 black shepherd staff into the ppp, so that it curves to the back. Continue by angling it to the bottom as much as possible.

Step 17

Interactive Peach can step on the cloud and interact with it! Alternatively, you can place the back row of Lakitu's feet on top of the 2nd row from the back of the cloud, so that they are centered horizontally.

Group 6 – Lakitu's terrain

Step 1

Let's build Lakitu's terrain. Place 1 blue 4x4 tile with studs on perimeter in front of you. Then, place 1 blue 2x2 round plate with axle hole on the back right corner of the ppp.

Step 2

Interactive Peach can interact with the blue surface as if it was water!

Step 3

Locate 2 transparent clear 1x2x3 panels. Place the first one vertically on top of the rightmost column of the ppp, so that its flat edge faces to the left. Take the second one and repeat symmetrically on the left.

Step 4

Place 1 white 2x2 round tile on top of the 2 ppps.

Step 5

Rotate 1 blue 2x6 plate horizontally. Locate 2 green 1x1 round tiles. Attach the first one to the 3rd column from the right of the back row and the second one to the 3rd column from the left of the front row. Place the 2x6 plate's 2 rightmost columns under the 2 leftmost columns of the build, so that it is centered vertically and it has 4 columns exposed to the left.

Step 6

Place the 2 rightmost columns of 1 bright green 4x4 round tile with studs on perimeter on top of the 2 leftmost columns of the terrain build, so that it is centered vertically.

Step 7

Interactive Peach can interact with the bright green surface as if it was grass!

Group 7 – Lakitu's terrain (continued)

Step 8

Place 1 green 1x1 round plate with leaves on top of the 4th column from the left on the back row, so that its leaves face to the front. Then, place 1 dark pink 1x1 round plate with open stud on top of the ppp.

Step 9.1

Rotate 1 transparent clear 1x2 plate with 12L bar and 1x1 round plate vertically upright, so that its anti-studs face to the back and the 1x2 plate is on top. Insert its bottom bar into the ppp. Attach 1 transparent clear 1x2 plate with clip to the middle of the ppp, so that its plate is to the left and its antistuds face to the back.

9.2 Rotate 2 white 3x5 cloud tiles with 3 studs horizontally upright, so that their studs face to the front. Attach the 2 rightmost columns of the first one to the ppp, so that it is centered vertically. Then, attach the second one to the 1x2 plate on top, so that it is centered horizontally.

Step 10.1

Attach 1 transparent clear 4L antenna vertically upright to the front left corner of the build. Then, attach 1 white 1x1 round plate with open stud to the top of the ppp. Continue by placing 1 blue 2x2 round plate with axle hole on top of the ppp. Next, place 1 blue 1x2 brick with yellow star printed pattern horizontally on the back row of the ppp, so that its star faces to the back. Ask a sighted friend to make sure that the brick is oriented correctly.

Group 8 – Lakitu's terrain (continued)

Step 10.2

Place 1 blue 1x2 brick with yellow star printed pattern horizontally in front of the ppp, so that its star faces to the front. Ask a sighted friend to make sure that the brick is oriented correctly. Then, place 1 blue 2x2 tile with the code for "SUPER STAR BLOCK" on top of the 2 ppps.

Step 11

Interactive Peach can jump on top of the Super Star Block to interact with it!

Group 9 – Start Pipe

Step 1

Let's build a pipe. Place 1 bright green 6x6 plate with no studs on the corners and in the center in front of you.

Step 2

Place 2 light bluish gray 2x4 bricks vertically, one to the right of the other, on top of the ppp, so that together they are centered horizontally and vertically.

Step 3

Locate 2 bright green 1x4 tiles. Place the first one horizontally on the back row of the 2 ppps. Take the second one and repeat symmetrically on the front. Find 2 bright green 1x2 tiles. Place the first one vertically behind the leftmost column of the ppp. Take the second one and repeat symmetrically on the right. Continue by placing 1 bright green 2x2 tile with the code for "PIPE" (and the text "START") between the 2 ppps.

Step 4

Lastly, place 1 bright green 6x6 pipe on top of the build, so that the tiles from the previous step slide into its center.

Group 10 – Goal flag pole

Step 1

Let’s build the terrain for the goal flag pole. Place 1 dark orange 6x6 plate with no studs on the corners and in the center in front of you. Then, place 1 black 2x2 tile with the code for “GOAL” and a small picture of Bowser on the 2 front rows of the ppp, so that it is centered horizontally. Ask a sighted friend to make sure that the ppp is oriented correctly.

Step 2

Place 1 black 2x2 round tile with stud on the 2 back rows, so that it is centered horizontally.

Step 3

Insert 1 light bluish gray 16L rigid hose vertically upright into the ppp. Place 1 yellow 1x1 round plate with open stud on the top of the ppp. Then, attach 1 bright light orange technic ball to the ppp. Lastly, attach 1 black 2x3 tile with clips on short edge and white Bowser pattern to the top of the rigid hose, below the 1x1 round plate. Rotate the flag so that it faces to the right.

Book 1, bag 2

Group 11 – Yellow Toad

Step 1

Let’s build Yellow Toad. Place 1 reddish brown 2x2 round plate with 2 feet in front of you, so that the wider part of his feet face to the front. Then, place 1 white 2x2 round plate with axle hole on top of the ppp.

Step 2

Place 1 yellow 2x2 round brick with bright light orange open vest and pin holes on opposite sides on top of the ppp, so that its pin holes face to the left and right. Ask a sighted friend to make sure that the current part is oriented correctly.

Step 3

Insert the pin of 1 blue arm with yellow hand into each of the 2 holes of the ppp, so that the hands face to the front.

Step 4

Continue by placing 1 light nougat 2x2 brick with Toad face pattern on top of the minifigure’s body. Ask a sighted friend to make sure that the current part is oriented correctly.

Step 5

Place 1 white 1x2 jumper plate horizontally on the back row of the ppp. Then, place 1 red 1x1 round tile on top of the ppp.

Step 6

Place 1 light bluish gray 1x2 hinge base horizontally in front of the ppp, so that its flat wall faces to the front. Rotate 1 red 2x2 plate with hinge bar underneath so that its hinge bar is to the front. Attach it to the ppp and angle it to the back and down as far as possible. Then, place 1 tan 2x2 plate on top of the ppp.

Step 7

Attach 1 white hollow cube with yellow spots and 2x2 studs to the ppp. Lastly, place 1 yellow 2x2 round tile on top of the ppp.

Step 8

Place 1 white cup into Yellow Toad's right hand. Yellow Toad is complete!

Group 12 – Lava Bubble

Step 1

Let's build the Lava Bubble. Place 1 yellow 2x2 round plate with axle hole in front of you.

Step 2

Locate 2 yellow 1x2x2 2/3 bricks with side studs on 3 sides. Place the first one vertically on the leftmost column of the ppp, so that its side studs face to the back, left, and front. Take the second one and repeat symmetrically to the right.

Step 3

Attach 1 yellow 2x2 tile with the code for "LAVA BUBBLE" upright to the back-facing side studs of the 2 ppps.

Step 4

Find 4 transparent orange 1x2 plates. Attach the first 2 horizontally upright, one above the other, to the left-facing side studs. Take the remaining 2 and repeat symmetrically on the right.

Group 13 – Lava Bubble (continued)

Step 5

Attach 1 yellow 2x2 tile with black oval eyes upright to the front-facing side studs.

Step 6

Place 1 orange 1x2 plate horizontally on top of the front row. Then, place 1 orange 1x2 jumper plate horizontally behind the ppp.

Step 7

Attach 1 transparent orange 1x1 pyramid tile to each of the studs of the 2 ppps.

Step 8

Interactive Peach can jump on top of the Lava Bubble's back to interact with it!

Group 14 – Lava terrain

Step 1

Let's build the lava terrain. Place 1 red 6x6 rounded plate with no studs on corners and in the center in front of you.

Step 2

Interactive Peach can interact with the red surface as if it was lava!

Step 3

Place 1 light bluish gray 2x2 round tile on top of the 2 leftmost columns of the ppp, so that it is centered vertically. Then, place 1 light bluish gray 2x4 brick horizontally to the right of the ppp.

Step 4

Locate 2 light bluish gray 1x1 bricks. Place the first one behind the 2nd column from the right of the ppp. Take the second one and repeat symmetrically on the front.

Step 5

Place 1 orange 1x2 half cylinder brick horizontally on the back row, so that it is centered horizontally and it slopes to the back and to the front.

Step 6

Place 1 dark bluish gray 1x2 plate vertically on top of the rightmost column, so that it is centered vertically. Then, place 1 dark bluish gray 1x4 plate vertically to the left of the ppp, so that it is centered vertically.

Step 7

Place 2 dark bluish gray 1x2 plates with stud and pinhole horizontally, one in front of the other, to the left of the middle rows of the ppp, so that their pinholes are to the left and face to the front and back.

Step 8

Rotate 1 light bluish gray 2x3 brick horizontally. Place its leftmost column on top of the rightmost column of the 2 ppps.

Step 9

Grab 2 light bluish gray 1x1 bricks. Place the first one behind the 2nd column from the right of the ppp. Take the second one and repeat symmetrically on the front.

Group 15 – Lava terrain (continued)

Step 10

Locate 2 light bluish gray 1x2 inverted slope bricks with recessed stud. Rotate the first one vertically, so that it slopes to the front. Place its back row on top of the ppp. Take the second one and repeat symmetrically on the back. Place the rightmost column of 1 dark bluish gray 2x2 plate between the 2 ppps. Next, place 2 light bluish gray 1x2 inverted slope bricks with recessed stud horizontally, one in front of the other, to the right of the ppp, so that they slope to the right.

Step 11

Rotate 1 green 2x4 plate vertically. Place its rightmost column on top of the leftmost column of the 2 ppps, so that it is centered vertically. Then, place 1 green 1x2 plate vertically to the left of the middle rows of the ppp.

Step 12

Place the leftmost column of 1 blue 2x2 tile with the code for “TOAD SPEECH BUBBLE” on top of the ppp. Find 2 light bluish gray 2x2 corner tiles. Rotate the first one so that its 2 longest sides face to the back and to the right and place it behind and to the right of the ppp. Take the second one and repeat symmetrically on the front.

Step 13

Place 1 light bluish gray 1x2 log brick vertically to the right of the 2 ppps. Then, place 1 green 1x2 slope tile vertically on top of the ppp, so that it slopes to the left.

Step 14

Find 2 light bluish gray 1x1 bricks. Place the first one on the back row of the 3rd column from the right, behind the leftmost column of the 2x2 corner tile. Take the second one and repeat symmetrically on the front. Grab 2 green 1x1 slope tiles. Place the first one on top of the ppp, so that it slopes to the back. Take the second one and repeat symmetrically on the back.

Group 16 – Lava terrain (continued)

Step 15.1

We need to assemble a small sub-build. Place 1 green 2x4 plate horizontally in front of you.

15.2 Locate 2 black 1x2 bricks with 2 pinholes. Place the first one vertically under the leftmost column of the ppp, so that its pinholes face to the left and right. Take the second one and repeat symmetrically on the right.

15.3 The sub-build is complete. Rotate it horizontally upright so that its anti-studs face to the right and its pinholes face to the front and back. Place the left part of the sub-build on top of the rightmost edge of the 2x2 round tile located on the 2 leftmost columns of the lava terrain build, so that the top pinholes of the sub-build are aligned with the pinholes of the lava terrain. Then, insert 1 dark bluish gray 4L axle with stop into the top front-facing pinhole, so that its stop faces to the front. This should create 2x4 left-facing side studs.

Step 16

Place 1 red 1x2x2 slope brick horizontally on the front row, so that it is centered horizontally and it slopes to the right.

Step 17

Attach 1 black 1x4x2 fence horizontally upright to the bottom row of left-facing side studs. Then, attach 1 green 1x2 slope tile horizontally upright to the left-facing side studs of the ppp, so that it is centered

horizontally on the left-facing side studs and it slopes to the top. Next, find 2 black spear tips with fins. Attach the first one behind the ppp. Take the second one and repeat symmetrically on the front.

Group 17 – Lava terrain (continued)

Step 18.1

We need to assemble a sub-build. Place 1 red 4x4 rounded tile with studs on perimeter in front of you.

18.2 Rotate 1 orange 2x6 plate horizontally. Place its 4 leftmost columns under the ppp, so that it is centered vertically and it has 2 exposed columns to the right.

18.3 Find 2 light bluish gray 1x1 round tiles. Place the first one on the front left corner of the sub-build. Take the second one and repeat symmetrically on the right.

18.4 Hold 1 black 2x4 plate with pinholes underneath horizontally, so that its pinholes face to the front and back. Grab 2 black pins. Insert the first one into the front-facing pinhole of the 2x4 plate, so that it protrudes to the front by 1L. Take the second one and repeat symmetrically on the back. Locate 2 red 1x2 bricks with pinhole. Slide the first one onto the ppp. Take the second one and repeat symmetrically on the front. Place the ppp on the 2nd and 3rd columns from the left on the front row, so that it is between the 2 light bluish gray 1x1 round tiles.

18.5 The sub-build is complete. Bring back the lava terrain build, so that its spear tips with fins face to the front. Attach the sub-build's 2 rightmost columns under the 2 leftmost columns of the lava terrain build, so that it is centered vertically.

Group 18 – Lava terrain (continued)

Step 19

We need to assemble a sub-build. Place 1 orange 2x6 plate horizontally in front of you. Then, place 1 light bluish gray 1x2 plate with socket horizontally on the 2 rightmost columns of the back row of the ppp, so that its socket faces to the right.

Step 20

Rotate 1 red 1x4 tile horizontally. Place its 2 rightmost columns in front of the ppp. Then, place the front row of 1 red 2x2 jumper plate to the left of the ppp. Continue by placing 1 yellow 1x1 tile to the right of the back row of the ppp.

Step 21

Rotate 1 yellow 1x2 curved slope tile horizontally so that it slopes to the left. Place it to the right of the ppp. Then, place 1 yellow 1x1 tile to the right of the ppp.

Step 22

Locate 2 yellow 1x2 rounded plates with open studs. Place the first one vertically under the leftmost column of the sub-build. Take the second one and repeat symmetrically on the right.

Step 23

The sub-build is complete. Bring back the lava terrain build, so that its spear tips with fins face to the front. Place the sub-build horizontally on top of the 2x4 plate located on the 4 leftmost columns, so that it is centered horizontally and it can swing to the left and to the right. Then, grab the spear tips with fins and rotate them 90 degrees from front to back, creating a small prison.

Step 24

You place Yellow Toad in the prison and release him by hitting the 2 leftmost columns of the hinging sub-build of the lava terrain.

Book 1, bag 3

Group 19 – Yellow Toad’s couch

Step 1

Let’s build Yellow Toad’s terrain, starting with his couch. Place 1 black 1x3 inverted tile with holes vertically in front of you. Then place 1 reddish brown 1x2 log brick vertically on top of the 2 back rows of the ppp.

Step 2

Rotate 1 reddish brown 1x4 arch horizontally. Place its rightmost column in front of the ppp, so that it overhangs to the left by 3 columns.

Step 3

Rotate 1 black 1x3 inverted tile with holes vertically. Place its front row under the leftmost column of the ppp. Then, place 1 reddish brown 1x2 log brick vertically on the 2 back rows of the ppp.

Step 4

Place 1 medium nougat 2x4 plate horizontally on top of the 2 front rows.

Step 5

Place 1 medium nougat 2x2 jumper plate on top of the ppp, so that it is centered horizontally. Locate 2 medium nougat 1x2 tiles. Place the first one vertically to the left of the ppp. Take the second one and repeat symmetrically on the right.

Step 6

Find 2 reddish brown 1x1 bricks with side stud and lip. Place the first one behind the ppp, so that its side stud faces to the left. Take the second one and repeat symmetrically on the left. Then, attach 1 reddish brown 1x1 slope tile to each of the side studs of the 2 ppps, so that they slope to the bottom.

Step 7.1

We need to assemble a small sub-build. Place 1 transparent yellow 1x2 brick horizontally in front of you.

7.2 Grab 2 reddish brown 1x2 curved slope tiles with recessed stud. Rotate the first one horizontally so that it slopes to the left. Place its rightmost column on top of the leftmost column of the ppp. Take the second one and repeat symmetrically on the right.

7.3 Place 1 reddish brown 1x2 ingot tile horizontally on top of the 2 ppps.

7.4 Locate 2 reddish brown 1x1 plates. Attach the first one under the leftmost column of the sub-build. Take the second one and repeat symmetrically on the right.

7.5 The couch sub-build is complete. Bring back the couch build, so that its 2x2 jumper plate is to the front. Place the sub-build horizontally on top of the couch's back row.

Group 20 – Yellow Toad's terrain

Step 1

Let's build Yellow Toad's terrain. Place 1 green 2x6 plate vertically in front of you. Then, place 1 medium nougat 2x2 round brick with axle hole on top of the ppp, so that it is centered vertically.

Step 2

Find 2 bright green 4x4 rounded tiles with studs on perimeter. Place the first one in front of the ppp, so that it is centered horizontally. Take the second one and repeat symmetrically on the back.

Step 3

Rotate 1 green 2x6 plate horizontally. Place its rightmost column under the leftmost column of the ppp, so that it is centered vertically and it has 5 exposed columns to the left.

Step 4.1

Place 1 reddish brown 2x4 plate vertically on top of the 2x2 round brick with axle hole located on the 2 rightmost columns, so that it is centered vertically and it overhangs to the front and to the back by 1 row. Then, place 1 white 2x2 jumper plate on the 2 back rows of the ppp. Continue by placing 1 white cup on top of the ppp.

Group 21 – Yellow Toad’s terrain (continued)

Step 4.2

Place 1 bright pink 2x2 jumper plate in front of the ppp.

4.3 Place the corner of 1 white 2x2 tile with black scribbles and a red Bowser head seal (which represents a letter from Bowser stating that Lakitu kidnapped Yellow Toad) on top of the ppp. Its exact orientation is not important.

Step 5

Yellow Toad’s terrain is complete. If you wish, you can place his couch behind the table.

Thank you so much for building this set! Assemble your own course by placing the different elements as you wish. The goal is that Interactive Peach should start at the pipe, save Yellow Toad, and end at the flagpole. Have fun with Interactive Peach going through the course!

At the end of the instructions, you will find a page with a picture of the Interactive Peach figure. Above her, the text “MAKE SURE TO UPDATE YOUR INTERACTIVE FIGURE IN THE LEGO SUPER MARIO APP TO BE READY TO PLAY” inside a yellow rectangle with rounded corners. On the right side of the page, the text is displayed in several different languages. On the bottom, there is a link to a trouble shooting website: [https://www.lego.com/super-mario-trouble-shooting-guide]. The next two pages advertise the functionality of play with two interactive figures: Interactive Peach with Interactive Mario or Interactive Peach with Interactive Luigi. Afterwards, the next 2 pages advertise 10 other sets from the theme: 71428 (Yoshis' Egg-cellent Forest Expansion Set), 71429 (Nabbit at Toad's Shop Expansion Set), 71430 (Penguin Family Snow Adventure Expansion Set), 71431 (Bowser's Muscle Car Expansion Set), 71432 (Dorrie's Sunken Shipwreck Adventure Expansion Set), 71433 (Goombas' Playground), 71434 (Soda Jungle Maker Set), 71435 (Battle with Roy at Peach's Castle), 71436 (King Boo's Haunted Mansion), and 71437 (The Bowser Express Train). Afterwards, you will find warning text in different languages about batteries and how to dispose of them, the set inventory, and on the last page you will find an invitation to share feedback.

Congratulations on finishing your build! Would you like to inspire other blind people to build LEGO sets? Let’s feature your build on our Builders page. It’s easy and we will do all the work! Just contact us at info@bricksfortheblind.org and together we will make it happen!

We hope you enjoyed building your LEGO set! Bricks for the Blind is able to create these text-based building instructions thanks to generous donations from our builders. If you enjoy the instructions we create, please consider making a $5 donation at: https://www.gofundme.com/f/bricks-for-the-blind-gofundme.
Bricks for the Blind is a registered tax exempt 501(c)(3) corporation.
